The provisions and requirements stated in the Goshen College catalog are not to be considered as an irrevocable contract between the student and the college. The college reserves the right to make changes that it deems necessary, including course and program changes and cancellations. The online version of the catalog will be updated periodically to reflect such changes. The responsibility for understanding and meeting the graduation requirements published in the Goshen College catalog rests entirely with the student.

The mission of the college

Mission statement

Goshen College is a four-year liberal arts college dedicated to the development of informed, articulate, sensitive, responsible Christians. As a ministry of the Mennonite Church, we seek to integrate Christian values with educational, social and professional life. As a community of faith and learning, we strive to foster personal, intellectual, spiritual and social growth in every person. We view education as a moral activity that produces servant-leaders for the church and the world.

Educational mission and core values

At Goshen College we intend to create a community of faith and learning built on five core values: Christ-centeredness, passionate learning, servant leadership, compassionate peacemaking and global citizenship. In our academic program and campus life students will develop the knowledge, skills and values for:

- A life that is Christ-centered, with
  - a reflective faith that nurtures spiritual growth in individual and corporate contexts.
  - an active faith that informs an individual’s experience and choices in all aspects of life.
- A life of passionate learning, through
  - the mastery of a major field of study as the basis for life-long learning, service, relationships and work in a socially and culturally diverse context.
  - an extensive foundation of knowledge, skills and dispositions derived from a liberal arts curriculum that inform an appreciation for and critical understanding of human experience and cultural variety.
- A life of servant leadership, based on
  - a leadership ability that empowers self and others.
  - a healthy understanding of self and others that is reflected in relationships of interdependence and mutual accountability.
- A life of compassionate peacemaking with
  - a personal integrity that fosters the ability to resolve conflict and to promote justice.
  - a commitment to diversity in all of its forms both conceptually and in practice.
- A life of global citizenship with
  - an intercultural openness with the ability to function effectively with people of other worldviews.
  - a responsible understanding of stewardship for human systems and the environment in a multicultural world.

Liberal arts tradition and Christian context

Goshen College is nationally recognized for its excellent academic program and Christian ideals. As a Christian liberal arts college, Goshen draws on the best from both streams. The basic question that drives all liberal arts inquiry is “What is truth?” Different approaches, such as historical, scientific, aesthetic or linguistic, contribute different perspectives of truth.

Because Goshen College is a Christian college, theological and spiritual approaches to truth are highly valued as well. When students learn multiple ways of knowing and alternative modes of problem-solving, they have a more complete view of the world.

Together, the Goshen College community searches for knowledge and meaning, new and old. It is a liberating search that leads us to delight in the awesome mystery of life and celebrate the unique gifts and passions that God has created in each person. A Christian liberal arts education is education for life vocation, not just preparation for employment.

Historic church relationship, open to all

Goshen College was established in 1894 and is affiliated with Mennonite Church USA, a Christian denomination that grew out of the 16th-century Anabaptist movement in northern Europe. With the Friends (Quakers) and the Church of the Brethren, Mennonites are one of the three historic peace churches in the U.S. From the church in which it is rooted, Goshen College has derived a spirit of peace and simplicity, mutual support and biblically based service to those in need.

Around 55 percent of students and 80 percent of faculty members are Mennonite affiliated. Other students come from about 30 different Christian denominations and several world religions. The largest groups are Catholic, Methodist and Church of the Brethren. All faculty members are active Christians, and more than half have lived or worked outside the United States, often in church-related mission or service work. Students are not required to be Christians to attend Goshen, but must be willing to accept and live by the Goshen College commitment to community standards. All who are willing to search for truth with integrity are welcome.

Facilities and resources

The Goshen College campus comprises 135 acres and 19 major buildings and is located at the south side of Goshen, Ind., population 30,000. General classroom facilities and faculty offices are located in 10 buildings – Administration, Church-Chapel, Good Library, Music Center, Newcomer Center, Roman Gingerich Recreation-Fitness Center, Science Hall, Umble Center, Visual Arts and Wyse Hall. Special departmental facilities are provided for radio and video production, studio art, computer work and scientific research. The following facilities and resources are especially noteworthy:

Music Center: Opened in 2002, this beautiful new award-winning facility has excellent acoustics and contains the 1,000-seat Sauder Concert Hall, 300-seat Rieth Recital Hall, rehearsal rooms, classrooms, practice rooms, offices, the Community School of the Arts and the Hershberger Art Gallery, which features rotating exhibits by guest artists, faculty and students.
Roman Gingerich Recreation-Fitness Center. Opened in 1994, the multi-use recreation-fitness facility includes three basketball courts, a swimming pool, jogging track, racquetball courts, weight room, climbing wall, classrooms, laboratories, an athletic training room and office space for the campus Wellness and Health Center and the physical education department. Surrounding the building are a lighted soccer field and bleachers, with adjacent practice field, baseball and softball fields and Eigsti Track and Field Complex completed in 2001.

Information Technology Services. ITS provides the high quality technology environment required by a modern college curriculum – and one that is continuously improving. All student lab computers are upgraded regularly (annually in most cases). Recent upgrades included 64 bit computers, flat screen monitors and DVD burners. The student to computer ratio in labs is 7.6 to 1, and both Macintosh and PC computers are available. Students who own their own computers can easily connect them to the campus network because all residence halls are networked, there is an extensive on-campus wireless network and free dial-up service is available for commuting students. Students have access to a full complement of network services, all accessible via a single, personal user ID and password. Students have access to over 500 MB of personal network storage accessible from any computer on campus. All classrooms have network connections and major classrooms have multimedia and computer projection capabilities. The ITS Help Desk provides students on- and off-campus with tech support. Schertz Computing Center is open 24 hours, seven days a week. ITS also holds special Install Fair events to help get student computers configured for use from home or residence hall room. For more information about technology at GC, see the ITS Web page at www.goshen.edu/its/.

Science Hall and Schrock Annex. With updates and the annex completed in 1992, this facility provides modern laboratory and research facilities for biology, chemistry, physics and mathematics. Special research facilities are:

• Turner Laboratory. Established through a gift from the Basil S. Turner Foundation, the endowed laboratory is a center for research in X-ray crystallography. Experimental and theoretical investigation of semiconductor crystals, surface films and novel heterostructures are conducted with a unique collection of computer controlled X-ray spectrometers. Undergraduate students are actively involved in cooperative research projects with Bell Telephone Laboratories, CTS Corporation and the University of Notre Dame.

• Biology Research Laboratory. The research laboratory has been the center of basic research in genetics and cell biology since 1964. An electron microscope is used both in research and teaching. The laboratory includes numerous additional items of equipment related to basic research in genetics and cell biology.

Multicultural Affairs Office. Established in 1992, this office supports the infusion of multicultural topics and resources into the curriculum. It also helps in recruiting and retaining of faculty, staff and students from underrepresented groups and offers special events.

Good Library. As a research and information center, the Harold and Wilma Good Library connects the campus to ideas and information in a variety of formats. In addition to over 130,000 print sources, the library maintains a video/DVD collection and serves as the gateway to extensive online resources, including scholarly databases, digital journals and electronic books. Collection strengths include peace studies, curriculum materials, and the J. D. Hartzler Music Collection of early American hymnody. Librarians are available for one-on-one assistance throughout much of the day and evening and also offer group instruction. A Web catalog indexes the collections of the Good Library, the Mennonite Historical Library, and 25 other Indiana college libraries. Interlibrary loans provide access to print materials in most North American libraries. Library facilities include a computer lab/classroom, vending and lounge areas, plenty of study space, a reservable meeting room, listening/viewing stations, a periodicals reading room and a gallery which typically features historical and cultural exhibits.

Mennonite Historical Library. The Mennonite Historical Library, housed on the third floor of the Good Library, contains more than 65,000 volumes, an unrivaled collection of published works by and about Anabaptists, Mennonites and related groups (Amish, Hutterites, etc). Resources also include substantial source materials on the Protestant Reformation, local and family history and Pennsylvania Dutch culture.

Laboratory Kindergarten and Campus Center for Young Children. Since 1959, an innovative laboratory kindergarten has been operated on campus. Established in 1998, the Campus Center for Young Children offers quality childcare services for children of students, faculty, staff and community members. Both facilities provide students with opportunities for observation and practicum experiences.

Umble Center. An award-winning building in the center of campus, the John S. Umble Center features an excellent 400-seat theater. Lighting and sound systems were upgraded in 2002.

Merry Lea Environmental Learning Center. The Merry Lea Environmental Learning Center is a 1,150-acre complex of fields, forest, bogs and meadow located 30 miles south of the campus. Opportunities are available for field research in natural sciences as well as teaching internships in outdoor education. Facilities include an environmental-education building that houses a classroom, offices and library, a Farmstead with a renovated barn with meeting space for 65 people, a pavilion, and some housing with overnight accommodations. The first phase of a set of “green” collegiate laboratory/residence buildings will be completed by March 2006. Merry Lea offers undergraduate courses in environmental science and education. Plans are to begin offering a master’s degree program in environmental education in July 2007.

Marine Biology Laboratory in Layton, Fla. A housing-laboratory building in the Florida Keys provides a permanent resource for the marine biology program that has been a unique part of Goshen College since 1966. The facility houses 18 students during an intensive May term experience in marine biology and is used at other times by several other colleges and universities.

Residence Life. Newly renovated residence halls Kratz, Miller and Yoder are joined together with the KMY Connector complex, which offers a new game room, large laundry facility, full ADA access, student lounges, computer study spaces and a new student run coffee bar, the Java Junction. Newly constructed senior apartments offer housing with fully equipped kitchens, private bedrooms, the option to sign up for cable TV and many other amenities. More than a dozen small group housing units continue to offer an alternative to students who want to live in a small setting with a select group of friends.

Spiritual development resources. On the lower level of the junior-senior dorm, Coffman Hall, is the Quiet Place, with space for individual or group prayers and meetings with spiritual directors. For warmer weather, an outdoor labyrinth was established as an additional option for a space of quiet reflection and contemplation. It is located on the lawn north of East Hall.
Student Life – activities and services

Goshen College helps students grow toward intellectual, social, moral and spiritual maturity. The college offers a high-quality education in the context of a community of Christian scholars, but learning extends beyond traditional “academic” boundaries. Students ponder questions such as:

“How can my education best be used to serve others?”
“How can I become an effective leader?”
“What should a Christian lifestyle look like?”
“Where is the balance between individual freedom and community responsibility?”

A variety of activities and services help students to explore their individual potential and develop relationships with others, including opportunities for service and experiential learning.

Spiritual life

Goshen College encourages growth in faith through worship, Christian community and service. The campus ministries office offers both support for students’ faith journeys and challenges to new discoveries in spiritual life. While Goshen is a Christian college rooted in the Mennonite Church USA we welcome seekers and people of all faiths to attend campus spiritual life activities.

Worship opportunities include chapel services every week, a variety of worship groups that meet throughout the week, and Sunday morning involvement in local congregations. Worship groups meeting during the week include a Fellowship of Christian Athletes chapter, Voices-n-Harmony Gospel Choir, Taizé worship and student-led contemporary worship. Christian community sustains students through friendships and in small groups organized by campus ministries that meet for prayer, Bible study, accountability and sharing. Residence hall floors also plan spiritual life programming.

Service projects of many kinds allow students to reach beyond themselves and the campus to show concern for needs of the world. Types of service include the Big Brother/Big Sister program, tutoring, Habitat for Humanity, working with the elderly, housing rehab and collecting supplies to be sent for world relief. During midterm breaks, groups of students travel to service locations. Celebrate Service Day, held annually in September, encourages service in the local community. The international Study-Service Term (SST) and many classes also include service-learning activities.

Convocations and chapels

Convocations and chapel services gather the campus community to focus on themes that connect with our personal lives and also to the world at and beyond Goshen College. Chapel services foster Christian worship and faith exploration. They may include guest speakers, faculty faith stories, hymn sings, or student presentations. Convocations are learning experiences that promote the mission and core values of Goshen College. They may include faculty speakers, guest lecturers, drama or music performances, or student presentations by clubs or Study-Service Term units.

Attendance requirements for convocation and chapel are publicized at the beginning of each semester.

Goshen College commitment to community standards

A spirit of hospitality

Goshen College is dedicated to fostering a spirit of hospitality on our campus, including all students, faculty and staff and college guests, as part of maintaining a healthy living and learning community. We welcome all students as God’s creation regardless of color, gender, religion, ethnicity or nationality, sexual orientation and social or economic class. In order for a diverse community to thrive, we must recognize our differences and seek understanding and integrity in our relationships. Students and faculty at Goshen College are expected to support an environment of mutual respect and accountability, to care for the personal dignity of others and to have integrity in their conduct and communication.

The spirit of respect and hospitality at Goshen College reflects our character as a Mennonite-Anabaptist liberal arts community of scholarship, teaching, learning and service. We believe that the expression of hospitality is best understood in the life and character of Jesus Christ, who welcomed the Gentile and the Jew, women and men, the poor and the wealthy, the slave and the free, the sick and the healthy. The Mennonite Church promotes a community founded on love and justice in which all persons possess inherent dignity as children of God. Our search for truth and our understanding of complex modern challenges is informed and transformed by the life and teachings of Jesus and the tradition of Anabaptist Christians to be accountable to each other in the context of the church.

Invitation to Christian community

Goshen College is committed to encouraging students in intellectual, social, moral and spiritual growth. Students are invited to engage in a dynamic and life-giving community here and to mature as individuals through respectful relationships in the classroom, the local community, in the broader Christian church and among other cultures. All are expected to demonstrate sensitivity and concern for others’ convictions, perspectives and struggles. Within the context of a Christ-centered community, we seek to become:

- passionate learners;
- global citizens;
- servant leaders; and
- compassionate peacemakers

Expectations

Members of the Goshen College community are expected to demonstrate individual responsibility in showing consideration for the beliefs and feelings of others; abiding by federal, state and local laws; and demonstrating exemplary conduct. When a student’s behavior has direct implications for others and/or the well-being of the campus community, there is cause for community involvement, regardless of where the situation occurs (e.g. home or abroad.)

- **Academic honesty**
  
  As an academic community that expects integrity, we seek for truth and knowledge by requiring intellectual and personal honesty in learning, teaching, research and service. As an academic community of integrity, we uphold personal accountability and take action against wrongdoing. Examples of academic dishonesty include, but are not all inclusive of, the following: plagiarism, cheating on assignments or exams, falsification of data, sabotaging the work of another and aiding in academic dishonesty of another.

- **Alcohol and illegal drug use**
  
  Goshen College considers the use of alcoholic beverages and illegal drugs detrimental to individual and community health. The use of alcohol is illegal for minors, and alcohol and illegal drugs also may create dependencies, invite an unhealthy escapism, waste money and abuse health and take lives, as well as generate behavior offensive to
other people. Goshen College does not consider it possible to have a wholesome campus community if alcoholic beverages and illegal drugs are used. Abstinence may be an effective witness against these practices, which are so widely and indiscriminately condoned in our culture. For these reasons, Goshen College recommends non-use as the most appropriate lifestyle choice. Alcoholic beverages and illegal drugs are prohibited from the campus and all college-related functions. Students will be held responsible for any alcohol, drugs or drug paraphernalia found in their presence.

- **Firearms-fireworks**
  The possession or use of firearms or fireworks is prohibited on campus.

- **Fire and safety equipment**
  Tampering with any fire and safety equipment on campus is unacceptable.

- **Fraud and theft**
  Students are expected to respect the identity and property of others. Examples of fraud or theft include, but are not all inclusive of, the following: dishonesty on timecards, theft of and other misuse of personal or college property.

- **Racism**
  Goshen College creates a social and academic environment where students develop awareness of issues of race, sensitivity to minority populations and intercultural understanding. The campus reflects God’s world: multicultural, multiracial and multiethnic. We believe that racist attitudes and actions do not exemplify the love of Christ, and violate the inclusive intention of the mission of Goshen College.

  Racism is a set of attitudes or beliefs that hold particular racial or ethnic groups superior to others, often resulting in justification of discriminatory treatment or other racist acts. Racism denies the humanity of others and denies the truth that all human beings are made in the image and likeness of God.

  As an institution of the Mennonite Church, Goshen College believes that racism is contrary to Christian theology and is inconsistent with the life and teachings of Christ. Therefore, we will resist the pervasive racism of our society by identifying and confronting its evidence.

- **Sexuality**
  We believe that sexuality is an integral part of our personalities, reflecting who we are as individuals. To care for another person includes honoring and respecting that person as a sexual being. Sexuality cannot be separated from the other dimensions of our lives.

  Sexual discrimination, coercion, exploitation and abuse are detrimental to both relationships and to individual self-esteem; these are also destructive behaviors that violate the caring nature of our community. Goshen College is firmly opposed to sexual discrimination, sexual harassment, sexual exploitation and sexual abuse. We believe the clear intent of New Testament Scripture is to place sexual intercourse within the covenant of marriage.

  The goal of confrontation in these matters, as in all others, will be for well-being, reconciliation, correction, forgiveness and redemption. Our counseling and health-service personnel are available to students wishing to discuss issues regarding sexuality or sexual behavior. These conversations will be held in strict confidence.

- **Tobacco use**
  The use of tobacco imposes a serious and unnecessary burden upon the health of the user and community. It also constitutes a fire hazard in some cases. Use of tobacco in any form is prohibited on campus or at any off-campus official college activity and strongly discouraged elsewhere.

- **Threats of violence**
  The threat of violence against another individual, whether verbal or physical, is unacceptable.

- **Vandalism**
  Any vandalism on campus will be considered offensive behavior. Responsibility for restitution will be expected.

**Serious intent**
While it is difficult to determine a framework of community standards that completely matches the ideals of each individual, clear expression of commonly held expectations is vital to productive, positive life and work together in a diverse campus setting. Every Goshen College student is expected to show serious intent to live according to these standards. Information regarding the disciplinary process is located at www.goshen.edu/aboutgc/community.php and is published in the student handbook distributed each fall.

**Housing**
As a primarily residential campus fostering learning and leadership outside the classroom, policies are in place to encourage single students not living with a family member to join the Goshen College community through on-campus residential programs. Goshen offers a variety of housing options for students who are single, married or have families.

  Three residence halls – Yoder, Kratz and Miller Halls are available to single students of any classification. Each hall is coed, with men and women on different floors. Students typically live in groups of 20-30 per living unit. Leadership is provided by student resident assistants and a resident director.

  Two senior/junior halls – In Coffman and Kulp Halls, first priority is given to single students who are seniors or at least 22 years of age. Second priority is given to juniors or those who are 21 years old.

  Small group housing – available to single students who are seniors, juniors or 20 years of age. Facilities are in small residence hall units or houses for six to 12 students per group. Students form their own group and apply for housing facilities.

  Apartments – New apartments designed for groups of four to six students are available for seniors or those at least 22 years of age. Self selected groups sign up for apartments through student life. See residence life and housing link at www.goshen.edu/oncampus.

  College-owned houses – available primarily for married students and families; located a short walking distance from campus; size of houses range from one to four bedrooms. Contact the physical plant office for additional information.

**Academic Support Center**
The Academic Support Center promotes independent, life-long learning for all students of Goshen College. The ASC assists students with documented disabilities by helping them advocate for themselves and by helping coordinate reasonable academic accommodations with teaching faculty. The ASC trains peer writing mentors and tutors who are available to help all GC students grow as writers and scholars. ASC staff also administers the placement and competency tests.
First-year student program
The colloquium program helps new first-year students adjust to college life academically, socially and spiritually. In this program, ongoing orientation and advising activities are attached to a regular college class. Fall orientation includes several meetings with the colloquium professor and classmates, sessions for parents, placement testing, a worship service and other activities. During the first half of the fall semester, colloquium sessions continue to address college adjustment topics, including how to choose a major. Students do not officially declare a major until near the end of the first semester, or later, whereupon they are assigned an adviser from their major department. Colloquium professors serve as faculty advisers for students in their class during the first semester. In addition, upper-class peer mentors are assigned through Student Life to provide contact and support to first-year students through the fall semester.

Use of motor vehicles
Students must register all motor vehicles to be used on campus at the beginning of each semester during registration check in or anytime at the physical plant. Vehicles must be covered by liability and property damage insurance. Auto registration is available both online and through the physical plant. Tickets are issued for parking, driving or registration violations.

Commuter student program
A commuter student lounge with study rooms, lockers and a kitchenette is available at the south end of the Union building. The Nontraditional/Commuter Student Association holds regular meetings to discuss special interests and concerns of commuting students.

Parents program
The director of the parents program works with the Parent Council, comprised of approximately 35 households, to plan programs and services for parents of students, including Family Weekend (usually the second Saturday in November) and an online newsletter. The program provides avenues for parents to learn about their student’s education and to communicate with administrators and faculty. A Web site especially for parents can be found at www.goshen.edu/parents/.

Activities

Athletics and recreation. Goshen College holds memberships in the National Association of Intercollegiate Athletics and the Mid-Central College Conference. Goshen men compete in baseball, basketball, cross country, golf, soccer, tennis and track and field. Women compete in basketball, cross country, soccer, softball, tennis, track and field and volleyball.

Opportunities for recreational activity are available to all students through the Roman Gingerich Recreation-Fitness Center, the intramural program or outdoor facilities. Over half the student body participates in the intramural program, which schedules one-night tournaments, as well as longer sports seasons of four to six weeks. The Gingerich Center is available for a wide range of walk-in activities. The recreation-fitness staff as well as student leaders organize these events.

Witmer Woods, an 18-acre site near the main campus, is an arboretum of plants native to Indiana and also a recreational area. The woods are named for S.W. Witmer who taught biology and botany at GC from 1915 to 1959. The College Cabin, adjacent to Witmer Woods, is available to students for meetings and recreational activities. A Meditation Garden is located near the College Cabin along the Elkhart River. It is a place for quiet reflection and contemplation.

Music. Students interested in music are invited to audition for music department ensembles, including Chamber Choir, Chorale and Chamber Choir. All members of Chorale and Chamber Choir are also part of the Men’s Chorus and Women’s World Music Choir. The Voices-n-Harmony Gospel Choir is open to all without audition. The choirs perform several on-campus concerts each year and at least one choir tours annually. The orchestra and wind ensemble perform a classic and contemporary symphonic and chamber repertoire on campus concerts. A fully-staged student opera, operetta, or musical is produced on alternate years. In addition to these faculty-directed groups, a variety of student-formed groups seek vocal and instrumental talent for coffeehouses, talent shows and worship teams.

Performing Arts Series. This program brings well-known artists to the campus for public performances. Recent performers include Lincoln Jazz with Wynton Marsalis, Sweet Honey in the Rock, Illrd Tyme Out, Colm Wilkinson, the International Sejong Soloists and Baltimore Consort.

Multicultural affairs
The mission of the multicultural affairs office is to foster intercultural understanding at Goshen College. Through diversity training, curriculum development, recruiting and retention programs, the office promotes an anti-racist campus community. Special events such as the Martin Luther King Jr. Study Day and the celebration of heritage months are designed to increase awareness of the historical and cultural background of underrepresented ethnic populations. Faculty advisers provide academic, social and personal support for multicultural students on campus. Black Student Union, Latino Student Union and International Students Club encourage underrepresented students to negotiate the college experience, become involved in campus activities and develop leadership skills.

Health services
Located in the Roman Gingerich Recreation-Fitness Center, the Wellness and Health Center is a primary health care facility providing both preventive and treatment services to all qualified students. The Wellness and Health Center provides a variety of health education programs and participates in the Campus Wellness Committee. All students are required to carry approved hospital and medical insurance.

Counseling
The Goshen College counseling office provides professional, short-term, on-campus counseling services to students on a free and confidential basis. Services support students’ personal, social and spiritual health, while increasing student’s ability to succeed academically. The counseling office provides individual, couple and group mental health counseling, wellness education, crisis intervention and referral to community providers.

Career guidance and employment
The mission of the career services office is to help students discover their vocation. In collaboration with academic faculty and administrators, the office works to enhance the professional opportunities available to students after graduation, whether that is work, service, or graduate school. A variety of services helps students with all facets of their career planning and post-graduation experience, including career advising, résumé preparation, practice interviews, job search skills, career readiness workshops, job and internship listings, alumni mentors and more. Students who desire on-campus employment should contact this office. An extensive online job bank for both on-campus and off-campus jobs is available from the career services Web page. The office is located in the Administration Building on the first floor (Ad 14), within the student life offices.

Commuter student program
A commuter student lounge with study rooms, lockers and a kitchenette is available at the south end of the Union building. The Nontraditional/Commuter Student Association holds regular meetings to discuss special interests and concerns of commuting students.

Parents program
The director of the parents program works with the Parent Council, comprised of approximately 35 households, to plan programs and services for parents of students, including Family Weekend (usually the second Saturday in November) and an online newsletter. The program provides avenues for parents to learn about their student’s education and to communicate with administrators and faculty. A Web site especially for parents can be found at www.goshen.edu/parents/.

Activities

Athletics and recreation. Goshen College holds memberships in the National Association of Intercollegiate Athletics and the Mid-Central College Conference. Goshen men compete in baseball, basketball, cross country, golf, soccer, tennis and track and field. Women compete in basketball, cross country, soccer, softball, tennis, track and field and volleyball.

Opportunities for recreational activity are available to all students through the Roman Gingerich Recreation-Fitness Center, the intramural program or outdoor facilities. Over half the student body participates in the intramural program, which schedules one-night tournaments, as well as longer sports seasons of four to six weeks. The Gingerich Center is available for a wide range of walk-in activities. The recreation-fitness staff as well as student leaders organize these events.

Witmer Woods, an 18-acre site near the main campus, is an arboretum of plants native to Indiana and also a recreational area. The woods are named for S.W. Witmer who taught biology and botany at GC from 1915 to 1959. The College Cabin, adjacent to Witmer Woods, is available to students for meetings and recreational activities. A Meditation Garden is located near the College Cabin along the Elkhart River. It is a place for quiet reflection and contemplation.

Music. Students interested in music are invited to audition for music department ensembles, including Chamber Choir, Chorale, Orchestra, Wind Ensemble and Lavender Jazz. All members of Chorale and Chamber Choir are also part of the Men’s Chorus and Women’s World Music Choir. The Voices-n-Harmony Gospel Choir is open to all without audition. The choirs perform several on-campus concerts each year and at least one choir tours annually. The orchestra and wind ensemble perform a classic and contemporary symphonic and chamber repertoire on-campus concerts. A fully-staged student opera, operetta, or musical is produced on alternate years. In addition to these faculty-directed groups, a variety of student-formed groups seek vocal and instrumental talent for coffeehouses, talent shows and worship teams.

Performing Arts Series. This program brings well-known artists to the campus for public performances. Recent performers include Lincoln Jazz with Wynton Marsalis, Sweet Honey in the Rock, Illrd Tyme Out, Colm Wilkinson, the International Sejong Soloists and Baltimore Consort.
Public lectures
• The Frank and Betty Jo Yoder Public Affairs Lecture Series brings nationally known speakers to campus to address a variety of current issues. Speakers have included Ray Suarez, Paul Loeb, Peggy Wehmeyer, Dorothy F. Cotton and Kenneth Woodward.
• Martin Luther King Jr. All-Campus Study Day annually brings to campus outstanding civil-rights leaders who share King’s vision for peace and justice. Past speakers have included Yolanda King, Herma Williams, Rev. C.T. Vivian and Vincent Harding.
• The Eric Yake Kenagy Visiting Artist Program annually brings a distinguished visual artist to campus for lectures, workshops and interaction with students. Past artists have included Robert Blackburn, Jaune Quick-to-See Smith and Ursula Von Rydingsvard.
• The S.A. Yoder Memorial Lecture annually brings a distinguished poet, novelist, essayist or humorist to campus. Past guests have included Madeleine L’Engle, Garrison Keillor, Seamus Heaney, Gwendolyn Brooks and Edwidge Danticot.
• The C. Henry Smith Peace Lecture is given annually on a peace-related theme by a faculty member of colleges related to Mennonite churches.
• The Umble Master Class series brings an outstanding educator or practitioner in theater or communication to campus each year for lectures and workshops.
• The Miller-Jeschke Endowment for Science and Religion brings an outstanding scholar to campus each spring for a conference on science and religion.

Student government. The student body is represented by the Student Senate. A four-member cabinet is elected each spring to lead the next year’s Senate of campus group representatives and residence hall representatives. Student Senate appoints members to campus committees where students are actually involved in making decisions side by side with faculty and administrators. The Senate also manages all club funds for various student clubs and organizations.

Student activities. The director of student activities oversees all planning of social and recreation events on campus and advises student organizations with the help of faculty sponsors. The Campus Activities Council (CAC) sponsors a variety of events that include large celebrations like the annual luau, the Kick-Off talent competition each semester, and a number of weekly events such as coffeehouses, Hour After (variety shows), movies and late-night activities.

Service opportunities. Many students regularly participate in tutoring, Habitat for Humanity and a variety of other service organizations. In addition, the campus ministries office coordinates service trips during midterm breaks. Many academic courses include service-learning activities; the Study-Service Term includes six weeks of international service-learning.

Theater. Any student may audition for the two fully staged theater productions each year or any of the numerous student-directed one-acts. Students may also volunteer as costume, light and set construction assistants. Advanced students may design or direct shows, including selected one-acts.

Broadcasting. WGCS, or 91.1 The Globe, is the college radio station. Students serve as station manager and staff members. The station features American roots music, public affairs and religious programs, news and sports. On the air 24 hours a day, The Globe offers students many opportunities for broadcast experience. Students working with GC-TV produce a weekly video magazine called GC Journal distributed via the campus cable system. Both The Globe and GC-TV use state-of-the-art digital equipment.

Publications. Students edit two major publications on campus. The Record, a weekly newspaper, includes news, features, perspectives and photographic coverage of campus events and issues and provides a forum for student, faculty and staff opinion. The Maple Leaf annual yearbook gives an overview of campus life. Both staffs, advised by communication faculty members, use the college’s communication center, a facility equipped with state-of-the-art computers, scanner and laser printer.

Pinchpenny Press. Sponsored by the English department, Pinchpenny Press publishes small volumes of creative writing by students and faculty members. Broadside publishes occasional short pieces of creative writing in signed, limited editions. Editorial committees of students and members of the English department faculty approve manuscripts for each publication series.

Clubs and organizations. A variety of student clubs and organizations are active on the campus. In most cases membership is open to any interested student. New clubs or organizations may be formed with the approval of Student Senate and the student activities office. Students who wish to start a new club or organization should discuss their purposes and goals with the coordinator of student activities. Following is a partial listing of groups that meet currently:
Advocates
AMISH (Association of Midwesterners for Ice and Street Hockey)
Black Student Union
Business Club
Campus Activities Council
Campus Ministries Team
Catholic Student Association
College Republicans
Commuter/Nontraditional Student Club
Eco-Pax
Fellowship of Christian Athletes
Fellowship of Rock Climbers
Fun Club
GC Nursing Students Association
GC Players
Goshen Student Women’s Association (GSWA)
International Student Club
Latino Student Union
Pax
Pre-Medical Club
Social Work Action Association
Student Senate
Student Women’s Advocacy Network (SWAN)
Third Culture Students
Voices-n-Harmony Gospel Choir
Young Americans for Freedom

More information about these groups may be obtained through the Student Senate office located in Student Life.
Admission

First year
Admission counselors work individually with each applicant to ensure sound educational planning. High school courses, grades, test scores, high-school rank, references and personal essay, are all indicators of an individual’s ability to work successfully in college programs; they are important factors in the admission decision.

High school preparation
Graduation from an accredited high school is expected. High school college-prep programs are the best way to prepare for Goshen College. This preparation usually includes the following areas of study and units: English – 4, science – 2-3; foreign language – 2-4; social science and history – 2-3; mathematics – 2-4. Applicants planning to enter the pre-nursing program need to have one unit of high-school chemistry with a grade of “C” or higher, or its college equivalent.

We are interested in you and the promise you represent. Students who enrolled at Goshen College in recent years averaged a high school GPA of 3.55, scored an average of 1155 on the combined SAT (Critical Reading plus Math), 580 on Critical Reading or Writing and 574 on Math, scored an average of 25 on the ACT and ranked in the top 25 percent of their graduating class. If your scores or grade point are lower than these averages, don’t be alarmed; remember these are averages. We strongly encourage you to apply, as we consider each applicant on an individual basis taking into consideration classes, extracurricular activities, recommendations and your personal promise. Students admitted with a Critical Reading score lower than 430 are required to enroll in ENGL 105 Writing Skills Seminar. Applicants who have been home-schooled are welcome to apply. Home-school curricula are evaluated on a case-by-case basis. Applicants who have not completed high school are considered for admission if they have achieved an average score of 500 or above on the General Educational Development (GED) tests.

Home-schooled students
Goshen College welcomes home-schooled students and recognizes the valuable contribution you bring to the diversity of our students. Home-schooled students need to show that they have successfully completed a secondary school education in a home setting and met state law requirements for secondary education. Applicants must submit high school equivalent transcripts with grades or evaluations. If these are not available you can provide curricula for grades 9 through 12. You should also submit either SAT I or ACT scores and write a personal essay as requested of all students in the application form. If no letters of recommendation are available from teachers other than family members, a letter of recommendation from your pastor, employer or close family friend would be acceptable.

SAT I or ACT test scores
All United States and Canadian applicants who want to play intercollegiate sports are asked to take the Scholastic Aptitude Test (SAT I) or the American College Test (ACT). SAT I and ACT tests are given at testing centers several times each year around the world and should be taken in the junior year and/or as early as possible in the senior year. SAT I and ACT scores are not required of students age 24 or older.

Other requirements
The admission department will occasionally ask applicants for additional information or a personal interview before an admission decision is made. Applicants who are denied admission may appeal the decision to the Enrollment Committee.

Learning differences
Students with learning differences who are otherwise qualified for admission to Goshen College must, after being admitted, provide documentation of their specific learning differences in order to receive reasonable accommodation.

Application procedures and fee
Full-time first-year applicants need to provide a completed application form, $25 application fee, high school transcript, SAT I or ACT scores, two personal references and a personal essay. Part-time students do not need to provide a personal reference or SAT/ACT score.

Application deadlines
Early action: Early action is available to students who are completing their senior year in high school and desire to have an admission decision by Dec. 15. Students who complete the application process by Dec. 1 will be notified of their admission decision and their eligibility for merit scholarships by Dec. 15. Students who take advantage of the early action program are encouraged to forward a $200 enrollment deposit by March 1 to establish their housing and registration priority. This is a non-binding program. Enrollment deposits are refundable by written request until May 1.

Regular acceptance: Students are encouraged to apply for admission by Feb. 1 for priority consideration for financial aid. Applications submitted after the Dec. 1 Early Action date will be reviewed on a continuous basis as they are completed. Students will normally be notified of the admission status and merit scholarship eligibility within two weeks of completing the application process. Admitted students must submit the $200 enrollment deposit in order to establish their priority for campus housing placement and to be eligible to register for classes. The $200 enrollment deposit is fully refundable by written request until May 1.

Early enrollment program
The early enrollment program at Goshen College is for area high school juniors and seniors who excel in one or more subject areas and are ready for more advanced study at the college level. The student enrolls part time at GC while maintaining enrollment in high school. The total number of college courses a student takes must be equal to or fewer than the number of high school courses taken during the same period. A separate application is required, and students enroll on a semester-by-semester basis. No financial aid or other tuition discounts are available.

Guest student status
The guest student program is for individuals who wish to take a college course but do not initially intend to seek a degree from Goshen College. Students enrolled in this program may take no more than five hours per semester and will receive no financial aid. A separate application is required, and students enroll on a semester-by-semester basis. Credits earned as a guest student cannot be transferred to another institution unless the student provides high school and college transcripts. A maximum of 15 cumulative hours can be earned in the guest student program. If a student reaches 15 hours and wants to continue taking classes, he or she must complete a regular application for admission. Degree-seeking students will have priority for limited enrollment courses.
Transient students
The transient student program is for students not seeking a degree from Goshen College and currently enrolled at another college. A separate application is required as is a college reference. Transient students can enroll full time or part time at GC.

Transfer students
Requirements for admission. Transfer student applicants need to provide a completed application form, $25 application fee, high school transcript (if you have earned fewer than 24 semester college credits), college transcript(s), personal essay and a transfer reference form, which is completed by the dean of students at the college most recently attended. The application fee is not refundable.

Applicants are expected to be in good standing at the college or university they last attended and to have maintained a 2.50 GPA (out of 4.00) or higher.

Transfer of credits. Students who transfer from nationally or regionally accredited colleges or universities can receive credit on work in which they received a “C” grade or better. Up to 12 hours of credit will be accepted from technical schools. Transfer credit is recorded with the same titles and credit hours as at the previous school. Departmental advisers evaluate courses that are to be considered for meeting requirements for majors, minors and professional programs. All transfer students are expected to meet Goshen College graduation requirements. Course requirements for general education are determined by the registrar.

Hesston College transfers. Goshen College assures the acceptance of the Hesston College associate of arts degree and the associate of science degree and assures the student of junior standing.

Beginning with the Hesston College graduating class of 2003, Goshen College accepts the associate of arts and associate of science degrees as meeting the Goshen College lower level general education requirements. These degrees may meet some upper level requirements and international education requirements. All other competencies, prerequisites and upper level general education requirements must be met on the same basis as any other Goshen College student.

Transfer application deadlines
Early action: Early action is available to students who desire to have an admission decision by Feb. 15. Students who complete the application process by Feb. 1 will be notified of their admission decision and their eligibility for merit scholarships by Feb. 15. The enrollment deposit of $200 is due on or before May 1. Students who take advantage of the early decision program are encouraged to forward a $200 enrollment deposit by March 1 to establish their housing and registration priority. This is a non-binding program. Enrollment deposits are refundable by written request until May 1.

Regular acceptance: Students are encouraged to apply for admission by March 1 for priority consideration for financial aid. Applications submitted after the Feb. 1 early action date will be reviewed on a continuous basis as they are completed. Students will normally be notified of the admission status and merit scholarship eligibility within two weeks of completing the application process. Admitted students must submit the $200 enrollment deposit in order to establish their priority for campus housing placement and to be eligible to register for classes. The $200 enrollment deposit is fully refundable by written request until May 1.

International students
Goshen College has a long tradition of admitting international students who, along with our U.S. students, gain a wider view of the world from this educational exchange. International students comprise about 10 percent of the student body and come from over 30 different countries, bringing with them their values, cultures and perspectives which they share with each other and with the rest of campus for everyone's benefit. When they come to Goshen, international students are especially welcomed by our U.S. students who have had cross-cultural living experiences either on SST or by growing up overseas. So, if you are from outside the United States, we welcome your application to come join us!

Applicants who are not citizens or permanent residents of the United States should complete a special set of application forms. These are available from the admission office and are also available on line at www.goshen.edu. There is an application fee of $25.

International students must meet minimum requirements for admission to a university in their home country. A TOEFL score of 550/213 (paper version/computer version) or an overall Band Score of 6.0 on the IELTS or a grade of “C” or better on the General Certificate of Education (GCE) English exam is required for admission. It is also highly recommended that international students submit SAT I scores with their application for admission. These would be of significant assistance in determining academic scholarships. The SAT exam is given in locations around the world several times a year. Students can get details of when the exam is given and how to apply by contacting the nearest American Embassy or Consulate. Students should also start planning a year in advance of the time they want to attend college to take the required tests like the TOEFL and SAT I exams and to prepare the other required documents for admission and scholarship consideration.

Re-admitted students
Applicants who have formerly been Goshen College students (not continuously enrolled each semester) will complete an abbreviated application form. Readmission is contingent upon approval from accounting, registrar and student life departments.
Academic year: Two semesters plus a May term
In addition to fall and spring semesters, Goshen has a three and one-half week May term that is considered part of the regular school year. Students who are enrolled full time in fall and spring semesters and living in campus housing pay no additional tuition or room and board costs for May term courses on campus. Commencement is held annually between spring semester and May term. Students may enroll for three or four credit hours in a wide range of May term courses offered both on and off campus. In addition, two summer sessions during June and July offer a limited number of courses.

The summer Study-Service Term starts at the beginning of the May term and ends in July. A calendar for the 2006-07 school year is located on the last page of this catalog and is also available online.

Degrees
The Bachelor of Arts is the primary degree awarded by Goshen College. The program that leads to this degree includes general education requirements, a major and electives that can also be used for a second major, one or more minors or to complete professional programs in elementary or secondary education and social work.

The Bachelor of Science in Nursing is a professional degree. Upon completion of the nursing curriculum, graduates take the State Board Examination to become registered nurses. Graduates of associate degree programs are welcome to enter and pursue a modified program.

The Bachelor of Science degree in Organizational Leadership is designed for students with two or more years of college. Classes are offered in the evening by the Goshen College Division of Adult and External Studies program and accommodate adult needs in content and learning style.

Majors and minors
The major is a specified concentration of courses in a department, in addition to designated electives in related departments, which develop expertise in the concepts and skills of a discipline. Many majors offer specialized concentrations, which allow students to tailor a program to their personal interests. Each major includes a departmental or interdisciplinary seminar at the senior level and most include an internship. Majors range in size from 30 credit hours to 60 or more in professional programs.

Minors supplement the major, often emphasizing a special interest, an interdisciplinary approach or vocational skill. They require 18-20 credit hours of study.

A total of 35 minors are offered in:
- Accounting
- American Sign Language
- Anabaptist-Mennonite studies
- Art
- Bible and religion
- Biology
- Business
- Business information systems
- Chemistry
- Communication
- Computer science
- Computer science and applied mathematics
- Elementary education
- English
- Environmental science
- History
- History and investigative skills
- Mathematics
- Molecular biology/Biochemistry
- Music
- Nursing
- Organizational Leadership
- Peace, justice and conflict studies
- Physical education
- Physics
- Psychology
- Social work
- Sociology
- Spanish
- Special education (K-6)
- TESOL (Teaching English to Speakers of Other Languages)
- Theater

An Interdisciplinary major is also offered, usually combining work in three departments.

Additional teacher education programs are available, leading to certification in:
- Business education (5-12)
- English/language arts education (5-12)
- Teaching English as a new language education (K-12)
- Journalism education (5-12)
- Mathematics education (5-12)
- Music education (vocal or instrumental) (K-12)
- Physical education (5-12 or K-12)
- Chemistry education (5-12)
- Life sciences education (5-12)
- Physics education (5-12)
- Social studies education (5-12)
- Spanish education (5-12)
- Theater arts education (5-12)
- Visual arts education (K-12)

Minors supplement the major, often emphasizing a special interest, an interdisciplinary approach or vocational skill. They require 18-20 credit hours of study.

A total of 35 minors are offered in:
- Accounting
- American Sign Language
- Anabaptist-Mennonite studies
- Art
- Bible and religion
- Business
- Business information systems
- Church music
- Communication
- Computer science
- Conflict studies
- Education
- English
- Entrepreneurship
- Environmental science
- Global economics
- Graphic design
- Health
- History
- International studies
- Mathematics
- Multimedia communication
- Music
• Peace and justice studies
• Physical education
• Piano pedagogy
• Psychology
• Social policy
• Sociology/Anthropology
• Spanish
• (TESOL) Teaching English to speakers of other languages
• Theater
• Women's studies
• Writing
• Youth ministry

Details on required courses and sequences for each major and minor appear under departmental headings in the academic programs section of the catalog. Handbooks on professional programs such as nursing or education are available in the appropriate departmental offices.

Declaring a major or minor
Students who wish to declare a major or minor should meet first with the faculty member who is their academic adviser, then notify the registrar's office of their intent. The registrar will begin a plan of study form that is to be filled out by the student's major and/or minor adviser(s).

Certificate programs
Certificate programs are designed for persons with special interests who want to spend one year at Goshen College. These programs are open to high school graduates and other mature adults. Certificate programs are offered in biblical studies, business administration, church music, piano pedagogy and teaching English to speakers of other languages (TESOL). Details of each program are available from the related department or from the registrar's office.

Undergraduate professional programs
Professional programs in education (elementary and secondary), nursing and social work are offered as majors or supplements to majors at Goshen College. Details about these programs are in their department pages in the academic programs section of the catalog.

Pre-professional programs
Certain programs are offered at Goshen College to prepare students for professional study at the graduate level or by transferring to an undergraduate professional program at another school after 1-3 years at Goshen. Pre-professional programs at Goshen College include:

• Pre-Architecture
• Pre-Medicine
• Pre-Dentistry
• Pre-Pharmacy
• Pre-Engineering
• Pre-Physical Therapy
• Pre-Law
• Pre-Seminary
• Pre-Veterinary

Pre-seminary. Goshen College has a close relationship with Associated Mennonite Biblical Seminary, Elkhart, Ind. Students anticipating seminary study are counseled to complete a B.A. degree with a major in Bible and religion, humanities or social sciences. They are also encouraged to join the pre-ministry club, attend the annual spring vocation banquet and participate in a summer Ministry Inquiry Program internship in a congregation.

Pre-medicine, pre-veterinary, pre-physical therapy or pre-dentistry. Since course sequencing is important, any student interested in these programs should consult the pre-medical adviser or advisers in the biology and chemistry departments about course selection. Early in the spring semester of the junior year, the pre-medical adviser, biology professor James Miller, will meet with students interested in applying to professional schools and explain the application and recommendation process. Applications should be sent before the fall of the senior year.

Pre-law. Law schools want students who can think, read and write well and who have some understanding of what shapes human experience. No specific major is required. History and English are good choices, but, depending on student interests, business, communication, Bible and religion or other fields could serve just as well. The most important thing is to select rigorous courses in wide-ranging fields. Alan Weldy, associate professor of business and a practicing attorney, serves as the pre-law adviser. Materials for the Law School Admissions Test (LSAT) and information about law schools and pre-law internships are available in his office.

Professional degree programs completed at other colleges
Each of the programs below involves two or three years of study at Goshen College and the remaining work at a professional school. For several of the professional programs, a B.A. degree can be granted by Goshen College.

Architecture. This is a two degree, or 3-2 program resulting in a B.A. in physics or art from Goshen College and a B.S. in architectural engineering from Washington University in St. Louis, Mo.

Engineering. This is a two degree, or 3-2, program resulting in a B.A. in physics, chemistry or mathematics from Goshen College and a B.S. in engineering from a major university with an accredited engineering program. The student spends the first three years at Goshen and the final two years at the university. For details and requirements, see the program description of the physics and pre-engineering department.

Pharmacy. This program is normally a 2-3 program, with the last three years spent in an accredited college of pharmacy. Pre-pharmacy students take general-education courses and courses in chemistry, biology, physics, mathematics, sociology and psychology. The student should consult the college of pharmacy early in the freshman year to select appropriate courses at Goshen College. This program does not result in a Goshen College degree.

Key to course numbers
Lower level
100 - 199 courses — Primarily for first-year students
200 - 299 courses — Primarily for sophomores
Upper level
300 - 399 courses — Either juniors or senior
400 - 499 courses — Primarily for seniors and graduates

A student may register for courses one year above current classification (for example, a sophomore may register for a 300 course) provided prerequisites have been met.

In general, courses extend through one semester. A hyphen between the numbers of a two-semester course indicates that the first semester is prerequisite to the second semester, as does a “+” sign between the credit hours.

The number of hours stated after the description of each course refers to the number of credit hours granted for successful completion of one semester of the course.

Not all courses listed are offered each year. A list of course offerings
for the two semesters of the next academic year is prepared in April of each year and is available from the dean's office. The college reserves the right to cancel any course if fewer than 10 students enroll or if suitable faculty are not available.

**Special course — all departments**

299/399 Special Studies: (title to be given) . . . . . . . . . . . . 1-6
An all-purpose course for recording credit in topics not contained in regular offerings, often used for independent study or credit by experience. Registration arrangements need to be approved by both the department and the dean's office. The course is open for use in all departments of the college.
General education curriculum

The Goshen College general education program provides a core of common courses and activities for students in every major. Central to Goshen College general education is the Study-Service Term (SST), with its strong emphasis on international, intercultural education. As a Christian liberal arts college, Goshen also gives Bible and religion studies a prominent place in its liberal arts core.

What is a liberal arts education?
At the heart of the liberal arts tradition is the assertion that only an educated person – one who is aware of self and of the other; one capable of independent discernment, analysis and judgment; one gripped by the quest for truth – can be truly free. The Bible also reflects this notion in Jesus’s words, “You will know the truth, and the truth will make you free.”

The basic question that drives all liberal arts inquiry is “What is truth?” Since different disciplines offer different approaches to the exploration of truth, the general education core at Goshen College gives students courses and experiences in a wide range of disciplines: communication skills, mathematics and natural science, history and social science, physical education, humanities, Bible and religion, and international education. As the Goshen College learning community pursues truth together, our aim is to develop “informed, articulate, sensitive, responsible Christians.”

Summary of general education course requirements

Orientation ............................................ 1
  Colloquium (attached to another course)

Communication skills ................................. 5-6
  Comm 202, Oral Communication (2-3 hours)
  College reading and writing (3 hours)
  Engl 110, Literature and Writing or
  Engl 210, Introduction to Literature

International/intercultural education. .............. 12-13
  Study-Service Term (SST)
  (international or alternate options) 12-13
  Language proficiency through 102-level required (or alternate)
  (See international education pages for details.)

*Nursing students, see nursing department pages.

Bible/religion/philosophy/peace studies .............. 9
  Bible survey course (3 hours)
  Bibl 100, Knowing the Bible or
  Bibl 200, Reading the Bible
  Bible or religion course (3 hours)
  Any additional Bible or religion course (except Greek and
  Hebrew languages)
  Peace/justice/conflict studies or philosophy** course (3 hours)
  Select one:
  Phil 200, Introduction to Philosophy
  Phil 302, Ethics and Morality
  Phil 307, Asian Thought
  PJCS 210, Transforming Conflict and Violence
  PJCS 312, War, Peace and Nonresistance
  PJCS 313, Violence and Nonviolence
  *Nursing students, see nursing department pages.

Mathematics** and natural science .................. 6-8
  Select a course from any two areas**
    Mathematics (3-4 hours)
    Math 100, Mathematical World
    Math 102, Precalculus
    Math 131, Mathematical Concepts for the Elementary Classroom
    Math 141, Finite Mathematics
    Math 205, Discrete Mathematics
    Math 211, Calculus I
    Biological science (3-4 hours)
    Biol 100, Biological World
    Biol 111 or 112, Biological Principles
    Biol 154, Human Biology
    Biol 203, Human Anatomy and Physiology
    Physical science (3-4 hours)
    Chem 100, Chemical World
    Chem 101 or 102, Chemistry and Physics of Life
    Chem 111, General Chemistry
    Phys 100, Physical World
    Phys 154, Descriptive Astronomy
    Phys 203 or 204, General Physics
  **Competency through Math 030 required

History and social science ........................... 6
  History (3 hours) Select one:
    Hist 100, Human Stories
    Hist 101 or 203, World History I or II
    Hist 102, European History
    Hist 105 or 202, American History I or II
  Social science (3 hours) Select one:
    Econ 201 or 202, Principles of Economics
    PoSc 200, Introduction to Political Science
    Psyc 100, General Psychology
    Soc 200, Principles of Sociology
    Soc 220, Human Origins, Human Nature

Physical education .................................... 1
  PhEd 100, Wellness (1 hour)

Humanities (select one) ............................... 4
  Hum 220, Humanities: Literature and Art
  Hum 221, Humanities: Literature and Music
  Hum 222, Humanities: Theater and Literature
  Hum 223, Humanities: Music and Art
  Hum 224, Humanities: Music and Theater
  Hum 225, Humanities: Art and Theater

TOTAL Credit hours ................................. 44-48

Special features in the senior year
Students in nearly every major participate in an internship during the senior year in which they apply academic learning to practical problem-solving or a position of employment. In addition, seniors enroll in a senior seminar appropriate to their major. Senior seminars integrate and synthesize learning from students’ entire college experience and guide them in exploring future vocations. Senior seminars also address ethical issues in the major field from a Christian perspective and sometimes include a major research project.
Descriptions of courses and areas of study in the
general education curriculum

Colloquium
All first-time first-year students enroll in a colloquium course in the fall semester at Goshen College. Colloquium, a one-credit-hour course attached to another 1-4 credit course, is a set of activities that introduces students to academic life. Most of the courses with colloquium attachments meet a general education core requirement. Class size is limited to 20-22 students, giving them close contact with a small group of other students and the professor.

Colloquium students learn about the resources and values of Goshen College, process the changes that happen at college and find encouragement to grow socially, spiritually, psychologically and academically. The colloquium class introduces competency requirements in information literacy and begins to document students' academic learning. The colloquium professor serves as academic adviser to students in the colloquium class for the first semester at Goshen College. Required of all transfer students with fewer than 15 credits of college courses.

Communication skills
Courses in this area build a solid foundation in reading, writing, speaking and thinking skills to be used throughout students' academic careers. Close, careful reading and effective speaking and writing are essential skills for academic success. The English classes include readings in classical and contemporary literature and writing instruction. Most students will select Engl 110. Engl 210 is for students with SAT verbal scores of at least 630 or ACT English scores of at least 28 or for students who have earned AP or CLEP credit, but desire a stronger foundation in college-level reading and writing. The oral communication class involves practical speaking experiences from public speaking to interpersonal communication. Attention is given to communicating in a culturally diverse society. These courses also develop critical thinking skills.

International/Intercultural education
The core requirement in international/intercultural education provides students with an opportunity to learn about the values and assumptions of their own and other cultures. Most students choose to meet this requirement by participating in the unique Study-Service Term, or SST program.

SST is a full semester of international service learning in a country significantly different from the United States. Groups average about 20 students and are led by a Goshen College professor. Students live with host families and study the language and culture of the host country in a large city during the first half of the semester. Much experiential learning occurs as students scatter to outlying locations during the second half of the term. Current SST countries include the Dominican Republic, Germany, Ethiopia, China, Peru and Senegal.

This core general education requirement may also be met through alternate intercultural study that combines academic coursework and experiential learning. A full year of BCA meets the SST requirement. (See an expanded description of both SST and other alternatives in the international education section of the catalog.)

Study-Service Term abroad (13 credits)
Requires the following language proficiency as a prerequisite:
- French, German and Spanish SST units – 102-level in the language of the country;
- Other units – one elementary language course in the language of the country and either one course from the list of prerequisite courses in the international education pages or other foreign language competency at the 101-level or higher.

Alternate SST (12 credits)
Requires one of the following ways to demonstrate language proficiency
- 102-level language proficiency or
- Comm 206, Communicating Across Cultures and 101-level language proficiency or
- two 101-level language courses in addition, students select 12 credits of courses from the approved list in the international education section of the catalog.

Bible/religion/philosophy/peace studies
Because Goshen College considers biblical literacy to be a foundational requirement for a well-rounded education, all students take a Bible survey course, either Bible 100 (for students with little or no past experience with the Bible) or Bible 200 (for students who are already familiar with biblical stories and concepts). For course descriptions, see the Bible, religion and philosophy department pages of this catalog. Placement tests are available at the beginning of each semester to help uncertain students determine which level is most appropriate for them.

In addition to a Bible survey course, all students select one more Bible or religion class of their choice. Also, all students select at least one of the philosophy or peace/justice/conflict studies classes in the list of general education courses. Each of these courses broadens the knowledge base and cultivates critical thinking skills in students as they face both current and perennial issues.

Mathematics and natural science
The core requirement in natural science is designed to help students understand the scientific approach to the pursuit of knowledge and the nature of the scientific community. Courses include laboratory experiences as well as classroom instruction.

Since the ability to think quantitatively and reason accurately from data is a fundamental skill for every educated person, all students must meet a mathematics competency requirement. Students who do not meet the minimum competency requirement must pass Math 030 before taking mathematics or natural science general education courses.

All students choose at least one course from two of the three areas in the list of general education courses.

Note: The preferred mathematics course for students who do not have a mathematics requirement in their major is Math 100. Also, Biol 112 and Phys 204 may be taken without Biol 111 or Phys 203 as prerequisites.

History and social science
Historical study reveals the roots of modern civilization. History is a form of inquiry and a way of knowing both the world and one's place in it. The social science core requirement allows students to become familiar with at least one approach to understanding human behavior in the context of contemporary society.

Students select at least one of the history courses and at least one of the social science courses in the general education list.

Physical education
Everyone has both the challenge and the opportunity to improve and preserve health in body, mind and spirit. Toward this end, all students take PhD 100, Wellness as part of the general education core. This course explores wellness in many dimensions: physical, mental and spiritual. It is taught in the physical education department in collaboration with student life professionals.
Humanities

The humanities – art, music, literature, theater and other fine arts – have long been a central part of a liberal arts education because they offer both an expression of and an inquiry into human experience. These interdisciplinary courses give students an opportunity to study the history of artistic expression while participating in artistic activities and examining the relationship between the arts and their own lives. Students select one humanities course from the general education list. Two or three courses will be offered each year.

International education program

Director and International Education Adviser, Associate Dean T. Meyers

Goshen College is involved in several types of international education activity. First, there are offerings to fulfill the general education requirement of a Study-Service Term (SST) or its equivalent (Sections I and II). Second are a variety of other overseas educational opportunities offered by Goshen College or other organizations with whom we cooperate (Sections III and IV). The third type of activity is the international student program directed by Student Life.

I. The Study-Service Term (SST)

A. Program

SST is a program designed to immerse students for one term in a culture significantly different from that of the United States. Its goals for each student are to develop intercultural openness, communication in a variety of forms, thinking that is active and reflective, and understanding of self and others. Spanish SST units are offered in the Caribbean and South America. Currently, units also operate in Germany, China, Ethiopia and Senegal.

Students choose a language area for SST in consultation with their academic adviser and spend one term in a location of that language, preferably during the sophomore year. Students are urged to plan and sign up for SST participation upon entering college because spaces are limited.

At each location, Goshen faculty leaders arrange the academic program and give personal counsel to a group of up to 23 students.

The first six weeks of the term are spent studying the language and culture of the host country. The faculty leader uses local resources to support a largely experience-based learning program: home stays, lectures, discussion, field trips, journal writing, readings, special projects and examinations. Library resources, although somewhat limited, are available at each unit.

During the last six weeks of the term, students work in a field/service-learning assignment, usually in a rural area. Throughout the term, students live in homes of the host country and eat at least two meals daily with their "families."

Participation in SST is an educational privilege for those whose recent performance suggests that they are ready for the special challenge of SST. A screening process reviews the health and the academic and behavioral performance of all SST applicants throughout the preparation process until departure. On location, all SSTers are expected to follow both the standards of the college and the guidelines more specific to the norms of the host culture and host family.

Student fees in the Caribbean area, including travel costs, are the same as for a semester's tuition, room and board on campus. Units in other locations involve extra cost.

B. Credit

The student normally receives 13 credit hours for the Study-Service Term, distributed as follows:

- Language .................................................. 4
- Intercultural communication .......................... 3
- History and Culture of (Country) .................... 3
- Arts and Literature of (Country) ................... 2
- The Natural World of (Country) ........................ 1

Additional credit in foreign language may be awarded when testing shows unusual progress.

C. Evaluation

In addition to a letter grade, the faculty leader will complete an academic evaluation sheet summarizing the unit activities and the individual student's performance. This becomes part of the student's academic record, for release by request of the student or transcript recipient.
D. Prerequisites for SST

1. Students participating in French, German or Spanish units need to establish 102-level competency (by course or test) in the language of the country.

2. Students participating in any other foreign language unit will complete one elementary course in that language, offered on campus especially for that SST group prior to departure, and one course selected from any other language or from among any of the following:

   - Bus 350, International Business
   - Comm 206, Communicating Across Cultures
   - Econ 306, International Economics
   - Econ 308, Introduction to Economic Development
   - Engl 201, Postcolonial Literature
   - Engl 310, Introduction to Linguistics
   - MCLL 300, International Classics
   - Hist 240, World Geography
   - Hist 255, History of Global Poverty
   - Hist/WoSt 330, International Women's History
   - Hist 335, History of Ethnic Conflict
   - Hist 350, African History
   - PoSc 308, International Politics
   - Phil 307, Asian Thought
   - Rel 317, Islam & Judaism
   - Soc 230, Cultural Anthropology
   - Soc 330, Family and Kinship Across Cultures
   - Soc 334, Race, Class and Ethnic Relations
   - Soc 340, African Societies and Cultures

Whenever possible students should elect a course from the specific region of their SST unit.

3. Students are responsible for completing these essential prerequisites prior to SST. The director of international education must approve any exceptions.

E. Minor in international studies

Program director and adviser: Associate Dean T. Meyers, International Education Office

SST is the core and the prerequisite for this minor. Its goal is to integrate international study experience with campus experience, to link SST with academic interests, and to enhance career planning. The international studies minor gives formal credentials to the very attractive international dimension of education at Goshen College.

Requirements*

Language prerequisite for SST .............................. 8 credits (or proficiency)
The 13th hour of SST (only 12 credits required for general education) . 1 credit
Any three approved “SST alternate” courses
(see course list below) 9 credits Total .............................. 10-18 credits

*Notes: This minor is available only to students who have had SST or an equivalent semester of study abroad.

For students with SST in Ethiopia, China, or Indonesia, the alternate SST prerequisites may be used.

The course work is recommended for after SST, but courses taken before SST do apply.

The three “SST alternate” courses may not overlap with requirements in any major or any other minor.

II. Alternate ways to achieve Goshen College’s international education goals

A. Approved study-abroad programs

The approved study-abroad programs described in Section IV may be used toward the alternative to the SST, if they are in a foreign language location. Students may receive SST alternate credit for language courses at the 200-level or higher in an approved study abroad program. If the student has already met the SST prerequisite, 100-level language study may also count as an alternate. Approval must be granted by the director of international education.

B. Other international and cross-cultural options

This program is designed for those whose needs call for an experience different from the full three-month SST unit abroad. While immersion in another culture through SST comes nearest to our ideal for an integrative experience in international education for most students, we intend other options to promote the same learning outcomes as SST. Through courses on the Goshen campus, experiences and resources in the surrounding community, and where possible participation in shorter seminars abroad, this program includes a serious study in culture, encourages an interdisciplinary service learning component and invites an integrative activity to bring the various components into a meaningful whole. Required are:

A prerequisite: Two units of foreign language and culture which may be completed in any one of the following ways: a) 102-level course or competency in any foreign language, b) 101-level language plus Comm 206 or c) two 101-level courses in any foreign language (or equivalent).

Twelve credit hours in courses selected from the list of “SST alternate” courses below. These courses may not also count toward major, minor or other general education requirements. With assistance from advisers, students are encouraged to plan an integrated program to meet particular educational goals rather than to select courses based on random interest.

The following list of international studies courses may be supplemented with one-time courses approved by the dean and the director of international education. Some courses are offered in alternate years.

- ASL 104, American Deaf Culture
- Bus 350, International Business
- Bus 375, Business in Spain
- Comm 206, Communicating Across Cultures
- Econ 306, International Economics
- Econ 308, Introduction to Economic Development
- Engl 201, Postcolonial Literature
- Engl 207, 307, Irish Literature in Ireland, African-American Literature or American Indian Literature
- Engl 310, Introduction to Linguistics
- MCLL 300, International Classics
- Any 300-level Spanish literature course
- Hist 240, World Geography
- Hist 255, History of Global Poverty
- Hist/WoSt 330, International Women's History
- Hist 335, History of Ethnic Conflict
- Hist 344, Latin American History
- Hist 350, African History
- Hist 375, History of the Southwest
- Intl 250/350, Intercultural Service-Learning (see description below)
- PJCS 320, Borderlands
- PJCS 430, Healing the Wounds of Violence
- PoSc 308, International Politics
- PoSc 318, Latin American Politics
Phil 307, Asian Thought
Rel/Soc 315, Religion in Culture and Society
Rel 317, Islam and Judaism
Rel/Soc 319, Doing Theology Abroad
Rel/PJCS 316, Liberation Theologies
Soc 220, Human Origins/Human Nature
Soc 230, Cultural Anthropology
Soc 330, Family and Kinship Across Cultures
Soc 334, Race, Class and Ethnic Relations
Soc 336, Latin American Societies and Cultures
Soc 340, African Societies and Cultures
Soc 342, Native American Societies and Cultures

B.S. Nursing students who desire an alternative to the SST program should see the nursing department information in this catalog for a modification of the above requirements.

Intl 250, 350 Intercultural Service-Learning . . . . . . . . . . . . . . . . .1-6
A field assignment in an intercultural setting through an approved voluntary-service agency. Arranged by the student with the international education director and faculty adviser.

C. Modified program for students with other intercultural experience
Although most North American students who have considerable intercultural experience participate in SST, some may qualify for a reduced international education requirement. Students must meet one of the following requirements:
1. Live in another country outside the United States or Canada at least six months after completing high school.
2. Live in another country outside the United States or Canada for at least two years after the age of 12.
3. Participate in an organized service program operated by a church or service agency in a cultural group significantly different from one's own, for a period of at least six months.

If ANY one of the above conditions is met, the student must then:
1. Meet the standard language prerequisite to SST (See above).
2. Earn six credit hours in international-studies courses from the above options. Three hours of language learned in a foreign country may count as part of the six hours.

D. Exemption from SST
1. Students who have had significant intercultural experience throughout their life prior to enrolling at Goshen College may be exempt from SST. These students will be assessed on a case by case basis by the director of international education.

2. Studying in the United States meets the international education requirement for international students, though they are encouraged to seek service experience in this country. They may participate in SST, but any GC grants to international students may not be applied to SST.

III. Other study abroad options with Goshen College
During the May term or summer, Goshen College may offer special courses abroad. Locations vary, but in the past they have operated in England, Ireland, Italy, Spain, the Middle East, Colombia, Guatemala and Peru.

Credits may be earned in several areas, among them language, history, literature and peace studies. Some credits may apply as international study options (II-B).
The department of collegiate studies has three tasks: (1) to help students adjust to academic life at the college level; (2) to help students select courses, majors and minors so that they can make progress toward a degree; and (3) to provide career counseling for all students.

All Goshen College faculty members have an interest in this department because students’ success at Goshen College depends at least in part on their making wise decisions about majors and careers and responding to a sense of vocation.

The department itself offers neither a major nor a minor; instead, it offers these services:

• An academic home for all first-year students during their first semester and for continuing students who are deciders (those students still in the process of selecting a major);
• Coordination of the colloquium program for first-year students during their first semester;
• Academic advising for all deciders;
• Workshops, advising guidelines and career counseling services for all students.

Colloquium
Introduces new college students to the Goshen College learning community. Required of all first-year students when they enter college during the fall semester. Colloquium activities add an extra credit hour to existing courses. See the student life and general education sections for more details.

Courses

DCS 210  Career Exploration  .................................................. 1
An interactive exploration of career decision making. Introduces students to the concepts of career, life planning and vocation through identifying strengths, clarifying values and self-evaluation. Career services director and guest speakers provide information about educational and career options. Lectures and discussion.

DCS 300  Colloquium Assistant Leadership  .......................... 1
Leadership training for colloquium assistants who serve as an assistant to one colloquium professor during the fall semester program for first-year students. Responsibilities include assisting in orientation activities, planning events and conducting interviews.

Division of Adult and External Studies (DAES)

Director, M. Moretto

Mission
The Division of Adult and External Studies offers quality education designed for adult learners. It reflects the distinctive standards of academic excellence, in a friendly environment of professional support, that characterizes Goshen College.

Faculty
Organizational Leadership Program faculty members are full-time professors at Goshen College or adjunct professors from local businesses who teach in their area of expertise. For nursing faculty, see nursing department pages.

Degree completion programs
Degree completion programs are designed for adult learners who are working full time. Classes meet once a week in evening hours. Students must have three to five years significant life or work experience, at least 60 semester hours already completed, demonstrate mastery of basic computer skills, provide a satisfactory writing sample, references and have a C average in all prior work.

Students graduating in this department must earn 120 semester hours with a 2.0 grade point average on courses completed at Goshen College. General education requirements must be completed as follows: English composition (3), literature/fine arts/foreign language (3), natural science (3), social science (3) and history (3). In addition, students must show evidence of competency in four areas: computer usage (basic knowledge, word processing), speech (presentation skills), written communication (effective writing ability) and quantitative skills (basic math skills).

In addition to the 40 hours earned in the core modules/classes, students may earn up to 30 additional hours by Credit for Prior Learning. Credits can also be obtained using DANTES and CLEP tests. Goshen College is a test center for both exam programs.

Two different majors are available: B.S. in organizational leadership and B.S. in nursing for persons who have already completed an R.N. program. For more information about the R.N. to B.S.N. program, including specific graduation requirements, see the nursing department pages.

Major in organizational leadership
The Organizational Leadership Program prepares learners to lead effectively within an organization. Through a thoughtful blend of theory and application, learners are able to understand what works — and why. Solid textbooks, experienced faculty, and the formal and informal life experiences of participants enable learners to be challenged to grow as leaders — and as people. Forty semester credits are awarded to those students who successfully complete this program.

Courses

OLP 300  Effective Communication  ..................................... 3
This course develops and enhances general and professional writing skills. Clear, concise, well-edited writing is emphasized. Course content includes selecting appropriate writing formats for specific situations and practicing various writing strategies to promote clear thinking and effective communication. Life-learning essays and professional writing assignments are included in the course requirements. (five weeks)

OLP 301  Individual and Group Dynamics  ............................ 3
This course examines the question: What factors combine to determine
The acquisition, analysis and reporting of financial information is important to the individual leader and the organization. Special attention is given to the planning and control responsibilities of practicing managers. Students gain confidence in their ability to interpret and use financial information for more effective decision making. (five weeks)

OLP 312 Organizational Theory ........................................ 3
Humans are immersed in organizations; to a large extent they form our lives. This course introduces the history of organizational development and examines how and why organizations change. It covers organizational task goals of planning, organizing and control. (five weeks)

OLP 401 Organizational Cultures ................................. 3
This course introduces the concept that organizational culture is the sum total of the written and unwritten assumptions that an organization has learned and used throughout its history. The role of culture in young corporations, mid-life and mature organizations is considered. Consequences to organizational culture in a time of acquisitions, mergers and joint ventures are examined. (five weeks)

OLP 450 Leadership Project ............................................. 4
This project provides opportunity for students to integrate classroom theory with practical experience by identifying an opportunity to lead through service within an organizational setting – either the student's workplace or a public benefit organization. Students work with a faculty mentor to structure the learning, coordinate with the cooperating organization and assess the level and significance of their learning. The findings or outcomes of the project will be presented on the last two nights of the program schedule. (12 months)

OLP 403 Leadership Theory and Development ............. 3
This course focuses on providing theoretical foundations and conceptual principles for leadership and skills necessary to practice leadership competently. Activities are designed to enhance leadership self-awareness, encourage development of personal perspectives on leadership and prepare students to address leadership challenges. The course reviews historical and current perspectives on leadership and considers how leaders use influence to direct and coordinate the activities of group members. (five weeks)

OLP 307 Managerial Accounting .............................. 3
The acquisition, analysis and reporting of financial information is important to the individual leader and the organization. Special attention is given to the planning and control responsibilities of practicing managers. Students gain confidence in their ability to interpret and use financial information for more effective decision making. (five weeks)

OLP 308 Economic Environment of Organizations .......... 3
This course focuses on the role of prices and markets in the modern, mixed free-enterprise economy. Students consider economic tools needed to better understand economic policy debates and make better choices as leaders. (five weeks)

OLP 309 Leading and Serving in a Multi-Cultural World .... 3
The modern workforce is rapidly becoming a mosaic of colors, languages, cultural traditions and values. This demographic reality poses an immense challenge for both workforce and leaders. The goal of this course is to better understand different cultural values and styles, to recognize one's own biases and assumptions and to value diversity. (five weeks)

OLP 412 Leading and Managing Change ...................... 3
Organizations today function within a dynamic environment marked by rapidly changing technologies, globalization of markets, the "knowledge enterprise" and an increasingly diverse workforce. Leaders of organizations must understand the change process, appropriate responses to change, conflict resolution and how to develop strategies for the future. Rethinking competition, leadership and markets is an essential exercise as leaders search for new paradigms that will govern organizations now and in the future. (five weeks)

OLP 420 Strategic Planning, Action, and Measurement .... 3
This course addresses strategic issues in running a business enterprise. Effective strategy-making and strategy-execution are the key ingredients of company success and the most reliable signs of good leadership. The basic concepts and tools of strategic analysis and business research are presented, utilizing case studies and simulation problems. (five weeks)

OLP 410 Ethical Issues in Leadership and Organizations .... 3
This capstone course considers the responsibilities of both leaders and organizations. Attention is given to three distinct but related themes: the social responsibility of organizations, public policy toward business organizations and leadership ethics. Students are challenged to make ethical analysis a routine part of their decision-making framework. Case studies explore the reality of the multiple, competing claims placed on the leader and the organization. (five weeks)

R.N. to B.S.N. Completion
For more information about the R.N. to B.S.N. completion program, including specific graduation requirements, see the nursing department pages.

RELN 305 Enduring Issues in Christian Perspective ........ 3
Examines the biblical heritage and major doctrines of Christian faith. Explores basic issues such as individualism and community, personal decision-making, social justice and relating to other religious traditions. Class members will be challenged to think through their own responses to these issues. (five weeks)
Special programs

Adult Programs
Bachelor degree programs with majors in organizational leadership and nursing are offered in the evening. For more detailed information, see the Division of Adult and External Studies (DAES) section.

Honors
The academic ethos at Goshen College is rigorous and engaging. An annual Academic Symposium features exemplary student research and writing. Each summer the Maple Scholars program supports numerous student-faculty research partnerships. Although there is no separate honors program at Goshen College, students may earn a bachelor's degree “with honors” if desired. Individual departments have determined requirements for the “honors” designation, as appropriate for each major. Requirements may include items such as a senior thesis, presentation of research at a conference, or the achievement of a certain grade point average. In addition, a Latin Honors system for graduates is described in the Requirements and Procedures section of the catalog.

Goshen College off-campus programs
Goshen College offers many off-campus study options. Off-campus internships are available in nearly every major. Study-Service Terms (see international education section of the catalog) and May term and summer courses in England, Florida and other sites are entirely planned and coordinated by Goshen College. Off-campus May term courses offered by Goshen College in 2004-06 were:
- The Arts in London
- Marine Biology (Florida)
- General Ecology (Merry Lea)
- Ornithology (Merry Lea)
- Field Experience in Environmental Biology (various sites)
- Business in Spain
- Religious Journalism
- Borderlands (Arizona/Mexico)
- Anabaptist History in Europe
- Art Study Tour: France
- History of the Southwest
- Civil Rights Movement Tour
- Camping and Recreation (Boundary Waters, Minnesota)

Peace House in Indianapolis
Goshen collaborates with Earlham and Manchester colleges to offer an urban peacemaking experience. The city of Indianapolis is the classroom. The peace house program combines a living and learning experience with other college students, academic study and an internship at an Indianapolis agency. A 14-week, 15-credit program in fall or spring semester. Summer internships also available. For more information, contact Goshen Plowshares director Dean Johnson or the associate dean or see www.plowsharesproject.org/php/peacehouse/index.php

Other off-campus programs
Many other possibilities for off-campus study exist in cooperation with other colleges and universities. (See list below.) Special arrangements make it possible for students to register for Goshen College credit while participating in these programs. However, since tuition and fees are collected and passed on to the other agencies or colleges, sources of student financial aid and scholarships normally are limited to outside funding such as Pell Grants, state grants, non-Goshen College scholarships and Stafford Loans while enrolled in these programs.

Goshen College tuition discounts, scholarships and direct financial aid can be used only when a sponsored program is required for a student's major and those requirements cannot be fulfilled without the sponsored off-campus experience (Spanish major, e.g.). For Goshen College financial aid to apply to required off-campus study, an application must be submitted and the major must be declared by spring advising days prior to the year of off-campus study.

To obtain information on financial aid, contact the student financial aid office. Academic credits earned in these sponsored off-campus programs are considered residential credits. However, these are not Goshen College programs. Therefore, May-term fees are charged for students who were off-campus in one of these affiliated programs during fall or spring semester.

Au Sable Institute of Environmental Studies offers summer programs in Mancelona, Mich., and other locations. See the biology department pages in this catalog or contact the environmental studies director for more information or see www.ausable.org.

Brethren Colleges Abroad offers academic-year and half-year programs in Europe, Asia and South America. Contact the international education department (SST office) for more information or see www.bcanet.org.

Central American Study and Service (CASAS) in Guatemala offers semester or summer programs in Spanish and Central American studies. Contact www.sal.org or the international education department (SST office) for more information.

Council for Christian Colleges and Universities (CCCU) offers various semester and summer programs. For further information, contact the associate dean or www.bestsemester.com. Semester programs of CCCU include the Los Angeles Film Studies Center. Located near major production studios, the program combines seminar courses with Christian context and a liberal arts perspective. Participation in this program is required for theater and communication majors who elect a film studies concentration.

Council on International Education Exchange offers many academic-year and half-year programs in Europe, Asia and Latin America. Contact the international education department (SST office) for more information or see www.ciee.org.

Lithuania Christian College has summer TESOL internships and semester study opportunities. See the international education department (SST office) or www.lccbc.org for more information.

Oregon Extension, in an old logging camp, offers an interdisciplinary fall semester and a women's studies May term for students from Christian colleges. Contact www.oregonextension.org or the associate dean for more information.

Urban Life Center in Chicago offers semester and short and long summer programs in Socs 302, Urban Diversity and many internship possibilities. Because of special financial arrangements with this program, students who spend the fall or spring semester at Urban Life Center are not charged extra for a May term at Goshen. Contact the associate dean for more information or www.urbanlifecenter.org.
Washington Community Scholars Center (sponsored by Eastern Mennonite University) has semester, year-long or spring/summer programs available in Washington, D.C. Includes significant internship experience and course work at a nearby university. Contact the associate dean or www.emu.edu/commun/wsy for more information.
Major in art
33 credit hours
- Art 101, Drawing .................................................... 3
- Art 107, Design ...................................................... 3
- Art 202, Painting .................................................... 3
- Art 205, Figure Drawing ........................................... 3
- one 3-D course (Ceramics, Jewelry or Sculpture) ........... 3
- Art 341, History of Art I ............................................ 3
- Art 342, History of Art II .......................................... 3
- Art 409, Senior exhibit ............................................. 1
- Art 410, Seminar .................................................... 3
- Art electives ......................................................... 5

Related course:
- Thea 245, Aesthetics .................................................. 3

Planning notes: 38 art hours and 27 education hours required for K-12 art teaching certification. 75 non-art hours are required for graduation.

Beyond the basic requirements for a major, the department suggests that each student develop a specialized program from the elective courses in one of the concentration areas below.

Possible concentration areas

Visual arts education (K-12)
In addition to the required courses outlined above, these course are also required: Art 108, Art 255, Art 312; and plus six credits advanced study in a medium as preparation for senior exhibit. For more details see visual art and secondary education pages of the Goshen College Teacher Education Handbook.

Graphic design
Art 108, Art 208, Art 308, Art 408; Art 203, Art 207; Art 301/401, Art 315, Art 355, Comm 326, Comm 375, or Comm 255; Art 343; Bus 336, Advertising; Bus 121, Introduction to Entrepreneurship; Engl 204, Expository Writing; Comm 212, Broadcast Media Production I.

Production crafts
Art 206; Art 301/401; Art 312; Art 343; Art 355; nine-15 hours in ceramics or jewelry; Bus 121, Introduction to Entrepreneurship; Bus 328, Venture Planning; Acc 201 and 202, Accounting.

Studio art
For students preparing for graduate school or a career as a studio artist. Art 206; Art 301/401; Art 312; Art 343; Art 355; nine-15 hours in selected studio courses in two- or three-dimensional media. Engl 204, Expository Writing. Selections from history, French, German, philosophy and anthropology.

Pre-Architecture
Pre-graduate school program. For a master's degree in architecture, an undergraduate major in art is recommended, along with selected electives in other areas. Courses usually required include: Art 101; Art 107; Art 108; Art 301/401; Art 355; studio art classes; Math 211, Calculus I; Phys 203 or 204, General Physics; and two history courses chosen from Hist 101, 102, 203 or one of the humanities courses. In addition, courses in sociology, psychology, communication skills and business are strongly recommended, along with cross-cultural experience.

Art therapy
Pre-graduate school program. Art 204; Art 206; Art 207; Art 217; Art 301/401; Art 312; Art 355; Art 412; Psy 210, Developmental Psychology; Psy 306, Abnormal Psychology.

Curatorial studies
Pre-graduate school program. Art 301/401; Art 312; Art 343; Art 355; Art 412; Bus 121, Introduction to Entrepreneurship; Comm 324, Principles of Public Relations; Engl 204, Expository Writing; selections from history, French, German, philosophy and anthropology.

Planning guide
We recommend at least one, but not more than two studio art classes per term.

First year
- Drawing  
- Design  
- Painting  
- Any art 3-D media course  
- General education courses

Second year
- Figure Drawing  
- Balance of remaining first-level studio courses  
- Begin art concentration courses  
- Aesthetics (offered on alternate years)  
- General education, including SST

Third year
- History of Art  
- Art concentration courses  
- General education

Fourth year
- History of Art  
- Remaining major courses, concentration courses and electives  
- Remaining general education and electives  
- Senior Exhibit  
- Senior Seminar

Minor in art
Requires 20 hours in art including
- Art 101, Drawing  
- One from either Art 107, Design or Art 202, Painting  
- History of Art; one from Art 341, 342 or 343  
- Eleven hours of art electives  
- Eight hours of the 20 required must be upper-level courses.
Minor in graphic design
Requires 18 hours in art including:
- Art 101, Drawing .................................................. 3
- Art 107, Design .................................................. 3
- Art 108, Digital Design ......................................... 3
- Art 208, Graphic Design I .................................... 3
- Art 308, Graphic Design II .................................. 3
- Art 341, 342, or Art 343, Art History* .................. 3

Plus one elective from: ........................................... 2-3
- Art 315, Photography
- Art 408, Graphic Design III
- Bus 336, Advertising

* A third art history course is not required of art majors who select this minor. An additional three hours of elective credit from the list above may be chosen instead.

Minor in multimedia communication
Requires 18 hours in art, communication and business information systems. See the communication department pages for a full description.

Courses
Art 101 Drawing .................................................. 3
Fundamentals of drawing as applied to pictorial organization. Emphasis placed on rendering skills: the use of line, value and perspective balanced by expressive approaches. Includes the use of various dry and wet media. Encouraged as a first course in art. Open to all students.

Art 107 Design .................................................. 3
A beginning course focusing on art elements and principles. Through experimentation, exercises, specific problems and using basic media and techniques, the student becomes familiar with fundamental visual concepts. Studio experience, critique and some research/writing are included. Encouraged as a first course in art. Open to all students.

Art 108 Digital Design ......................................... 3
This course in visual expression and communication will introduce students to relevant computer programs including Adobe InDesign, Adobe Illustrator and Photoshop. Through exercises, projects and critiques, students will learn both creative visual design and technical aspects of computer-generated images and composition.

Art 202, 302, 402 Painting ..................................... 3, 3, 1-3
The first course in painting is an introduction to the use and control of acrylic medium with a perceptual approach. Emphasis on technique, color and composition. Advanced courses emphasize independent investigation leading to a personal expressions in oil paint. Art 202 open to all students. Prerequisite for Art 302 is Art 202; prerequisite for Art 402 is Art 302 and Art 101 or Art 107.

Art 203, 303, 403 Watercolor .................................. 3, 1-3, 1-3
Through studio activity, a wide range of subject matter and techniques are explored. Skill and control of the medium are encouraged through practice. Art 203 open to all students. Prerequisite for Art 303 is Art 203; prerequisite for Art 403 is Art 303 and Art 101 or 107.

Art 204, 304, 404 Ceramics ..................................... 3, 3, 1-3
In the first term, students use the potter’s wheel and other methods to create forms in clay, both sculptural and functional. Forming, glazing and firing are learned. Second-term students do glaze or clay research and continue skill and concept development. Advanced students develop personal styles. Art 204 open to all students. Prerequisite for Art 304 is Art 204; prerequisite for Art 404 is Art 304 and Art 101 or 107.

Art 205, 305, 405 Figure Drawing .......................... 3, 1-3, 1-3
Studio based on the human figure, using a variety of drawing techniques, brief and sustained poses. Further development of perception and knowledge of the human figure stressed in advanced work. Features a variety of media, the relationship of figure to ground and a variety of conceptual approaches. Prerequisite for Art 205 is Art 101; prerequisite for Art 305 is Art 205; prerequisite for Art 405 is Art 305.

Exploration of sculpture media and techniques. Includes verbal interpretation and research of sculptors. Art 206 open to all students. Prerequisite for Art 306 is Art 206; prerequisite for Art 406 is 306 and Art 101 or Art 107.

The study of woodcut and intaglio techniques. Advanced work directed toward experimental techniques and skill development. Individual and group critiques. Art 207 open to all students. Prerequisite for Art 307 is Art 207; prerequisite for Art 407 is Art 307 and Art 101 or Art 107.

Art 208, 308, 408 Graphic Design .......................... 3, 3, 1-3
First-term students are introduced to the elements and principles of graphic design/visual communication. Emphasis will be placed on aesthetic use of typography and image in the conceptual development of projects in publication, poster and advertising design. The course will also provide a historical overview of the influences and movements in the field of graphic design.

Second-term students continue the study of graphic design/visual communication. Emphasis will be placed on the design and implementation of corporate symbols. Students will design various symbols and identities and carry the visuals through to stationary, packaging, advertising and various other marketing projects. Production standards for layouts, inks and paper and the printing process will also be studied.

In the third and consecutive terms, students concentrate on developing skill in various areas of interest. Projects from GC and the Goshen community are used with input and critique from students and instructor. Projects are chosen with the purpose of developing experience in working with clients and portfolio development.

Graphic design courses must be taken in sequence. Prerequisite for 408 is Art 108; prerequisite for Art 308 is Art 208 and Art 101 or 107; prerequisite for Art 408 is Art 308.

Art 217, 317, 417 Jewelry ...................................... 3, 1-3, 1-3
Three-dimensional design in metals including basic fabrication techniques, silver soldering, cold connections, stone setting, chain making and polishing processes. Includes study of historical and contemporary work in metal. Advanced students learn lost wax centrifugal casting. Art 217 open to all students. Prerequisite for Art 317 is Art 217; prerequisite for Art 417 is Art 317 and Art 101 or Art 107.

Art 255 Photo Communication .............................. 3
(See Comm 255)

Art 301, 401 Art Study Tour ................................. 3, 3
Art study on location in major art centers in Europe. Study stresses historical works and architecture. Both class and individual study is included. Extra cost. Open to all students.

Art 312 Teaching the Visual Arts ........................... 3-4
A methods course introducing the issues, concepts, philosophy and content of teaching art for art education students (K-12) and others with an interest in teaching art in other settings. Emphasis on
curriculum and lesson planning, reading in art education, art classroom management and evaluation. Includes field work. Art majors strongly encouraged to take this course. Non-art education majors may take this for three hours.

**Art 315, 415 Photography** 3, 2-3
The study of photography as an expressive art form. Advanced students follow individualized plans of study in an artistic, technical, digital and/or commercial area of photography to prepare work for exhibition, Web site, or to develop skills needed prior to a field assignment in commercial or journalist photography. Prerequisite for Art 315: Comm/Art 255, for Art 415: Art 315 and Art 101 or Art 107.

**Art 330 Media Workshop** 3
A course that explores in depth a single medium or process such as metal casting, raku, papermaking, weaving, kiln building, silk screen and airbrush.

**Art 341 History of Art I** 3
A survey of historical art from prehistory through the Middle Ages. Lecture. Prerequisite: junior level or consent of instructor. Offered alternate years.

**Art 342 History of Art II** 3
A survey of historical art from the Renaissance to present day. Lecture. Prerequisite: junior level or consent of instructor. Offered alternate years.

**Art 343 20th Century Art** 3
A survey of major art movements, architecture and artists of the 20th century with emphasis on art since 1945. Students learn critical assessment, research and become more artistically articulate. Prerequisite: junior level or consent of instructor. Offered alternate years.

**Art 355 Arts in London** 4
(See Thea 355)

**Art 375 Multimedia Concepts** 3
(See Comm 375)

**Art 409 Senior Exhibit** 1
A senior exhibition emphasizing studio work in an area in which the student has specialized and developed a personal style. Course includes gallery installation, publicity and education relating to the exhibit. Prerequisite: six-nine hours in medium and consent of instructor. For art majors only.

**Art 410 Senior Seminar** 3
Integrating creative endeavors, life’s purpose and faith. Issues concerning vocational, ethical, theological and historical dimensions of art are explored. Prerequisite: Required of all senior art majors; consent of instructor.

**Art 412 Special Projects** 1-3
Independent self-directed work or apprenticeship at an advanced level beyond that which is offered in regular courses or an internship related to an art concentration area. Prerequisite: consent of instructor.

---

**Bible, religion and philosophy**

Chair, Professor K. Graber Miller
Professors J. Brant and P. Keim
Director and Assistant Professor of Youth Ministry R. E. Yoder
Visiting Professor M. Berry

**Major in Bible and religion**

The Bible and religion major is designed to provide students with an introduction to biblical studies and the academic study of Christian and other religious traditions while affirming their faith and orienting them toward the value that the Anabaptist tradition places upon the Bible and the church.

The major requires courses on the content and methods of biblical study, church history, theology, ethics and philosophy, and culminates in a senior seminar in narrative theology. A major in Bible and religion is of particular value to students contemplating graduate study in Bible, religion or theology, mission and service occupations in the church, or callings to youth ministry or broader pastoral work.

Recent Bible and religion graduates have gone on to become pastors, service workers, professors, hospital chaplains, teachers, reporters, public relations consultants, lawyers, farmers, computer analysts, musicians, artists, business executives, translators and church administrators. Regardless of their future occupations, majors are given a strong foundation for careful reading of texts, thinking theologically, considering the relevance of faith for their daily lives, and active participation in congregational life.

The major requires a total of 39 hours, including 27 hours of core requirements and 12 hours of related courses. The 27 hours of core requirements include:

- **Bibl 300, Jesus and the Gospels** 3
- **Bibl 301, Hebrew Scripture** 3
- **Elective in Bible** 3
- **Rel 320, Christian Faith** 3
- **Rel 318, Anabaptist/Mennonite History or Hist 321 History of Mennonites in America** 3
- **Phil 302, Ethics and Morality** 3
- **Phil 200, Introduction to Philosophy or Phil 307, Asian Thought or Phil 401, Philosophy of Religion** 3
- **Bibl/Rel 409, Internship** 3
- **Bibl/Rel 410, Seminar** 3

Twelve hours of related courses in the department or in supporting courses such as Hist 304, PJCS 313, Psyc 314, Soc 210 in consultation with the adviser. 

Planning note: Bibl 100/200 may not be applied to the major.

**Planning guide**

**First year**
- General education
- Knowing the Bible or Reading the Bible
- Religion in the Americas

**Second year**
- General education
- SST
- 200-300 level courses in major including Bibl 301
Concentration in youth ministry:

An apprenticeship in ministry

The youth ministry concentration within the Bible and religion major requires a total of 40 hours, including the following:

**Third year**
- General education
- Upper-level courses in major including Bibl 300
- Related courses

**Fourth year**
- Balance of general education
- Balance of major
- Internship
- Seminar

**Planning guide**

**First year**
- General education
- Knowing the Bible or Reading the Bible
- 200-level courses in concentration

**Second year**
- General education
- SST
- 200-300-level courses in concentration including Rel 210

**Third year**
- General education
- Upper-level courses in concentration including Rel 374

**Fourth year**
- Balance of general education
- Balance of major including worship and pastoral care courses
- Internship
- Seminar

**Minor in Bible, religion and philosophy**

Departmental advisers will help shape the minor toward individual students' needs and interest, but minors are required to take at least eight hours of upper-level coursework and are encouraged to take courses in all three areas in the department: Bible, religion and philosophy. An example of a model program drawing on the departmental core:

16 hours:
- Bibl 300, Jesus and the Gospels ........................................3
- Bibl 301, Hebrew Scripture ..............................................3
- Elective in Bible .............................................................3
- Phil 302, Ethics and Morality ............................................3
- Rel 320, The Christian Faith .............................................3
- Elective in religion or philosophy ......................................3

**Minor in youth ministry**

The minor in youth ministry contains the core of the youth ministry concentration and is designed to complement a degree in teacher education or social work for those preparing to become youth pastors. A minor in youth ministry prepares a student to work as a youth sponsor and provides students with basic theory and skills for working with young people.

**Third year**
- General education
- SST
- 200-300-level courses in concentration including Rel 210

**Fourth year**
- General education
- Upper-level courses in concentration including Rel 374

---

*Bible and religion majors and minors are encouraged to focus their plan of study by selecting electives in concentrated areas. Among the possible foci are youth ministry inquiry, ministry inquiry, religious studies, theology, biblical studies and philosophy. Faculty advisers will work with students to create the most appropriate plan of study for their particular interests.*
Certificate programs

One-year certificate programs are available in biblical studies and Mennonite studies. See the department chair or the registrar for more details.

Courses

A. Bible

Bibl 100  Knowing the Bible ........................................ 3
This course will cover the basic narrative structure of the Bible, the main characters and themes and will address the following questions: How did the Bible come to be? How does one understand Scripture? In what contexts does one read Scripture? This course is for people with very little or no formal background in the Bible.

Bibl 200  Reading the Bible ........................................ 3
This course will focus upon questions of genre and composition and interpretation of the Bible and will address the following questions: How does genre affect how we read? How is doctrine derived from Scripture and how does it influence our own readings? How are various modern methodologies used to understand the Bible? How does one distinguish between opinion and reasoned interpretation? This course is for students who have studied Scripture in a formal setting such as in high school, Sunday school or academic courses and who know the basic narrative structure and main characters. Note: Students who take Bibl 100 cannot use Bibl 200 to satisfy the additional general education Bible and religion requirement.

Bibl 100 or 200 fulfills the lower-level Bible literacy general education requirement. Students who do not know which level to take are encouraged to take the placement test scheduled at the beginning of each semester or to consult with either Professor Brant or Keim.

Bibl 201  New Testament Greek .................................. 3
Basic vocabulary, verb structure and grammar of New Testament Greek; reading and translation in first chapters of the Gospel of John. This course does not meet the Bible/religion general education requirement. It may, however, meet the basic Bible literacy requirement for students who place out of Bibl 200 on the Biblical Literature placement test. Prerequisite: Bibl 100, Bibl 200 or equivalent.

Bibl 204  Hebrew Language and Culture ....................... 3
Students will work through a standard grammar of biblical Hebrew, building a working vocabulary of 600-800 words. The Book of Ruth will be read in its entirety, along with representative selections from the major genres of biblical Hebrew literature. Attention will also be devoted to the cultural settings reflected in the texts. Offered alternating years with Bibl 201. This course does not meet the Bible/religion general education requirement. It may, however, meet the basic Bible literacy requirement for students who place out of Bibl 200 on the Biblical Literature placement test. Prerequisite: Bibl 100, Bibl 200 or equivalent.

Bibl 300  Jesus and the Gospels ................................... 3
Study of the life and teachings of Jesus, focusing on the proclamation of the reign of God and Jesus’ messianic identity as the Son of God. Examination of Jesus in his historical setting will be balanced with discussions of Jesus’ call to discipleship and theological interpretations of the Gospels. Prerequisite: Bibl 100 or 200 or consent of instructor. BRP majors are encouraged to add a one-hour depth credit.

Bibl 301  Hebrew Scripture ....................................... 3
Content of this course will alternate every other year with one of the following topics.

Prophets: A study of the important corpus of prophetic literature from the Hebrew Bible. Attention is given to historical, social, literary and theological features of the texts. Broad surveys of the prophetic writings will set the stage for close reading of selected oracles. Balancing the ethos of the Hebrew prophets with the demands these texts place on the contemporary audience keeps the Scriptural nature of this foundational material constantly in view.

Wisdom and Psalms: Alongside law, history and prophecy, the wisdom and poetry sections of biblical Hebrew writings give expression to the formative power of this significant literary, theological and social movement in ancient Israel. Primary attention will be given to the universal perspectives reflected in the books of Ecclesiastes, Proverbs and Job, with selective attention given to the Wisdom corpus of the Apocrypha. Significant time will also be devoted to the laments, hymns and pilgrimage songs of the book of Psalms. Prerequisite: Bibl 100 or 200.

Bibl 303  Paul and the Early Church ............................. 3
Study the ministry of Paul and the growth of the early church by traveling through the geography and social world of the early church and reading the book of Acts and Paul’s letters. Explore Paul’s understanding of Jesus Christ and the nature of the Christian communities he established. Discussion will range from Paul’s council on issues such as church life, the role of women and the state, and circumcision to his theological teachings on salvation and end times. Prerequisite: Bibl 100 or 200.

Bibl 304  Writings of John ......................................... 3
A study of the theology, themes, literary structure and social world of the fourth Gospel. Special attention is given to unique contributions of the fourth Gospel to the New Testament canon, to our understanding of the Christ event and to Christian thought. Other Johannine writings are examined in relation to the Gospel. Prerequisite: Bibl 100 or 200 or consent of instructor.

Bibl 310  Topics in Biblical Studies ............................... 3
Lecture, research and discussion oriented around specific biblical studies themes such as the book of Revelation, leadership in ministry, spiritual and pastoral care. Prerequisite: Bibl 100 or 200.

Bibl 321  Biblical Themes of Peace ............................... 3
A study of the themes and concepts that provide a biblical basis for nonretaliation and peace making. Particular attention is given to the nature of God’s sovereignty, forgiveness versus vengeance and love of enemies. Prerequisite: Bibl 100 or 200.

Bibl 324  Women in the Bible ..................................... 3
An examination of the characterization of women in Old and New Testament narratives, their role in biblical societies and the early church and their representation in Judeo-Christian culture, particularly our contemporary culture. The course draws upon current research and exegetical strategies in biblical studies. Prerequisite: Bibl 100 or 200.

Bibl 409  Bible Internship .......................................... 1-3
An approved internship or work experience related to biblical studies. Examples are: Ministry Inquiry Program, supervised work in local campus ministries, church agencies or hospital chaplaincy.

Bibl 410  Bible Senior Seminar ................................. 3
Advanced work in principles and problems of biblical studies through the examination and assessment of narrative theology and ethics. Constant attention is given to meaningful articulation of faith. (See Rel 402, Christianity and Modern Thought)
B. Religion
Rel 202: Religion in the Americas ................................. 3
An overview of religious institutions and individual expressions of religious faith in the Americas. The course includes some attention to historical developments across the Americas, but focuses primarily on recent or contemporary religious movements, realities, themes and issues in North America. The course also provides an introduction to the discipline of religious studies and is designed for colloquium students.

Rel 209: Field Experience in Ministry .......................... 1-3
A field placement in applied ministry or discipleship at a camp, retreat center, congregation or religious organization. Appropriate for credit by experience registration.

Rel 210: Introduction to Youth Ministry ....................... 3
Focuses on aspects of pastor identity formation, theological understanding for and history of youth ministry, various models of youth ministry, and issues related to spiritual development of youth. Attention will also be given to issues regarding size of youth groups, organizational nature of ministry, mentoring, abuse, suicide, evaluation, self-care, humor and recreation. Includes attending a national or regional youth ministry training event.

Rel 301: Topics in Religion ......................................... 3
Lectures, research and discussion of specific topics in religion such as politics and religion, spirituality, religion and the media.

Rel 315: Religion in Culture and Society ...................... 3
An analysis of the social, cultural and political contexts that profoundly affect religious institutions and expressions, and upon which religion has an influence. Course includes such topics as meaning and belonging, modern individualism, dynamics of religious collectives and the impact of religion on social change.

Rel 316: Liberation Theologies .................................. 3
Liberation Theologies focuses on three contemporary theologies of liberation (Latin American Liberation Theology, North American Black Theology and North American Feminist Theology) as they are developing in the Americas. The course examines similarities and differences among these three theologies — in conversation with Womanist and Latina theologies — as each addresses specific theological questions raised by the people of God in actual contemporary situations of exploitation and oppression. The course also has a praxis component in which students move outward into the community.

Rel 317: Islam and Judaism ....................................... 3
An introduction to the essential beliefs, religion, texts and cultures of Islam and Judaism. Along with Christianity, these religious traditions represent the great cultural heritage of the Ancient Near East. A survey of essential Scriptures and exploration of primary doctrines will lay the groundwork for understanding these traditions with more clarity and sympathy. The living, contemporary communities of faith which claim direct descent from the Scriptures and doctrines of these formative cultures will become familiar through personal interaction with Muslims and Jews — both in the classroom and on field trips to mosque and synagogue. Emphasis will be placed on the deep continuities that exist among the “peoples of the book,” as well as the unique contributions each has made to contemporary world culture.

Rel 318: Anabaptist/Mennonite History ....................... 3
(See Hist 318)

Rel 319: Doing Theology Abroad .............................. 4
An intensive seminar taught on location in a southern hemisphere country, focusing on socio-political relations and practical theology. Participants live and attend church-related activities with host-country families. Topics of study include challenges of peace-building, effects of U.S. military aid, impacts of U.S. commercial interests and partnerships between North American churches and hosts. Personal safety of participants will likely be at risk, so freedom of movement must be surrendered. Proficiency in language of host country desired, but not required.

Rel 320: Christian Faith ........................................... 3
An introduction to theology, examining the character of Christianity by identifying and defining basic features and themes (e.g. Christology, atonement, church, eschatology). Careful attention will be paid to both historical development of theology as well as contemporary credibility. Prerequisite: Bibl 100 or 200 or consent of instructor.

Rel 322: Worshipping Communities .......................... 3
An introductory survey course about worship which examines styles and patterns of worship as practiced by local communities of faith. Includes weekly attendance at worship services in a variety of denominations.

Rel 328: Spiritual Writings of Women ......................... 3
A survey of women’s writings about the spiritual journey. Includes a range of medieval through 20th-century women. Examines women’s use of their experiences as one source of theologizing.

Rel 330: Religion and Sexuality .................................. 3
An exploration of the meaning and purpose of human sexuality in the context of Christian (and other) religious faith(s) and in relation to culturally based attitudes. Topics addressed will include body phenomenology, body theology, gender issues, historical developments, sexuality and spirituality, singleness, marriage, friendship, sexual violence and a variety of other theological, ethical and relational issues. The course draws extensively on feminist models, themes and authors.

Rel 374: Youth Ministry Seminar ............................. 3
Focuses on new ways to help young people pray and strengthen their faith; critiques and adapts current youth ministry materials for one’s own ministry context; considers the challenges of our ever-changing world and the impact on our youth and youth ministry settings; learns and practices various spiritual disciplines and prayer exercises; develops practical ministry skills and resources; includes attending a national or regional youth ministry training event. Co-registration for at least one credit of Rel 209 highly recommended.

Rel 402: Christianity and Modern Thought .................. 3
A seminar examining and assessing narrative theology and ethics. An attempt to state faith in meaningful terms by understanding the principles and structures of narrative and habitually using them. This course also serves as the senior seminar for Bible and religion majors, and only seniors are allowed in the course. Participation for non-Bible and religion majors requires the consent of the professor.

Rel 405: Spiritual Care and Healing ........................... 3
Especially oriented towards the professional caregiver, this course emphasizes the interaction of spiritual factors with physical and emotional ones in the lives of helpers and their clients. Course enrollment includes a commitment to regularly practice one of the classical spiritual disciplines as a source of spiritual renewal and healing.
Rel 409  Religion Internship .......................... 1-3
Approved intern or work experience related to studies in religion.
Examples are Ministry Inquiry Program, supervised work in campus
ministries, church agencies, chaplaincy or congregational programs.

Rel 410  Religion Senior Seminar ....................... 3
Advanced work in principles and problems of religious studies through
the examination and assessment of narrative theology and ethics.
Constant attention is given to meaningful articulation of faith. (See Rel
402)

C. Philosophy

Phil 200  Introduction to Philosophy ......................... 3
An introduction to the major problems of philosophy such as the
nature of knowledge and reality, the relation of faith and reason,
moral reasoning, politics and aesthetics. Discussion of the problems
is driven by self-examination of each student’s reasoned ideas and the
contributions of major philosophers from a variety of traditions.

Phil 302  Ethics and Morality ............................ 3
A study of the nature of moral claims and the bases for ethical principles.
The course draws on both moral philosophy and on Christian ethical
reflection, addressing the development of character as well as the
patterns and methods for both individual and corporate decision-
making.

Phil 305  Philosophy of Science .......................... 3
A study of the nature and history of scientific inquiry, the role of
rationality, intuition and truth in the sciences, as well as the relationship
of the sciences to other realms of discourse, especially religion.

Phil 307  Asian Thought ........................................ 3
The main aim of this course is to introduce the student to the questions,
methods, goals and character of Asian philosophies and to instill in
him or her a sensitivity to the profundity of thought that informs Asian
history and culture.

Phil 310  Topics in Philosophy .............................. 2-3
Study in specific areas of philosophic thought such as ancient/medieval,
logic, modern philosophy, theory of knowledge, theory and problems of
reality. See Nurs 309, Health Care Ethics 2.

Phil 400  Individual Readings in Philosophy ............... 1-3
Students take initiative to develop a plan with a department faculty
member. By consent of the faculty member only.

Phil 401  Philosophy of Religion ............................ 3
Traditional and modern encounters of religion and philosophy;
theistic arguments, faith and reason, apologetics, natural theology and
philosophical theology.

Biology and environmental science

Chair, Professor J. Miller
Professor S. Grove
Associate Professor L. Yoder
Assistant Professors L. English, D. Hess, D. Miller,
B. Minter, J. Saylor

The biology department offers three majors: biology, environmental
science and molecular biology/biochemistry. It also offers a minor in
environmental science.

Major in biology

Career opportunities

Biology graduates are active in human medicine and related areas,
veterinary medicine, the agricultural sciences, cell biology, microbiology,
marine biology, biotechnology, ecology, environmental analysis, science
communications and science education, as well as basic research in
numerous biological areas.

Requirements

Minimum of 24 hours in biology (plus internship and seminar), of
which 12 hours must be upper level, plus courses in related sciences for
a total of 40 hours as follows:

Core courses required for all majors

Biol 111-112, Biological Principles ............................... 8
Biol 300, Microbial Biology ...................................... 4
Biol 301, Genetics .................................................. 4
Biology electives (at least four hours must be upper level) .............. 8
Biol 410, Biology Senior Seminar (or equivalent by
permission of the biology department) ................................ 3
Biology experience: Biol 209 (Field Experience), Biol 400
(Biology Research), Biol 409 (Internship) or other equivalent
experience entailing at least 120 clock hours of practical
experience in biology. See adviser for internship form. ............... 0-3

Related courses

Chem 111-112, General Chemistry .............................. 8
Chem 303, Organic Chemistry .................................... 4
Additional science electives ....................................... 1 or more

Students expecting to major in biology should elect General

Secondary education majors must take Biol 200 or 201; Biol
203/204 or 302; and Biol 215, 309 or 315. For additional education
requirements see the education department pages or the Goshen College
Teacher Education Handbook.

Areas of interest for which majors may prepare by careful
selection of courses include: agriculture, allied health (medical
technology, pharmacy), biotechnology, botany, cellular biology, ecology,
environmental biology, field biology, genetics, human biology, marine
biology, microbiology, molecular biology, pre-professional (dentistry,
medicine, veterinary medicine, physical therapy), teaching biology,
tropical agriculture, wildlife biology or zoology.

Field biology courses

Field biology courses are usually based at two Goshen College facilities:
the Merry Lea Environmental Learning Center and the Marine Biology Laboratory. Additional field study and other courses can be done at Au Sable Institute. For more details, see “Field biology courses” under the environmental science major below.

Planning guide

First year
General education
Biological Principles
General Chemistry
Pre-calculus (if needed)

Second year
General education
Microbial Biology (or Calculus I)
Genetics (or Calculus II)
Organic Chemistry
SST (summer)

Third year
General education
Upper-level biology (or calculus)
Physics
Developmental Vertebrate Biology (pre-med)
SST (if not in second year)

Fourth year
Balance of general education
Balance of major
Internship or equivalent
Biology Senior Seminar

Major in molecular biology/biochemistry

Coordinator, Professor S. Grove

Career opportunities
A molecular biology major provides excellent preparation for further study in medical or graduate school, or direct entry into the job market. Molecular biology provides a foundation for careers in biochemistry, molecular biology, molecular genetics, biotechnology, genetics, molecular medicine, genomics, molecular diagnostics, drug discovery and many related areas.

Requirements
Completion of the following courses or the equivalent (55-58 credit hours):
- Biol 111-112, Biological Principles I and II ................................. 8
- Biol 301, Genetics ................................................................. 4
- Biol 307, Molecular Cell Biology ............................................. 4
- Biol 409, Internship or alternate .............................................. 0-3
- Biol 410, Biology Senior Seminar ............................................ 3
- Chem 111-112, General Chemistry I and II ............................... 8
- Chem 303-304, Organic Chemistry I and II ............................. 8
- Chem 430, Biochemistry .......................................................... 4
- Math 211-212, Calculus I & II ............................................... 8
- Phys 203-204, General Physics ............................................... 8

Recommended electives
Biol 300, Microbial Biology; Biol 302, Developmental Vertebrate Biology;
Chem 200, Analytical Chemistry; Chem 310, Thermodynamics; and Chem 312, Quantum Mechanics I.

Recommended enrichment activities
Research Seminar, Biol 330; undergraduate research project – credit available through advanced biology (if done on campus) or internship (if done off campus).

Planning guide

First year
General education
Biological Principles
General Chemistry

Second year
General education
Calculus I, II
Organic Chemistry
Genetics
SST (summer)

Third year
General education
Biochemistry
General Physics
Molecular Cell Biology

Fourth year
Balance of general education
Balance of major
Internship/alternate
Biology Senior Seminar

Major in environmental science

Director, Assistant Professor L. English

Career opportunities
Graduates in environmental science (ES) may work in a wide variety of areas, such as sustainable agriculture, conservation biology, water/air quality analysis, environmental education, recovery of threatened or endangered species, and as consultants for local, regional, or national parties interested in sustainable development. Courses in environmental science are designed to provide knowledge in areas of social structures, available natural resources, market forces, biodiversity status, landscape quality, cultural value, habitat and natural resource sustainability, and policy decisions. Potential employers include church and community agencies, local, state and federal government, private advocacy, stewardship and land trust organizations.

Required core courses (28-31 credit hours):
- Biol 111-112, Biological Principles ........................................... 8
- Biol 215, Principles of Environmental Science .......................... 3
- Biol 309, General Ecology ....................................................... 4
- Biol 335, Natural Resources Policy Seminar ............................. 1
- Biol 409, Internship ................................................................. 0-3
- Biol 410, Senior Seminar ......................................................... 3
- Econ 202, Principles of Economics .......................................... 3
- Econ 207, Introduction to Statistics .......................................... 3
- PoSc 210, Introduction to Public Policy ................................ 3

These core courses equip all majors to analyze environmental issues from biological, economic and social/political points of view. All of these tools are necessary for addressing questions of human ecology. When students declare the environmental studies major, they will, with their academic adviser, choose an area of concentration that reflects their interests and career goals. Available areas of concentration are listed on the following page.

Recommended electives
Hist 345, Environmental History; Biol 200, Zoology; Biol 201, Botany; Biol 300, Microbial Biology
Concentration options (28 credit hours)

Agroecology

Biol 201, Botany of Seed Plants ........................................ 4
Biol 220, 230, 316, 318 ...................................................... 12

Summer program at Merry Lea, studying four courses simultaneously:
Vegetable Crops, Agroecology, Properties and Management
of Soils, Small Farm Management and Produce Marketing
Biol 308, Entomology ......................................................... 4
Biol 312, Land Management ................................................. 4
Chem 111, General Chemistry I .............................................. 4

Conservation biology

Biol 301, Genetics ................................................................. 4
Biol 312, Land Management .................................................. 4
Chem 111-112, General Chemistry ........................................... 8
Chem 303, Organic Chemistry ............................................... 4
Selected field biology courses ................................................ 8

Environmental analysis

Biol 300, Microbial Biology .................................................. 4
Chem 111-112, General Chemistry .......................................... 8
Chem 200, Analytical Chemistry ............................................. 4
Chem 303, Organic Chemistry ............................................... 4
Two other biology or chemistry courses approved by academic adviser ... 8

Resource management

Biol 201, Botany of Seed Plants ............................................. 4
Biol 312, Land Management .................................................. 4
Biol 345, Forest Resources .................................................... 4
Chem 111-112, General Chemistry .......................................... 8
Field courses approved by adviser ........................................... 8

Planning guide

First year
General education
Biological Principles I and II
General Chemistry
Principles of Economics
Human Origins/Human Nature (social science gen.ed.)

Second and third years
General education
SST
Principles of Environmental Science
Introduction to Statistics
Introduction to Public Policy
Natural Resources Policy Seminar
General Ecology
Courses in concentration area

Fourth year
Courses in concentration area
Balance of general education
Internship
Senior Seminar

Field biology courses

Most field biology courses in the environmental science major take place
at the Merry Lea Environmental Learning Center of Goshen
College, a 1,150-acre natural area 30 miles from campus. This preserve
contains prairies, grasslands, upland forests, lowland forests, lakes,
ponds and senescent bogs. The marine biology course is taken at
the Goshen College Marine Biology Laboratory, located on Long Key, Fla.
Additional field courses are available through the Au Sable Institute, a
field station with three U.S. locations and two international programs.
The Great Lakes campus of Au Sable is close to Mancelona, Mich.
– near state and national forests, Lake Michigan, two rivers and numerous
ponds, bogs, etc. Summer programs and a May term are available at the
Great Lakes campus. Au Sable-Pacific Rim offers a summer program
from their campus on Whidbey Island in the Puget Sound. Au Sable-
Everglades offers a program at the Educational Concerns for Hunger
Organization (ECHO) tropical demonstration farm at North Fort
Myers, Fla., with a focus on sustainable tropical agriculture. Au Sable-
India, located near Tamil Nadu, South India, offers a summer program
in the natural history, resources, conservation and ecology of the Indian
tropics. Au Sable-Africa offers a summer program in tropical biology
and ecological sustainability from their campus near Nairobi, Kenya.

Practical experience in environmental science

Students should enrich their course work in the major with appropriate
experiences/internships. Many Goshen students have worked on projects
in environmental education, city planning, municipal water quality
assessment, organic agriculture, conservation biology, urban forestry,
wilderness trail and facility maintenance, restoration ecology, wetland
construction and planting and field biology. Appropriate international
experience can be gained on SST, in Au Sable-India and Au Sable-Africa
programs and with specially arranged programs.

Agroecology Program

There are four agroecology courses taught at the Merry Lea
Environmental Learning Center during a summer session: Biol
220, Biol 230, Biol 316 and Biol 318. Permission of the director of
environmental science is required.

Minor in environmental science

(18-19 credit hours)

A minor in environmental science is appropriate for elementary and
secondary teachers, regional planners, interpretive naturalists, park and
camp managers, water and air resources analysts, environmental policy
makers, bioinformation specialists and artists wishing to represent the
natural world.

Field studies in the minor are usually based at the Merry Lea
Environmental Learning Center or the Marine Biology Laboratory.
Additional field study can be done at the Au Sable Institute. See
descriptions of these field study sites under the environmental science
major (above).

Requirements:

- Biol 111-112, Biological Principles ........................................ 8
- Biol 215, Principles of Environmental Science .......................... 3
- Choose 7-8 credit hours from the following field biology courses:
  - Biol 201, Botany of Seed Plants
  - Biol 304, Marine Biology
  - Biol 308, General Entomology
  - Biol 309, General Ecology
  - Biol 312, Land Management
  - Biol 340, Field Experience in Environmental Education
  - Biol 345, Forest Resources
  - Biol 350, Ornithology

Appropriate Au Sable courses may be selected with approval of your
environmental science adviser.
Courses

Biol 100 The Biological World ........................................ 3
A general education science class designed to provide a background of biological principles in order to help the student understand and evaluate current issues. Laboratory exercises will document and test these principles.

Biol 111-112 Biological Principles ............................... 4, 4
This course emphasizes the basic principles underlying all fields of biology, including diversity, water biology, energy flow, inheritance, reproduction and communication. Surveys plant and animal taxa, with special emphasis on vascular plants and vertebrate animals. This course is for science majors and others interested in a rigorous introduction to biology. Either Biol 111 or Biol 112 may be taken first.

Biol 154 Human Biology ................................................. 3-4
A biological study of how the body functions, of the diseases/disorders that can disrupt the normal functioning of the body and of strategies for the prevention of disease. Includes an exploration of human genetics and its role in disease. Current issues related to human health are discussed. Laboratory exercises will introduce students to scientific principles affecting the body. A four-credit option, with extra material on the muscular and skeletal system, is offered in even numbered years for physical education majors. (fall semester)

Biol 200 General Zoology ............................................... 4
A survey of representative animal groups from Porifera through Chordata. Includes anatomy, morphology, systematics, life histories and ecology. Three lectures, one three-hour lab. Prerequisite: Biol 111-112 or permission of instructor. (spring semester 2007-08, 2009-10)

Biol 201 Botany of Seed Plants ......................................... 4
A major study of the stems, roots, leaves, flowers, fruits and seeds of the advanced vascular plants. Emphasis is placed on plant anatomy, morphology and physiology. Two lectures and two two-hour labs. Prerequisite: Biol 111-112 or permission of instructor. (fall 2006-07, 2008-09)

Biol 203-204 Human Anatomy and Physiology ............... 4+3
A study of the organ systems of the human body, their gross and microscopic structure and their functions. Laboratory demonstrations and dissections. Three lectures, one three-hour lab. With permission of the instructor, biology majors may take Biol 204 for two hours of lecture only. Prerequisite: one semester of college chemistry. (203 is offered in the spring semester, 204 in the May term.)

Biol 206 Microbiology ................................................... 3
A general study of microorganisms and their relations to health and disease, with practical applications valuable to the nurse. Includes the characteristics and activities of microorganisms, procedures for sterilization and disinfection; methods of growing and studying organisms; and techniques of diagnosis, treatment and prevention of diseases; as well as a brief survey of the major pathogenic groups. Three lectures, one two-hour lab. Prerequisite: one semester of college chemistry. Not for the biology major. (spring semester)

Biol 209 Field Experience ............................................. 1-3
Practical experience in biology, typically in a relevant off-campus experience. Off-campus positions may include various types of work (employed or volunteer) in university, hospital or other medical, veterinary, agricultural and industrial facilities or nature centers and camps. Students are encouraged to develop their own ideas. Taken only as credit/no credit. Prerequisite: consent of adviser.

Biol 210 Biology of the Sea ............................................. 4
An introductory course to enable the student to recognize the more common marine plants and animals and appreciate such an ecosystem. An elective suitable for elementary-education students. Does not count toward biology or natural-science major. The course will be given on location in the Florida Keys. Lecture-lab approach. Prerequisite: application process and consent of instructor. Moderate extra cost. (May term)

Biol 215 Principles of Environmental Science ............... 3
Introduction to natural resources (forests, wetlands, water, air, climate, soils, etc.), human use and impact on resource supply, pollution and sustainability. A critique of the land use history and ethics in the United States will then frame the discussion of the human ecology and the development of a vision of sustainability. Prerequisite: Biol 111-112 or consent of instructor. (spring semester 2006-07, 2008-09)

Biol 220 Soil Properties and Management ...................... 3
A comprehensive introduction to the field of soil science with emphasis on scientific principles and their application to solve practical soil management problems. Topics will include soil formation, soil physical properties, soil organisms and ecology, and practical nutrient management. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 230 Small Farm Management and Produce Marketing . 3
This course teaches skills necessary for making a farm or market garden an economic success, including finding land, planning appropriate marketing strategies for selected crops, and managing income and expenses. Community supported agriculture (CSA) and other direct marketing options will be studied and local farmers and entrepreneurs will share from their experience. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 300 Microbial Biology ............................................ 4
Study of the anatomy, physiology and natural history of microorganisms, particularly bacteria and viruses. Such organisms are studied in their roles in the environment, health and disease. Includes techniques involved in isolating, culturing and analyzing microbial organisms. Three lectures, one three-hour lab. Prerequisites: Biol 111. (fall semester)

Biol 301 Genetics ....................................................... 4
Introduction to genetics including classical, molecular and population concepts. Includes discussions of the moral and ethical implications related to genetic principles and techniques. The laboratory will include individual experiments with living organisms and modern genetic biotechnology. Three lectures and one laboratory/discussion session per week. Prerequisites: Biol 111-112. (spring semester)

Biol 302 Developmental Vertebrate Biology ................... 4
Principles of vertebrate development with study of developing systems in chicken and human embryos. Material covered includes the molecular genetics of developmental processes and cancer. Three lectures and one lab per week. Prerequisite: Biol 111-112. (fall semester 2006-07, 2008-09)

Biol 303 Vertebrate Physiology ..................................... 4
A concentrated study of the principles of vertebrate physiology. Material covered includes various topics of significance in the biomedical field, including cellular, nervous, muscular and cardiovascular physiology.
Biol 304  Marine Biology  ........................................  4
A concentrated field study in the Florida Keys to enable the student to recognize common shallow-water marine plants and animals and appreciate various marine ecosystems. Requires completion of a comprehensive collaborative field research project. The course is given on location. Prerequisites: Biological Principles, Biol 111-112, application process and consent of instructors. Moderate extra cost. (May term)

Biol 307  Molecular Cell Biology  ..........................  4
Examination of the structure and function of cells. Includes individual and group demonstrations of how cells are studied including genomics. Emphasis on molecular organization and phenomena associated with eucaryotic cells. One lecture, two three-hour labs. Prerequisites: Biol 301 and Chem 111-112 or consent of instructor. (spring semester 2006-07 2008-09)

Biol 308  General Entomology  ........................................  4
A general study of insect structure, development, classification and habits. Laboratory sessions particularly directed at identification of insects and their economic roles. Three lectures and one three-hour lab per week. Prerequisite: Biol 111-112 and Biol 200 strongly recommended. (spring semester 2007-08, 2009-10)

Biol 309  General Ecology  ........................................  4
A study of the distribution and abundance of organisms. The course will include studies of the dynamics of natural Biol communities and the interaction of these communities with the abiotic environment. The impact of humans on natural ecosystems and concepts of sustainable living will be addressed. Taught as a concentrated field course at the Merry Lea Environmental Learning Center. Prerequisites: Biol 111-112. (May term 2007-08, 2009-10)

Biol 310  The Plant Kingdom  ........................................  4
An in-depth study of the classification, structure and relationships of organisms that botanists have traditionally studied. Algae, bryophytes and primitive vascular plants are given extensive coverage. Taught as field course at the Merry Lea Environmental Learning Center with minimal lecture time. Prerequisite: Biol 111.

Biol 312  Land Management  ........................................  4
Basic principles of the management of natural ecosystems for various values and functions. Includes principles of restoration of disappeared or damaged ecosystems. Focus on wetlands, prairies and natural grasslands, and forests, primarily as a field course. Field work at Merry Lea. Prerequisite: Biol 111-112. (spring semester 2007-08, 2009-10)

Biol 315  Conservation  ........................................  3
A study of the need for and the best methods of conservation of our natural resources from an ecological approach. Emphasis on ecological principles related to populations, soil, water, forest, wildlife pesticides, waste, pollution and energy. Includes first-hand study of natural areas, erosion, conservation practices, impact of humans and some all-day field trips. Prerequisites: one physical science and one biological science course at the college level. Extra cost for field trips. (May term)

Biol 316  Vegetable Crops  ........................................  3
This course provides an understanding of the role of the environment in plant growth and development and focuses on the basic principles of sustainable vegetable production. Topics will include environmental factors influencing plant growth and crop production, preparing and planting the field, extending the growing season, and handling crops after harvest. Students will practice production techniques on college-operated acreage. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 318  Agroecology  ........................................  3
Study of sustainable food production, investigating the ecological impacts of manipulating natural systems to produce food, feed, fiber and medical products. Ecological concepts are discussed and their principles applied to sustainable food production that supports community culture and economy. Topics will include the theoretical basis of agroecology, alternative production systems, and ecological management of diseases, insect pests and weeds. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 320-321  Human Pathophysiology  ..................  3+3
An introductory study of the biology of diseases. Examines causes of disease and bodily response processes. A survey of both disorders that affect the body as a whole and disease of individual organs. Intended for students in allied health professions. Prerequisite: Biol 203-204 or consent of instructor. (fall and spring semesters)

Biol 330  Research Seminar  ........................................  1
An exploration of opportunities in research at the undergraduate level, graduate level and for a career. Includes an introduction of ongoing departmental research programs, discussion and demonstrations by current student participants of their projects, examination of new discoveries reported in the current literature and discussions of opportunities for student participation in our research program for advanced biology credit.

Biol 335  Natural Resources Policy Seminar  .........  1
To be taken in conjunction with Introduction to Public Policy, PoSc 210. Focus on U.S. natural resources policy (clean air, clean water, forest service policy, etc.) and the structure of the governmental agencies responsible for natural resources (Forest Service, Army Corps of Engineers, EPA, IDNR, IDEM, etc.). (spring semester 2006-07, 2008-09)

Biol 340  Field Experience in Environmental Education  ....  1-3
Participants will develop and conduct interpretive programs in nature study for visiting school groups; observe practices related to managing a natural area and participate in discussions of environmental issues. Instruction takes place at the Merry Lea Environmental Learning Center. Enrollment by permission of instructor only. Not offered in spring semester. Prerequisite: one semester of college-level biology. (fall and May terms)

Biol 345  Forest Resources  ........................................  4
Study of the function, value and use of forest resources, including management of forests for harvest, water quality, biodiversity, aesthetics and recreation. Significant time spent in the field at forestland sites. Prerequisite: Biol 111-112. (fall semester 2006-07, 2008-09)

Biol 350  Ornithology  ........................................  4
Natural history, taxonomy, and conservation of birds. Includes much work on visual and aural identification of birds in the field. Taught during the May term at Merry Lea Environmental Learning Center. Prerequisite: Biol 111-112. (May term 2006-07, 2008-09)

Biol 355  Limnology  ........................................  4
Study of the geochemistry and biological communities of wetlands,
lakes and streams. Primarily a field course, with significant time spent at Merry Lea and environs. Prerequisite: Biol 111-112.

**Biol 375 Topics in Biology: (Special Topic) 1-4**
Classroom and/or laboratory study in a major area of biology not covered by regular courses. Prerequisite: consent of instructor.

**Biol 400 Biology Research 1-4**
On-campus participation in a research project. Prerequisite: consent of faculty supervisor.

**Biol 409 Internship 1-3**
Practical experience in biology including professional levels of responsibility. Activities may be similar to those described for Biol 209, but with a higher degree of independent responsibility in the experience, as would be appropriate for a traditional apprenticeship. Students are encouraged to develop their own ideas. Taken only as credit/no credit. Prerequisite: consent of adviser.

**Biol 410 Biology Senior Seminar 3**
An exploration of the interactions between biology and other areas of human concern, especially ethics and theology. Includes lectures, discussion and preparation of a paper. Prerequisite: senior standing. (Fall semester)

**Au Sable courses:**
The Au Sable Institute, described above in "Field biology courses," under the environmental science major, offers a variety of summer field courses and internships in several locations. These courses will appear as Biol 360-380 on student transcripts. See the environmental science coordinator for the current course catalogue.

---

**Business**

Chair, Associate Professor A. Weddy
Professors D. Good, R. Rupp
Associate Professors M. Horning, P. Rush, T. Yoder
Assistant Professors J. Alvarez, M. Kinsey

The business department offers three majors: accounting, business and business information systems. In addition, it offers five minors: accounting, business, business information systems, entrepreneurship and global economics. A certificate program in business administration is also offered. Adult students interested in an evening program should see the Division of Adult and External Studies (DAES) section for a major in organizational management.

Some students seek a double major, or a major and minor, in our department. Note that a double major is not possible for accounting plus business, nor business information systems plus business, since there is very significant overlap in the courses required for these majors. A major plus minor is appropriate in these areas.

In addition to degree programs, the business department sponsors two continuing education programs for businesses: Family Business and Management Development. See information below.

**Career opportunities**

There is presently a very strong demand for graduates of these majors. Students with a degree from the business department are awarded with career opportunities with a broad range of businesses and nonprofit organizations. Students also create success in entrepreneurial settings. Numerous graduates have gone on to do graduate work in business, information systems, law, public policy and economics, completing degrees at the master's and doctoral level.

**Accounting:** Accounting majors have career opportunities in auditing, financial analysis, financial planning, taxation, as chief financial officers and controllers. Successful accountants possess a balance of quantitative and qualitative skills. Employers look for both problem-solving and relational skills.

**Business Information Systems (BIS):** BIS majors are in demand as consultants; to provide system-related support in a variety of positions and fields; to help maintain networks; to design and produce information systems, including e-commerce related functions. Projected to be one of the fastest growing jobs and best-paying areas according to the U.S. Bureau of Labor Statistics.

**Business:** Business graduates are currently working in business, industry, education, banking, overseas development, church offices and many not-for-profit settings. Their careers span the fields of marketing, human resources, management, finance and operations. Many also work in consulting or start their own businesses.

**Economics:** Global economics minors continue to find employment with business, government and in education.

**Entrepreneurship:** Entrepreneurship minors develop businesses and nonprofit organizations to complement their interests and major course of study. Previous Goshen College graduates currently successfully operate a variety of businesses. Coursework designed for students who may want to work in a family business, start their own business, manage a small business or start a professional practice or skill-based business.

**Admission to department**
All students are welcome to take courses in the business department, guided by their interest and course prerequisites (if required). To be officially admitted as a major in the department the student must:

a. Complete all lower level major and related requirements with a grade
point average of 2.0 or above.
b. Complete a Goshen College Plan of Study with academic adviser.
c. Formally apply for admission to the business department with
   signature of academic adviser.

Department majors

A. Accounting
Completion of the following courses or equivalent:

- Acc 201-202, Principles of Accounting ........................................... 6
- Acc 210, Accounting Information Systems ..................................... 3
- Acc 301, Cost Accounting .......................................................... 3
- Acc 302-303, Intermediate Accounting ......................................... 6
- Acc 304, Federal Income Tax: Individual ...................................... 3
- Acc 405, Auditing ................................................................. 3
- Bus 310, Business Law ........................................................... 3
- Bus 405, Business Career Planning ............................................. 1
- Bus 409, Business Internship or
  Acc 408, Accounting Internship ............................................... 3-12
- Bus 410, Management Policy and Social Responsibility ............... 3

Related courses:
- Mathematics ................................................................. 3-4
- Math 102, Precalculus Mathematics or
- Math 141, Finite Mathematics or
- Math 211, Calculus 1 or Math 205, Discrete Math
  (determined based on high school math courses and SAT/ACT scores)
- Econ 201-202, Principles of Economics .................................... 6
- Econ 207, Introduction to Statistics ........................................... 3
- BIS 220, Office Software Productivity ...................................... 3
- Elective in business department ............................................. 3

Planning guide

First year
- General education
- Mathematics
- Introduction to Entrepreneurship (optional elective)
- Principles of Accounting: Financial
- Office Software Productivity

Second year
- General education
- Principles of Accounting: Managerial
- Principles of Economics
- Introduction to Statistics
- Accounting Information Systems
- Cost Accounting
- SST

Third year
- General education
- Intermediate Accounting
- Federal Income Tax: Individual
- Business Law
- Business Career Planning

Fourth year
- Balance of general education
- Balance of accounting major
- Internship
- Management Policy and Social Responsibility

Planning notes

Bus 121 is an excellent first-year elective course for students exploring
their business interests; Acc 201 and 202 must be completed in the first
two years; Acc 210 is intended for the second year; SST should come in
the first two years or summer of the third year.

150-hour program in accounting

In many states, 150 hours of undergraduate or graduate education is
required for individuals to sit for the Certified Public Accounting (CPA)
examination. Goshen College offers several options for students desiring
to complete 150 hours. Students can choose to complete all 150 hours
at Goshen College through any of the following options:

Accounting and business (not a double major)
All the current accounting major requirements (52 hours) plus
completion of:
- Acc 434, Federal Income Tax: Corporate .................................. 3
- Bus 315, Principles of Management .......................................... 3
- Bus 317, Financial Management ............................................. 3
- Bus 403, Management Strategy ............................................. 3
- Nine hours of upper-level electives in business, economics
  or business information systems ............................................ 9
- Electives from any department (to complete 150 hours) ............... 6-9
This program is designed to give the student a broader understanding
of business and the role of the professional accountant as a business adviser.

Accounting and business information systems (double major)
All the current accounting major requirements (52 hour major) plus:
- Acc 434, Federal Income Tax: Corporate .................................. 3
- Bus 315, Principles of Management .......................................... 3
- Seven BIS core courses: 250, 305, 310, 335, 340, 405, 407 .......... 21
- One related course: CoSc 200 ................................................. 4
- Elective in department ......................................................... 3
The internship could potentially include a significant experience in
business information systems.
This program is designed to equip the professional accountant to work,
consult and advise effectively in the business information systems arena,
as well as accounting.

Accounting plus minors in business and in business
information systems (BIS)
All the current accounting major requirements (52 hour major) plus:
- Acc 434, Federal Income Tax: Corporate .................................. 3
- Bus 315, Principles of Management .......................................... 3
- Bus 317, Financial Management ............................................. 3
- Bus 403, Management Strategy ............................................. 3
- Four BIS courses from the BIS core courses ............................ 12
- Elective in department ......................................................... 3
This program is similar to the previous one but includes a broader
exposure to the functional areas of business.

Finally, a student can meet the state’s 150-hour requirement by
completing an accounting degree at Goshen College and transferring
to another institution to complete a master’s degree. Goshen College
is committed to developing and maintaining articulation agreements with
various Indiana institutions to facilitate this option.

Minor in accounting
- Acc 201-202, Principles of Accounting ..................................... 6
- Econ 201 or 202, Principles of Economics ................................ 3
- Acc 302, Intermediate Accounting ......................................... 3
- Six additional hours of accounting ........................................... 6
(Business and business information systems majors must take 12 hours
of accounting beyond the major, including Acc 302. Courses must be
selected with approval of your adviser.)
Courses

Acc 201  Principles of Accounting: Financial ................. 3
Development of principles underlying financial statements and accounting procedures. Basic accounting terminology and concepts of both financial and managerial accounting. Emphasis on analyzing and understanding financial statement information.

Acc 202  Principles of Accounting: Managerial .............. 3
Development of principles used in planning, controlling and evaluating organizational decision making. Primary topics are cost behavior, costing systems, profitability analysis and budgeting. At the conclusion of this course students will be able to conduct cost-volume-profit analysis, compute break-even points, prepare budgets, conduct variance analysis, do job costing, relevant cost analysis and capital budgeting. Prerequisite: Acc 201.

Acc 210  Accounting Information Systems .................... 3
Create an accounting system using a popular business software package. Gain understanding of internal control systems and organizational relationships with utilization of a computerized business system. Concentrates on the transaction cycles of cash receipts, cash disbursements, purchasing, sales, inventory control and management reporting. Prerequisite: Acc 201.

Acc 301  Cost Accounting ........................................ 3
A study of how accounting information is used and communicated by managers to plan, control and evaluate decisions. Primary topics include cost behavior, cost-volume-profit analysis, costing systems, variance analysis, cost-allocation issues, budgeting and pricing decisions. This course is a continuation of the principles learned in Acc 202. Case studies are used extensively in this course. Prerequisite: Acc 201-202, BIS 220 or Bus 150.

Acc 302-303  Intermediate Accounting ......................... 3+3
Development of accounting theory and practice by critically analyzing each element of the financial statement. Concentration on a conceptual approach to accounting information and reporting. Courses must be taken in sequence. Prerequisite: Acc 201-202.

Acc 304  Federal Income Tax: Individual ....................... 3
A comprehensive study of the current income tax laws as they apply to individuals and sole-proprietorships. Emphasis is placed on applying the tax laws for tax return preparation. Students are also introduced to tax research and tax planning. Students will participate in a tax preparation program for the Goshen community.

Acc 375  Topics in Accounting ................................... 1-4
Depth study on a selected topic in accounting. Intended to accommodate student interest and/or faculty expertise in specific accounting issues. Issues may vary from year to year.

Acc 400  Selected Readings ........................................ Credit Arranged
Special topics for majors and minors.

Acc 405  Auditing .................................................. 3
Study of the attest function and the responsibility of a Certified Public Accountant as an independent auditor of financial information. Includes study of the CPA Code of Professional Ethics and the legal liability of auditors. Prerequisite: Acc 302-303.

Acc 408  Accounting Internship .................................... Credit Arranged
Work experience in professional accounting. Limited to accounting majors. Student must be approved by department faculty and accepted by a firm through an interview. Interested students should contact the supervising instructor during the junior year.

Acc 409  Internship in Accounting ............................... 3
Work experience in, or student observation of, a business enterprise or problem. Each student's project is individually arranged with the instructor. The course is designed to integrate and apply theoretical learning with experience.

Acc 432  Government and Not-for-Profit Accounting .......... 3
The study of accounting theory and practice relating to governmental entities and not-for-profit organizations. Prerequisite: Acc 201-202.

Acc 434  Federal Income Tax: Corporate ....................... 3
Study of the current tax laws applicable to C corporations, S corporations, partnerships and limited-liability companies. Students are introduced to tax research and tax planning for these business entities. Also included is an introduction to tax law related to not-for-profit organizations, trusts, estates and gift taxation. Prerequisite: Acc 304.

B. Business

Major in Business

Completion of the following general education courses:
- Math 141, Finite Math or Math 102, Pre-calculus or Math 211, Calculus 1 or Math 205, Discrete Math (determined based on high school math courses and SAT/ACT scores)
- One social science course selected from:
  - Soc 200, Soc 220, Psych 100 or Psych 200
Completion of the following "core" courses or equivalents, totaling 40 credit hours.
- Acc 201-202, Principles of Accounting ..................... 6
- Econ 201-202, Principles of Economics .................... 6
- Econ 207, Introduction to Statistics ....................... 3
- BIS 220, Office Software Productivity .................... 3
- Bus 310, Business Law ....................................... 3
- Bus 315, Principles of Management ....................... 3
- Bus 316, Principles of Marketing ......................... 3
- Bus 317, Financial Management ......................... 3
- Bus 403, Management Strategy ......................... 3
- Bus 405, Business Career Planning ..................... 1
- Bus 409, Business Internship ......................... 3
- Bus 410, Management Policy and Social Responsibility 3
Completion of an additional 12 hours elected from the department, of which nine must be upper level.

A secondary teacher-education program is available. For more details see the Goshen College Teacher Education Handbook and the education department pages.

Planning guide

First year
- General education
  - Introduction to Entrepreneurship (optional elective)
- Mathematics
  - Principles of Accounting: Financial
  - Principles of Economics, 202
- Office Software Productivity

Second year
- General education
  - Principles of Economics, 201
  - Principles of Accounting: Managerial
  - Introduction to Statistics
  - SST (spring or summer)
Third year

General education
Management, Marketing, Financial Management, Business Law
Upper-level courses in major
Business Career Planning
A summer internship between third and fourth year is strongly encouraged

Fourth year

Balance of general education
Balance of major
Management Strategy
Management Policy and Social Responsibility

Planning notes
Bus 121 is an excellent first-year course for students exploring their business interests. Acc 201 and 202, Econ 201 and 202 and 207 and SST should normally be scheduled in the first two years. Additional math courses are encouraged for students anticipating graduate school.

Minor in business
Acc 201, Principles of Accounting: Financial
Econ 201 or 202, Principles of Economics
12 additional hours of accounting, business, business information systems, and/or economics, of which nine must be upper level.

(For the business minor, accounting and business information systems majors must take nine hours in business and economics beyond the major. Courses must be selected with approval of the adviser.)

Certificate: business administration
Bus 121, Introduction to Entrepreneurship
Acc 201, Principles of Accounting: Financial
Bus 315, Principles of Management
Econ 201, Principles of Economics
Econ 202, Principles of Economics
SST term
Elective in business
Bible or religion
Electives

(Usually scheduled for completion in one year. Specific courses may vary depending on previous training, experience and/or maturity of student. Courses selected with the approval of adviser.)

Courses

Bus 102 Advanced Keyboarding
Manipulative skill development in the use of computer/typewriter keyboards, including numerical keypad. Skills development in the production of letters, reports, tables and other word processing communications using a leading software package. (Available as independent study.)

Bus 121 Introduction to Entrepreneurship
Introduces the various activities that entrepreneurs undertake, from recognizing an opportunity to launching a business. Provides an overview of developing and testing a business concept, the components of a business plan and planning for growth and change. Additional attention is given to the nature of entrepreneurial thinking and the ethical environment of entrepreneurship.

Bus 150 Introduction to Microcomputers
An introduction to personal computers and their common uses. Hands-on experience with word processing, spreadsheets, data base management, presentation graphics, the Windows operating systems and the Internet. Students work in a hands-on computer lab and gain experience with the software and concepts through completion of exercises and lab problems.

Bus 210 Basic Spreadsheet Applications
Introduces the student to the features and functions of a commercial spreadsheet software for the microcomputer. Hands-on exercises and cases illustrate the use of spreadsheet software in common business applications. A working knowledge of microcomputers is required. (Credit not available for this course and Bus 150.)

Bus 215 Entrepreneurial Finance
Designed to introduce the basics of business finance and accounting to nonfinancial managers or students who anticipate acquiring or starting a new venture. Builds understanding of key financial statement and day to day accounting and finance issues, tips for improving financial efficiency and strategies for pursuing financial growth.

Bus 217 Personal Finance
Designed to introduce students to the basics of personal finance. A survey course of personal and family financial planning with an emphasis on financial recordkeeping, planning your spending, tax planning, consumer credit, making buying decisions, purchasing insurance, selecting investments and retirement and estate planning.

Bus 306 Human Resource Management
Provides a comprehensive understanding of what effective firms in competitive environments are doing to manage their human resources as successfully as possible. Topics include the major issues facing human resource management and the various human resource activities.

Bus 308 Office Administration and Technology
Principles of management, problem-solving, systems and communications as applied to office administration; the role of people in using the tools of information technology to increase productivity; records management, space, furniture, equipment and office automation. (Available as independent study.)

Bus 310 Business Law
Survey of legal principles. Topics include liability, contracts, sales and negotiable instruments; also, secured transactions, agency, partnerships, corporations and antitrust.

Bus 315 Principles of Management
Founded on the four major managerial functions: planning, organizing, leading and controlling. The process of management is applied to the functions of a business enterprise. Other topics include motivation, problem-solving and the coordination, communication and human relations aspects of management.

Bus 316 Principles of Marketing
The nature of marketing in our society; how organizations develop marketing strategies that enable them to meet their objectives and the needs of their customers; the relationship of marketing to other management functions.

Bus 317 Financial Management
Introduces students to the primary elements of organizational finance such as time value of money, stock and bond valuation, forecasting, working capital management, capital budgeting and structure and dividend policy. Prerequisite: Acc 201-202, Bus 150 or BIS 220, Econ 202.

Bus 318 Production/Operations Management
Decision-making and quantitative analysis of production problems.
arising in areas of methods analysis, plant location, facilities design, production planning and control, inventory management, work measurement, job design, worker safety and health, materials handling and quality control.

Bus 319 Leading Nonprofit Organizations ....................... 3
An exploration of how business principles apply to leading nonprofit organizations. Course provides students with the concepts, techniques and illustrations needed for effective nonprofit organizational management. Topics covered will include management and motivation of staff, trustees and volunteers, marketing, financial management, fund raising, planning, ethics, social responsibility, partnerships and sustainability.

Bus 320 Marketing Research ................................. 3
A comprehensive overview of the nature and scope of marketing research and its role in decision support systems. Course focuses on the practical aspects of marketing research and provides a framework for conducting quantitative and qualitative research. Prerequisite: Bus 316 or consent of instructor.

Bus 322 Organizational Communication ....................... 3
(See Comm 322)

Bus 327 Internet Business Strategies ....................... 3
The Internet is a powerful global force that is influencing, and in some cases significantly changing business practices. The Internet can be a valuable business tool for marketing, customer and supplier relationship management, supply chain and inventory management and of course product sales. This course uses a strategic business planning approach to evaluating and implementing business functions on the Internet.

Bus 328 Venture Planning ..................................... 3
In this course students write business plans for an entrepreneurial venture. Areas of exploration include recognition of opportunity, pre-venture planning, start-up, strategy, negotiation and funding. Emphasis is also placed on the management of organizational growth and change. Attention is given to special concerns of small-firm management.

Bus 330 Entering Family Business ......................... 3
The business, personal and interpersonal issues associated with a family-owned and managed firm are explored in this course. Topics include: the competitive strengths and weaknesses of a family firm; the dynamics of family interactions and the family business culture; conflict resolution; estate planning and planning for succession.

Bus 332 Investments ........................................... 3
In this course students will learn how to research, formulate and implement investment plans through portfolios constructed and monitored by students. Analytical frameworks and investment strategies that target objectives will be established and utilized. Also, decision making tools such as security valuation and leverage analysis models will be explored. Prerequisite: Bus 317 or consent of instructor.

Bus 336 Advertising ............................................ 3
This course covers a managerial approach to developing advertising strategies; the use of advertising as a marketing tool; the creative process; evaluation of the effectiveness of advertising; the role of advertising in our society. Prerequisite: Bus 316 or consent of instructor.

Bus 338 Sales ...................................................... 3
An introduction to the dynamic world of selling. A pragmatic approach to the techniques and skills used by professional sales persons. Includes role playing and the development of a sales presentation.

Bus 340 Advanced Spreadsheet Applications ............... 1-2
Further practice in applying the features and functions of a commercial spreadsheet are provided. Emphasis is on overall spreadsheet design as well as the use of macros and spreadsheet publishing features. Much of the work is done independently by the student, in consultation with the instructor. Applications are drawn from common business and accounting problems. Prerequisite: Bus 150 or BIS 220 or consent of instructor.

Bus 350 International Business .............................. 3
International business is the field of study that focuses on business activities that cross national boundaries. It includes exports and imports – the subject of traditional international trade discussions – as well as foreign direct investment, international banking, the international transfer of technology and global business strategy. The cultural environment of international business is considered in some detail. The course presents the important activities of an international firm and a framework for analysis from a manager's perspective. Case studies are used in the course. Prerequisites: Econ 201-202 and Acc 201-202 or consent of instructor.

Bus 360 Java Junction Management ....................... 3
The purpose of this course is to give students the opportunity to manage a real business. Java Junction, a coffee shop located in the KMY Connector, is completely student-run and student-managed. Student managers, under the supervision of a business faculty member, have full responsibility for all management and operating decisions. Management positions include accounting, human resources, marketing, operations, purchasing and special events planning and coordination. The management team reports regularly to an Advisory Board who serves as Java Junction's Board of Directors. Managers are selected by the business department through an application process. Entrepreneurial students and those energized by challenges are encouraged to apply. This course is repeatable.

Bus 375 Topics in Business .................................. 1-4
Depth study on a selected topic in business. Intended to accommodate student interest and/or faculty expertise in specific business issues. Issues may vary from year to year (example: Business in Spain).

Bus 400 Selected Readings ................................. Credit Arranged
Special topics for majors and minors.

Bus 402 Applied Entrepreneurship ......................... 3
This course is awarded to recipients of Entrepreneurship Grants to provide time and business departmental guidance for student to start a business.

Bus 403 Management Strategy ............................... 3
A study and evaluation of management strategies to achieve organizational goals and objectives. Utilizes management principles, financial analysis and control, personnel decisions and marketing strategies to solve case/simulation problems. Prerequisites: Bus 315, 316 and 317 or consent of instructor.

Bus 405 Business Career Planning ......................... 1
The course will provide a framework within which to appraise career options, set goals and implement a plan to reach goals. Topics include self-appraisal, résumés, developing a job-search strategy, interviewing for jobs, choosing the first job and graduate school opportunities.
### Minor in business information systems

- **Acc 201, Principles of Accounting: Financial** ........................................ 3
- **Econ 201 or 202, Principles of Economics** ........................................ 3
- **Bus 315, Principles of Management** ................................................. 3
- **BIS 220, Office Software Productivity** .............................................. 3
- **BIS 305, Introduction to Information Systems** .................................... 3
- **BIS 310, Information Technology Hardware and Networks** .................... 3
- **BIS 335, Systems Analysis and Design** ............................................. 3

(Business majors must take 12 hours of business information systems beyond the major. Accounting majors must take Bus 315, plus 12 hours of business information systems beyond the major. Courses must be selected with approval of adviser.)

### Courses

#### BIS 220 Office Software Productivity .............................................. 3

Advanced skills in commonly-used office-suite software, such as spreadsheets, word processing, presentation graphics and personal databases. An introduction to Hypertext Markup Language (HTML) is also included. The focus is on using these tools in an organizational setting to improve personal and organizational productivity and effectiveness. The course currently uses the Microsoft Office Suite on personal computers. **Prerequisites:** Bus 150 or consent of instructor.

#### BIS 250 Introduction to Business Programming ............................ 3

This course will provide an understanding of algorithm development, computer concepts and the design and application of data and file structures. It includes an understanding of the logical and physical structures of both programs and data. The course will be taught from a business perspective with business software development projects. Course will use the Visual Basic language.

#### BIS 305 Introduction to Information Systems ............................... 3

A broad introduction to the Information Systems (IS) field. Accessible to anyone interested in learning about the various aspects of the IS field who may not be able to schedule additional, in-depth IS courses. Topics range from security and ethical challenges, to hardware, software, networking, e-business and IS strategy. Attention is also given to emerging trends in IS and their potential impact on organizations. **Prerequisites:** BIS 220 or consent of instructor.

#### BIS 310 Information Technology Hardware and Networks ............ 3

This course addresses hardware and operating systems and includes data communications and networking, and management of telecommunications networks. **Prerequisite:** BIS 305 or consent of instructor.

#### BIS 335 Systems Analysis and Design .......................................... 3

A structured approach to solving organizational problems in the context of Information Systems. The focus of the course is on determining the needs of the organization and meeting those needs through the design of an information system. Topics such as feasibility analysis, determining business requirements, documenting processes and data requirements...
through modeling tools, designing a new system and implementation issues are covered. An appropriate course for those considering a career as a business analyst in the consulting field. Prerequisite: BIS 305 or CoSc 215 or consent of instructor.

**BIS 340 Database Management Systems**  
3  
Properly designed and constructed databases are crucial to ensuring business success. This course focuses on the proper design of databases and their construction. Students learn to design databases through diagramming tools, as well as learning the “language” of databases, SQL. Attention is also given to form and report development, data warehouse and data mining issues and administrative issues such as user security. Students gain experience in robust database environments such as Oracle. Prerequisite: BIS 335 or CoSc 215 or consent of instructor.

**BIS 375 Topics in Business Information Systems**  
1-4  
Depth study on a selected topic in business information systems. Intended to accommodate student interest and/or faculty expertise in specific business information systems issues. Issues may vary from year to year.

**BIS 400 Selected Readings**  
Credit Arranged  
Special topics for majors and minors.

**BIS 405 Project Management and Practice**  
3  
Practice in managing the system life cycle; requirements determination for logical design, physical design, testing and implementation of a system. Other topics: system and database integration issues; metrics for project-management and system-performance evaluation; managing expectations of superiors, users, team members and others related to the project; determining skill requirements and staffing the project; cost effectiveness analysis; reporting and presentation techniques; effective management of both behavioral and technical aspects of the project. Prerequisite: BIS 335 or CoSc 215.

**BIS 407 Web Application Development**  
3  
This course will cover advanced system development for the Internet with business-to-business application projects as the focus. It includes an understanding of advanced HTML concepts and database access using ASP (active server pages) and ADO (active data objects). The development environment will include Microsoft Access, Oracle, VB script, Java script and XML. Prerequisite: BIS 250 and BIS 340 or consent of instructor.

**BIS 409 Internship in Business Information Systems**  
3  
Work experience in, and student observation of, an organization or problem related to the information systems field. Each student's project is individually arranged with the instructor. The course is designed to integrate and apply theoretical learning with experience.

**D. Economics**

**Minor in global economics for the non-business major**

- Econ 201, Econ 202, Principles of Economics ..................... 6
- Econ 207, Introduction to Statistics ............................... 3
- Econ 306, International Economics or Econ 308, Introduction to Economic Development .................. 3
- One additional upper-level economics course ..................... 3
- One course selected from  
  Bus 350, International Business  
  Bus 375 Business in Spain,  
  Hist 315, War and Peace in Twentieth Century Europe  
  PoSc 308, International Politics  
  (or another upper-level course approved by the adviser)

**Minor in global economics for business or BIS**

- Econ 306  International Economics .............................. 3
- Econ 308  Introduction to Economic Development ............... 3
- Three additional upper-level hours in economics; and one course selected from Bus 350, Bus 375, PoSc 308, Hist 315 or other upper-level international course approved by the adviser. Total 12 hours above the major.

**Planning notes**

Students should complete Econ 201 and 202 in first or second year. These two courses may come in any order. Additional mathematics beyond Math 211 is strongly urged if graduate work in economics is anticipated. Teacher education program is available for students seeking to teach social studies in high school.

**Courses**

**Econ 201, 202 Principles of Economics**  
3, 3  
A general survey of economic relationships and processes in modern society. Econ 201 focuses on macroeconomic topics: national-income accounting, aggregate-income determination, money and banking and international trade. Econ 202 analyzes market and price behavior under competitive and monopolistic conditions and reviews the economic activities of government, with emphasis on spending and taxing patterns. Either course may be taken first; both are prerequisites for most upper-level courses in economics.

- Econ 207 Introduction to Statistics .............................. 3  
  Collection, presentation and analysis of numerical data. Descriptive measures; index numbers; probability, sampling, estimation and hypothesis testing; linear regression and correlation. Prerequisite: a knowledge of algebra.

- Econ 301 Money and Banking ....................................... 3  
  Monetary theory and policy; commercial bank management and the study of other financial institutions; the money markets; central banking and the Federal Reserve System. Prerequisite: Econ 201.

- Econ 304 Public Sector Economics ............................... 3  
  Basis for public sector in an economy; mechanisms of governmental allocation. The financing of federal, state and local governments; principles and economic effects of taxation and expenditures. Prerequisite: Econ 202.

- Econ 306 International Economics .............................. 3  
  Factors in international economic relations; international trade theory; balance of international payments; foreign exchange; commercial policy of the United States and other countries; foreign investment and economic development; international economic cooperation. Prerequisite: Econ 201-202 or consent of instructor.

- Econ 308 Introduction to Economic Development ............... 3  
  Provides a general overview of the development field and surveys major issues from a range of viewpoints. Topics include trade and financial problems faced by developing countries, evaluation of various models of development and application of economic techniques to development problems. Prerequisites: Econ 201-202 or consent of instructor.

- Econ 375 Topics in Economics ................................. 1-4  
  Depth study on a selected topic in economics. Intended to accommodate student interest and/or faculty expertise in specific business issues. Issues may vary from year to year.

- Econ 400 Selected Readings ........................................ Credit Arranged  
  Special topics for minors.
E. Entrepreneurship
Minor in entrepreneurship

Minor for the non-business major

Required core courses:
- Bus 121, Introduction to Entrepreneurship ........................................... 3
- Bus 215, Entrepreneurship Finance ..................................................... 3
- Bus 328, Venture Planning ................................................................. 3
- Bus 315, Principles of Management or ................................................. 3
- Bus 316, Principles of Marketing

(Note: Bus 315, Principles of Management or Bus 316, Principles of Marketing may be taken as a core course. The alternative course may also be taken as an elective.)

Electives: ................................................................. 6
- Bus 217, Personal Finance
- Bus 319, Leading Nonprofit Organizations
- Bus 327, Internet Business Strategies
- Bus 330, Entering Family Business
- Bus 402, Applied Entrepreneurship
- Bus 409, Internship in Business
- Econ 202, Principles of Economics

Minor for majors in accounting, business or BIS

Required core courses:
- Bus 121, Introduction to Entrepreneurship ........................................... 3
- Bus 328, Venture Planning ................................................................. 3
- Electives: (choose two) ................................................................. 6
  - Bus 217, Bus 319, Bus 327, Bus 330 or Bus 402

F. Organizational Leadership Program

A major in organizational leadership is offered as an evening program for adults, leading to the bachelor’s degree. For further information, please see descriptions under the DAES listing.

G. Continuing Education Programs in Family Business and Management Development

Family Business Program provides a variety of educational services for people involved in family owned and managed businesses and for students from a family that owns and/or manages a business. The Family Business Program Series offers quarterly seminars focusing on topics and issues pertinent to family businesses. Other services include Executive Breakfast meetings, affinity groups, a Family Business Library and a referral service for family firms seeking counsel from qualified professionals.

Bus 330, Entering Family Business (3 hours) is an evening course offered in the fall semester and is available to both college students and community people involved in family businesses.

Participation in the Family Business Program is on an annual membership basis and is open to both family business firms and professional firms that serve family businesses. Information about the program is available by calling the Family Business Program office, (574) 535-7135. J. Alvarez, director.

Management Development Program provides a variety of short courses and seminars for the local business and professional community. Special programs can be designed for “in-house” presentation for individual organizations. Participants can earn continuing education units. More information is available by calling the Management Development Program office, (574) 535-7150.

Major in chemistry

51 credit hours

Completion of the following courses or equivalent:
- Chem 111-112, General Chemistry ................................................... 8
- Chem 200, Analytical Chemistry ...................................................... 4
- Chem 303-304, Organic Chemistry .................................................. 8
- Chem 310, Thermodynamics ............................................................ 4
- Chem 312, Quantum Mechanics I ..................................................... 4
- Chem 409, Chemistry Internship ...................................................... 0-3
- Chem 410, Senior Seminar ............................................................. 3
- Chem 415, Inorganic Chemistry ........................................................ 4
- Math 211-212, Calculus I and II ......................................................... 8
- Phys 203-204, General Physics .......................................................... 8

Additional recommended courses:
- Chem 420, Organic Analysis ............................................................. 4
- Chem 430, Biochemistry ................................................................. 4
- Math 213, Calculus III ................................................................. 4
- Chem 350, Environmental Chemistry .............................................. 4
- Chem 450, Introductory Research Problems ..................................... 1-3

Fundamental computer competency is expected. Chem 409, Chemistry Internship or an equivalent noncredit experience is required.

Planning guide – option A

First year
- General education
- General Chemistry
- Calculus I, II
- Calculus III recommended (May)

Second year
- General education
- Organic Chemistry
- Analytical Chemistry
- SST (summer)

Third year
- General education
- General Physics
- Quantum Mechanics I
- Inorganic Chemistry

Fourth year
- Balance of general education
- Biochemistry
- Thermodynamics
- Internship
- Senior Seminar

Planning guide – option B

First year
- General education
- General Chemistry
- Calculus I, II
- Calculus III recommended (May)

Second year
- General education
- Organic Chemistry
- General Physics
- SST (summer)
Third year
- General education
- Analytical Chemistry
- Biochemistry
- Thermodynamics
- SST (fall or summer)

Fourth year
- Balance of general education
- Quantum Mechanics I
- Inorganic Chemistry
- Internship
- Senior Seminar

A secondary teacher-education program is available. For more details see education department pages and the Goshen College Teacher Education Handbook.

A cooperative "3+2" program in chemical engineering is available, with three years completed at Goshen College and two years at a cooperating engineering school. See chemistry department faculty members for more information.

Career opportunities
Chemistry graduates are currently working at many levels in business and industry as medical doctors, professors and teachers in college and high school, laboratory chemists, librarians and administrators.

Courses

Chem 100 Chemical World ........................................ 3
An introduction to chemistry in our society for non-science majors. The course is a hands-on laboratory course based on important and intriguing problems from the world around us. Topics may include forensics, biochemical, environmental, household, medicinal, and nuclear chemistry. Modern instruments and analysis will be used to collect and discuss data. Lectures and laboratory. Prerequisite: one year of high school algebra.

Chem 101-102 Chemistry and Physics of Life ............... 3+4
Designed for nonscience majors. Chem 101 gives students a condensed foundation of chemistry principles. Chem 102 focuses on organic and biochemistry. Prerequisite: Chem 101: none. Chem 102: Chem 101, consent of the instructor or at least two semesters of high school chemistry with grades of B- or higher.

Chem 111-112 General Chemistry ............................. 4+4
An introduction to the basic particles of matter, the modern concept of the atom, chemical bonding and the structure of chemical compounds. The physical and chemical properties of some elements and compounds are examined. Reaction equilibrium and kinetics, acid-base theory, electrochemistry, radiochemistry and thermodynamics are included. Lectures and laboratory. Prerequisite: Chem 100 or high-school chemistry (grade C or better) and adequate pre-calculus math.

Chem 200 Analytical Chemistry ............................... 4
Quantitative analysis using traditional and instrumental methods. Lectures and laboratory. Prerequisite: Chem 111-112 or consent of instructor.

Chem 220 Human Nutrition ...................................... 3
A study of the nutritive needs of the body in normal stages of growth and development, food sources of nutrients, nutrient functions and factors affecting nutrient utilization. Current U.S. and global nutritional problems are explored. Prerequisite: Chem 101 or 111 (Biol 203 and 204 recommended).

Chem 303-304 Organic Chemistry ......................... 4+4
The structure, physical properties and reactions of organic compounds with an emphasis on the mechanisms by which these reactions take place. Stereochemistry, effect of structure on reactivity and spectroscopy (IR, NMR, UV, MASS) are discussed. Chem 303 is an organic chemistry survey course that covers all major functional groups, with an emphasis on those pertinent to biology. Chem 304 addresses more advanced topics. Laboratory experiments teach experimental techniques; instruments (GC/MS, FT IR, FT NMR, GC) are used by students. Lectures and laboratory. Prerequisite: Chem 111-112.

Chem 310 Thermodynamics .................................... 4
A study of classical thermodynamics in the formulation of Gibbs. Thermodynamic potentials, characteristic variables, stability, homogeneous and heterogeneous systems, chemical kinetics are treated. An introduction to statistical mechanics is presented. Applications include studies of material properties and engineering systems. Lectures and laboratories. Prerequisites: Phys 203-204, Chem 111-112, Math 212 or consent of the instructor.

Chem 312 Quantum Mechanics I ............................ 4
Principles of quantum mechanics are discussed beginning with a hydrogen atom and concluding with many atom molecules. The material is examined using the physical evidences that support the theory of quantum mechanics, particularly spectroscopy. The course also discusses symmetry of molecules, theory of NMR and X-ray diffraction. Lectures and laboratory. Prerequisites: Phys 203-204, Chem 111-112, Math 212 or consent of the instructor.

Chem 350 Environmental Chemistry ........................ 4
A laboratory intensive course with two lectures and two three-hour labs each week. Will include sampling, statistics and techniques involved in determining the level of contaminants in the environment. Although some instrumental theory will be discussed, the course will emphasize experimental technique. Students will gain hands-on experience collecting authentic environmental samples and using modern instrumentation and methods for detecting the presence of a variety of inorganic and organic compounds. Instruments used in the laboratory will include AA, HPLC, GC and GC-MS as well as standard commercial test kits. The students will gain experience using EPA methods for determining the level of contaminants in their samples. Prerequisite: Chem 111-112 and Chem 303.

Chem 400 Advanced Preparations .......................... 1-2
Projects involving advanced laboratory techniques.

Chem 409 Chemistry Internship .............................. 0-3
Designed to give the student practical experience in chemistry. May involve work in a chemical industrial laboratory or production facility or an academic research activity. Students may also propose their own projects. 120 hours of work experience are required.
Chem 410  Senior Seminar  .......................... 3
An exploration of the relations between the natural sciences and other broad areas with special emphasis on ethical and theological concerns. Discussion, lectures, preparation and presentation of papers. Prerequisite: Senior standing.

Chem 415  Inorganic Chemistry  .......................... 4
Emphasis on models of structure and bonding as related to chemical and physical properties. Discussions will include descriptive chemistry of the elements, coordination and organometallic compounds and solid state materials. The laboratory component emphasizes synthesis and characterization of inorganic compounds. Prerequisites: Chem 200, Chem 303-304, Chem 312.

Chem 420  Organic Analysis  .......................... 4
Structure elucidation using instrumental techniques (NMR, FT-IR, MS, UV). Advanced synthesis and identification of organic compounds. Lectures and laboratory. Prerequisite: Chem 303-304.

Chem 430  Biochemistry  .......................... 4
Introduction to the chemical processes of living organisms, both plant and animal, with secondary attention to structure and organization. Lectures and laboratory. Prerequisite: Chem 303-304.

Chem 450  Introductory Research Problems  .............. 1-3
Laboratory and conference. Prerequisite: consent of instructor.

Communication
Chair, Associate Professor D. Stoltzfus
Associate Professors R. Johnson, P. McFarlane
Assistant Professor J. Samuel

The communication department offers a major and minor in communication and minors in writing and multimedia communication. Concentrations within the communication major include broadcasting, journalism, film studies, generalist, multimedia and public relations. The department also offers courses that meet Goshen College’s general education requirements. Co-curricular activities and internships, supervised by faculty members, constitute an integral part of departmental programs.

The department considers communication a dynamic field of study that prepares students to engage in meaningful service and fulfilling careers. Also, involvement in communication provides avenues for self-discovery and creative expressions, giving students a strong base for further learning in graduate, professional and personal contexts.

Communication department faculty members endeavor to keep informed of academic advances and the latest professional practices to prepare students well for graduate study and careers. Faculty members are especially attuned to contemporary ethical issues and attempt to bring the college’s Christian/Anabaptist orientation to bear on these issues.

A. Communication
Communication program
Communication students at Goshen College have numerous opportunities to apply their classroom learning and to test their vocational interests. Students can develop leadership skills in broadcasting (The Globe), journalism (Maple Leaf and Record), public address (the C. Henry Smith Peace Oratorical Contest) and video production (GC-TV). Student journalism organizations are based in a Communication Center with a full-service newsroom and suite of offices. The Globe studios feature state-of-the-art digital and computer-based equipment with satellite connections; GC-TV also is equipped with digital and computer-based production and editing equipment.

Career opportunities
Graduates have pursued vocations as broadcasters, reporters, editors, public relations and advertising practitioners, educators, attorneys, business executives and church leaders.

Major in communication
Students majoring in communication must complete at least 38 hours of communication and related courses. All communication majors, in consultation with a faculty advisor, develop a plan of study that includes one of the concentration areas below. Basic requirements for the major include these courses:

All communication majors are required to take the general education course Comm 202, Oral Communication for three credit hours.

Comm 204, Expository Writing........................................ 3
Comm 240, Communication Research ................................ 3
Comm 270, Media Law and Ethics.................................... 3
Comm 383, Communication and Society ................................ 3
Comm 300, Communication Practice*.................................. 2
Comm 409, Internship*.................................................. 3
Comm 410, Senior Seminar............................................. 3
Area of concentration................................................. 18 (minimum 9 upper level)
*Comm 200/Communication Practice should be with a co-curricular
closely related to the area of concentration. The Comm 409/Internship should be in the student’s area of concentration.

A portfolio or its equivalent is required for graduation.

**Concentration options**

**Broadcasting (Radio and Television)**

Required: (14 hours)
- Comm 190, Introduction to Radio .................................................. 1
- Comm 212, Broadcast Media Production I ........................................... 3
- Comm 250, Writing for Media ......................................................... 3
- Comm 290, Radio Operations .......................................................... 1
- Comm 260, Broadcast Writing .......................................................... 3
- Comm 312, Broadcast Media Production II ......................................... 3

Elective: (choose four hours)
- Comm 324, Principles of Public Relations ......................................... 3
- Comm 326, Creating for the Web ..................................................... 3
- Comm 386, Film ............................................................................. 3
- Comm 412, Special Project .............................................................. 1-3

Students are required to participate in at least four semesters with GCTV and/or GCTV and/or theater.

**Journalism**

Required: (9 hours)
- Comm 250, Writing for Media ......................................................... 3
- Comm 212, Broadcast Media Production I ........................................... 3
- Comm 350, Reporting for the Public Good ......................................... 3

Elective: (choose nine hours)
- Comm 108, Digital Design ............................................................... 3
- Comm 190, Introduction to Radio ...................................................... 1
- Comm 260, Broadcast Writing .......................................................... 3
- Comm 312, Broadcast Media Production II ......................................... 3
- Comm 325, Photo Communication ................................................... 3
- Comm 290, Radio Operations .......................................................... 1
- Comm 308, Feature Writing ............................................................. 3
- Comm 324, Principles of Public Relations ......................................... 3
- Comm 326, Creating for the Web ..................................................... 3
- Comm 412, Special Project .............................................................. 1-3

Students are required to participate in at least four semesters with GCTV, The Record, Maple Leaf and/or The Globe.

A journalism teaching minor is available for grades 5-12. See the teacher education department for more information about teacher certification in journalism.

**Film studies**

To obtain a film studies concentration a student must satisfactorily complete one full semester at the Council for Christian Colleges and Universities’ Los Angeles Film Studies Center, or an approved alternative off-campus program. This concentration cannot be completed solely in residence at Goshen College.

Required: (19 hours)
- Comm 212, Broadcast Media Production I ........................................... 3
- Comm 386, Film ............................................................................. 3
- Film studies program ..................................................................... 13

(9+ hours to fulfill Comm 409 requirement)

Recommended related (not required):
- Comm 235, The Power of Story ....................................................... 3
- Engl 230, Literature and Film ......................................................... 3
- Thea 245, Aesthetics ...................................................................... 3
- Comm 255, Photo Communication .................................................. 3
- Comm 312, Broadcast Media Production II ....................................... 3
- Thea 332, Design for the Theater .................................................... 3
- Thea 334, Acting ............................................................................ 3
- Comm 386, Film ............................................................................. 3
- Comm 412, Special Project .............................................................. 1-3

Students are required to participate in at least four semesters with GCTV, The Globe, the Maple Leaf and/or Record.

**Generalist (18 hours)**

This concentration is individually designed, in consultation with the faculty adviser, to develop individual areas of interest or encompass a broad base of communication areas. The course selection must include at least nine upper-level hours, at least nine hours in “communication” and at least six hours from the communication department. Generalist students are required to participate in at least four semesters with one or more relevant department co-curricular activities.

**Multimedia communication**

Required: (12 hours)
- Comm 108, Digital Design ............................................................... 3
- Comm 212, Broadcast Media Production I ........................................... 3
- Comm 326, Creating for the Web ..................................................... 3
- Comm 375, Multimedia Concepts ..................................................... 3

Elective: (choose six hours)
- Comm 206, Communicating Across Cultures ..................................... 3
- Comm 255, Photo Communication ................................................... 3
- Comm 312, Broadcast Media Production II ....................................... 3
- Comm 314, Broadcast Media Production III .................................... 3
- Comm 315, Information Technology Hardware and Networks .......... 3
- Comm 412, Special Project .............................................................. 1-3

Students are required to participate in at least four semesters with GCTV, The Record and/or The Globe.

**Public relations**

Required: (9 hours)
- Comm 206, Communicating Across Cultures ..................................... 3
- Comm 322, Organizational Communication ...................................... 3
- Comm 324, Principles of Public Relations ......................................... 3

Elective: (choose nine hours, at least three must be Comm hours)
- Comm 206, Communicating Across Cultures ..................................... 3
- Comm 255, Photo Communication ................................................... 3
- Comm 290, Radio Operations .......................................................... 1
- Comm 308, Feature Writing ............................................................. 3
- Comm 324, Principles of Public Relations ......................................... 3
- Comm 386, Film ............................................................................. 3
- Thea 235, The Power of Story ....................................................... 3
- Comm 250, Writing for Media ......................................................... 3
- Comm 325, Photo Communication .................................................. 3
- Comm 260, Broadcast Writing .......................................................... 3
- Comm 308, Feature Writing ............................................................. 3
- Comm 325, Photo Communication .................................................. 3
- Comm 314, Acting ............................................................................ 3
- Comm 336, Advertising .................................................................. 3
- Comm 350, Reporting for the Public Good ....................................... 3
- Comm 412, Special Project .............................................................. 1-3

Students are required to participate in at least four semesters with GCTV, The Globe, the Maple Leaf and/or Record.
Planning guide

First year
- General education
- Communication Research
- Oral Communication

Second year
- General education
- Media Law and Ethics
- Expository Writing
- Courses in major
- SST

Third year
- General education (including humanities requirement)
- Communication and Society
- Courses in major

Fourth year
- Balance of general education
- Balance of major
- Internship
- Senior Seminar

Minor in communication

Students minoring in communication must complete 18 hours in communication in addition to taking Comm 202, Oral Communication for three hours.

Core courses (six hours)
- Comm 240, Communication Research .............................................. 3
- Comm 383, Communication and Society ............................................. 3

Concentration (12 hours)
Individually designed, with at least nine hours in communication and at least six of these hours in the GC communication department. At least five of the concentration hours should be upper level.

Communication minors may take additional hours in the department, but the total number of communication hours applied toward the degree may not exceed 45. Also, students may earn a maximum of 12 hours of credit for experiential learning in Comm 200, 209, 409 or 412.

Minor in multimedia communication

The multimedia communication minor is offered by the art, communication, computer science and business information systems departments. Students in this program learn to design and develop Web sites and CD-ROM presentations that convey information effectively and aesthetically. A student must complete 18 credit hours (including at least eight upper-level hours) to receive a multimedia communication minor. Required are:
- Art 106, Digital Design ................................................................. 3
- BIS 220, Office Software Productivity .............................................. 3
- Comm 326, Creating for the Web .................................................... 3
- Art/Comm 375, Multimedia Concepts ............................................. 3

An additional six hours (at least two hours upper level) ......................... 6
must be selected from the following courses:
- Art 107, Design
- Art 208, 308, 408, Graphic Design I, II, III
- BIS 310, Information Technology Hardware and Networks
- Bus 336, Advertising
- Comm 212, Broadcast Media Production I
- Comm 250, Writing for Media
- CoSc 105, Introduction to Computer Science
- CoSc 375, Special Topics (must be related to multimedia communication)
- CoSc 400, Independent Study (must be related to multimedia communication)

Minor in writing

The writing minor is administered by the communication and English departments. Students selecting this minor must complete 18 hours. Students may focus on exposition/journalism or creative writing while augmenting those with courses in production/internships. See English department pages for more details.

Courses

Comm 108 Digital Design ................................................................. 3
(See Art 108)

Comm 190 Introduction to Radio ...................................................... 1
This applied course, offered on a credit/no-credit basis only, prepares students for work at The Globe. Students attend lecture-discussion periods, engage in self-study and learn to operate the station through tutorial shifts.

Comm 200 Communication Practice .............................................. 1-2
Applied work in communication with the student newspaper, yearbook, GC-TV, The Globe or other on-campus communication activity. A maximum of two hours applicable toward a communication major or minor. Consent of instructor required.

Comm 202 Oral Communication ..................................................... 2-3
A study of communication theories as applied to oral communication. Practical experience in a variety of activities including interpersonal communication, public speaking, small-group communication, persuasion and nonverbal communication. Attention is given to communicating in a culturally diverse society. Theories and principles of oral communication will be studied in all sections though individual professors may structure their courses around specific themes such as Border Crossings and Oral History. Communication and theater majors should take this course for three credits.

Comm 204 Expository Writing ......................................................... 3
(See Engl 204)

Comm 206 Communicating Across Cultures .................................... 3
A study of cultures, comparative message systems and principles of cross-cultural communication. A focus on current issues having to do with cultural interactions. Students analyze cultural dynamics through ethnographic projects, films and simulations. This course is designed as preparation for SST or for living in settings unlike one's native home.

Comm 209 Field Experience ............................................................ 1-3
Experiential learning, usually in an off-campus professional setting, for communication majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. The 209 level is intended for first-year and sophomore students. Upper-level students should enroll in 409. Prerequisite: Comm 202 or Comm 204.

Comm 212 Broadcast Media Production I ......................................... 3
An introduction to broadcast media production with an emphasis on audio and video production. The primary goal of the course is the development of the necessary skills and understandings needed to create effective broadcast media messages. Secondary goals are to give an overview of media production tools and techniques and to explore aesthetic and ethical issues of media. This course places emphasis on the “craft” roles of media production personnel. Students will gain production craft experience as members of a production team.

Comm 240 Communication Research
An introduction to theory building and research methodology of mass communication. Course focuses on the practical aspects of communication research, providing a framework for conducting quantitative and qualitative research.

Comm 250 Writing for Media
An introductory newswriting course devoted to print, broadcast and multimedia environments. The course will cover news judgments and news values; reporting strategies; research techniques; forms of journalistic writing; and Associated Press style. Prerequisite: Engl 110 or equivalent.

Comm 255 Photo Communication
A first course including 35-mm camera use, film processing, black-and-white darkroom printing, digital camera use, digital enhancement skills using computers and color digital printing. Assignments deal with ways to communicate through subject matter, composition and technical creativity. Special emphasis is placed on photojournalistic approaches to news and feature stories. Some assignments encourage students to set individual creative and artistic goals. Students must provide their own 35-mm camera capable of manual exposure and film speed settings.

Comm 260 Broadcast Writing
Students will study the principles, forms and techniques of writing for broadcast media. Assignments will focus on the writing and editing of broadcast news and commercial messages. Prerequisite: Comm 250.

Comm 270 Media, Law and Ethics
A course devoted to models of ethical decision making as they are applied to mass media issues, with special attention given to Christian perspectives. The course will cover issues like access to information, accuracy, conflicts of interest, deception, fairness, libel, obscenity, plagiarism and privacy.

Comm 290 Radio Operations
An applied course providing advanced instruction and experience in radio station operations, emphasizing four areas: announcing, systems operations (computer-based operations, satellite downlinking, basic productions, etc.), programming and management. Course work includes assisting The Globe managers in such areas as programming, production and operations. Prerequisite: Comm 150.

Comm 308 Feature Writing
Students will study nonfiction writing forms, including narrative journalism, and learn the process of publishing articles in newspaper, magazine and online markets. Students will prepare articles for submission. Prerequisite: Comm 204 or Comm 250 or equivalent.

Comm 312 Broadcast Media Production II
Advanced study of broadcast media production with an emphasis on audio and video production. The primary goal of the course is the development of advanced skills and understandings needed to create effective broadcast media messages. Secondary goals are to give extended development of media production tools and techniques and to explore aesthetic and ethical issues of media. This course places emphasis on the “creative” roles of media production personnel as producers, directors and designers. Students will take creative responsibility for media productions, including supervision of a production team. Prerequisite: Comm 212.

Comm 314 Broadcast Media Production III
The primary focus of this course is on advanced integration of audio and video elements in program-length productions. Capabilities of computer-aided editing and digital audio and video will be explored in depth. The major project for the class will accommodate an individual's interest in either audio or video. Prerequisite: Comm 312 or consent of instructor.

Comm 322 Organizational Communication
An exploration of communication within organizations, as well as communication between organizations and the larger society. Topics include theories of communication and organizational structure; examination of power, culture and conflict in organizations; and analysis of oral and nonverbal messages in interpersonal, small-group and public settings. Assignments will assist students in developing skills in listening, analysis, speaking and written. Prerequisite: Comm 240 or Bus 316.

Comm 324 Principles of Public Relations
Introduction to public relations contexts, issues and practices – research, planning, communicating and evaluating. Emphasis on skills in analyzing public opinion and in communication with internal and external publics, with special attention to non-profit organizations. Prerequisite: Comm 240 or Bus 316.

Comm 326 Creating for the Web
This course surveys a wide range of media based on new technologies – media such as the World Wide Web, CD-ROM and DVD animation and virtual reality – to explore their strategic use in education and other organizational contexts. The course includes some hands-on research and creative assignments. Attention will be given to legal and ethical issues associated with new media. Prerequisite: Comm 240 or Bus 316.

Comm 340 Audio Production
Journalism’s role in serving the public good will be in the forefront as students discuss civic journalism, the watchdog function of the news media, tensions between profits and public service and the advocacy of peace and justice. Students will focus on significant independent reporting projects intended to advance the public good. Prerequisite: Comm 250 or equivalent.

Comm 350 Reporting for the Public Good
This course surveys a wide range of media based on new technologies – media such as the World Wide Web, CD-ROM and DVD animation and virtual reality – to explore their strategic use in education and other organizational contexts. The course includes some hands-on research and creative assignments. Attention will be given to legal and ethical issues associated with new media. Prerequisite: Comm 240 or Bus 316.

Comm 357 Multimedia Concepts
A study of communication issues in modern society with attention to the persons, institutions, media and systems that facilitate social interaction. An overview of communication philosophy as a basis for ethical and aesthetic perspectives.

Comm 385 Studies in Communication
Investigations into particular communication issues: social, scientific, philosophic, historical, aesthetic, political or institutional. Focus on an institution or topic of current interest.
Computer science
Chair, Professor D. Houseman
Professors P. Oakley, F. Sauer

The computer science program at Goshen College is an academic discipline that provides theoretical and applied perspectives on computer systems, software and hardware. Areas of study include problem-solving techniques, algorithm design and analysis, software design and development, computer hardware, mathematics, human-computer interaction and ethics.

The liberal-arts context of the program produces graduates who are prepared for life-long learning in a rapidly changing discipline, who can communicate well and who have a broad understanding of other disciplines – characteristics that employers value highly.

Career and graduate school opportunities
Our computer science graduates are employed in many careers such as programmers, analysts, teachers, business owners, project managers, Web developers and network specialists. They work in business, insurance companies, banks, accounting firms, computer consulting agencies, telecommunications firms, higher education institutions and many other settings. Our students who go to graduate school are successful in earning master's and Ph.D. degrees.

Degrees and programs
The computer science department offers the following programs:

- a bachelor of arts in computer science;
- a bachelor of arts in computer science and applied mathematics (in conjunction with the mathematics department); and
- a minor in computer science.

The computer science, business, art and communication departments cooperate to offer a minor in multimedia communication. A degree and minor in business information systems is described in the business department pages.

Computing facilities
Goshen College has a campus-wide computer network that interconnects residence halls, multimedia classrooms, computing labs and faculty offices. Each student has access to e-mail and to the Internet. Computer laboratories provide students free access to PC and Macintosh computers. Software available for student use includes various programming language compilers, mathematical and statistical analysis programs, computer-aided drafting software, multimedia software, database programs, spreadsheet programs and word processing programs. Students in upper-level computer science or business information systems courses have access to an advanced computing lab equipped with state-of-the-art PC computers, current software and several servers and networks.

General and departmental academic requirements
Major in computer science: 50 credit hours
Major in computer science and applied mathematics: 60 credit hours
Minor in computer science: 18 credit hours

Computer science majors must obtain a grade of C or better in each computer science course counted for the major. Any student taking a computer science course must obtain a grade of C or better in all prerequisites for that course prior to taking the course.
Major in computer science

Minor in computer science
A minor consists of 18 credit hours in computer science. The 18 hours
must include a minimum of eight upper-level credit hours (300 or 400
level). The courses selected must include:
CoSc 200, Programming Techniques ........................ 4
Math 205, Discrete Mathematics ............................ 3
At least one 300-level course ................................ 3
Any other 200-level or higher computer science courses to fulfill the
credit-hour requirements.

Major in computer science and applied mathematics
(60 credit hours)
This degree is a rigorous, yet flexible, applied science degree. It offers
excellent preparation for a career in applied mathematics, programming
in science, industry or engineering. It also offers a strong base for
graduate study in computer science or in applied mathematics. The
18 hours of electives permits students to individualize the program.
The program is close to a double major in computer science and
mathematics and can be completed in four years. Degree requirements
are designated in three different areas:

Computer science core
23 credit hours
CoSc 200, Programming Techniques .......................... 4

Minor in multimedia communication
The multimedia communication minor is offered by the art, business,
communication and computer science departments. For further
information, see the full description in the communication department
pages.

Courses
CoSc 105  Introduction to Computer Science ............... 3
An introduction to basic computing concepts, hardware and software.
Topics include a history of computing devices, Web and Internet use,
an introduction to algorithmic solutions to problems, programming
concepts such as variables, loops and iteration, elementary programming,
the function of an operating system, careers in computing and social
and ethical considerations in computer science. No prerequisite.

CoSc 200 Programming Techniques .......................... 3-4
An introduction to problem solving, algorithm development
and structured programming techniques. Topics include pseudo-code,
language syntax and semantics, applets and applications, loop and
control constructs, primitive data types, objects, arrays, lists, files, graphical user interfaces, recursion, sorting and searching. Includes three lectures and one 75-minute lab each week. Computer science and business information systems majors are required to register for four credit hours. Others may register for three credit hours. In the three-hour option, students complete three-fourths of the course. Offered spring semesters. Prerequisite: CoSc 105 or equivalent experience.

CoSc 215  Data Structures and Algorithms  4
A continuation of Programming Techniques. Emphasis is placed on program specifications, data abstraction, information hiding, encapsulation and object-oriented programming. Traversing, sorting and searching algorithms are studied along with an analysis of time-space complexity. Data structures studied include lists, stacks, queues, trees and graphs. Includes three lectures and one 75-minute closed lab each week. Offered fall semesters. Prerequisite: CoSc 200 (four credit hours); corequisite Math 205.

CoSc 315  Advanced Programming  4
A programming course that emphasizes visual-based programming tools and advanced programming concepts such as the use of APIs, development of GUIs, event-driven programming, multithreading and client- and server-side programming. Actual topics included in the course may vary from semester to semester. Offered spring semesters. Prerequisite: CoSc 215.

CoSc 325  Data Communications  3
Computer interfacing, serial and parallel I/O techniques, modems, file transfer, data communications and common computer networking protocols. Offered alternate spring semesters (2007-08). Prerequisites: CoSc 200 (three or four credit hours) and Math 205.

CoSc 335  Computer Architecture  3
A study of computer organization, architecture, basic logic design and assembly level programming. Topics include logic gates, basic digital circuits, microprocessors, micro-programming, memory addressing, address buses, assembly level programming and addressing techniques. Offered alternate fall semesters (2006-07). Prerequisites: CoSc 200 (three or four credit hours) and Math 205.

CoSc 340  Introduction to Artificial Intelligence  3
An introduction to basic concepts in artificial intelligence: state spaces, search, heuristics, knowledge representation, problem-solving paradigms, rule-based systems and neural networks. Some examples of applications in natural language processing, speech, vision, robotics, expert system or machine learning are presented. Includes an introduction to LISP or Scheme, Prolog and an expert systems shell. Prerequisite: CoSc 215.

CoSc 345  Theory of Computation  3
An introduction to topics in formal systems of computation: Turing machines, post productions, recursive functions, finite state automata, halting problem, undecidability, P/NP problems. Offered alternate years (2007-08). Prerequisites: CoSc 215 and Math 211.

CoSc 360  Operating Systems  3
A study of operating system concepts and structures with a major focus on process control, memory management, I/O management and concurrent processes. Offered alternate spring semesters (2006-07). Prerequisite: CoSc 215.

CoSc 375  Special Topics  3
Credit Arranged
Classroom study of advanced or special topics in computer systems. May be repeated. Offered according to demand. Prerequisite: upper-level status and consent of instructor.
Education
Chair and Coordinator of Teacher Licensure, Associate Professor M. Mast
Professors K. Meyer Reimer, A. Stalter
Assistant Professor B. Stahly
Adjunct Faculty S. Esh, M. Nolt

Preparing for tomorrow's classrooms
Goshen College seeks to graduate teachers who interact with their students and the content they teach, to construct meaning for living responsibly in a changing world. Programs offered include elementary education (K-6); elementary/special education (K-6); all grade education in visual art, music, physical education and English as a new language (K-12); and secondary education (5-12) in various subject areas.

Goshen's teacher education programs meet standards set by state and national accrediting agencies. Department faculty members are actively involved in the world of education, teaching in the college laboratory kindergarten or working collaboratively in public school settings.

Goshen College prepares teachers to be lifelong learners who are also professionally active. They also invite pre-service teachers to put their faith into practice in all aspects of teaching and learning.

Several themes emerge throughout all teacher education courses: (1) an emphasis on teaching diverse student populations, including those with special needs; (2) principles of peacemaking inside and outside of the classroom, including conflict resolution skills; and (3) an approach to curriculum which integrates content within and across the disciplines as well as with students' lives.

Education programs available
Elementary education (K-6)
Upon completion of a major in elementary education, students are eligible to be certified to teach kindergarten through sixth grade. Fieldwork takes place in a variety of classroom settings where students learn to teach language arts, math, social studies, science, art, physical education and music. Students also explore approaches to classroom management, discipline and evaluation.

Elementary education/Special education (K-6)
Goshen offers certification in Exceptional Needs: Mild Intervention for K-6 in conjunction with an elementary education certificate. It is a certification that must be completed at the same time as an elementary education certification but does not stand alone as a separate program. To complete this program, 12 additional hours (Student Teaching: Exceptional Needs, Special Education Issues, Learning Disorders and Social Emotional Disorders) are added to the elementary education program.

All grade education in English as a new language, music, physical education or visual arts (K-12)
All-grade education focuses on the content area while including requirements for general and professional education at all developmental levels.

Secondary education (5-12)
Students can be certified to teach fifth through twelfth graders upon completion of teacher education requirements for teachers of early adolescence, adolescence and young adults and content requirements in the chosen field of instruction. Goshen offers teaching majors in business, chemistry, English, English as a new language, journalism, Spanish, bilingual/bicultural, mathematics, music, physical education, physics, life science, social studies and theater arts.

Special attributes of Goshen's teacher education program
- Elementary and exceptional needs dual certification program: Nationally, there is a critical shortage of special education teachers. Completing this dual certification program dramatically increases a candidate's marketability. In addition, all classrooms include students with special needs. We believe that all special education teachers need to know what regular classroom teachers know, and all regular classroom teachers need to know what special education teachers know. The marriage of these two licensure content areas will prepare candidates to meet the needs of all students in their classrooms.
- English as a New Language: Schools continue to need teachers who are skilled in teaching students who do not speak English as their first language.
- Conflict transformation: As school violence has increased, we have seen the need for teacher candidates to develop skills in conflict mediation. In collaboration with the peace, justice and conflict studies department, we are able to offer a series of three courses that equip our students in being able to help transform conflict peacefully. We strongly recommend that all teacher education candidates complete this sequence, which results in a Goshen College Certificate in Conflict Transformation (see below).
- Environmental education: Goshen College is fortunate to have integrated Merry Lea Environmental Learning Center into content area courses so all elementary majors have the opportunity to work in environmental education as part of their program.

Admission to the program
Students generally apply for admission to the Goshen College teacher education program during the sophomore year. Admission to the program includes:
- successful completion of the reading, writing and mathematics sections of the Pre-Professional Skills Test;
- a review of your high school record;
- successful performance in early fieldwork experiences;
- supportive references from former teachers;
- demonstrated experience with children or youth;
- successful completion of the technology competency; and
- a written essay.

Teacher education students must maintain a 2.5 GPA overall and a 2.8 in their content area. All content related courses for the license content area must be passed with at least a C.

Fieldwork experiences
An important part of Goshen's teacher education program is learning first-hand in the schools. Students will work in a variety of settings with diverse populations. If Study-Service Term (SST) is part of the international education experience, students will also have the opportunity to work with children or youth in another culture.

Student teaching experience
School systems in the area cooperate with Goshen College to provide strong and varied student teaching experiences. Preservice teachers experience a broad spectrum of classroom situations. During the student teaching experience, students will work 12 or more weeks full time in a local school system and will be supervised by classroom teachers and college professors.
Certification for teaching
After satisfactorily finishing an approved teaching program and successfully completing the Praxis II exam, students will apply and be recommended for licensure. Goshen graduates are generally eligible for initial or conditional certification in other states.

Accreditation
Goshen College is accredited by the North Central Association of Colleges and Secondary Schools and is authorized by the Indiana State Board of Education to prepare teachers for elementary and secondary schools. The teacher education program has been accredited by the National Council for Accreditation of Teacher Education since 1954.

Special facilities
- Laboratory kindergarten
  Since 1959, a laboratory kindergarten has been operated by the education department in the Church-Chapel Building. The laboratory kindergarten is an integral part of teacher education at Goshen College. It provides opportunities for (1) observation of child development and behavior; (2) observation of teaching procedures; and (3) field placements for the kindergarten internship.
- Merry Lea Environmental Learning Center
  A 1,150-acre nature conservancy owned by Goshen College which hosts more than 5,000 school children each year for outdoor education.
- Curriculum library, Peace Curriculum Collection and Royer Reading Room (Children’s Literature Collection) in the Harold & Wilma Good Library.

Teaching content areas
Goshen College has been approved by the Indiana State Board of Education to offer the following content areas and all-grade content areas.

Planning guide – secondary education

First year
- General education
- Literature and Writing
- Oral Communication
- Technology Competency
- Transforming Conflict and Violence
- Science/Math
- Introductory courses in major

Second year
- General education
- Inclusive Schooling
- Mediation: Process, Skills and Theory (strongly recommended)
- Educational Psychology
- Science/Math
- Expository Writing (strongly recommended)
- Courses in major

Third year
- Child Development Practicum (K-12 only)
- Adolescent Exceptional Learners
- Middle School Curriculum & Instruction
- General education
- Curriculum & Instruction: General Methods
- Curriculum & Instruction: Content Methods (not for K-12 programs)
- Courses in major/content area

Fourth year
- General education
- Conflict in Groups (strongly recommended)
- Balance of major and certification requirements
- Student Teaching (fall)
- Education Seminar

Certificate in conflict transformation for teachers
This certificate may be added to an elementary, middle school, or secondary education program. For further information, consult with a member of the teacher education faculty. Education students who wish to complete the conflict transformation studies minor at the conclusion of their certificate requirements should declare the minor and consult with a PJCS adviser for further details. (9 hours)
- PJCS 210, Transforming Conflict and Violence ........................................... 3
- PJCS 325, Mediation: Process, Skills and Theory ........................................ 3-4
- PJCS 426, Conflict in Groups ................................................................. 3-4

Courses
- Educ 030 Technology Competency ...................................................... 1 (non-credit)

All education students must demonstrate competency in the area of technology. At the beginning of each school year a performance-based assessment will be offered as an opportunity for students to test out of this requirement. Students who cannot successfully complete the assessment will be required to complete this course. The course consists of computer based tutorials designed to teach general competencies in the following subject areas: operating systems, word processing, spreadsheets, Web browsing, e-mail, multimedia, Web page authoring and presentation software. Conducted largely as an independent study course. Credit hours earned in this course meet the teacher education requirement for technology, but do not count as hours toward graduation.

- Educ 201 Inclusive Schooling ............................................................... 3

Includes both campus and field study of learning environments, classroom management and instructional methods that meet the needs of diverse student populations with emphases on race, gender, ethnicity, socio-economic status, family structures, language and exceptionalities.
A study in the development of reading, writing, listening and speaking.

A study of mathematics pedagogy with an emphasis on conceptually sound and developmentally appropriate lessons. Includes selecting and evaluating topics of study, multiple representations of information and instructional strategies, interdisciplinary teaching and using school and community resources. Also includes study of ways to adapt curriculum for special needs students. Field experience in diverse classrooms. Enrollment limited to those who have been admitted to the teacher education program.

A study of the social studies curriculum and pedagogy with special emphasis on moral and identity development birth through adolescence. Includes a guided observation of both a pull-out program and an inclusion classroom.

A study of drama, art and music as it pertains to the elementary education. Participatory experiences, integration across the arts and integration of the arts into the classroom.

Focus on instructional methods, assessment and developing authentic engagement that leads to a life-long enjoyment of reading and writing in many modes and styles. A study of literacy development, methodology and curricular options for K-6 learners. Includes study of literacy and developmentally appropriate lessons. Includes selecting and using a wide variety of formal and informal assessments and knowing how to communicate that information to parents and colleagues. Emphasis on using assessment to guide instruction for individuals and groups.

Subject-specific class sessions concentrate on curriculum and instruction in those subject areas. To be taken concurrently with Educ 315 and 321 the year prior to student teaching.

Subject-specific class sessions concentrate on curriculum and instruction in those subject areas. To be taken concurrently with Educ 314 and Educ 321 the year prior to student teaching. Not required for ENL, music, art or physical education content areas.

Instructional methods, strategies and classroom management particularly as they pertain to fifth-eighth graders. Also includes a study of the development of middle schoolers and how that influences which methods and strategies are most appropriate to use. A tutoring clinic is embedded into the framework of this course which will develop students' understanding of theory and practice related to literacy skills in the content area.

A study of drama, art and music as it pertains to the elementary education. Participatory experiences, integration across the arts and integration of the arts into the classroom.

Focuses on assessment, identification, characteristics and instruction of elementary students with learning disabilities, as well as accommodating students with learning challenges who do not qualify for special education services.

Focuses on assessment, identification, characteristics and instruction of elementary students with emotional disabilities, as well as other students with social/emotional difficulties who do not qualify for special education services.

A study of multiple forms of assessment and record keeping. Focuses on knowing how to select, use and interpret a wide variety of formal and informal assessments and knowing how to communicate that information to parents and colleagues. Emphasis on using assessment to guide instruction for individuals and groups.

Issues and policy as they directly apply to schools and teachers including school law, politics, state legislation, unions, educational policy, parent issues and community services and how they function in school settings particularly as they apply to the exceptional needs student. To be taken concurrently with Educ 415.

A study of child development. Focuses on learning theory and the importance of play for young children. Will include a field experience based on the application of developmentally appropriate practice. Required for K-12 art, ENL, music and physical education content areas.

At least 12 weeks of full-day student teaching in elementary schools under the supervision of a licensed elementary teacher and a faculty member of the GC education department. Includes several workshops on campus to reflect on important teaching issues.
An intensive three-week seminar immediately following Educ 405. Uses the licensure portfolio as a frame and also focuses on: educational philosophy, classroom management and discipline, evaluation, integration of faith and teaching. Includes student projects and presentations, group work, variety of approaches to individual reflection on teaching, and preparation of the licensure and presentation portfolios. Corequisite: Educ 405.

At least 12 weeks of full-day student teaching in a secondary school teaching area and a GC faculty member. Includes several workshops on campus to reflect on important teaching issues.

A second course in literacy focusing on observing and recording children's literate behaviors closely to be able to support struggling readers and writers and prevent further difficulties in developmentally appropriate ways. Emphasis on strategic teaching based on the psychosocio-linguistic nature of language. Includes tutoring a struggling reader. Corequisite: Educ 303.

Individual study, research or field experience on a variety of topics.

An intensive three-week seminar immediately following Educ 402. Uses the licensure portfolio as a frame and also focuses on: educational philosophy, classroom management and discipline, evaluation, integration of faith and teaching. Includes student projects and presentations, group work and a variety of approaches to individual reflection on teaching and preparation of the licensure and presentation portfolios. Corequisite: Educ 402.

Ten weeks of half-day student teaching in a mild intervention context, under the supervision of a supervising teacher who is licensed for mild intervention and a GC faculty member of the Goshen College education department. Focuses especially on planning, instruction and assessment, following standards numbers 3, 4, 5, 6, 7 and 8 of IPSB Standards for Teachers of Exceptional Needs. Concurrent course: Educ 346.

The English department provides three distinct majors: one in general English studies, with an opportunity to select elective and upper-level related courses to create an emphasis in creative writing or literature of ethnicity, gender and race; one in teaching English as a second language (TESOL) in a strong intercultural framework; and one in teaching English and language arts to grades 5-12. Three minors enable students to augment any major with literary, writing, or second language skills.

The English department supports the Goshen College mission to develop informed, articulate, sensitive and responsible Christians by teaching skills in critical thinking, reading and writing as well as literary analysis, criticism and theory. Our approach to the study of literature, language and writing emphasizes human stories and the search for truth. By paying special attention to the contexts of literary creation – cultural, philosophical, historical, aesthetic and rhetorical – we seek to impart an understanding of knowledge as power, and the responsible ways in which that power can be used, both to understand the journeys of others and articulate more fully our own personal search for truth in a Christian context. Our English, creative writing and TESOL majors, as well as our co-curricular programs, offer students skills and opportunities to express their perspectives on the world and faith that they encounter at Goshen College and to participate in the circulation of knowledge. Our TESOL and English/language arts secondary education majors offer students practical skills for building bridges between cultures and languages in educational and service positions locally or globally.

English is a versatile major that prepares students for a wide range of jobs after graduation: writing, publishing, public relations, teaching. An English degree also provides a strong base for graduate schools in many fields besides literary study: law school, medical school, creative writing, library science, history, education and even business management. Alumni majors in English are employed in a wide variety of occupations around the world, such as teaching, program management, service with church agencies, journalism, publication, public relations, business, social services and the professions, including law, medicine, library science and the ministry. A significant number of graduates are engaged in teaching English as a second language, especially abroad. Extracurricular opportunities in publishing include writing, editing and/or producing student work through Broadside, Pinchpenny Press or the Horswell Fellowship.

Mission

Opportunities
English majors should normally take a humanities section that covers
*In general education, English majors are encouraged to choose Phil 200 to meet the Phil/PJCS requirement.
**English majors should normally take a humanities section that covers other humanities fields than literature.

Major in teaching English to speakers of other languages (TESOL)
42 to 46 hours, including
English, communication, language* and education (35-39):
  Engl 204, Expository Writing ................................. 3
English/Language arts education (5-12 certification)

A teacher-education program is also available in English. In addition to fulfilling the secondary education requirements and a semester of student teaching, English education majors must meet requirements for the English major, with the specification of the following courses for elective and upper-level related requirements.

Department courses (32)

- Engl 204, Expository Writing
- Engl 300, Critical Theory and Practice
- Engl 301, British Literature to 1800
- Engl 302, British Literature 1800 to Present
- Engl 303, American Literature Survey
- Engl 315, English Language Problems
- Choice of Engl 305, Genre Studies or Engl 306, Major Author
- Choice of Engl 201, Postcolonial Literature
- Engl 307, Topics in Literature: Ethnicity, Gender and Race
- Engl 319, English Syntax
- Engl 410, Senior Seminar
- English electives

Required related courses and General Education (13-14 hrs)

- Comm 200, Communication Practice
- Comm 202, Oral Communication
- PJCS 210, Transforming Conflict/Violence
- Choice of Comm 206, Communicating Across Cultures
- Intl 256, Intercultural Communication
- Educ 307, Child/Adol Lit

English electives (6 required) or electives taken outside the department must include a writing course and a film or performance course from the list below.

Writing courses

- Engl 126, Creative Writing
- Engl 312, Poetry Workshop
- Engl 330, 332, 334, Advanced Writing
- Comm 308, Feature Writing
- Comm 250, Writing for Media
- Comm 260, Broadcast Writing
- Thea 350, Playwriting

Film or performance courses

- Engl 230, Literature and Film
- Comm 386, Film
- Thea 235, Power of Story

Required courses from education (30 hrs.)

- Educ 201, Inclusive Schooling
- Educ 302, Adolescent Exceptional Learners
- Educ 309, Educational Psychology
- Educ 314, Secondary Curriculum & Instruction
- Educ 315, Secondary Curriculum: English Methods
- Educ 321, Middle School Curriculum and Instruction
- Educ 405, Student Teaching: Secondary
- Educ 409, Secondary Education Seminar

*For more details of secondary education requirements see the Goshen College Teacher Education Handbook.

**If combining the TESOL major with any education program, take TESOL methods at the end of the sophomore year.

Planning guide for English/Language arts secondary education major

First year

- General education
- Literature and Writing or Introduction to Literature
- Oral Communication
- Transforming Conflict & Violence (as Gen. Ed. PJCS requirement)

- Postcolonial Literature/Introduction to Creative Writing, and/or
  - Topics in Literature: Ethnicity, Gender and Race
  - Inclusive Schooling

Second year

- General education
- Expository Writing
- Critical Theory and Practice
- British Literature to 1800
- British Literature 1800 to Present
- Communication Across Cultures or Intercultural Communication
- Educational Psychology
- SST

Third year

- General education
- American Literature Survey
- Advanced Writing Communication Practice
- Literature and Film, The Power of Story or Film
- Children's and Adolescent Literature
- Middle School Curriculum & Instruction Secondary Curriculum, Instruction and Content Methods
- Related courses

Fourth year

- Balance of general education
- Secondary Education Seminar
- Student Teaching: Secondary
- English Language Problems
- Balance of major and related courses
- Senior Seminar

English-related minors

Choosing the right minor adds to your employability and expands your knowledge and skills. Students can influence job potential with minors, special course work, or extracurricular activities: TESOL, Web work, business, communication, theater, MCLL, BRP or PJCS, sociology, environmental studies. Eighteen hours, including

Required courses (12)

- Engl 300, Critical Theory and Practice
- Engl 315, English Language Problems
- Any two of the literary survey courses
- Engl 301, British Literature to 1800
- Engl 302, British Literature 1800 to Present
- Engl 303, American Literature Survey

Elective courses (6)

Courses selected from departmental electives in literature, language and writing. English minors are strongly encouraged to take Engl 204.

Minor in writing

The writing minor indicates your superior writing skills. You may select courses that give you an emphasis in creative writing, which is helpful if you are considering an M.F.A. (master's in fine arts). Students will work with an academic adviser to select 15 hours of courses emphasizing a particular area of expertise. Every year a distinguished visiting writer offers an intensive week-long writing workshop to a small group of
A TESOL minor provides you with intercultural and teaching skills that
enhance your role in any profession, but in education or international
work and study in particular. 20-21 hours, including

Required courses (14)
- Engl 310, Introduction to Linguistics ........................................... 3
- Engl 315, English Language Problems ........................................... 3
- Engl 319, English Syntax ............................................................ 1
- Engl 320, Methods of TESOL ..................................................... 4
- Engl 325, Field Experience in TESOL .......................................... 3

Related courses (6-7)
- Comm 206, Communicating Across Cultures or
- Soc 230, Cultural Anthropology or
   additional foreign language courses*

*Prerequisite: competence in a second language equivalent to completion
of 102-level study.

Teaching English to speakers of other languages (TESOL):
One-year certificate

Students with a minimum background of one year of college and skill
in a second language equal to 102-college level may complete this
certificate, which is usually scheduled for completion in one year.

Required courses (14)
- Engl 310, Introduction to Linguistics ........................................... 3
- Engl 315, English Language Problems ........................................... 3
- Engl 319, English Syntax ............................................................ 1
- Engl 320, Methods of TESOL ..................................................... 4
- Engl 325, Field Experience in TESOL .......................................... 3

Elective courses (16)
- Bible or religion ........................................................................... 3
- Comm 206, Communicating Across Cultures or
- Soc 230, Cultural Anthropology or
   additional foreign language courses* ....................................... 3-4
- Any elective course .................................................................... 9-10

Teaching English as a New Language (K-12 certification)

In addition to the requirements for the TESOL major, English as a New
Language (ENL) teachers must fulfill the same education requirements
required of secondary or elementary education majors. For more details see
the Goshen College Teacher Education Handbook and an English adviser.

A. Literature

Goals: Literature courses teach the historical narrative of western and
nonwestern literature along with the skills of literary analysis required
to study authors, genres and literary topics in depth. In both survey
and seminar literature courses, we teach the theoretical framework
and critical apparatus involved in interpreting texts. As one of the
first departments in the United States to offer a course in Postcolonial
Literature, we are committed to examining both the production of and
response to literature in diverse cultural contexts and offering a range of
interdisciplinary courses featuring national and global literary traditions.

Opportunities: Special course offerings provide opportunities to study
literature in off-campus settings such as Ireland or Stratford, Ontario.

Engl 201 Postcolonial Literature .................................................. 3
Study of literature that deals in a significant way with the intersection
of culture, particularly postcolonial literature from Africa, Asia, the
Caribbean and Latin America.

Engl 207, 307 Topics in Literature: Ethnicity, Gender and Race . 3
Study of literature shaped distinctively by cultural and theoretical
concerns related to ethnicity, gender and race. Specific topics,
announced in advance, include the following:

Irish Literature in Ireland. Field studies in the cultural geography of
20th-century Irish authors, including Yeats, Joyce, Synge, Mary
Lavin, Peter Fallon and Seamus Heaney. Conducted during May or
summer term at urban and rural locations in the Republic of Ireland.

American Indian Literature. Contemporary fiction and poetry by such
writers as M. Scott Momaday, Louise Erdrich, Leslie Silko and
Sherman Alexie, with special emphasis on historical and cultural
cultures and the revitalization of tribal practices, spirituality,
ceremony and oral tradition.

African-American Literature. Twentieth-century fiction, poetry and
essays from W.E.B. DuBois to Toni Morrison, with an emphasis
on the history of race in America as it informs the literary tradition.
Literature integrated with music, art and performance.

Mennonite Literature. Recent literature – mainly poetry and fiction
– by U.S. and Canadian Mennonite writers, studied in relation to
Mennonite history, culture and theology. Authors include Rudy
Wiebe, Sandra Birdsall, Armin Wiebe, Julia Kasdorf, Janet Kauffman,
Jean Janzen, Jeff Gundy and others.

Women in Literature. The study of literature written by women (mainly
fiction and poetry) and of related issues such as the literary canon,
gender representation and feminist literary theory. The syllabus will
often include literature by Austen, Bronte, Woolf and Hurston and
criticism by Gilbert, Gubar, Showalter and Fetzerly.

Engl 210 Introduction to Literature .............................................. 3
Analysis of literary texts in a genre chosen by individual professors.
Instruction in literary analysis essay and literary research essay.
Prerequisite: Engl 110, AP or CLEP credits, SAT verbal or critical reading
score of at least 630, ACT English score of at least 28 or permission of
instructor.

Engl 230 Literature and Film ...................................................... 3
Study of important texts from early and recent times and European and
nonwestern cultures, as well as their successful translation into films.
Special attention to philosophical, ethical, political, cultural, spiritual
and gender-related issues. Offerings may feature specific topics such as
Arthurian Legend or Global Images in Film.

Engl 300 Critical Theory and Practice ......................................... 3
This course examines contemporary critical interpretative strategies
and theories as applied to several literary genres. In addition, the
course introduces students to important research skills involved in the
production of literary criticism. Intended as an introduction to the English major and as an elective for other (usually upper-level) students. **Prerequisite:** Any college-level literature course beyond Engl 110.

**Engl 301  British Literature to 1800 .......................... 3**
Development of British literature from *Beowulf* through the medieval period, Renaissance and 18th century, with special attention to authors such as Chaucer, Shakespeare, Spenser, Milton and Swift.

**Engl 302  British Literature 1800 to Present .......................... 3**
Development of British literature through the Victorian, modern and post-modern periods, with special attention to authors such as Arnold, Eliot, Conrad, Yeats and Woolf.

**Engl 303  American Literature Survey .......................... 3**
Development of American literature from colonial times to the present. Study of literature that explores a range of American identities, including European-American, American Indian and African-American. Authors include Nathaniel Hawthorne, Emily Dickinson, Langston Hughes, William Faulkner, Adrienne Rich, among many others.

**Engl 305  Genre Studies .................................. 3**
Study of a single genre as announced, sometimes with focus on writings of a specific period or place. Typical offerings include:
*Contemporary Drama.* Study of dramatic literature from early modern classics by Eugene O’Neill, Tennessee Williams and Arthur Miller in the U.S. and John Osborne and Samuel Beckett in the United Kingdom to currently productive playwrights on and off Broadway.
*History of the Novel.* The reading and study of significant works illustrating the development of the novel in Great Britain and the United States. Attention to authors such as Austen, Dickens, Melville, Woolf, Hemingway and Morrison.
*Contemporary Poetry.* The reading and study of poetry and poets working since 1945, including such authors as Allen Ginsberg, Galway Kinnell, Rita Dove, Li-Young Lee, Linda Hogan, Adrienne Rich and Maxine Kumin. In addition to critical writing, each student will practice writing poems in an effort to better understand the creation and artistic nature of poetry.

**Engl 306  Major Author .................................. 3**
A study of a major author or of two authors in comparison. Shakespeare every other year. In the alternate years, the author or selection of authors will be announced in advance: recent choices include Chaucer, Faulkner and Morrison.

**Engl 409  Senior Project .................................. 1 - 2**
English majors propose independent projects in research, off-campus field experience, internship, or creative writing.

**Engl 410  Senior Seminar .................................. 1**
Weekly meetings of departmental majors and faculty for an exchange of views on such topics as vocations, curriculum and ethical/spiritual issues related to a life-long study of literature and language.

**B. Writing**

**Goals:** Writing courses teach students the expository, creative and research writing strategies needed to express themselves professionally and personally. While developing skills in purposeful thinking, logical organization and clear expression, students also have opportunities to share their writing through publication or public presentation. The normal sequence in writing moves from Literature and Writing, Engl 110, to Expository Writing, Engl 204, and then to 300-level writing courses. Students are permitted to enroll in the 300-level creative writing courses with no prerequisite, even though Creative Writing, Engl 120, offers the preferred introduction to creative writing.

**Opportunities:** Many curricular and extracurricular writing opportunities exist for students interested in expository and creative writing, along with associated editorial responsibilities. Of particular note are Pinchpenny Press, which produces a number of books each year written and/or edited by students, and the Broadside series: signed, limited editions of single short works of creative writing. Pinchpenny and Broadside policies and publications are administered by student-faculty editorial boards. Students also gain valuable experience writing for the Record, a weekly newspaper, and the Maple Leaf, the college yearbook. One student a year is selected as the Horswell Fellow, a role that provides publishing and editorial experience.

**Engl 105  Writing Skills Seminar .................................. 3**
Introduction to college-level reading and writing skills. Next course is Engl 110 to fulfill General Education requirements. This course is required for students with Verbal SAT/ACT score of 430/20 or below, low GPA in high school English courses, low overall GPA, or concern about college-level writing and study skills.

**Engl 110  Literature and Writing .................................. 3**
Critical reading, thinking and writing based on literary texts focused on themes chosen by individual professors. Instruction in writing the essay, argumentative prose and the cross-disciplinary research essay. **Prerequisite:** Successful completion of Engl 105, Verbal SAT/ACT score of 431/21 or higher. Fulfills the General Education requirement.

**Engl 120  Introduction to Creative Writing .................................. 3**
An introduction to the writing of poems, short stories and creative nonfiction, with emphasis on writing, reading and discussion. Written evaluations for credit instead of letter grades. **Enrollment limited to 15 per section.**

**Engl 204  Expository Writing .................................. 3**
Theory and practice of written communication. Assignments in a variety of prose forms aim at developing the student’s control of logic, organization, rhetoric and usage. **Prerequisite:** Engl 110, Engl 210 or equivalent.

**Engl 312  Poetry Workshop .................................. 1**
Intensive one-week workshop in writing poetry, usually conducted by a visiting poet during the first week of the spring semester. Repeatable. **Prerequisite:** Any college-level creative writing course. Written evaluations for credit instead of letter grades. **Enrollment limited to 15 per section.**

**Engl 330  Writing Fiction .................................. 3**
A workshop course in writing short fiction, with special attention to issues of setting, character, plot, dialogue and point of view. Readings by contemporary writers. Written evaluations for credit instead of letter grades. **Enrollment limited to 15 per section.**

**Engl 332  Writing Poetry .................................. 3**
A workshop course in writing poetry in a variety of forms, with special attention to imagery, sound, line, meter and revision. Readings by classic and contemporary poets. Written evaluations for credit instead of letter grades. **Enrollment limited to 15 per section.**

**Engl 334  Writing Creative Nonfiction .................................. 3**
A workshop course in writing the personal essay and nonfiction prose, with special attention to creating a personal voice and applying creative writing techniques to nonfiction subjects. Students will read and discuss...
examples of creative nonfiction and prepare two longer essays for a
final portfolio. Written evaluations for credit instead of letter grades.
Enrollment limited to 15 per section.

C. Language

Goals: Through studies in language, students learn historical and
sociological framework for language development, as well as a respect
for both the power and limits of language as a social and artistic tool.

Opportunities: Through field work, senior project, service assignments
and on-campus and community tutoring, students have opportunities
to teach language acquisition in diverse cultural contexts.

Engl 310 Introduction to Linguistics .................. 3
Different ways of looking at language: how languages’ systems of sounds,
word structures, grammatical patterns and meaning constructions
function. Insights useful for language learning, teaching and
appreciation of English and language in general.

Engl 315 English Language Problems .................. 3
The study of the sound system and history of the English language,
followed by exploration of current developments in sociolinguistics,
dictionaries and word formation. The course cultivates an informed
attitude toward English usage.

Engl 319 English Syntax .................. 1
Independent study in English grammar verified by a final exam.
Available only to TESOL majors and minors and English and Teaching
English as a New Language education students. Prerequisite: Previous or
concurrent enrollment in Engl 310 or 315.

Engl 320 Methods of Teaching English to Speakers of Other
Languages (TESOL) .................. 4
Primary topics addressed are theories of language learning, general
TESOL approaches, methods for the teaching of specific language
skills and materials preparation in ESL. A concurrent internship
(teaching English to a nonnative speaker) brings reality to the theories.
Prerequisite: Engl 310 or Engl 315.

Engl 325 Field Experience in TESOL .................. 3
One-hundred twenty hours of supervised teaching in the U.S.A. or
abroad when appropriate supervision can be arranged. Prerequisite: Engl
320 and consent of instructor.

History and political science

Chair, Associate Professor S. Nolt
Professor J. D. Roth
Associate Professors L. R. Berry, J. B. Shetler

A. History

Special resources for the study of history at Goshen College include the
Mennonite Historical Library, the Archives of the Mennonite Church
and The Mennonite Quarterly Review, a respected scholarly journal
published by Goshen College.

Major in history

United States and world history (at least 10 upper-level hours) 19 or more hours
Hist 409, History Internship ................................. 2-3
or student teaching for secondary education majors
Hist 410, History Seminar: Analysis ................................. 3
Hist 411, History Seminar: Synthesis ................................. 2
Comm 204/Engl 204, Expository Writing ................................. 3
Related courses in one of two areas: ................................ 12
Social science: At least one course in three different fields,
chosen from:
economics
political science
sociology
peace, justice, conflict studies
Humanities: At least one course in three different fields,
chosen from:
literature
philosophy
Bible or religion
art or music theory or music history

All history majors are encouraged to acquire proficiency in a foreign
language equal to the intermediate (202) level.

Planning guide

First year
General education
World and/or European History
American History I
Second year
General education
World Geography
History of Global Poverty
Upper-level history
Related courses
SST (fall or spring)
Third year
General education
History Seminar: Analysis
Upper-level history
Balance of related courses
Fourth year
Balance of general education
Balance of major
History Seminar: Synthesis
History Internship
Minor in history
A minimum of six history courses (18 hours) including at least one lower-level course and three upper-level courses in American and World History.

Major in history and investigative skills
A minimum of 24 hours of history, at least 15 upper-level and including Hist 410-411, Seminar.
Related courses:
Soc 200, Principles of Sociology .............................................. 3
CoSc 105, Introduction to Computer Science ................................. 3
Econ 207, Introduction to Statistics .............................................. 3
Soc 391, Methods of Social Research .......................................... 3
Internship and Senior-Seminar work should utilize various research skills. The student's faculty adviser will encourage taking additional elective courses in economics, sociology/anthropology and political science. This major is designed to provide the student with library, statistical and field-research skills useful in business, public administration, law and other practical pursuits. A variety of history courses provides a broad perspective rather than merely a technical orientation.

Secondary education
A secondary teacher-education program is available. Teacher certification in social studies education requires 54 credits in social science, with at least 12 credits each in three areas chosen from economics, historical perspectives, geographical perspectives, government, psychology or sociology. Other requirements of a Goshen College major in history, sociology or psychology must be met as well. In addition, 27 credits are required in the education department, including a fall semester of student teaching. For more details see education department pages and the Goshen College Teacher Education Handbook.

Career opportunities
Recent graduates with these majors teach social studies in high school or a specialty in college. Some are employed in libraries, archives and education administration. Others are in church vocations, law, business and administration.

Courses
Hist 100  Human Stories .................................................. 4
A topic course designed for the first-year colloquium. Provides an introduction to historical modes of inquiry based on themes of particular interest to the instructor. Topics in the past have included: “Leadership in American History,” “History of Childhood” and “Utopian Thought in the Western Tradition.”

Hist 101  World History I (Beginning to 850) ......................... 3
History of the world from the agricultural revolution to European expansion, concentrating on the establishment and interaction of classical traditions in the non-Western world. Also introduces the study of history as an academic discipline and how the historian uses primary sources.

Hist 102  European History (400-1815) ............................... 3
Selected topics in European civilization from the Middle Ages through the Renaissance, Reformation, Age of Absolutism to the 18th-century Enlightenment and French Revolution.

Hist 105  American History I (Beginning to 1877) ................... 3
History of the American colonies and the United States through the Civil War and Reconstruction. Also introduces the study of history as an academic discipline.

Hist 202  American History II (1877 to Present) ..................... 3
U.S. from the period of rapid industrialization and immigration to the present with an emphasis on social history. Also introduces the study of history as an academic discipline.

Hist 203  World History II (1500 to Present) ......................... 3
History of the world from European expansion to the present, with an emphasis on understanding the foundations of a global society. Also introduces the study of history as an academic discipline through the analysis of approaches to historical causation.

Hist 240  World Geography ............................................... 3
Survey of the world's geographic regions with emphasis on the impacts humans have had on the physical environment and explanation for variation of the world's regions. Course includes regular discussion of current issues in world affairs.

Hist 255  History of Global Poverty .................................... 3
Examination of the phenomenon and roots of global poverty in the colonial expansion of Europe, the rise of nationalism in the colonies and post-colonial globalization and development. Emphasis will be placed on viewing this problem and its solution from the perspective of common people in the global south.

Hist 304  Renaissance and Reformation ............................... 3
Topical survey of European civilization in the period from about 1300 to 1550. Intellectual, cultural and religious changes will receive most attention.

Hist 315  War and Peace in 20th Century Europe ................... 3
Exploration of major European political, cultural, intellectual and economic developments since the 1890s. Major themes include: modernism, the onset of totalitarianism and totalitarian regimes in Europe and the Soviet Union, war as an agent of social change, the Cold War, the dissolution of Soviet-style communism in Eastern Europe and peace-making efforts throughout the century.

Hist 318  Anabaptist/Mennonite History ............................... 3
Introduction to Mennonite history and thought. About one-third of the course is devoted to Anabaptism. Special attention given to distinctive Anabaptist religious ideas, changes in Mennonite religious ideas and practice in Europe, migrations, contrasts in social-communal practices among Mennonites and related groups.

Hist 321  History of Mennonites in America ......................... 3
Emphasis on Mennonites as a people developing and interacting with the larger American society, using themes such as migration, community formation, beliefs, acculturation and pacifist citizenship in war and peace.

Hist 323  Colonial and Revolutionary America ..................... 3
Focus on cultural encounters and conflicts. Colonialism begs the question, how are cultures transported, replicated and transformed? A look at contact between Europeans and Native Americans, between Europeans and Africans, between different European colonial projects and finally between Anglo-American colonists and Britain. All involved sharp cultural conflict.

Hist 324  U.S., 1790-1877: Nationalism and War .................. 3
Having rejected the one thing they had in common – British rule – Americans created an identity and constructed the myths needed to sustain a new nationalism. Slavery was a central and contested part of
this identity, leading to frightful civil war. Through it all, American nationalism continued to claim the power to "reconstruct" society.

**Hist 325** U.S., 1877-1945: Identity and Diversity

The U.S. became the first highly diverse nation state, but only gradually came to understand the implications of that fact. Economic divisions, urban and Western population growth, debates over race and ethnicity, and international consciousness all shaped a society that faced Depression and global war, and began to link its plurality to notions of pluralism.

**Hist 326** Recent American History

A look at events that shaped the most recent generations of Americans. From grand expectations of the Civil Rights movement, faith in science, and the possibilities of affluence and social reform, society confronted the realities of Vietnam, Watergate and environmental destruction — producing cynicism, culture wars and continued efforts to balance liberty and equality.

**Hist 327** American Immigration and Ethnic History

An examination of the development of ethnic and racial identities in the United States, from the colonial period(s) to the present. Immigration patterns, forced migration, assimilation, ethnicization, nativism, family and gender dynamics, immigration and naturalization law, and multicultural debates were important factors in these processes.

**Hist 328** African-American History

Historical study of the experience of African-Americans as a group, especially their political and economic situations, their community life, some of their outstanding organizations and leaders, their forms of adjustment and resistance and their participation and contributions in U.S. life. Prerequisite: any 100- or 200-level history course or consent of instructor.

**Hist 330** International Women's History

A comparative studies in world history course. Women have been left out of the world's history, particularly women in the non-Western world who are stereotyped as oppressed and passive. Putting women back into the center of world history unsettles older historical paradigms and challenges our ethnocentric assumptions. Explores the diverse experiences of women as active agents in shaping their world through a comparative case-study approach.

**Hist 335** History of Ethnic Conflict

A comparative studies in world history course. The world seems plagued with increasing conflict between ethnic groups. Explores the historical roots of this problem through a comparative case-study approach and takes an interdisciplinary approach both to analysis of the problem and its solution. Students will present an in-depth research paper on the historical roots of one conflict.

**Hist 340** Christianity in Africa and the Diaspora

A comparative studies in world history course. Examination of the development of Christianity in Africa and the Americas with an emphasis on the religious tradition Africans brought to the encounter with Christianity and how they shaped its practice both in mission and independent churches in Africa. The history of slavery in the New World, particularly Brazil and the Caribbean, will frame the exploration of Christianity in the Diaspora.

**Hist 344** Latin American History: National Period

A study of the history of the Latin American republics since independence, with special attention given to Mexico, Cuba and the ABC countries (Argentina, Brazil and Chile).

**Hist 345** Environmental History

A comparative studies in world history course. Exploration of human interaction with the environment over time particularly in the non-Western world. Examination of the material and ideological conditions which have led to preservation or destruction of the environment through a comparative case-study approach.

**Hist 350** African History

African history from ancient times to the present with an emphasis on topical studies of land and food, slavery and social reciprocity and colonial transformations in political authority. Encourages historical analysis for the purpose of responding positively to pessimistic predictions of Africa's future and appreciating Africa's strengths.

**Hist 375** Topics in History

Study on a selected topic in American or world history. Examples: the United Nations, history of childhood in America. Students may be invited to help shape the topic.

**Hist 400** Advanced Study

Special topics for majors and minors.

**Hist 409** Internship

Using research, writing and organizational skills in a setting outside the classroom; deliberate reflection on the process of historical or legal inquiry.

**Hist 410** History Seminar: Analysis

Philosophy and purposes of history; principles and methods of historical research; history and Christian faith; choice of a topic and bibliographical work and initial research on that topic. Course to be taken in the fall semester of the junior year. Required of all majors.

**Hist 411** History Seminar: Synthesis

Continued research on topic chosen and presentation in forms of oral report and written thesis paper. Course to be taken in the spring semester of the senior year. Required of all majors. Prerequisite: Hist 410.

### B. Political science

**PoSc 200** Introduction to Political Science

General comparative survey of political institutions and behavior in various types of regimes, with special emphasis on the American political system. The most appropriate course for students required to take one course in political science. Collateral reading may be adjusted to individual needs and interests.

**PoSc 210** Introduction to Public Policy

Explores the nature of the policy-making process in the United States and, to a lesser extent, other pluralist polities. Topics will include constitutional and structural framework in which policies are shaped, interest articulation, policy formulation and the feedback process.

**PoSc 305** U.S. Government

A basic introduction to the federal system of government in the United States. Focus on the constitutional arrangements established at the nation's founding, critical points in the constitution's evolution and the contemporary setting. Topics include the legislative process, the judiciary branch and the nature of the presidency. The regulatory process, interest groups, political parties, the press, campaigning and voter behavior, civil rights and federal-state relations will also be examined.
PoSc 308  International Politics  ............................................. 3
Examination of the structure, development and operation of the present
international political system and its possible alternatives.

PoSc 318  Latin American Politics  ............................................. 3
Analyzes Latin America’s contemporary political and socio-economic
institutions and issues; relates them to the area’s development and need
for change; includes the meaning of revolution in Latin America.

PoSc 320  Issues in Politics and Society  ............................................. 3
Contemporary (and often controversial) political issues in the U.S.
and Latin America, e.g.: African-Americans and the U.S. judicial
system; educating legal professionals; the church and Latin American
politics. Analysis through class discussions, some lectures by the
instructor, student papers and contribution from resource persons with
involvement in the subject matter.

C. Minor in Anabaptist-Mennonite studies
Although this minor is intended to be interdisciplinary in nature, responsibility for administering the program will be lodged with the
history/political science department.

Core courses (12 hours required from the following)
  Hist 318, Anabaptist/Mennonite History
  Hist 321, History of Mennonites in America
  Engl 207, 307, Mennonite Literature
  PJCS 312, War, Peace and Nonresistance
  Any topics class or independent study approved by the chair of the
  history/political science department, such as Soc 351, Contemporary
  Issues; Hist 375, Topics in History.
Six additional hours selected from core courses above or the following
electives:
  Hist 304, Renaissance and Reformation*
  Rel 320, Christian Faith*
  German, Spanish or French special project focused on
   Anabaptist/Mennonite related topic
  Mus 311, Church Music*
  Soc 334, Race, Class and Ethnic Relations*
  Any topics class or independent study approved by the chair of the history
  and political science department*
  Internship with the Mennonite Historical Library, Menno-Hof, Mennonite
  Mission Network, Mennonite Central Committee, or any other Mennonite
  agency or institution
  Class at Associated Mennonite Biblical Seminary (e.g. HTE602, Rethinking
  Mennonite History)
  Ministry Inquiry Program (MIP) internship with a Mennonite congregation
*Note: It is assumed that students who apply these courses to the minor
will do a focused study (paper or project, e.g.) that makes an explicit
connection with an Anabaptist-Mennonite topic.

D. Minor in social policy
The social policy minor at Goshen College is a collaborative cross-
disciplinary program for students who want to work for social change
within the public sector or nonprofit organizations. The minor is
described in the sociology, social work and anthropology department
pages.

Humanities

Humanities courses at Goshen College are interdisciplinary courses,
team-taught by professors from several different departments. Each of
these interdisciplinary courses studies the history of artistic expression,
provides opportunities for participating in artistic activities and
examines the relationship between the arts and students’ own lives.
Fulfills the general education requirement for humanities study. One
course is offered each semester.

Hum 220, Humanities: Literature and Art ............................................. 4
Hum 221, Humanities: Literature and Music ............................................. 4
Hum 222, Humanities: Theater and Literature ............................................. 4
Hum 223, Humanities: Music and Art ............................................. 4
Hum 224, Humanities: Music and Theater ............................................. 4
Hum 225, Humanities: Art and Theater ............................................. 4

Interdisciplinary studies

Associate Dean T. Meyers

An interdisciplinary major is for students who wish to engage in
substantial study in several academic fields. It also gives students the
opportunity to design a major that fits their unique interests and needs.
An interdisciplinary major provides preparation for careers or professional
programs where a broad educational background is appropriate.

Requirements for the major
A minimum of 45 credit hours, plus a senior seminar and internship.
Courses are selected from three academic departments in which
Goshen offers a major or a minor. Must include a minimum of 15
credit hours from each department, of which at least nine credit hours
must be core courses required by the major or minor.

The senior seminar and internship are not included in the nine
hours of core courses required in each of the three departments. These
should be completed in the same department. Any exceptions must be
approved by the supervising professor for the internship.

At least one three-credit core course in each department must be
completed in residence at Goshen College. Not including the senior
seminar and internship, a minimum of at least 18 credit hours in the
major must be upper-level courses (300-400 level).

Students interested in investigating an interdisciplinary major should
contact the associate dean to discuss interests and options. The student’s
academic adviser will usually be a professor from the department in
which the student elects to complete the senior seminar and internship.

Career opportunities

Interdisciplinary graduates are working in nonprofit agencies, education,
business, church ministries, community development, journalism, law
and many other fields.
Mathematics
Chair, Professor D. Housman
Professors R. Milne, P. Oakley

The mathematics program provides preparation for majors and nonmajors that is academically sound, responsive to individual needs and exemplary in its pedagogical approach. A student who successfully completes a major in mathematics will:

- develop mathematical ways of thinking and knowing (i.e., logic and deduction, data interpretation and analysis, modeling, pattern recognition and inference, abstraction, symbolism, optimization).
- make and value connections among different areas of mathematics.
- communicate mathematics through written and oral means.
- use general problem-solving strategies.
- use computers and calculators appropriately as mathematical problem-solving tools.
- have increased knowledge of and sensitivity to a variety of historical and cultural contexts in which mathematics has developed.
- develop self-confidence and enthusiasm along with technical expertise.
- experience mathematics as a collaborative, as well as an individual, enterprise.
- integrate spiritual/ethical values with mathematical activity, and be prepared for life-long learning in a discipline where knowledge grows exponentially.

Career opportunities
Graduates with mathematics majors are currently working in education, administration, computer technology, insurance, statistics, overseas development, mass communication and engineering.

A secondary teacher education program is available. For more details see the Goshen College Teacher Education Handbook.

Major in mathematics
Core (21 credits):

Math 205, Discrete Mathematics .................................................. 3
Math 211, Calculus I ................................................................. 4
Math 212, Calculus II ............................................................... 4
Math 213, Calculus III .............................................................. 4
Math 300, Conjecture and Proof .................................................. 3
Math 301, Linear Algebra .......................................................... 3

Other upper-level mathematics (15 credits, or 12 credits for those who do student teaching in mathematics):

Must select at least one of the following:

Math 302, Abstract Algebra ....................................................... 3
Math 305, Modern Geometry ....................................................... 3
Math 311, Real Analysis ............................................................ 3

Other possible selections:

Math 321, Differential Equations ................................................. 3
Math 323, Probability and Statistics .......................................... 3
Math 341, Numerical Analysis .................................................. 3
Math 351, Mathematical Modeling ............................................ 3
Math 390, Problem Solving Seminar ........................................... 1
Math 409, Senior Project/Internship ........................................... 3

Related courses (10 credits):

Biol 111, Biol 112, Chem 111, Chem 112, Phys 203, or Phys 204 ...... 4
CoSc 200, Programming Techniques ......................................... 3
Phys 410, or CoSc 410, Senior Seminar ..................................... 3

Total credit hours required: 46, or 43 for those who do student teaching in mathematics.

Other requirements:

- Students must achieve a grade of C or better in every course counted for the major.
- Listed prerequisites for all mathematics courses require a grade of C or better. (This applies to all students, not just majors.)
- All secondary education students in mathematics must complete at least one semester as an intern or as an assistant in Math 131 or Math 132.

Planning guide
First year
- General education
- Discrete Mathematics
- Calculus I, II, III
- Programming Techniques
- General Physics

Second year
- General education
- Conjecture and Proof
- Linear Algebra
- Upper-level math
- SST (summer)

Third year
- General education
- Upper-level math
- SST (fall or summer)

Fourth year
- Balance of general education
- Balance of major
- Senior Project/Internship or Student Teaching
- Senior Seminar

Minor in mathematics
Completion of 19 credit hours in mathematics, including Math 205, Discrete Mathematics; Math 211, Calculus I; Math 212, Calculus II; and at least eight credit hours of mathematics chosen at the upper level (300 or 400 level).

Note: A typical way for a student to complete the eight upper-level credits would be to take Math 300, Conjecture and Proof (3 credits); Math 301, Linear Algebra (3 credits); and Math 351, Mathematical Modeling (3 credits).

Major in computer science and applied mathematics
A combined major in computer science and applied mathematics is available. For a full description, see computer science.

Courses
Math 030 Elementary Mathematics ........................................... 3 (non-credit)
A noncredit course in arithmetic and elementary algebra as preparation for Math 101 or Math 131. (Meets the general education competency requirement but does not count toward graduation credit.)

Math 100 Mathematical World .................................................. 3
A survey of selected content chosen to help build basic number sense, develop skills in pattern recognition, use mathematical modeling to represent and investigate practical problems. Basic arithmetic computational skills are assumed. Prerequisite: competency test.*

Math 101 Intermediate Algebra ............................................... 4
Basic algebra as preparation for Math 102 or Math 141. Prerequisite: one unit of high school algebra or Math 030; competency test.* (Offered by demand.)
Math 102 Precalculus Mathematics .............................................. 4
Families of functions and their graphs. Polynomial, rational, exponential, logarithmic and trigonometric functions and related applications. Graphing calculators and computer software are used. (Includes weekly computer lab.) Prerequisite: Three units of high school algebra and geometry or Math 101.

Math 131 Mathematical Concepts for the Elementary Classroom I .................................................... 3
Theory of natural, rational and real number arithmetic; computation in different numeration systems; elementary set theory and logic; number theory; probability and statistics; problem solving strategies. Linkage to mathematics education in the elementary school. Prerequisite: competency test.*

Math 132 Mathematical Concepts for the Elementary Classroom II ......................................................... 3
Formal and informal approaches to Euclidean geometry; patterns, symmetries, classification of geometric figures in two and three dimensions; transformations in the plane; measures, measurement and approximate data; computer software applications to geometry. Linkage to mathematics education in the elementary school. Prerequisite: Math 131 or high school geometry; competency test.*

Math 141 Finite Mathematics .................................................. 3
Linear systems of equations and inequalities including linear programming set theory, elementary counting principles, probability, Markov chains. Applications to problems from business and the social sciences. Prerequisite: Two units of high school algebra or Math 101.

Math 205 Discrete Mathematics ............................................... 3
Number systems and arithmetic, logic and Boolean algebra, enumeration, problem solving and proof techniques, functions and relations, set theory and applications, elementary graph theory and probability. Prerequisites: three and one-half units of high school mathematics including trigonometry or Math 102.

Math 211 Calculus I .............................................................. 4
Differential and integral calculus of elementary algebraic and trigonometric functions with applications to geometry and physics; use of graphing calculators and mathematical computer software. (Includes weekly computer lab.) Prerequisites: three and one-half units of high school mathematics including trigonometry or Math 102.

Math 212 Calculus II ............................................................ 4
A continuation of differential and integral calculus of a real variable; exponential, logarithmic, inverse trigonometric and hyperbolic functions; techniques of integration; introduction to differential equations; sequences and series; vectors in the plane; polar coordinates. (Includes weekly computer lab.) Prerequisite: Math 211.

Math 213 Calculus III ............................................................ 4
Differential and integral calculus of three-space; vectors, lines, planes and surfaces in three-space; vector valued functions; functions of several variables; partial derivatives; multiple integrals; vector calculus. (Includes regular computer lab.) Prerequisite: Math 212.

Math 300 Conjecture and Proof .............................................. 3
An introduction to the exploration and formalization of mathematical phenomena, techniques of proof and the rudiments of logic, sets, real analysis and axiomatic geometry. Provides a preparation for the study of abstract mathematics. Prerequisite: Math 211 and either Math 205 or Math 212; or permission of instructor.

Math 301 Linear Algebra ....................................................... 3
Linear systems of equations, vector spaces, linear transformations, matrices, determinants, characteristic vectors and values, inner products, computational aspects and applications. Prerequisite: Math 211 and either Math 205 or Math 212.

Math 302 Abstract Algebra .................................................... 3
An introduction to algebraic structures such as groups, rings and fields. Prerequisites: Math 300 and Math 301. (Offered in 2006-2007)

Math 305 Modern Geometry .................................................. 3
A survey of geometries. Comparison of Euclidean, hyperbolic, elliptical, and projective geometries. Integral and fractional dimension; transformation groups; implications for computer graphics. Prerequisite: Math 300. (Offered in 2007-2008)

Math 311 Real Analysis ....................................................... 3
A rigorous study of differentiation and integration of both one and several variables. Infinite series. Distance, compactness, limits of sequences, convergence and introduction to the topology of Euclidean n-space. Prerequisites: Math 213, Math 300 and Math 301. (Offered by demand)

Math 321 Differential Equations ............................................ 3
The solution and application of ordinary differential equations; analytic solutions for linear systems; qualitative behavior of nonlinear systems; approximation and computer methods. Prerequisite: Math 213 or Math 301. (Offered in 2006-2007)

Math 323 Probability and Statistics ....................................... 3-4
An introduction to the theory, practice and computer simulation of probability and statistics. Data exploration, sample spaces, random variables, probability distributions and their derivations, probability simulations and statistical inference. The optional fourth credit hour consists primarily of an independent data collection and analysis project. Prerequisites: Math 213 or permission of the instructor. (Offered in 2006-2007)

Math 341 Numerical Analysis ................................................ 3
Numerical methods and error analysis for approximating solutions of mathematical problems. Includes linear and nonlinear numerical methods, interpolation and approximation techniques, numerical differentiation and integration. Prerequisite: CoSc 200 and one of Math 301 or Math 321. (Offered in 2007-2008)

Math 351 Mathematical Modeling ......................................... 3
The modeling process, built around a study of applications from a variety of both social as well as natural sciences. A variety of mathematical and computing techniques will be employed including discrete structures, probability, calculus, differential equations and algorithms. Completion of modeling projects will be a major component of the course. Prerequisites: CoSc 200 and one of Math 213, Math 301 or Math 323. (Offered in 2007-2008)

Math 390 Problem Solving Seminar ..................................... 1
The problem-solving process in the context of nonroutine problems, including a wide variety of general heuristics for approaching such problems. May be repeated. Prerequisite: Math 300 or permission of instructor. (Offered in 2006-2007)

Math 400 Selected Topics in Mathematics ............................. 1-3
For mathematics majors with consent of the department. May be repeated.
Math 409  Senior Project/Internship  
Project designed to give the student practical experience in mathematics. Each student’s project is individually arranged with the instructor. Arrangements must be made at least one semester in advance.

*A satisfactory score on a competency test (or equivalent) is required before taking any mathematics course for credit at Goshen College.

Modern and classical languages and literatures

Chair, Associate Professor E. D. Rhodes
Professors R. Falcón, P. Keim
Associate Professor M. Yoder
Assistant Professor S. Yoder
Adjunct Faculty C. Baker-Shenk, J. Humphrey, K. Massanari

Major in American Sign Language Interpreting
(59 credit hours)

Core courses

- ASL 101, Elementary ASL I ........................................ 4
- ASL 102, Elementary ASL II ...................................... 4
- ASL 104, Deaf Culture ............................................. 3
- ASL 106, Introduction to the Interpreting Profession .......... 2
- ASL 201, Intermediate ASL I .................................... 4
- ASL 202, Intermediate ASL II ................................... 4
- ASL 205, Advanced Fingerspelling and Numbers .......... 2
- ASL 206, The Deaf Community, Church & Religion .......... 2
- ASL 301, Interpreting I ........................................... 4
- ASL 302, Interpreting II ......................................... 4
- ASL 304, Certification Overview ............................... 1
- ASL 305, Linguistics of ASL .................................... 3
- ASL 306, ASL Literature ......................................... 3
- ASL 401, Interpreting III ....................................... 4
- ASL 407, Topics in Interpreting .................................. 2
- ASL 408, Specialized Vocabulary ................................ 2
- ASL 409, Interpreting Internship ................................ 10
- MCLL 410, Senior Seminar ..................................... 1

Recommended electives

- Engl 315, English Language Problems
- Engl 310, Introduction to Linguistics
- Soc 200, Principles of Sociology
- Soc 230, Cultural Anthropology
- Soc 334, Race, Class and Ethnic Relations
- Comm 206, Communicating Across Cultures

Planning guide

First year
- General education
- Elementary American Sign Language I and II
- Deaf Culture
- Introduction to the Interpreting Profession

Second year
- General education
- SST (recommended)
- Intermediate American Sign Language I and II
- Other courses in major
- Recommended electives

Third year
- Courses in major
- General education
- Recommended electives

Fourth year
- Balance of general education
- Balance of major courses
- Interpreting Internship
- Senior Integrating Seminar
Minor in American Sign Language
(23 hours)

- ASL 101, Elementary American Sign Language I ........................................ 4
- ASL 102, Elementary American Sign Language II ..................................... 4
- ASL 201, Intermediate American Sign Language I .................................... 4
- ASL 202, Intermediate American Sign Language II .................................. 4
- ASL 104, Deaf Culture .................................................................................. 3
- ASL 205, Advanced Fingerspelling and Numbers ....................................... 2
- ASL 206, The Deaf Community, Church and Religion .................................. 2

Major in Spanish
(40 credit hours)

- Language courses ................................................................. 21
  - 202 level and higher: composition/conversation, literature, special projects (may include three hours any level of French or German)
- MCLL 300, International Classics ......................................................... 3
- MCLL 410, Senior Integrating Seminar .................................................. 1
- History (related to language countries), English (international literature, linguistics), history of art or music, aesthetics, themes in drama
- Junior Year Abroad (or approved alternate)
- Internship ......................................................................................... 3 or more
  - Met by junior year abroad or other extended residence
  - in country where the foreign language is spoken

Note: Most upper-level courses for the Spanish major are taken on location during the study abroad year through Brethren Colleges Abroad or other approved program. Spanish is an appropriate component of an interdisciplinary major.

Planning guide

First year
- General education
- Level 202 or higher
- Second language (or second year)

Second year
- General education
- Advanced language courses
- Second language
- SST (recommended)

Third year
- Junior Year Abroad (advanced language and related courses)

Fourth year
- Balance of general education
- Balance of major and related courses
- International Classics
- Senior Integrating Seminar

Planning notes

While most language majors begin to study another language in high school, it is possible to complete the major successfully if the student begins at Goshen and participates in a Junior Year Abroad program (see international education pages).

Generally no upper-level courses are offered in May.

SST is recommended but not required of students who participate in Junior Year Abroad.

A secondary teacher-education major is available in Spanish. For this major the student must complete 36 hours in the language area (this may include six hours of linguistics and/or credit by exam for high-school study above the 101-102 level in the major language). Teacher education majors must also participate in a two-semester study-abroad program in the language of the major. For more details see the Goshen College Teacher Education Handbook and the education department pages of this catalog.

Minor in Spanish

Twelve hours in Spanish selected from any courses numbered 202 and above. Participation in a one-semester study-abroad program (or an approved alternate such as SST or CASAS) is required for all minors.

Courses

A. American Sign Language

ASL 101 Elementary American Sign Language I ........................................ 4
An introduction to American Sign Language and the deaf community; focuses on frequently used signs, basic rules of grammar, nonmanual aspects and cultural features of the deaf community.

ASL 102 Elementary American Sign Language II ..................................... 4
Emphasizes further development of receptive and expressive skills, vocabulary building and grammatical structures. Introduction to language forms used in American Sign Language poetry and theater. Prerequisite: ASL 101 or consent of instructor.

ASL 104 American Deaf Culture ......................................................... 3
Explores the American deaf community, examining the educational, sociological and cultural features which shape this group of people. Prerequisite: none

ASL 106 Introduction to the Interpreting Profession ............................. 2
Introduces students to the professional field of interpreting: code of ethics, employment opportunities, professional organizations, etc. Prerequisite: ASL 102 or consent of instructor.

ASL 201 Intermediate American Sign Language I .................................. 4
Continues development of expressive and receptive language skills through student-led discussions and prepared reports on topics related to the deaf community. Prerequisite: ASL 102 or consent of instructor.

ASL 202 Intermediate American Sign Language II .................................. 4
Develops further expressive and receptive language skills. Prerequisite: ASL 201 or consent of instructor.

ASL 205 Advanced Fingerspelling and Numbers .................................. 2
Concentrated instruction and practice in expressive and receptive fingerspelling and the complex numbering system of ASL. Prerequisite: ASL 201 or consent of instructor.

ASL 206 The Deaf Community, Church and Religion ............................ 2
Explores the variety of deaf community's experiences with churches and religion. Models of ministry and mission in the deaf community will be presented and critiqued. Out-of-class visits to local deaf ministries are required. Prerequisite: ASL 104. Offered May 2008 and May 2010.

ASL 301 Interpreting I ............................................................................ 4
Introduces theory and skills of the interpreting process, presenting both consecutive and simultaneous methods. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 302 Interpreting II .......................................................................... 4
Introduces spontaneous ASL/English interpreting and provides extensive practice utilizing videotapes and audiotapes. Prerequisites: ASL 301 or consent of instructor.
ASL 304 Certification Overview
Studies various quality assurance/state licensure assessments established across the United States. Prepares students for the written portion of the national certification of the Registry of Interpreters for the Deaf. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 305 Linguistics of ASL
Investigates the major grammar rules of American Sign Language. Studies specific aspects of phonology, morphology, syntax and semantics. Prerequisites ASL 205, Engl 310.

ASL 306 ASL Literature
Focuses on various genres of literature by and about deaf people. Concentrates on deaf characters and the influences deaf culture and deaf history have on literary works. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 401 Interpreting III
Continues the development of interpreting skills through role-playing and participating in out-of-class interpreting opportunities. Prerequisites: All 300-level ASL courses or consent of instructor.

ASL 407 Topics in Interpreting
Practical and ethical issues in interpreting, Decision-making, assignment assessment, environmental management, policies and procedures within agencies and organizations. Prerequisites: All 300-level ASL courses or consent of instructor.

ASL 408 Specialized Vocabulary
Examines and develops the vocabulary necessary for interpreting in specific settings including education, medicine, mental health, legal, religious, etc. Taken during the first four weeks of the internship semester. Prerequisites: ASL 401 or consent of instructor.

ASL 409 Interpreting Internship
Supervised interpreting experiences through placement in various community settings. Course offered the last 10 weeks of the senior year. Prerequisites: All preceding 400-level ASL courses.

B. French
Fren 101-102 Elementary French I, II
Basic skills in understanding, speaking, reading and writing French for beginners.

Fren 103 Elementary French III
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: Fren 102 or equivalent.

Fren 201 Intermediate French I
Grammar review with reading and discussion in French. Normally offered only on SST. Prerequisite: Fren 102 or equivalent.

Fren 202 Intermediate French II
Reading and discussion of prose, poetry and drama. Grammar review, oral and written practice. Normally offered only on SST. Prerequisite: Fren 201 or equivalent.

Fren 203 Intermediate French III
Emphasis on conversational French. Normally offered only on SST. Prerequisite: Fren 201 or equivalent.

C. German
Germ 101-102 Elementary German I, II
Basic skills in understanding, speaking, reading and writing German for beginners; class work includes collaborative learning.

Germ 103 Elementary German III
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: Germ 102 or equivalent.

Germ 201 Intermediate German I
Review of grammar related to readings in German literature and cultural texts with discussion based on readings. Prerequisite: Germ 102 or equivalent.

Germ 202 Intermediate German II
Reading and discussion of prose and poetry topics in German culture. Emphasis on further development of oral and written skills. Prerequisite: Germ 201 or equivalent.

D. Spanish
Span 101-102 Elementary Spanish I, II
Basic skills in understanding, speaking, reading and writing Spanish for beginners; class work includes collaborative learning.

Span 103 Elementary Spanish III
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: Span 102 or equivalent.

Span 201 Intermediate Spanish I
A review of grammar and intensive oral practice. Prerequisite: Span 102 or equivalent.

Span 202 Intermediate Spanish II
Reading and discussion of short story, drama and topics in Spanish culture. Major emphasis on improving reading and written and conversational skills. Prerequisite: Span 201 or equivalent.

Span 203 Intermediate Spanish III
Continuation of grammar practice with emphasis on spoken Spanish. Normally offered only on SST. Prerequisite: Span 201 or equivalent.

Span 204 Spanish for Spanish Speakers
A course for native speakers of Spanish in orthography, syntax and lexicography with extensive practice in reading and composition. Fulfills prerequisite for any upper-level Spanish course in the department.

Span 205 Spanish Conversation and Culture
Extensive practice in spoken Spanish. Topics related to life in Spanish-speaking countries. Course especially designed to meet interests of returned SST students. Prerequisite: Span 201 or equivalent.

Span 301-302 Introduction to Spanish Literature
A survey of the currents in Peninsular literature. The first semester includes beginnings through Golden-Age writers; the second semester focuses on late-19th and 20th-century writers.

Span 303, 304 Spanish Composition I, II
A thorough review of Spanish grammar with exercises in composition.
Span 305 Culture of the Hispanic World .......................... 3
Course focuses on culture, history, literature and music of the Hispanic world, with particular emphasis on Spanish-speaking SST locations. Comprehensive experience in written and spoken Spanish.

Span 309 Spanish-American Novel .............................. 3
A study of selected 20th-century Spanish-American novels representing various types emerging from the Spanish-American scene.

Span 322 Spanish-American Literature ........................... 3
A study of Spanish-American literature from 1880 to present time with special emphasis on the novels, the essay and the short story.

Span 349 Hispanic Short Stories ................................. 3
Presents Hispanic literature through short stories representative of the Hispanic world, originating in Spain, Latin America, United States and Canada, and integrating Spanish grammar and culture. Students read stories; review vocabulary and grammatical structures; study authors' lives and the historical context of the stories; and discuss cultural elements.

Span 350 Hispanic Studies in Film ............................... 3
Presents Hispanic culture, conversation and grammar using films in Spanish. Prior to viewing, historical and cultural contexts, literary movements and influences of the era are discussed. Shows representative films, followed by activities which include written assignments, small-group presentations and discussions. Draws comparisons between books and the films based on them; encourages students to use vocabulary and grammar structures used in the films.

Span 400 Special Projects in Spanish ......................... 1-4
Projects vary from studies in literature to advanced practice of language skills. Reserved for Spanish majors.

E. Departmental courses
Students may request a special course in classical or medieval Latin as well as in biblical Greek or Hebrew. MCLL 300, International Classics, may focus on classical Greek and Latin literature in translation as well as on translations of modern-language classics.

MCLL 101-102 Elementary Latin I, II ........................... 3+3
Provides a thorough introduction to the Latin prose of the classical period of Roman civilization. Primary attention to building a working knowledge of Latin grammar and vocabulary, basic Latin idioms and expressions. Students will cultivate an appreciation of the eloquence of Latin prose style through reading sentences and short texts of increasing difficulty.

MCLL 300 International Classics ................................. 3
Taught in English, this course offers, in translation, an introduction to literary masterpieces of Europe and the Americas. Themes and texts vary from year to year and may include classical mythology, Greek and Roman drama, national epics, the Grail quest, ethical dilemmas and decisions, and approaches to realism. Required for Spanish majors; appropriate for returning SSTers and all who wish to deepen their knowledge of comparative literatures and cultures.

MCLL 409 Language Internship ................................. 0-3
Required of all departmental majors. Requirement usually fulfilled in extensive residence or study abroad in the language of the major, internship abroad or student teaching. Majors may also propose projects.

MCLL 410 Senior Integrating Seminar ....................... 1
Majors and faculty meet regularly for an exchange of views on such topics as vocations in foreign language and other issues related to a life-long study of language, culture and literature in a diverse and multilingual global community. Involves the final assembly of a portfolio in the language of the student’s major, as well as field excursions to culturally diverse communities in the area. Independent projects in research or teaching.

Music
Chair, Associate Professor J. Graulty
Professor D. Brubaker
Associate Professors J. Heiks, M. Hill, B. Lapp
Assistant Professors L. Dengler, S. Dengler, C. Seitz,
S. Soroka, C. Thögersen
Adjunct Faculty H. Carreño, P. Penny-Henderson
For a list of studio instructors, see the private applied study section.

Mission
The music department at Goshen College is dedicated to the cultivation of excellence in the areas of musical performance, pedagogy and scholarship. We believe musical expression is a human manifestation of the divine impulse and, as such, serves as a window into the individual soul, as a bridge between human beings and as a means of shared religious experience.

Career and post-graduate opportunities
Music graduates are currently working in public and private schools, colleges and universities, in private teaching, in music therapy (a music education degree is recommended for graduate work in music therapy), music technology, professional performance, in church music ministry and in music business. Many music graduates have gone on to pursue graduate degrees at our nation’s most prestigious graduate schools.

Major in music
All bachelor of arts in music degree programs include a core requirement of 18 hours, plus additional hours to provide for any one of the following five possible areas of concentration: music education, general music major, music business/technology, music in worship and piano pedagogy.

Core requirements for all music majors (18 credit hours)

Senior recital or lecture recital (45-50 minutes) ................. NC
Public demonstration of chamber music ensemble leadership or hymn
leading required.

Research and performance endorsements
Music majors may choose to pursue the "performance endorsement" or "research endorsement" in addition to their area concentration.

Research endorsement requirements:
1. Sophomore recital (15 min.) or lecture-recital (20 min.)
2. Junior project: a lecture or lecture-recital (30 min.)
3. Senior presentation of a scholarly paper (60 min.), which may or may not include performance. A 9-10,000 word paper must be submitted to faculty one month in advance.
4. Specific instrument requirements:
Pianists – learn at least one full concerto (may serve as junior recital) and accompany at least three sophomore recitals or comparable collaborative performances.
Violinists – learn at least one full concerto (may serve as junior recital)
Other instrumentalists – significant sonata repertoire and full concerto or other collaborative chamber project.

Degree with honors
In addition to research and performance endorsements, an honors degree in music may be pursued. See the music department Web site for more information.

Keyboard proficiency
Keyboard proficiency will require facility in sight-reading, keyboard technique, harmonization, transposition, improvisation and playing
by ear. Prior to entering the first semester of music theory (Mus 201), an examination will be given to determine the student’s keyboard proficiency level and placement in the keyboard theory labs. Keyboard proficiency exams will be given at the end of each semester.

In order to pass the keyboard proficiency exam, most students require a sequence of study that begins with the 200-level music theory keyboard skills labs and continues with at least one semester of private applied piano study. Fulfilling the keyboard proficiency requirement early on in the degree program (by the end of the junior year at the very latest) is strongly recommended.

Departmental recitals
All music majors are expected to perform at least once per semester in the music department weekly recitals. All music minors are expected to perform at least once a year.

Sophomore qualifying recital
All music majors, minors and interdisciplinary majors with a focus in music are required to present 15-20 minutes of music in a public recital by the end of their fourth semester of applied music study. Successful completion of this requirement, as well as acceptable work in other music studies, is a prerequisite for continuing as a major in the department.

Junior recital/project
Junior recitals/projects are required only for students pursuing the research or performance endorsements or the Music Department Honors Program. See specific requirements under those headings and on the music department Web site.

Senior recital/lecture-recital/project
For those required to perform or present a senior recital or project, a permission performance is required one month prior to the public recital by the end of their fourth semester of applied music study. Written documents must be submitted at the time of the permission for review and approval. Senior recitals are not required for music minors, but may be included (NC) if agreed upon by the student and music department adviser.

Ensemble participation
All music majors and minors are required to participate in a core ensemble (chorale, chamber choir, orchestra, or wind symphony). Participation in non-core ensembles is also encouraged (jazz band, men’s chorus, women’s world music choir, Voices-n-Harmony, percussion ensemble, small chamber groups).

Planning guide

First year
General education
Music Theory or Foundations of Music Theory
Applied music
Survey of Music Literature

Second year
General education
Music Theory (if not taken in first year)
S specialty Course: Learning & Teaching Concepts in Music, Introduction to Piano Pedagogy, Music Technology, Vocal Methods and Pedagogy, String Methods and Pedagogy
Applied music
Sophomore recital
SST

Third year

Advanced Theory
Applied music
Courses in concentration

Fourth year
Balance of general education
Balance of major
History of Music
Topics in Music
Senior Seminar
Recital or paper

Fifth year
Student teaching in fall for music education majors

Music minors and music scholarships
Students pursuing a minor in music, especially those receiving music scholarships, are strongly encouraged to complete all requirements by the end of their junior year, particularly the 201/202/204 sequence of courses.

Minor in music
(20-21 credit hours) Required courses:

Mus 201-202, Music Theory ......................... 8
Mus 204, Survey of Music Literature ................ 3
Mus 212, Song Leading ......................... 1
Applied music .......................................... 6
Mus 210, Learning and Teaching Concepts or
Mus 241, Music Technology or
Upper-level music elective (not ensemble) .................. 2-3
Ensemble participation (at least six semesters)
Sophomore recital or project (may take place in junior or senior year) ... NC

Minor in piano pedagogy
(22 credit hours) Required courses:

Mus 201, 202, Music Theory ......................... 8
Mus 204, Survey of Music Literature ................ 3
Mus 208, Introduction to Piano Pedagogy ................ 3
Mus 310, Private Teaching ......................... 2
Applied piano ......................................... 6
Ensemble participation (at least four semesters)
Sophomore recital or project (may take place in junior or senior year) ... NC

Minor in music in worship
(21 credit hours) Required courses:

Mus 201, 202, Music Theory ......................... 8
Mus 204, Survey of Music Literature ................ 3
Mus 210, Learning and Teaching Concepts of Music or
Mus 241 Music Technology ......................... 3
Mus 212, Song Leading ......................... 1
Mus 311, Topics in Music Literature: Church Music 2
Applied music ......................................... 4
Ensemble participation (at least six semesters)
Sophomore recital or project (may take place in junior or senior year)

Courses
A. Departmental
Mus 209 Music Field Experience ...................... 1-3
On-campus internships supervised by a professor. May include arts administration, audio recording technology, church music, private teaching or other fields.
### B. Music theory

**Mus 102 Foundation of Music Theory** .......................... 2
An introduction to the reading and interpretation of musical notation for those with limited experience. The development of basic aural and keyboard skills, along with exposure to musical forms and styles will also be included. Intended as preparation for Mus 201-202 and as an exploratory experience for all aspiring musicians. *(Offered in spring semester. May be required for admission to Mus 201.)*

**Mus 201-202 Music Theory** .......................... 3+3
Designed to show how music is constructed artistically. Develops the ability to hear and perform music and teaches the technical elements necessary for original composition. Participation in the keyboard and aural-skills labs is required. Prerequisite: successful completion of online diagnostic exam in music theory (See Prof. Christine Seitz for details) or completion of Mus 102.

**Mus 201L-202L Keyboard Lab** .......................... 5
Provides experiences designed to develop technical proficiency and understanding of music theory principles at the keyboard as well as development of sight-reading, harmonization, transposition and improvisation skills. The labs are divided into two or three groups according to previous experience at the keyboard. While music minors and nonmajors participate, for the music major the lab serves as initial preparation for the piano proficiency exam.

**Mus 201L-202L Aural Skills Lab** .......................... 5
Provides experiences designed to develop the abilities necessary to become fluent in transforming written notation to performance. Course focuses on skills in reading and hearing rhythm, melody and harmony.

**Mus 241 Music Technology** .......................... 3
Introduces student to MIDI, recording, digital audio, notation software and computer-aided instruction in music. Students produce projects relevant to individual areas of study. Explores the historical role of technological development on musical composition and the more practical applications of current technologies. Current issues such as duplication, distribution and intellectual property also discussed. *(Offered in fall semester)*

**Mus 303-304 Advanced Music Theory** .......................... 3+3
Study of chromatic harmony through altered chords and modulation procedures of the late 18th and 19th centuries. Introduction of orchestration and 20th century composition techniques. Original composition. Continuation of analysis techniques. Prerequisites: Mus 201-202, Mus 204 or permission of instructor.

**Mus 340 Audio Production** .......................... 3
An introduction to the recording studio presenting its function in commercial music production. Areas include basic electronics, studio setup and engineering fundamentals. Lecture/lab. *(Offered spring 2007-08)*

### C. Music history and literature

**Mus 204 Survey of Music Literature** .......................... 3
Designed to follow a year of music theory and precede the study of music history, this course presents an introduction to the basic style periods in Western music literature and acquaints the student with the main forms, composers and masterworks of those epochs. *(Offered in May term only)*

**Mus 301-302 History of Music** .......................... 3+3
History of musical style within Western civilization from the ancient Greeks to the modern day. Special emphasis on important trends and their relation to the other arts. Prerequisite: Mus 201-202, Mus 204 or permission of instructor.

**Mus 311 Topics in Music Literature** .......................... 2
The study of a major composer, genre or style. The topic will be church music at least every other year. In 2006-07 the topic will be world music. Prerequisites: Mus 201-202 and Mus 204 or permission of the instructor. *(Offered in spring semester)*

### D. Music education

**Mus 210 Learning and Teaching Concepts in Music** .......................... 3
This is an introductory course for anyone who may someday teach music. It focuses on understanding the importance and power of melody, high quality diverse repertoire, song teaching strategies and developing skills for teaching children. The course also includes skill development on folk instruments: guitar, banjo, mountain dulcimer, autoharp and recorder. A fieldwork component provides real life experience with young singers. *(Offered spring semester)*

**Mus 305 String Methods and Materials** .......................... 2
Study of a variety of pedagogical materials and procedures. Particular emphasis on the methods and ideas of Shinichi Suzuki. Class lessons on stringed instruments. *(Offered fall semester 2007-08, 2009-10)*

**Mus 306 Woodwind Methods and Materials** .......................... 2
Study of pedagogical materials and teaching techniques appropriate to the woodwind instruments. Class lessons on woodwind instruments. *(Offered fall semester 2006-07, 2008-09)*

**Mus 307 Brass Methods and Materials** .......................... 2
Study of pedagogical materials and teaching techniques appropriate to the brass instruments. Class lessons on brass instruments. *(Offered spring semester 2006-07, 2008-09)*

**Mus 308 Vocal Methods and Pedagogy** .......................... 2
Required of all music-education majors and strongly recommended for all vocal performance majors. Study of basic concepts of singing in a class setting with the goal of assisting students in becoming effective teachers of singing. Emphases will include review of basic singing technique, vocal physiology, drill in diagnosis and correction of vocal problems, diction and vocalizing for desired results. There will be a fieldwork dimension to this class. *(Offered spring semester 2007-08, 2009-10)*
With special emphasis on the intermediate level student, this course focuses on the integration of theory, skills and repertoire; the reconstruction of transfer students; adolescent psychology and piano teaching. This course will present an historical survey of piano literature learned through exercise and song. Musical and dramatic interpretation studied within a singing performance setting. This course serves as a prerequisite for private applied voice study for students without previous private vocal instruction. Exceptions are determined by the voice faculty. (Offered fall semester)

Mus 260, 360 Chamber Music 1 (optional)
Designed as an avenue to explore the intricacies of small ensemble playing. Approved chamber groups of two to eight students work with the instructor on rehearsal techniques and music decision making in a master-class setting. The class meets weekly and is open to all vocalists and instrumentalists.

Mus 262, 362 Opera Workshop 1 (optional)
Opera Workshop is open to music majors and nonmajors by audition, and may be taken with or without credit. In alternate years, Opera Workshop performs a complete production of a major opera, operetta, or musical. In the spring semester or May term of alternate years, Opera Workshop will meet weekly as a class with the goal of performing a variety of shorter excerpts from opera, operetta and music theater. In the fall semesters, students may sign up for Opera Workshop as an independent study course with students assigned to smaller solo and ensemble scenes. (A full opera production is scheduled for fall 2006.)

2. Private applied music study
Private lessons are available in voice, piano, harp, organ, string, brass and wind instruments, percussion and composition. Two hours of credit are granted for each applied music registration. At least one hour of daily practice is expected of nonmajors while music majors are expected to practice at least two hours daily. Students who have passed their sophomore qualifying recital should register for the 300-level course number in their particular applied area. Students electing applied music will perform for a music faculty jury at the end of each semester of study. (An applied surcharge for the costly nature of one-on-one instruction is assessed for each semester of applied music study. See the "Expenses" section of this catalog for more information on the applied music surcharge.)

Mus 240 Class Voice ........................................... 2
Breathing, diction and other beginning techniques of voice production learned through exercise and song. Musical and dramatic interpretation studied within a singing performance setting. This course serves as a prerequisite for private applied voice study for students without previous private vocal instruction. Exceptions are determined by the voice faculty. (Offered fall semester)

Mus 250 Class Piano ...................................... 2
A course of study for the beginning adult pianist, this course will meet in the Yamaha Clavinova lab. Skill development in ear playing, reading, transposition, harmonization, improvisation, technique and repertoire. Students earning a grade of B or higher in this course will have automatically met their piano proficiency requirement.

E. Piano pedagogy
Mus 208 Introduction to Piano Pedagogy ........................................... 3
This introductory course in the piano pedagogy sequence focuses on the beginning student and on the materials and teaching techniques most effective for this level of instruction. The course includes weekly lecture-discussion sessions, observation of class and private instruction and the supervised teaching of weekly private lessons. This course is an alternative to Mus 210. (Offered fall semester 2006-07, 2008-09)

Mus 211 Group Piano Instruction ........................................... 2
This course will provide students with an introduction to the pedagogy of group piano instruction for older students. We will examine a four-semester curriculum that encompasses elementary to intermediary piano levels. The pedagogical approach will examine conceptual learning and problem solving in relation to the following: ear playing, reading, transposition, harmonization, improvisation, technique and repertoire. Primary aims of study: Learning the applied skills such as ear playing, harmonization and transposition and being able to utilize these materials to convey important musical concepts in a classroom situation; gaining a greater appreciation, through research, of the academic literature concerning group piano instruction; surveying several college-level class piano texts. (Offered fall semester 2007-08, 2009-10)

Mus 310 Private Teaching ........................................... 2
With special emphasis on the intermediate level student, this course focuses on the integration of theory, skills and repertoire; the reconstruction of transfer students; adolescent psychology and piano study; and a survey of intermediate materials. (Offered spring semester 2007-08, 2009-10)

Mus 421 Piano Literature ........................................... 2
A functional knowledge of piano literature is essential for all pianists and teachers. This course will present an historical survey of piano literature from J.S. Bach to the present focusing on stylistic elements pertinent to particular composers. Special emphasis will be given to works that may be best suited for advanced students, both high school and at the college undergraduate level.

Mus 212 Song Leading ........................................... 1
An introductory conducting course using *Hymnal: A Worship Book* as a primary text. Emphasis will be placed on learning how to be a confident song leader. Attention will also be given to incorporating a variety of quality worship music in a worship setting. No prerequisite. Nonmusic majors are welcome. (Offered fall semester)
286, 288, Harpsichord ... 2 hours
287, 288, Saxophone ... 2 hours
295, 296, Trumpet ... 2 hours
296, 297, Trombone ... 2 hours
297, 298, Tuba/Euphonium ... 2 hours

Applied music studio specialists and instructors
Flute – R. Hovan; Oboe – A. Mather-Stow; Clarinet – J. Graulty;
Bassoon – A. Bridgett; Saxophone – C. French; Horn – M. Lewellen*;
Trumpet – A. Urotaoni*; Trombone – A. Hicks*; Tuba – S. Gnagye*;
Violin – S. Soroka; Viola – R. Troiano; Cello – D. Machavariani;
String Bass – R. Martin; Percussion – J. Bollero; Drum Set/Jazz – S.
Carreno; Harp – S. Davids; Voice – D. Brubaker, J. Manns, S. Dengler,
L. Dengler (also composition), S. Hill; Piano – M. Hill, B. Lapp, C.
*Indicates member of Fort Wayne Philharmonic

3. Ensembles
All ensembles require auditions. Credit is optional.

Choirs
All choirs rehearse Monday, Wednesday, and Thursday 4-5:30 p.m.
The rehearsal hours are shared between the four choirs, so that all
students will participate in both a mixed choir and either the men's or
women's choir. Students will audition for placement in either Chorale
or Chamber Choir and may choose to register for academic credit or to
participate as a co-curricular activity.

Mus 290  Chorale 1 (credit optional)
The Chorale is open by audition to all singers. Its members represents a
wide variety of academic majors. The choir sings choral treasures from
every continent and every period of music history. Often the Chorale
joins with the Chamber Choir to perform of a major work. Chorale also
performs concerts in the fall and spring, and at occasional off-campus
events.

Mus 390  Chamber Choir 1 (credit optional)
Chamber Choir is an auditioned group of 20-30 junior and senior
singers, performing secular and sacred music from the Renaissance,
Baroque, Classical and Modern periods. The Chamber Choir
occasionally joins the Goshen College Orchestra for choral/orchestral
works. Three or four on-campus and numerous off-campus concerts are
presented each season, as well as periodic tours.

Men's Chorus
Formed by the combined male voices of the Chorale and Chamber
Choir, the Goshen College Men's Chorus performs with the vitality and
energy that has become a tradition of collegiate men's choruses. They
perform in all the scheduled choral concerts and occasionally perform
in off-campus events and represent the college on tour. (Those wishing
to sing in this ensemble must audition for placement in either Mus 290,
Chorale or Mus 390, Chamber Choir.)

Women's World Music Choir
Formed by the combined female voices of the Chorale and Chamber
Choir, the Women's World Music Choir sings music of international
cultures and indigenous peoples. In doing so, the members celebrate the
music of the world, as well as the role that women take in maintaining
the arts within cultures. They perform in all the scheduled choral
concerts, and occasionally sing at off-campus events and represent the
college on tour. (Those wishing to sing in this ensemble must audition
for placement in either Mus 290, Chorale or Mus 390, Chamber Choir.)

Mus 261  Jazz Band 1 (credit optional)
Lavender Jazz is Goshen College's big band. The group plays classic jazz
standards and styles, such as swing, blues, waltz, mambo, cha cha and
funk. Lavender Jazz performs in a variety of settings, including concert
halls, malls, churches and high schools and makes recruiting trips
throughout the year.

Mus 280  Voices-n-Harmony 1 (credit optional)
An associate choir of the music department, the Community School of the
Arts and the multicultural affairs office, Voices-n-Harmony sings classic
and contemporary gospel music and is open to students, faculty, staff and
community members from a mix of racial and ethnic backgrounds. Voices-
n-Harmony performs for Martin Luther King Day events and in several
other concert settings throughout the year. They rehearse on Thursdays
5:30-6:45 p.m. in Music Center.

Mus 292  Orchestra 1 (credit optional)
The Goshen College Orchestra presents concerts of major orchestral works
each semester. In addition, it accompanies the choirs, opera productions
and student winners of the annual Concerto-Aria competition. The
orchestra also performs in the department's annual Festival of Carols
program, hosts world-renowned guest soloists and composers, and
occasionally serves as the host ensemble for nationally advertised
conducting workshops. The orchestra is open to all students by audition,
regardless of major. Rehearsals are on Tuesdays and Fridays 4-6 p.m.

Mus 298  Wind Symphony 1 (credit optional)
An opportunity for all brass, woodwind and percussion players to
perform the finest wind band and chamber wind repertoire. Open to
music majors and non-majors by audition. Auditioned area pre-college
students also participate in this group. Rehearsals are Tuesday evenings
6:30-9 p.m., beginning approximately Nov. 1. The ensemble performs
a brief seasonal pre-concert before the annual Festival of Carols in
December and two concerts in the spring semester in Sauder Concert
Hall.
Nursing
Director, Associate Professor V. Kirkton
Professors E. Driver, B. Sraf
Associate Professors F. Brunner, M. Helmuth, J. Hoffman,
N. Liechty Loewen, G. Weybright
Assistant Professor D. Hoover

Purpose
The nursing department is committed to excellence in nursing education and practice with an emphasis in liberal arts and the discipline of nursing. The nursing program provides opportunities for the student to gain knowledge and develop values for personal and professional growth and to prepare the student for entry into professional nursing practice as a generalist in settings where health care is provided. The study of the practice of nursing is based on nursing and related theories, scientific principles, intercultural perspectives and Christian ethics. The program prepares graduates with a foundation for continuous intellectual inquiry, graduate study and/or eventual specialization in nursing.

Program outcomes
Upon graduation, graduates will: 1) utilize knowledge from the humanities, theology, natural and social sciences, nursing theories and intercultural experiences in providing nursing care; 2) use the nursing process by employing strategic thinking, decision making, psychomotor and interpersonal skills; 3) develop a sense of vocational direction by interpreting the historical role of nursing and participate in the present emerging roles of the professional nurse; 4) collaborate and consult with clients and the interdisciplinary team in providing comprehensive health services that reflect a healthy understanding of self and others; 5) assume leadership that empowers self and others, foster ability to resolve conflicts, function as a change agent and promote accountability; 6) use the ability to think actively and strategically in applying selected research findings to improve nursing practice; 7) demonstrate personal and professional growth by commitment to lifelong learning and involvement in professional and community activities; 8) demonstrate a faith that is active and reflective; appreciate transcendent reality of aesthetic and spiritual experiences; and be sensitive and responsive to spiritual needs of self and others. Demonstrate stewardship of the environment and examine ethical issues in relationship to Christian faith.

Two tracks
The nursing program has a basic and a B.S.N. completion track. A person who has just graduated from high school or who has completed some college, follows the basic track. A person who has graduated from a three-year diploma or associate degree program in nursing and is a registered nurse follows the completion track. It is also possible for registered nurses to fit into the basic track, however the completion track was designed to provide an accelerated option that builds on previous education, nursing practice and life experience. The objectives and characteristics of graduates are the same for students enrolled in either track. At graduation, the bachelor of science in nursing degree is conferred.

A. Basic students
Admission process
Students applying for admission to the basic track should be in the upper half of their high school graduating class. The high school program should include foreign language, algebra, chemistry and biology. Physics is also recommended.

Applications are submitted during the second semester of the freshman year. Applications are due by March 1 and are processed by April 30. The first nursing course begins in the fall of the sophomore year. This course is also offered during the summer session. Transfer-student applications should be submitted by March 1 for summer or fall starts. Applications received after March 1 are considered according to date of receipt.

The applicant’s readiness for admission to the nursing major is determined by: academic performance, references, health record and a security check.

Admission criteria
General. Admission to Goshen College as outlined in this Catalog.
Professional. Essential abilities necessary to learn the professional nurse role include critical thinking, conceptual and judgmental skills, neurological function so that the senses can be used to make correct clinical judgments and perform psychomotor skills safely; the ability to communicate clearly; effective emotional coping skills; accountability; and the ability to engage in activities consistent with safe nursing practice.

Academic. Grade of C or above in supporting and nursing courses and a cumulative college grade point average of 2.5 or higher.

Mathematics requirement. All first-year or transfer students who are enrolled in pre-nursing courses need to take the Math Competency exam during registration. A score of 18 or above on this placement test is required.

Other. The nursing department reserves the right to adjust the current admission criteria when outcome assessment data demonstrate the need for such changes.

Continuation criteria. A grade of C or above in all supporting and nursing courses and a college grade point average of 2.5 or higher is required for continuation in the nursing major. A grade of D or F in a supporting or nursing course interrupts the student’s plan of study. The course must be repeated with a grade of C or higher prior to advancement to the next level. Nursing and supporting courses may be repeated only once. The number of repeated courses is limited to two supporting courses and two nursing courses.

Each student will have a clinically based evaluation near the end of the spring semester of the junior year. This evaluation includes use of critical thinking and judgment skills in clinical problem solving, therapeutic communication skills and accountability for actions. Successful performance is necessary for advancement to the senior-level courses.

The nursing department reserves the right to place a student on probation or require a student to withdraw from the nursing major when that student displays behaviors deemed inappropriate to the practice of professional nursing.

Graduation requirements
Completion of 120 credit hours accepted by Goshen College, successful completion of all nursing courses, cumulative grade point average of 2.5 or higher in college course work.

Curriculum
The basic curriculum consists of 120 credit hours, of which 41 are in supporting courses and 46 are in nursing courses. Nursing students complete the same general education course requirements as students in other majors with one exception: Nurs 309, Health Care Ethics substitutes for the general education course in philosophy or peace studies. Nursing majors participate in the Study-Service Term or the on-campus alternative courses. The SST alternate requirements for nursing students would be a total of 12 credit hours with the requirement that one of the alternative courses be in language.

Upon completion of the degree, the student is eligible to take the
National Council Licensure Examination – RN (NCLEX-RN) for licensure as a registered professional nurse. The program is accredited by the Commission on Collegiate Nursing Education and is approved by the Indiana State Board of Nursing.

Graduates are prepared for positions in all areas of nursing in hospital and community settings. Graduates are encouraged to continue their education in graduate studies as well as in continuing education.

**Supporting science courses**
The following courses in the natural and social sciences are required for all nursing majors. Prior to enrolling in nursing courses the following (or their equivalent) courses must be completed successfully:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 101, Chemistry and Physics of Life</td>
<td>3</td>
</tr>
<tr>
<td>Chem 102, Chemistry and Physics of Life</td>
<td>4</td>

*SoWk 221, Human Behavior may be substituted for Psych 210 with approval of the director.

**Courses**

**Nurs 210 Introduction to Professional Nursing**
Selected nursing theories, nursing process and research will be studied as foundations for nursing practice. Emphasis will be on the nurse as a person and the importance of self-understanding, accountability, communication and helping relationships. The role of the professional nurse is studied in terms of an ever-changing health care delivery system and emerging nursing practice settings. Introduction to client as individual, family and community.

**Nurs 211 Concepts and Strategies in Nursing**
Selected concepts and strategies inherent in basic nursing practice are studied. These are organized according to classification systems of nursing diagnoses, interventions and outcomes. Related nursing skills are incorporated. Prerequisite: Nurs 210.

**Nurs 212 Holistic Client Assessment**
Holistic client assessment focuses on collection of a database within the context of the nursing process. Components of the database include the health history and assessment of functional health patterns, body systems, growth and development, and cultural and spiritual dimensions. Assessment is linked with current health screening recommendations and a health promotion framework. Clinical and laboratory experiences are included. Prerequisite: Nurs 210, prerequisite or corequisite: Nurs 211.

**Nurs 305 Pharmacology and Drug Administration**
An introduction to drug therapy focusing on drug classifications with an emphasis on: 1) principles of drug therapy and the actions of a classification, 2) drug administration in a clinical setting, 3) problem solving with clinical situations, and 4) nursing interventions with rationale. Nonnursing majors may take the course for one or two hours. Prerequisites: Nurs 211 and Nurs 212 for nursing majors and by consent of instructor for nonnursing majors.

**Nurs 307 Nursing Care of the Adult**
The nursing process is used with individuals and families experiencing changes in health status requiring assistance from the health-care system. Clinical experience consists of providing nursing care to persons hospitalized for diagnostic tests, medical treatments, and/or surgical procedures. The focus is on care of persons experiencing the results of diseases most common among adults in the United States. Nursing independent and interdependent functions will be addressed using a holistic view of the patient/client. Prerequisite: Nurs 211 and Nurs 212. Pre- or corequisites: Nurs 305, Biol 320.

**Nurs 308 Gerontological Nursing**
Normal age changes and health needs of persons in the latter one-third of the life span are addressed. The content is applied during clinical experiences within the community and nursing-home settings. Prerequisites: Nurs 211 and 212. Pre- or corequisites: Nurs 305, Biol 206, Biol 320.

**Nurs 309 Health Care Ethics**
In this course, students will actively reflect on ethical issues which are present in health care for practitioners and consumers. The focus will be on the process of ethical inquiry rather than decision outcomes. In the process of analyzing bioethical issues, student will be introduced to ethical theory and modes of ethical analysis informed by the Christian faith. Prerequisites: Open to third- and fourth-year students from all departments.

**Nurs 311 Nursing Care of the Expanding Family**
The nursing process and knowledge of normal and selected abnormal conditions experienced during the childbearing cycle are addressed. Clinical experiences occur with the family in the community and hospital. Prerequisites: Nurs 211 and Nurs 212. Pre- or corequisites: Nurs 305, Biol 320.

**Nurs 312 Nursing Care of the Child**
The focus of this course is on common conditions and illnesses of children. The clinical focuses of the nursing care of the ill child. Developmental concepts, health promotion and prevention are emphasized in clinical and theory. Prerequisites: either Nurs 307 or Nurs 308. Pre- or corequisites: Nurs 305, Biol 320.

**Nurs 403 Nursing Research**
Basic concepts of nursing research are examined. Focuses on critical analysis of published nursing research as a basis for using research in clinical practice. Prerequisites: nine credit hours of 300-level clinical nursing courses.

**Nurs 405 Psychiatric/Mental-Health Nursing**
A study of psychiatric/mental-health nursing practice. The clinical component provides opportunities in a psychiatric hospital and community mental-health settings. The role of the nurse as a member of the mental-health team is emphasized. Prerequisites: All 300-level clinical nursing courses, Psych 306.

**Nurs 406 Acute-Care Nursing**
Nursing concepts and theories are applied to the care of acutely ill adults and their families. Clinical experiences occur in an acute care
Nursing Care in the Home* .................................................. 3
Concepts from biological, behavioral and nursing sciences are applied to
the care of ill clients and their families in the home. Students enhance
their understanding of family theory and will apply this theory to their
practice by performing one detailed family assessment of one client
family. Loss theory is considered in the care of clients with complex
needs, often including terminal illness. Understanding of family violence
is emphasized. Prerequisites: All 300-level clinical nursing courses.

Community-Health Nursing* .................................................. 3
Applies a synthesis of nursing and public health theories to the
assessment and care of aggregates in the community. Community health
planning for aggregates is done using various community agencies and
resources. The public health delivery system is differentiated from the
private health care delivery system in its emphasis on social justice.
Prerequisites: All 300-level clinical nursing courses.

Leadership in Nursing* .................................................. 3
A three-credit-hour course that continues to focus on the use of the
nursing process with clients. Content includes management and
leadership theories. The clinical experience includes management of
care for multiple clients. Prerequisites: All supporting courses and clinical
nursing courses.

Senior Seminar in Nursing .................................................. 3
A focus on integration of current professional practice issues. Students
articulate their own philosophy of health care and nursing including
their faith beliefs, rights of clients and responsibility to deliver quality
nursing care. Prerequisites: All clinical nursing courses.

* Denotes courses with a clinical component or practice-based project

B. B.S.N. completion students
Registered nurses may choose to take the basic track or participate in
the B.S.N. completion track described below. The B.S.N. completion
program is offered in collaboration between the Goshen College
nursing department and Division of Adult and External Studies
(DAES). Transcripts from previous nursing education programs are
evaluated individually and credits are transferred accordingly. Credit
by examination is also an option for general education and supporting
courses.

Overview
This track allows registered nurses to complete a B.S.N. in about 19
months. The track is designed to affirm personal and professional
strengths. Students are actively involved in identifying their strengths
and their learning needs. Self-directed study is promoted. Study guides
are provided to maximize off-campus study and in-class activities. The
collaborative education process makes student experiences and insights a
vital part of classroom activities. Each group of R.N.s progresses through
the courses as a cohort group. Classes meet one night a week for four
hours and vary in length from two to 10 weeks. The same night of the
week is used for a group throughout the program. Clinical experiences
for specified courses will be arranged at other times during the week.
There are 13 courses providing 40 credit hours, of which 28 are upper-
level nursing credits and 12 are general education credits.

Purpose
The B.S.N. completion track completes the purpose of the basic nursing
program and provides a program that is designed for the working
registered nurse.

Admission requirements
• An associate degree or diploma in nursing from an accredited
program.
• A cumulative grade point average of 2.5 or higher in prior academic
work.
• Completion of all prerequisite supporting courses (listed below).
• Transfer of a minimum of 60 credit hours from an accredited college.
• Current licensure as an R.N. in Indiana or a neighboring state where
the clinical component can be completed.
• Equivalence of one year of full-time employment as a registered
nurse in a health-care delivery setting. Currency and relevance of
work experience will be evaluated individually.

Prerequisites
Prior to assignment to a group and beginning progression through the
track, the following courses (or their achievement test equivalent) must
be completed.

General education  minimum hours
English composition .................................................. 3

Supporting courses
Chemistry .......................................................... 4
Anatomy & Physiology ................................................. 4
Microbiology .......................................................... 3
Principles of Sociology/General Psychology ....................... 3

Graduation requirements
• Completion of 120 credit hours accepted by Goshen College
• Completion of the B.S.N. completion track
• Cumulative GPA of 2.5 or above in this program
• Completion of general education and supporting-course
requirements outlined above

Courses for the B.S.N. completion program
Nurs 331 Philosophy and Theories of Nursing. ................. 3
Bridge course that prepares adult learners for upper-level college study.
The metaparadigm of nursing is utilized as the organizing framework for
exploration of self and nursing. The evolution of nursing science, theory,
research and practice are studied.

Nurs 332 Holistic Client Assessment* ......................... 4
Builds on prior learning, expanding history taking and physical
assessment skills across the life span. Includes spiritual, cultural and
family assessment.

Nurs 333 Nursing Research .............................................. 2
Basic concepts of nursing research are examined. Students will focus
on applying these concepts by locating, reading and utilizing published
nursing research reports to make recommendations for evidence based
nursing practice. Nursing research is differentiated from research in
other fields.

Nurs 334 Communication Skills for Professional Nurses .... 3
This course responds to the challenges of professional communication
and the expectations for registered nurses who are baccalaureate students.
The focus is on critique and the development of individual written and
oral communication for content, style and effectiveness. Access and
management of information will be discussed.
Peace, justice and conflict studies

Program Director, Associate Professor J. C. Liechty
Associate Professor C. Schrock-Shenk
Assistant Professor D. Johnson
Adjunct Faculty D. Cortright, F. Weaver Grill, K. Shelly, P. Thomas, S. Thomas

Peace, justice and conflict transformation interests are an essential part of academic and co-curricular programs of Goshen College. Goshen offers four academic programs in peace, justice and conflict studies: a major in peace, justice and conflict studies; minors in conflict studies and peace and justice studies; and a conflict transformation track for the teacher education program. The major introduces students to the array of topics and disciplines that make up peace, justice and conflict studies, while also allowing students to focus in areas of particular interest. The two minors enable students to combine peace, justice and conflict studies content with any recognized major. The minor in conflict studies is oriented toward students completing professional programs in nursing, social work and education as well as students seeking to utilize conflict transformation skills in a particular career. The minor in peace and justice studies is oriented toward assisting students from a wide variety of academic majors to integrate peace and justice studies content with their vocational goals. Both minors are designed to help students prepare for work in peace and justice service agencies in the United States or abroad. Finally, a conflict transformation studies track, offered in conjunction with the teacher education program, gives a conflict transformation endorsement for elementary, middle school and secondary teacher education students.

Collaboration with local, regional, national and international peace, justice and conflict transformation organizations provides students with a wide opportunity for paid and voluntary internships. Examples of recent internships include Mennonite Disabilities, La Casa of Goshen, the Fourth Freedom Forum, the Center for Community Justice in Elkhart, the Elkhart County Probation Department, Boys and Girls Club of Elkhart and Goshen, Jubilee Partners in Georgia and Corrymeela in Northern Ireland.

Campus co-curricular activities include the annual C. Henry Smith Peace lecture series, the annual student peace oratorical contest, the student PAX organization, the peace play competition, peace studies community forums, peace scholars-in-residence, intercollegiate peace fellowship and the peace library collection.

The Orin and Marie Beechy scholarship fund assists students with academic expenses.

The department and its programs are rooted within the context of Anabaptist-Mennonite theology and history. Courses emphasize action-reflection learning in addition to more traditional classroom opportunities. The program encourages internships as a means for students to gain additional skills in active, practical peace building. Classes, internships and co-curricular activities equip students with a framework of personal values and skills in order that they may be able to make a positive impact on the society and culture in which they live.

Indianapolis Peace House

The Indianapolis Peace House began a peace studies program in fall of 2004. Students from three collaborating colleges – Goshen, Manchester and Earlham – join this urban peacemaking experience, involving an internship, several peace studies courses and independent study.
Career opportunities
Students are prepared to enter graduate programs in conflict transformation studies or in peace and justice studies. They are also prepared to enter the world of work in nongovernmental organizations, mission, peace and service organizations, restorative justice organizations, ministry or other work situations in social justice, active peace building and conflict transformation. Professional students electing the minor or professional endorsement in conflict transformation studies will be prepared to assist individuals, organizations and communities to deal more effectively and proactively with conflict situations as these arise in the work environment.

Major in peace, justice and conflict studies
Requires a total of 41 credit hours

Required courses ................................. 20-23 hours
Bibl 321, Biblical Themes of Peace ............... 3
PJCS 311, Junior Seminar .......................... 3
PJCS 313, Violence and Nonviolence .............. 3
PJCS 325, Mediation: Process, Skills and Theory .... 4
PJCS 409, Internship ................................ 1-4
PJCS 411, Senior Seminar ......................... 3
PJCS 425, War and Peace in the Modern World .... 3

Limited option courses .......................... 18 hours
Econ 202, Principles of Economics  or
Hist 255, History of Global Poverty .............. 3
PJCS 332, Religion, Conflict and Peace  or
PJCS 426, Conflict in Groups .....................
PoSc 200, Introduction to Political Science  or
PoSc 308, International Politics ...................
Phil 302, Ethics and Morality  or
PJCS 312, War, Peace and Nonresistance  or
Rel 316, Liberation Theologies .................... 3
PJCS 347, Justice/Restorative Justice  or
PJCS 350, Dynamics and Theology of Reconciliation ....
PoSc 210, Introduction to Public Policy  or
Soc 322, Social Policy and Programs  or
Soc 391, Methods of Social Research .............. 3

One of the following courses .......................... 3 hours
Any upper-level PJCS course or any non-PJCS course listed above, or
one of the following:
Comm 240, Communication Research
Hist 330, International Women's History
Hist 335, History of Ethnic Conflict
PJCS 210, Transforming Conflict and Violence (if taken before PJCS 325)
Psyc 200, Social Psychology
Psyc 305, Prosobal Behavior
Psyc 308, Personality Theory (Prerequisite: Psyc 100)
Psyc 314, Psychology of Religion
Rel 319, Doing Theology Abroad
Soc 210, Sociology of the Family
Soc 220, Human Origins/Human Nature
Soc 230, Cultural Anthropology
Soc 301, Community Development
Soc 334, Race, Class and Ethnic Relations
SoWk 221, Human Behavior
WoSt 301, Women's Concerns
WoSt 355, Contemporary Women's Issues

Planning guide for PJCS majors
SST
Recommended: sophomore year, any summer, spring term junior year or fall term senior year

First year
General education
SST language
Transforming Conflict and Violence (recommended but not required)

Second year
General education
Violence and Nonviolence
Mediation: Process, Skills and Theory
War, Peace and Nonresistance
Principles of Economics or History of Global Poverty

Third year
General education
Junior Seminar
Introduction to Public Policy, Social Policy and Programs or
Methods of Social Research
Three additional courses required for PJCS major

Fourth year
Balance of general education
Senior Seminar
Limited courses required for PJCS major

Minor in conflict transformation studies
(20 hours)
PJCS 210, Transforming Conflict and Violence .................. 3
PJCS 313, Violence and Nonviolence ......................... 3
PJCS 325, Mediation: Process, Skills and Theory ..............
PJCS 347, Justice/Restorative Justice  or
PJCS 350, Dynamics and Theology of Reconciliation .......... 3
PJCS 410, Senior Advanced Work ............................. 1
PJCS 426, Conflict in Groups .................................. 3
Any PJCS course ................................................. 3

Minor in peace and justice studies
(20 hours)
Bibl 321, Biblical Themes of Peace  or
PJCS 312, War, Peace and Nonresistance  or
PJCS 332, Religion, Conflict and Peace ......................
PJCS 311, Junior Seminar .................................... 3
PJCS 332, Religion, Conflict and Peace ......................
PJCS 313, Violence and Nonviolence ......................... 3
PJCS 325, Mediation: Process, Skills and Theory ..............
PJCS 347, Justice/Restorative Justice  or
PJCS 350, Dynamics and Theology of Reconciliation .......... 3
PJCS 425, War and Peace in the Modern World ............... 3
PJCS 410, Senior Advanced Work ............................. 1
Any PJCS course ................................................. 3

Certificate in conflict transformation for teachers
This certificate may be added to an elementary, middle school or secondary education program. For further information, consult with a member of the teacher education faculty. Education students who wish to complete the conflict transformation studies minor at the conclusion of their certificate requirements should declare the minor and consult with a PJCS adviser for further details. (nine hours)
PJCS 210, Transforming Conflict and Violence .................. 3
PJCS 325, Mediation: Process, Skills and Theory .............. 3-4
PJCS 426, Conflict in Groups .................................. 3

Courses
PJCS 209  Field Experience ................................. 1-4

An approved supervised internship related to peace, justice and conflict studies work.
PJCS 210 Transforming Conflict and Violence .................................. 3
Explores the potentially constructive nature of conflict, the destructive nature of violence and the relationship between the two. Examines various patterns of communication, conflict and violence and what is needed for transformation. Students will reflect on their own conflict styles, build their skills for peace building and examine their personal temptations for violence.

PJCS 255 History of Global Poverty ............................................. 3
(See Hist 255)

PJCS 305 Prosocial Behavior ....................................................... 3
(See Psyc 305)

PJCS 307 Conflict and Conciliation in Irish Literature ..................... 3
(Of offered in Ireland. See Engl 207/307)

PJCS 310 Issues in Peace, Justice and Conflict Studies .................... 3
A topical course focused on selected contemporary issues such as militarism, organizational power relationships and conflict transformation, nuclear weaponry, economic sanctions, domestic violence, etc.

PJCS 311 Junior Seminar ............................................................ 3
Junior Seminar has three main purposes: to explore classic and contemporary issues in conflict and justice through faculty- and student-led seminars; generally, to develop research and writing skills appropriate for PJCS; and specifically, to begin work toward a major research project to be completed in Senior Seminar.

PJCS 312 War, Peace and Nonresistance ...................................... 3
A survey course that examines the development of warfare ideologies and religious responses to warfare. Includes examination of just war theology, Anabaptist-Mennonite doctrines about nonresistance, pacifism and nonviolent action.

PJCS 313 Violence and Nonviolence ............................................ 3
An interdisciplinary study of the nature, causes and types of violence. Examines the juxtaposition of scientific theories and religious teachings about violence and nonviolence.

PJCS 316 Liberation Theologies .................................................. 3
(See Rel 316)

PJCS 319 Doing Theology Abroad ............................................... 4
(See Rel 319)

PJCS 320 Borderlands ............................................................... 3
This course will take place in Southeastern Arizona and Aigua Prieta, Sonora, Mexico. The Chiricahua Mountains extend from Arizona into North Central Mexico as one continuous ecosystem divided by the national border. The course will examine the interface between environmental realities of the region and U.S. government immigration policies. Students will hear the voices of western writers, Native Americans, immigrants, ranchers and environmentalists involved in border communities.

PJCS 325 Mediation: Process, Skills and Theory ............................. 3-4
Focuses on the third party roles of the mediator. Explores the theoretical basis for mediation, its various applications in North America and critiques the appropriateness of mediation for certain types of conflicts. Emphasis will be on experiential learning to develop the skills needed for mediation in formal and informal settings. PJCS majors and minors, as well as interdisciplinary majors with a PJCS component, will take this course for four hours.

PJCS 330 International Women’s History .................................... 3
(See Hist 330)

PJCS 332 Religion, Conflict and Peace ........................................ 3
An examination of the role of religion in causing and nurturing violence and in promoting peace, themes which have emerged as central to the pursuit of peace in the 21st century. The course will include exploration of the implications of these themes for Christian mission.

PJCS 335 History of Ethnic Conflict .......................................... 3
(See Hist 335)

PJCS 344 Individual Readings .................................................... 1-3
Independent readings in peace, justice and conflict transformation studies. Student takes initiative to develop a plan with a PJCS faculty member. By consent of the faculty member only.

PJCS 345 Group Readings ......................................................... 1-3
Selected writings of an individual scholar or peace activist will be studied to examine the themes and issues raised within the corpus of work that s/he has produced during her or his lifetime.

PJCS 347 Justice/Restorative Justice ......................................... 3
Begins with an account of some of the classic and mainstream understandings of justice and then moves on to an overview of the foundational principles of restorative justice and its various practical applications. The course will examine and address the needs of victims, offenders, communities and broader systems. It will specifically examine the Victim Offender Reconciliation (VORP) model and its role in the North American criminal justice system. It will also examine models from other contexts such as family group conferences and circles.

PJCS 348 Sexual Violation and Violence .................................... 3
This survey course examines issues of sexual violation and violence within the life of individuals and communities. It explores the question, “What is the nature of reconciliation, forgiveness and healing?” in the experiences of individuals or communities where rape, incest, sexual harassment, sexual torture, professional sexual misconduct or domestic violence has been present. Examines conflicts of opinion and belief about these issues as individuals and communities seek to resolve the long-term aftermath of sexual violation and violence.

PJCS 350 Dynamics and Theology of Reconciliation ..................... 3
An interdisciplinary examination of the work of reconciliation in interpersonal and small group relationships, but especially in large-scale social and political contexts.

PJCS 355 Contemporary Women’s Issues .................................. 3
(See WSt 355)

PJCS 405 Personal Violence ....................................................... 3
An interdisciplinary study seminar about the prevalence of violence in the life of individuals or small groups. May include, for example, the death penalty, sexual violence, politically motivated torture, right-to-die issues or other relevant expressions and experiences of violent behaviors. Course includes emphasis on the development of independent research as well as written and oral presentation skills. In selected years, may become the senior seminar anchor course.

PJCS 406 Spiritual Path of the Peacemaker ................................ 3
Uses biographical and autobiographical narratives alongside formal and/or theoretical writings of peace builders and healers of violence. Investigates the question, “How does a peace builder’s inner spiritual journey relate to her or his peace activism in the world?” Students will
PJCS 409  Senior Internship ........................................ 1-4
An approved internship or work experience related to peace, justice and conflict transformation studies. Examples include supervised activities in shelters for the homeless, work with local, regional, national or international peace, justice and conflict transformation agencies and organizations or work with congregational and denominational peace centers.

PJCS 410  Senior Advanced Work ........................................ 1
A written project designed and implemented by the student in consultation with PJCS staff, that relates the PJCS minor to his or her major course of studies. Designed to be the final course of the student's plan of study in the peace and justice and conflict studies minors.

PJCS 411  Senior Seminar ........................................ 3
Students will complete a major research project, which will be open to a wide variety of interpretations as suggested by student priorities and interests. Senior Seminar will also focus on integrative issues concerning the work of peace building and conflict transformation in the work or graduate school environment and on professional issues such as résumé preparation and job interviews.

PJCS 425  War and Peace in the Modern World ........................................ 3
Working primarily from a political science perspective, this course will examine changing patterns of fighting wars and seeking peace.

PJCS 426  Conflict in Groups ........................................ 3
Using a systems approach, students will move from interpersonal conflict to addressing conflict in groups. Students will explore the uniqueness of conflict in various kinds of groups and will examine models for assessment, analysis, process design, intervention and evaluation in such situations of conflict. Using case studies and real life situations of group conflict and systemic injustice from families, congregations, organizations and communities, students will learn practical strategies for group facilitation, dialogue, problem-solving, decision-making and system change. Prerequisite: PJCS 325.

PJCS 430  Healing the Wounds of Violence ........................................ 3
A seminar in which students develop advanced research as well as oral and written presentation skills. Focused on interdisciplinary examination and analysis of historical and contemporary models for recognizing, assessing and healing the wound of violence. Investigates the question, "What are the strategies of healing processes for individuals and communities who seek to heal themselves or others from the wounds of violence?" This course is also suitable for students enrolled in clinical professional programs such as nursing, social work or education. Prerequisites: 12 hours of upper level PJCS courses or permission of instructor.

Physical education
Chair, Associate Professor J. Lehman
Associate Professors S. Daugherty, V. Hershberger
Assistant Professor S. Wiktorowski
Athletic Director K. Pletcher
Coaches: L. Bontrager, R. Clark, S. Daugherty, C. Furman, J. Keister, S. King, T. Mounsithiraj, T. Mounsithiraj, S. Wiktorowski, D. Yoder, S. Yoder

Mission statement
The physical education department contributes to the overall mission and core values of Goshen College through the study of human movement in relation to wellness, exercise, sport and recreational activity. This program of study presents a unique and valuable perspective within the liberal arts education and provides programs specific for those who desire a career in the field of kinesiology. Based on the conviction that exercise and physical activity make a significant contribution to the health, growth and development of each individual, the physical education program is viewed as a valuable and integral part of the total curriculum at Goshen College.

Programs in the physical education department are guided by a philosophy that emphasizes the following: a commitment to the value of physical activity for all people, a scientific understanding of exercise, sport and physical activity, the significance of critical, creative and reflective processes, the importance of integrity and the appreciation of human movement as a form of expression. Moreover, the physical education program encourages majors to develop the knowledge and skills for effective group leadership, teaching, motor skill performance and the application of movement principles. Members of this department are committed to fostering personal, intellectual, spiritual and social growth in all students within the context of human movement.

Programs
The physical education department accomplishes this mission through curricular and cocurricular programs. First, the department services the general education curriculum by offering a wellness course which centers on the acquisition of wellness knowledge and the development of a personalized wellness plan. Second, the department offers a major and a minor in physical education, which prepares graduates for careers in teaching, sport management, personal training, retail sales, broadcasting, reporting and graduate work. Third, the elective physical activity program provides opportunities for students in any major to develop lifetime physical activity skills.

Two cocurricular programs, intramurals and athletics, provide many meaningful and intense opportunities for students to grow personally, intellectually, spiritually and socially as well. These programs have a significant impact in the lives of many Goshen College students who participate as leaders, event staff, players and as spectators. Additionally, these programs provide numerous occasions each week for other members of the campus and larger community to gather in a spirit of fun and recreation.

Career opportunities
Physical education graduates are currently teaching and coaching in public and private elementary, middle and secondary schools. Successful completion of a program in this department prepares graduates to work in physical therapy departments of hospitals, fitness clubs, athletic programs, municipal recreation, camp settings, community development and/or sport ministry.
Graduate school opportunities
Some alumni in physical education complete graduate school and pursue teaching or research opportunities in higher education.

Major in physical education
(39 hours)
PhEd 200-270 Sports Skills Electives (total of seven)
(five hours from areas 1-5, two electives from any area)
Area I: Aquatics ........................................ 1
Area II: Dance ........................................ 1
Area III: Gymnastics ................................. 1
Area IV: Individual Sports ......................... 1
Area V: Outdoor Recreation ....................... 1
Elective sports skills ................................... 2
Biol 203, Human Anatomy and Physiology (Prereq; Chem 101) or
Biol 154, Human Biology (with depth credit) ........... 4
PhEd 102, First Aid and CPR ......................... 1
PhEd 103, Basic Athletic Training .................... 2
PhEd 250, History and Philosophy of Physical Education .... 2
PhEd 308, Teaching Sport Skills and Strategies ........... 3
PhEd 309, Physical Education for Children ............... 3
PhEd 310, Administration of Physical Education ......... 2
PhEd 315, Kinesiology .................................. 3
PhEd 317, Exercise Physiology ....................... 3
PhEd 330, Psychology of Motor Learning ................ 3
PhEd 345, Theory and Techniques of Coaching .......... 3
PhEd 410, Senior Seminar ........................... 3

Planning guide
First year
Wellness Colloquium
*History and Philosophy of Physical Education (or second year)
Sports Skill Electives
Chemistry and Physics of Life (prerequisite for Human Anatomy)
Human Anatomy and Physiology (second semester or second year) or
Human Biology for four credit hours, available in fall
Basic Athletic Training
First Aid and CPR
General education
Inclusive Schooling (May)
Second year
Inclusive Schooling (or first year)
*Psychology of Motor Learning (May)
Physical Education for Children (prerequisite Educ 201)
Human Anatomy and Physiology (or first year)
*Administration of Physical Education (or third year)
Theory and Techniques of Coaching
Exceptional Learners
Educational Psychology
General education
SST (or junior or senior)
Third year
*Teaching Sports Skills and Strategies (May)
Sports Skill Elective
*Kinesiology
Secondary Curriculum and Instruction
Middle School Curriculum and Instruction (education majors)
General education
Fourth year
Student teaching (education majors)
Secondary Education Seminar
*Exercise Physiology

Secondary education
Certification for teaching grades 5-12 requires 27 credits of teacher education courses in addition to the physical education major. See the education department pages and the Goshen College Teacher Education Handbook for more details.

Area major in physical education (K-12)
(44 hours) In addition to the major and certification requirements described above, the following courses are also required for certification to teach grades K-12:
PhEd 311, Elementary Physical Education Internship ........ 4
Edc 401, Child Development Practicum ..................... 1

Major in physical education with concentration
For students who want to pursue career opportunities other than teaching.
(44 hours) Core courses include:
Biol 203, Human Anatomy and Physiology (Prereq; Chem 101) or
Biol 154, Human Biology (with depth credit) ............... 4
PhEd 250, History and Philosophy of Physical Education .... 2
PhEd 310, Administration of Physical Education ............ 2
PhEd 315, Kinesiology .................................. 3
PhEd 317, Exercise Physiology ........................... 3
PhEd 330, Psychology of Motor Learning .................... 3
PhEd 409, Internship or Comm 409, Internship .............. 3
PhEd 410, Seminar ........................................ 3
Courses in area of concentration ................................ 15
Six hours chosen from:
PhEd 200-242, 270
PhEd 308, Teaching Sport Skills and Strategies ............ 3
PhEd 345, Theory and Techniques of Coaching ............. 3

Concentration areas
Sport communication. Comm 240 or Comm 383; Comm 250; Comm 202 or 204 (both recommended); six hours of electives: one to three in PhEd, remainder chosen from Comm 210, Comm 212, Comm 255, Comm 260, Comm 308, Comm 350. Note: Courses in the concentration area may not count toward a communication or writing minor.
Sport management. Acc 201, Bus 315, Bus 316; six hours of electives from PhEd 102, PhEd 103, Biol 154, CoSc 105 or Bus 150, Chem 220, Biol 315, Bus 328 and Bus 336, or Psychology. Note: Courses counted toward a concentration in the major may not be included in a minor.

Minor in physical education
(24 hours)
Biol 203, Human Anatomy and Physiology (Prereq; Chem 101) or
Biol 154, Human Biology (with depth credit) ............... 4
PhEd 308, Teaching Sport Skills and Strategies ............ 3
PhEd 200-242, 270, Sports Skills Electives ................. 2
PhEd 345, Theory and Techniques of Coaching ............ 3
Eight hours selected from:
PhEd 102, First Aid & CPR ................................ 1
PhEd 103, Basic Athletic Training .......................... 2
PhEd 315, Kinesiology .................................. 3
PhEd 317, Exercise Physiology ........................... 3
PhEd 330, Psychology of Motor Learning .................... 3
Four hours selected from:

- PhEd 250, History and Philosophy of Physical Education ............ 2
- PhEd 309, Physical Education for Children .................................. 3
- PhEd 310, Administration of Physical Education ....................... 2
- PhEd 410, Seminar ................................................................. 3

**Minor in health**

(24-26 hours)

- PhEd 102, First Aid and CPR ............................................... 1
- PhEd 103, Basic Athletic Training .......................................... 2
- Biol 203, Human Anatomy and Physiology (Prereq: Chem 101) or Biol 154, Human Biology (with depth credit) .............. 4
- Chem 220, Human Nutrition .................................................. 3
- Soc 260, Human Sexuality ..................................................... 3

Five-eight hours selected from:

- Psyc 209, Social Psychology ................................................ 3
- Psyc 210, Developmental Psychology .................................... 3
- Soc 210, Sociology of the Family ......................................... 3
- Soc 220, Human Origins/Human Nature ................................ 4
- Soc 334, Race, Class and Ethnic Relations ............................... 3

Three-four hours selected from:

- Biol 111, Biological Principles ............................................. 4
- Chem 101, Chemistry and Physics of Life ............................... 3

**Coaching endorsement**

(6 hours)

- PhEd 102, First Aid and CPR ............................................... 1
- PhEd 103, Basic Athletic Training .......................................... 2
- PhEd 345, Theory and Techniques of Coaching ......................... 3

Successful completion of the coaching endorsement certifies the student for coaching through the American Sport Education Program.

**Courses**

**PhEd 100 Wellness** ....................................................... 1

Activities designed to promote wellness in body, mind and spirit. Each participant will gain knowledge that enables wise practices of physical, mental and spiritual health as well as the opportunity to develop and begin implementing a personalized fitness program. Topics addressed include cardiovascular fitness, muscular endurance and strength, flexibility, body composition, nutrition, stress management, spiritual wellness and lifestyle choices.

**PhEd 102 First Aid and CPR** ........................................... 1

The course will provide an introduction to sport first aid, practical experience in basic first aid skills, first aid for specific sport inquiries and a practical guide to sport related liability. Successful completion of the course results in certification for one year.

**PhEd 103 Basic Athletic Training** .................................... 2

This course is valuable to anyone who plans to do any type of coaching. Topics covered include: emergency procedures, evaluation and management of injuries to the foot, ankle, knee, shoulder, elbow and hand. Several class sessions are devoted to taping techniques.

**PhEd 250 History and Philosophy of Physical Education** ........ 2

A study of the relationship of classical and educational philosophies and implications for physical-education principles. This course includes an introduction to the field of physical education. *(Offered fall 2007-08, 2009-10.)*

**PhEd 255 Camping and Recreation** .................................. 3

Students gain hands-on experience in a wilderness setting. They will learn a variety of skills that may include: trip planning, map and compass reading, environmental care and study, spiritual growth and leadership skills. Other skills will be related specifically to either backpacking and/or canoeing. *(Offered May 2007, 2009)*

**PhEd 308 Teaching Sport Skills and Strategies** .................. 3

An applied course focusing on fundamental techniques in a variety of sports. Includes theory and practice in pedagogy and skill content. This course focuses on organization and management for teaching, skill progressions and common problems/techniques of basic and intermediate-level skills and tactics. *(Offered May 2007)*

**PhEd 309 Physical Education for Children** ......................... 2-3

Philosophy, methods and materials for teaching physical education to children. Some practical experience with the materials and children included. Prerequisite: Educ 201.

**PhEd 310 Administration of Physical Education** .................. 2

A focus on administrative practices in the areas of legal responsibility, personnel, finance, public relations, equipment, facilities, intramurals and athletics. *(Offered fall 2006-07, 2008-09)*

**PhEd 311 Elementary Physical Education Internship** ............ 4

Field experience with elementary students in the school setting. Prerequisite: PhEd 309.

**PhEd 315 Kinesiology** .................................................... 3

A consideration of the anatomical and mechanical factors contributing to skilled performance in sport. Laws and principles from anatomy and physics that govern the use of the human body, objects and implements in a sport context are applied to the teaching and coaching of sport skills. Prerequisite or concurrent registration: Biol 203 or Biol 154 with depth credit or consent of the instructor. *(Offered spring 2007-08, 2009-10)*

**PhEd 317 Exercise Physiology** ....................................... 3

A study of how the human body adjusts during various kinds of exercise. Laboratory equipment will be used when analyzing neuromuscular activity, circulation, respiration and metabolism as it applies to the trained and untrained. Prerequisite: Biol 203 or Biol 154 with depth credit. *(Offered spring 2006-07, 2008-09)*

**PhEd 330 Psychology of Motor Learning** .......................... 3

A study of the influence of psychological variables on sport performance and the influence of sport participation on psychological phenomena. Some topics included are: motor-learning theory, motor development, personality, perception, motivation and social factors. *(Offered May 2008)*

**PhEd 345 Theory and Techniques of Coaching** .................... 3

The course will present an overview of basic theories and coaching applications in sport philosophy, sport psychology, sport pedagogy, sport physiology and sport management.

**PhEd 409 Internship** ..................................................... 2-3

A practical experience related to the student's interest and ability. Generally occurs in an off-campus setting. For nonteaching majors only.

**PhEd 410 Senior Seminar** ............................................. 3

An introduction to descriptive and inferential statistics, test analysis and computer usage in physical education. Research methods in physical education; selection of a research problem, collection of data, written and oral presentation of findings. For senior physical education majors.
The physics department prepares responsible physicists, engineers and teachers for academic, research and industrial positions. Student involvement in active research and in teaching within the department fosters an understanding of the philosophical and structural concepts of physics as well as an ability to apply the science itself. The department consciously promotes an active participation in the wider scientific and engineering communities.

**Career opportunities**

Upon graduation, the physics major is prepared for graduate study in physics or engineering. Other possibilities include science secondary education or the combination of a physics baccalaureate degree with a master's degree in business administration, which affords the background for a management career in high technology and engineering industries. Biophysics and the neurosciences are growing fields requiring the background of an education in physics. Study of physics also provides the training and experience prized in many modern careers beyond the standard boundaries of science and engineering.

**Graduate schools**

All Goshen physics majors who have chosen to pursue a graduate degree have been admitted to graduate school. More than 70 percent of the physics majors elect this path. Individual professors at research universities have testified to the excellent preparation received at Goshen College. Recent Goshen graduates have chosen schools such as Purdue University, Princeton University, the University of Notre Dame, Carnegie-Mellon University, Case Western Reserve University, the Pennsylvania State University, the University of North Carolina, the University of Tennessee, Auburn University, Tulane University and Vanderbilt University.

**Engineering**

The combination of a liberal arts background and an engineering degree from one of the leading engineering schools in the nation is the optimal education for the modern engineer. Goshen College, acknowledged as one of the nation's finest liberal arts colleges, provides such a program. In this program the student spends three years at Goshen College and two or two and a half years at the engineering school receiving a bachelor of arts degree in physics (or chemistry) from Goshen and a bachelor of science degree from the engineering school.

Goshen College has program agreements with Case School of Engineering of the Case Western Reserve University (Cleveland, Ohio), Washington University (St. Louis, Mo.) and the University of Illinois (Urbana/Champaign). Admission to the engineering school is granted to a student with a 3.0/4.0 overall grade point average and at least a 3.0/4.0 in science and mathematics courses, upon recommendation of the engineering adviser.

Transfer to other schools is possible, but must be done on an individual basis. Goshen College will grant the B.A. degree when the student completes the engineering course and the Goshen College requirements.

While at Goshen College, the engineering student is enrolled as a physics or chemistry major. Studies of science and mathematics to fulfill the requirements of the first two years in the engineering school are undertaken. In addition the student completes the Goshen College requirements in the arts, religion and humanities. The Study-Service Term (SST) or alternative is also required of the engineer.

A large percentage of the Goshen students pursuing this program receive cum laude degrees from the engineering school and continue graduate study. Employment opportunities are excellent for graduates from this program.

**Secondary education in physics**

Goshen College offers a degree in secondary education with specialty in physics. In this program the student fulfills the complete requirements for the physics degree as well as the requirements of the secondary education program. Graduates are qualified to teach physics at the high school level or prepared to pursue graduate education as a physicist.

**Sports Skills Electives (SSE)**

The following elective courses in six areas are offered to students who do not already have proficiency in that activity. Normally, each course carries one hour of credit, except 226 and 240 which carry two hours of credit.

**Area I: Aquatics**
- 226, Life Guard Training (Prerequisite: Instructor's consent)
- 232, Beginning Swimming
- 234, Advanced Swimming
- 240, Water Safety Instructor

**Area II: Dance**
- 200, Aerobic Dance
- 224, International Folk Dance

**Area III: Gymnastics**
- 222, Gymnastics: Tumbling

**Area IV: Individual Sports**
- 206, Badminton
- 218, Golf
- 230, Racquetball
- 236, Tennis

**Area V: Outdoor Recreation**
- 210, Canoeing and Backpacking
- 214, Cross Country Skiing
- 216, Cycling
- 228, Outdoor Living Skills
- 255, Camping and Recreation

**Area VI: Other Sports**
- 223, Indoor Soccer
- 238, Volleyball
- 242, Weight Training
- 270, Selected Sports:

**PhEd 259-269 Intercollegiate Sport Credit**

- 259, Softball
- 260, Baseball
- 261, Basketball
- 262, Cross Country
- 264, Golf
- 265, Soccer
- 266, Tennis
- 267, Track and Field
- 268, Volleyball
- 269, Athletic Trainer
Certification in teaching physical sciences is also available. See the *Goshen College Teacher Education Handbook* for more information.

**Major in physics**
The major requires 27 hours of study in physics including:

<table>

**Double majors/minors**
Because of the extensive requirements in mathematics in the physics major, a double major in mathematics or applied mathematics may be undertaken. Many have also obtained double majors in physics and chemistry. A number of physicists have pursued minors in music.

**SST (Study-Service Term)**
This is required of pre-engineering as well as physics majors. The student should choose a unit freely, anticipating that course schedule adjustments can be made to accommodate the choice.

**Undergraduate research**
An undergraduate research experience has been identified nationally as the most influential contributing factor in the education of a scientist or engineer and is becoming almost a requirement for the student wishing to pursue graduate study. Working on a research project with a faculty member allows the student to encounter both the real world beyond the classroom and the profession. Papers with student authors are presented at both the National Conference on Undergraduate Research, held annually, and professional conferences.

The research center in the department is the Turner Laboratory, which has facilities for optical holographic studies of musical instruments, phospholipid bilayer studies in biophysics and X-ray diffraction studies. Theoretical modeling studies are also conducted in the laboratory.

Much of the work conducted in the Turner Laboratory is collaborative. Collaborative research is presently underway with the University of Notre Dame and Brigham Young University. These collaborations provide a steady flow of research problems as well as an invaluable contact for both students and faculty. The interaction allows the student to explore further possibilities for education or career and the experience makes the Goshen student particularly attractive to graduate schools.

**Thesis/internship**
There is no explicit internship requirement in physics, but internships have been arranged for interested students. Most students, however, are involved in some form of research that may include the development of special experiments for the teaching laboratory. For the student involved in research, the thesis option is recommended. A thesis may be undertaken in consultation with the faculty adviser and forms part of the student’s permanent record. Thesis abstracts are integral parts of graduate school and professional school applications.

Cooperative (Co-op) experiences are available for pre-engineering students.

**Courses**
The course sequences have been carefully arranged. Each academic year provides a developing experience. The student should consult with a faculty adviser regarding deviation from the designed sequence, such as for SST.

**Phys 100**  **The Physical World**  .................................................. 3
An introduction to physical science for nonmajors. The Manhattan Project is used as a vehicle for the study of physics, engineering and scientific management. The course is experiential. *(Offered annually in the fall.)*

**Phys 101-102**  **Research Seminar**  ............................................. 1+1
An introduction to the department and to physics and engineering as careers. Presentations by faculty and students of research, introduction to the scientific literature and scientific writing, individual research on a chosen topic. *(Offered annually)*

**Phys 154**  **Descriptive Astronomy**  ............................................. 3
An introduction to astronomy, including the study of the solar system, stars and stellar development, galaxies and cosmology. Laboratory experience will include astronomical observation and measurement.

**Phys 203-204**  **General Physics**  ............................................. 4+4
A calculus and vector treatment of basic physics including mechanics, heat, sound, electricity, light and modern physics. Required of physics majors and recommended for majors in the physical sciences. Lectures and laboratory. *Prerequisite or concurrent: Math 211-212. (offered annually)*

**Phys 208**  **Introduction to Research**  ...................................... 2
An introduction to the techniques and practice of experimental research.
### Psychology

**Chair:** Professor D. Kaufmann  
**Professor V. Koop**  
**Associate Professor J. R. Reese**

**Career opportunities**
Graduates of the psychology program are currently working in administration, counseling, public-welfare agencies, mental-health centers, institutions for delinquent and emotionally disturbed children, probation services and a variety of additional social and religious agencies.

**Major in psychology**
Concentration area of 39 hours including 30 hours in psychology.  
**Psyc 402, Statistics and Methods**  
**Psyc 408, Contemporary Viewpoints in Psychology**  
**Psyc 409, Senior Internship**  
**Psyc 410, Senior Seminar**  
Other psychology courses  
Related courses in sociology, social work, philosophy, peace studies, anatomy and physiology

---

**Students participate in laboratory work in the Turner Laboratory. Course is considered training for future research in the physics department. Prerequisites: Phys 203-204 or consent of instructor.**

**Phys 210 Modern Physics**  
An introduction to the basis of modern physics. Special relativity, experimental origins of the quantum theory, elementary particle physics and cosmology. **Prerequisites:** Phys 203-204 or consent of instructor. *(offered fall 2006-07, 2008-09)*

**Phys 240 Physics of Music**  
A study of the physics of a variety of musical instruments including the voice, the physical origins of musical scales and temperaments, perception effects in the ear and brain and room acoustics. Many class sessions will be laboratory experiences and each student will do a major project. **Prerequisites:** Phys 203 or high school physics, Mus 102 or equivalent ability or consent of instructor. *(offered spring 2006-07, 2008-09)*

**Phys 301 Methods of Mathematical Physics**  
Introduction to the mathematical methods used in physics. Complex variables, transformations, vector spaces. Green's Function solution to differential equations and calculus of variations. **Prerequisite:** Math 213. *(offered fall 2007-08, 2009-2010)*

**Phys 302 Analytical Mechanics**  
Newtonian Mechanics based on the formulation of Lagrange and Hamilton. Applications to oscillations, orbital motion, scattering, rigid body motion. Special topics include chaos theory and relativity. **Prerequisites:** Phys 203-204, Phys 301 or consent of instructor. *(offered spring 2007-08, 2009-2010)*

**Phys 303 Classical Field Theory**  
Study of electric and magnetic fields using the formulation of Maxwell. Maxwell's equations are developed with reference to experiments followed by selected applications including wave propagation in dispersive media, plasma phenomena, and magnetic and dielectric phenomena. **Prerequisites:** Phys 203-204, Phys 301 or consent of instructor. *(offered May 2007-08, 2009-2010)*

**Phys 304 Electronics**  
Introduction to analog and digital electronics and robotics. The focus is on design and construction of practical circuitry which can be used to build useful devices. After the analog and digital groundwork is laid, students learn to program microcontrollers to interface with a variety of sensors and outputs on mobile robotic platforms. Weekly laboratories culminate in individual projects presented in the biannual electronics show. Lectures and laboratory. **Prerequisites:** Phys 203-204 or consent of instructor. *(offered fall 2007-08, 2009-2010)*

**Phys 305 X-rays and Optics and Holography**  
Electromagnetic theory, geometrical optics, interference and diffraction, and other principles provide the framework for understanding a variety of optical instruments and experiments. Laboratories include various types of interferometry, laser beam filtering and profiling, several types of holography and culminate in individual projects. Lectures and laboratory. **Prerequisites or corequisites:** Phys 203-204. *(offered spring 2007-08, 2009-2010)*

**Phys 310 Thermodynamics**  
A study of classical thermodynamics in the formulation of Gibbs. Thermodynamic potentials, characteristic variables, stability, homogeneous and heterogeneous systems, chemical kinetics are treated. An introduction to statistical mechanics is presented. Applications include studies of material properties and engineering systems. **Prerequisites:** Phys 203-204; Chem 111-112; Math 212 or consent of instructor. *(offered fall 2006-07, 2008-09)*

**Phys 312 Quantum Mechanics I**  
Principles of quantum mechanics are discussed beginning with a hydrogen atom and concluding with many atom molecules. The material is examined using the physical evidences that support the theory of quantum mechanics, particularly spectroscopy. The course also discusses symmetry of molecules, theory of NMR and X-ray diffraction. Lectures and laboratory. **Prerequisites:** Phys 203-204; Chem 111-112; Math 212 or consent of instructor.

**Phys 313 Quantum Mechanics II**  
A study of the quantum theory in the vector formalism of Dirac. Schroedinger and Heisenberg representations are considered. Applications to scattering, atomic physics and magnetism. **Prerequisites:** Phys 203-204, Math 213, or consent of instructor. *(offered spring 2006-07, 2008-09)*

**Phys 314 Statistical Mechanics**  
A study of the statistical treatment of particles including molecules, atoms and electrons. The ensemble theory of Gibbs is developed as the basis. Applications include gases, crystalline solids, magnetic materials and phase transitions. **Prerequisite:** Math 213 or consent of instructor. *(offered spring 2006-07, 2008-09)*

**Phys 410 Senior Seminar**  
An exploration of the relations between the natural sciences and other broad areas with special emphasis on ethical and theological concerns. Discussion, lectures, preparation and presentation of papers. **Prerequisite:** Senior standing. *(offered annually in spring)*

**Phys 421 Advanced Topics**  
Special topics selected by the student in consultation with professor. These may include topics of special interest to the student or research. Academic credit for research or thesis is covered by enrolling in this subject. *(offered annually)*
Planning guide

First year
- General education
- General Psychology
- Principles of Sociology

Second year
- General education
- Social Psychology or Developmental Psychology
- Related courses
- SST

Third year
- General education
- Upper-level courses in major
- Related courses

Fourth year
- Balance of general education
- Contemporary Viewpoints in Psychology
- Statistics and Methods
- Balance of major and related courses
- Seminar
- Internship

A secondary social studies teacher-education program is available (54 credits of content courses plus 27 credits in education courses). The program must include two other social studies fields besides psychology. For more details see the Goshen College Teacher Education Handbook.

Minor in psychology
Eighteen hours in the psychology department, 12 of which must be upper-level. Five or more hours must be selected from Psyc 308, 402, 408 or 410.

Courses

Psyc 100  General Psychology ................................. 3
An introduction to the methods, concepts and principles used in the study of behavior. Includes a survey of topics in psychological development, individual differences, memory, personality structure, mental health, learning and social psychology.

Psyc 200  Social Psychology ................................. 3
A study of the influence of society on the individual and of the individual on society. Involves the study of person-to-person transactions, with emphasis on attitudes and small group structure and process.

Psyc 210  Developmental Psychology ................................. 3
A study of developmental processes across the life span. Physical, social and cognitive changes provide the basic organization for this course. A variety of developmental theories will be examined including Piaget, Vygotsky, Erickson, social learning and psychodynamic. Current research and an understanding of how to think about developmental processes will be emphasized.

Psyc 221  Human Behavior ................................. 3
(See SoWk 221)

Psyc 302  Experimental Psychology ................................. 4
A study of the methods and techniques of experimental psychology. Course will include study of selected empirical findings from the areas of learning, memory, intelligence and physiological psychology. Experimental projects constitute a major emphasis of the course.
Prerequisite: Psyc 100.
Psyc 303  Physiological Psychology  3
An introduction to the physiology of the brain and central nervous system and their effects on psychological processes. Prerequisite: Psyc 100.

Psyc 305  Prosocial Behavior  3
A study of theories and empirical research concerned with positive human interaction. Topics of special focus include altruism, empathy and service from the perspective of both the helper and the recipient. Some attention to applications in education, government and church agencies. Offered alternate years.

Psyc 306  Abnormal Psychology  3
A study of the variety of psychological disorders as classified by the DSM system. Issues related to classification will be discussed. A biopsychosocial model will be assumed when discussing etiology and treatment. Since this is primarily a descriptive course, considerable emphasis will be placed on case studies. At the conclusion of the course, students will be well versed in understanding the major psychological disorders. Prerequisite: Psyc 100.

Psyc 307  Applied Industrial/Organizational (I/O) Psychology  3
A study of the application of psychological principles to industry and organizations. Topics include employee selection, motivation, job satisfaction, workplace violence, stress, organizational climate, organizational effectiveness and leadership. Emphasis will be on applied issues. Designed for both psychology majors and for nonmajors. Prerequisite: Psyc 100. Offered alternate years.

Psyc 308  Personality Theory  3
A study of theory development with particular focus on major personality theories. The central concepts of each theory, the unique place in contemporary psychological thought and relationship of theory to psychological experimentation and research will be emphasized. Prerequisite: Psyc 100.

Psyc 309  Educational Psychology: Secondary  3
(See Educ 309)

Psyc 310  Educational Psychology: Elementary  3
(See Educ 310)

Psyc 313  Violence and Nonviolence  3
(See PJCS 313)

Psyc 314  Psychology of Religion  3
An exploration of the interaction of psychological dynamics and religious behavior. Includes study of belief systems, faith, behavior change, conversion, life styles, personality and religious persuasion. Offered alternate years.

Psyc 316  Introduction to Clinical Psychology  3
A study of the major issues facing someone entering the professional world of delivering psychological services to others. Critical thinking about the most recent diagnosis and treatment modalities will be emphasized. Other topics include ethics, psychopharmacology, counseling, health psychology, psychobiology and community psychology. Prerequisite: Psyc 100. Offered alternate years.

Psyc 317  Leadership Education  1
A learning experience in leadership that integrates theory and practice. Philosophy and theory of leadership will be integrated with each student’s specific campus leadership responsibility. The course is repeatable as the student assumes additional campus leadership. Enrollment is by consent of the instructor.

Psyc 320  Psychological Assessment  3
A study of psychological testing theory, test administration and test interpretation. The course will survey intellectual, aptitude, achievement, interest, personality and neurological assessment. Students will be given direct experience with tests from each of these categories. Prerequisite: Psyc 100. Offered alternate years.

Psyc 400  Advanced Projects in Psychology  1-3
Independent reading or research for psychology majors. Requires extensive reading or research on a topic of the student’s choice. Consultation with instructor required.

Psyc 402  Statistics and Methods in Psychology  4
A study of research methods and data analysis in psychology. Involves research on a specific problem and presentation in the form of a written thesis. Prerequisite: senior standing and consent of instructor.

Psyc 408  Contemporary Viewpoints In Psychology  3
A study of the research and current status of contemporary psychological issues in the areas of personality, measurement, intelligence, perception, learning, developmental, mental health and psychology of religion. Prerequisites: Psyc 100; minimum of nine additional hours in psychology.

Psyc 409  Senior Internship  2
Internship offers opportunity to observe and participate in a supervised field learning experience in which psychological theories and concepts are employed and issues pertaining to psychology as a career can be addressed. Prerequisites: senior standing; minimum of 12 hours of upper-level psychology or consent of instructor.

Psyc 410  Senior Seminar in Psychology  2
A focus on integrative issues concerning psychology and Christian faith. Questions related to psychology as a profession will also be addressed. Prerequisites: senior standing; minimum of 12 hours of upper-level psychology or consent of instructor.

Sociology, social work and anthropology
Chair, Associate Professor J. M. Liechty
Social Work Program Director, Professor R. Birkey
Professor T. Myers
Assistant Professor E. Stromberg
Adjunct Professors C. Jarvis, R. Shands Stoltzfus

A. Sociology and anthropology
Major in sociology
(40 hours)
Completion of these disciplinary core and skills courses (19 hours):
Soc 200, Principles of Sociology  3
Soc 391-392, Methods of Social Research  6
Soc 209, Field Experience in Sociology/Anthropology, or
Soc 409, Applications in Sociology/Anthropology: Internship  3
Soc 310, Social Theory  3
Soc 334, Race, Class and Ethnic Relations  3
Soc 410, Senior Seminar  1
In addition, each sociology major is required to take 12 additional hours in sociology, six of which must be upper level, and three hours each in history, introductory economics and political science.  21
Planning guide

First year
General education
Principles of Sociology
200-level sociology course

Second year
General education
History, economics, political science
Sociology course
SST

Third year
General education
Social Theory
Methods of Social Research
Upper level sociology course

Fourth year
Senior Seminar
Field Experience/Internship
Balance of general education
Balance of major

Minor in sociology/anthropology

Students minoring in sociology/anthropology complete 20 hours in the department including: four core courses, Soc 200, Soc 220 or 230, Soc 310 and Soc 391; and two elective courses in sociology or anthropology. (This option is not available for social work majors.)

Career opportunities

The sociology major and sociology/anthropology minor provide a knowledge base and skills in social analysis with a variety of practical applications. Past graduates have entered positions in high-school teaching, foreign and domestic community development and professional and voluntary social services (not requiring social-work training) with such agencies as Church World Service, Mennonite Central Committee and Peace Corps. The majority of graduates have gone on to attend graduate school or seminary and are presently employed in the Christian ministry, college teaching, community development, law and business, personnel management, public administration, public policy and program evaluation, research, social services, urban planning.

A secondary teacher-education program in social studies is available (52 credits in the major plus 27 credits in education courses). The program must include two other social studies fields besides sociology/anthropology. For more information see the Goshen College Teacher Education Handbook.

Honors degree

In addition to requirements specified for the honors degree campus-wide, students wishing to fulfill requirements for honors in sociology must complete at least six courses in the department including Soc 391-392 before beginning their honors project and maintain a GPA of at least 3.5 overall, and 3.8 in the major.

The senior honors thesis in sociology requires advanced, independent research and writing based on library research and/or fieldwork under the supervision of a department faculty member. Consult your adviser for further guidance.

Minor in social policy

The social policy minor at Goshen College is a collaborative cross-disciplinary program for students who want to work for social change within the public sector or nonprofit organizations. Students will develop understanding of policy making processes, community organizing and social advocacy in relation to their specific area of academic interest as well as some of the specific skills necessary for this work. The minor requires six courses (18-19 credit hours), including:

Core courses (six or seven credit hours)

one of the following: ........................................... 3-4
SoWk 322, Social Welfare Policy and Program I
PoSc 210, Introduction to Public Policy

one of the following: ........................................... 3
Econ 201 or 202, Principles of Economics
Hist 255, History of Global Poverty
Phil 302, Ethics and Morality
Psyc 200, Social Psychology
Soc 200, Principles of Sociology
Soc 230, Cultural Anthropology

Social policy internship ........................................... 3

Students will gain practical experience in their specific areas of interest – e.g. community development, environment, health care, women's studies, etc. Most will complete an internship through the existing course, SoWk 321, Social Service Field Experience (3), which combines 40 hours in an agency and policy setting with weekly class sessions and assignments. Students may also meet this requirement through existing departmental internship courses, provided they meet the three-credit hour requirement. The internship requirement may also be met through an off-campus program, approved by the social policy review committee, such as Indianapolis Peace House or the Urban Life Center in Chicago.

Skills and methodology courses ................................... 9

Choose three of the following, with no more than two courses from any one department:

Bus 121, Introduction to Entrepreneurship
Bus 215, Entrepreneurial Finance
Bus 319, Leading Nonprofit Organizations
Comm 212, Broadcast Media Production I
Comm 250, Writing for Media
Comm 324, Principles of Public Relations
PJCS 325, Mediation: Process, Skills and Theory
PJCS 426, Conflict in Groups
Soc 301, Community Development: Local and International
Soc 391, Methods of Social Research

Through consultation with their major advisers, students will submit a proposal of their goals for the minor and rationale for their course choices to the Social Policy Review Committee for approval. At least nine credit hours in this minor must be upper level (300-400 level) courses. After the plan of study is approved and submitted to the registrar, students will continue to be advised for the minor by their major advisers. Double counting will be limited to two courses, i.e., at least 12 hours of the minor must be met through discrete courses that do not count toward a student's major requirements.

Courses

Soc 200 Principles of Sociology ................................... 3
An introduction to the study of human society through basic sociological concepts and perspectives – culture and social order, social interaction, social stratification, power and organizations. Teaches fundamental skills of behavioral observation and social analysis and discusses topics of current concern.

Soc 207 Introduction to Statistics ................................ 3
(See Econ 207)

Soc 209 Field Experience in Sociology/Anthropology ...... 1-3
Offers first- and second-year students opportunity to gain first-hand experience in settings where sociological or anthropological perspectives and skills are put to work. Arrangements for field experience are
made at initiative of the student in consultation with a faculty adviser and a supervisor at the field-experience location. Forty hours of field experience will be expected for each hour of credit earned. **Prerequisite:** Soc 200.

**Soc 210 Sociology of the Family** ............................................. 3
Course combines institutional and functional approaches in the study of courtship, mate selection, marriage, family roles and relationships, family disorganization and social trends affecting the family in contemporary society and culture.

**Soc 220 Human Origins/Human Nature** ................................. 3
An introductory anthropology class, this course surveys broad sweep of human experience from earliest times, attending especially to the latest archaeological, bio-behavioral, ethnographic, fossil-skeletal, genetic and primate field studies as these help us better to comprehend the nature of being human. Student chooses any topic/issue of interest, e.g., socialization of children for cooperation/aggression, selfishness/self-renunciation (kenosis), status and role of women/men, amount and use of leisure time, abortion or other techniques of birth control, nutrition and health, freedom of mate selection/divorce, homo/heterosexuality, dancing, music-making, drug use/abuse, healers and healing, conscription of warriors, prevalence of violence and warfare, role of artists and artistic expression, beliefs about the nature of God, patterns of worship, leadership and authority, with the goal of learning how societies both ancient and modern, both near and far handle this topic/issue.

**Soc 230 Cultural Anthropology** ............................................. 3
Course teaches an anthropological approach to cultural studies at a time when global cultural homogenization is producing increasing conflict around cultural differences. Students gain knowledge and skills for making sense of all culturally conditioned experience – both “ours” and “theirs.” Lab component teaches ethnographic skills needed by anyone wishing to relate competently to persons whose linguistic, social and cultural backgrounds differ from one’s own.

**Soc 260 Human Sexuality** .................................................. 3
Biological, psychological and sociological factors determining sex-role identification and role performance; human reproduction, fertility control and sexual disorders; social and spiritual values in human sexuality; sex discrimination and movements toward sex equality.

**Soc 301 Community Development: Local and International** .. 3
Anthropological and sociological perspectives on rural communities, small towns, urban neighborhoods and globally networked associations involved in processes of both intentional and unintended change. Course focuses on community life and development both locally and internationally with special attention to global linkages between the two. Especially designed for anthropology, environmental studies, PJCS, policy studies, sociology, social work and other majors who expect to work actively with communities and social change organizations toward empowerment of people to find collective and effective solutions to problems of development.

**Soc 302 Urban Diversity (offered only at off-campus sites)** .... 3
Student is exposed to issues affecting the lives of an ethnically and religiously diverse urban populace – racism, sexism, classism – and helped to develop new ways of conceptualizing and interpreting the contemporary urban scene. Reading, research and writing are integrated with the student’s first-hand involvement in issues under study. Available through the Urban Life Center in Chicago, Peace House in Indianapolis or WCSC in Washington, D.C.

**Soc 310 Social Theory** ...................................................... 3
A seminar for sociology majors and minors, open to other students with the permission of the instructor. Students will examine the assumptions, purposes and orientations of sociology by critically engaging selected works by the classical figures of social theory (e.g. Durkheim, Marx, Simmel, Toqueville, and Weber) as well as writing by contemporary representatives of the classical perspectives. Typically taken junior year. **Prerequisites:** Soc 200, Soc 220 or Soc 230.

**Soc 315 Religion in Culture and Society** .............................. 3
An analysis of social, cultural and political contexts that affect religious institutions and expressions, and upon which religious beliefs and practice have an influence. This course is taught in alternate years by the Bible, religion and philosophy and sociology-anthropology departments. When taught by sociology/anthropology, the course has a cross-cultural, comparative focus on ritual and belief. Students complete an ethnographic study of a local religious group or phenomenon.

**Soc 322 Social Policy and Programs** .................................... 4
This course is identical to SoWk 322 and is described under Social Work Education.

**Soc 330 Family and Kinship Across Cultures** ....................... 3
Comparative study of marriage and family life in traditional, modern and post-modern settings. Course includes case studies of family systems with particular attention to the historical and cultural contexts in which these systems are situated. **Prerequisite:** Soc 200, Soc 210 or Soc 230.

**Soc 334 Race, Class and Ethnic Relations** ............................ 3
A study of the dynamics of race and ethnic group interaction focusing on minority groups in the U.S. as defined by race, language, culture, religion or national origin. Attention is given to social class, power and majority-group dominance as factors in assimilation and culture-loss or collective self-determination and maintenance of cultural pluralism. **Prerequisite:** Soc 200 or Soc 230.

**Soc 336 Latin American Societies and Cultures** .................... 3
Current developments are examined within the context of a general survey of Latin-American societies and cultures. The course aims to provide: 1) a basic knowledge of Central and South-American geography and social structure; 2) an acquaintance with alternative ways of interpreting information about and experiential knowledge of Latin-American life; and 3) an opportunity to explore themes of oppression and liberation as these pertain to Latin-American thought and experience.

**Soc 340 African Societies and Cultures** .............................. 3
A study of the current development and modernization of the nations and peoples of Sub-Sahara Africa. After brief attention to the geographic, historical and anthropological factors underlying Africa’s development, the major focus will be on the current social and political forces that are shaping the developing nations.

**Soc 342 Native American Societies and Cultures** ............... 3
A survey of the diversity and shared patterns of Native American societies and their development from the first settlements of North America until the present day. The course aims to foster a broad and sensitive understanding of the history, life ways and spirituality of Native Americans and to develop an appreciation for Native American values and contributions to world history.

**Soc 351 Contemporary Issues** ............................................. 3
A seminar providing for in-depth investigation of a current social...
The social work program is a four-year generalist program leading to the restoration and enhancement of social functioning through intervention with individuals, families, groups, larger social systems and social welfare policies and programs. The social work program is a four-year generalist program leading to the bachelor of arts degree with a major in social work. Generalist social work practice requires a person-situation approach to problem solving, and the generalist perspective of the Goshen College social work education program provides a broad conceptual framework. The program is accredited by the Council on Social Work Education and has, as its primary objective, the preparation of students for professional social work practice. Students are also prepared for graduate social work education and receive advanced standing in many graduate social work programs.

The social work curriculum is built upon a liberal arts perspective. By its focus on the humanities, physical and social sciences and international experience, this foundation assists students in thinking broadly about individuals and the social systems in which they function. Liberal arts education at Goshen College is seen as a moral activity that places a high value on persons and social justice.

### Major in social work

Social work courses required (38 hours):
- SoWk 221, Human Behavior .................................. 3
- SoWk 224, Introduction to Social Work .................. 3
- SoWk 321, Social Service Field Experience ............ 3
- SoWk 322, Social Welfare Policy and Program I ...... 4
- SoWk 323, Social Welfare Policy and Program II ..... 3
- SoWk 325, Social Work Practice Theory I ............. 4
- SoWk 425, Social Work Practice Theory II .......... 3
- SoWk 409, Field Instruction ................................ 10
- SoWk 423, Social Work Senior Seminar ............... 2
- One elective from: (3 hours) .............................. 3

- SoWk 350, Human Services: Services to Families
- SoWk 350, Human Services: Child Welfare
- SoWk 350, Human Services: Women's Concerns
- Soc 301, Community Development: Local and International

Required related courses (18 hours):
- Soc 200, Principles of Sociology .......................... 3
- Econ 201 or 202, Principles of Economics ............. 3
  (Econ 202 is strongly recommended)
- Psych 306, Abnormal Psychology ........................ 3
- Soc 210, Sociology of the Family ........................ 3
- Soc 334, Race, Class and Ethnic Relations ............ 3
- Soc 391, Methods of Social Research .................. 3
- Biol 154, Human Biology is strongly recommended for the general education science requirement.

### Planning guide

#### First year
- General education
- Human Biology
- Principles of Sociology
- General Psychology
- Physical World
- Sociology of the Family

#### Second year
- General education
- Human Behavior
- Introduction to Social Work
- Social Service Field Experience
- Principles of Economics
- SST (spring or summer)
- Expository Writing (strongly recommended)

#### Third year
- General education
- Social Welfare Policy and Program I, II
- Practice Theory I
- Methods of Social Research
- Race, Class and Ethnic Relations
- Abnormal Psychology
- Social work elective

#### Fourth year
- Balance of general education
- Social Work Practice Theory II
- Field Instruction
- Senior Seminar

### Admission

Social work is a professional program that requires an admission process separate from admission to the college. Students apply for admission to the social work education program following successful completion of Introduction to Social Work, SoWk 224, taken in the sophomore year. Written applications are accepted after Jan. 1 of each school year. Students transferring into the major in the junior year should apply immediately upon college admission. Admission criteria include academic and personal qualifications with a value orientation necessary for the professional practice of social work. The admission process is directed toward furthering students' personal growth as they explore vocational interests and abilities. Specific information about criteria and process is found in the Social Work Student Handbook. This may be obtained from the director of social work education.

### Advising

Students declaring a social work major are assigned a social work faculty advisor.
adviser. Students exploring their interest in social work are invited to talk with the program director. Academic advising, which takes place in the fall and spring semesters each year, aids students in selecting courses in the sequence required for successful completion of the program. All social work courses must be taken in numbered sequence. If possible, Methods of Social Research should precede Social Work Practice Theory I and Economics should precede Social Welfare Policy & Program I. Additional advising appointments are scheduled as part of admission to the program and to field instruction. Students are encouraged to initiate contact with faculty advisers as issues arise, at any time throughout the academic year.

Remaining in the program
The professional practice of social work requires acquisition of knowledge, specific skills, a firm identification with specified values and ethics and a high degree of social and personal responsibility. Students whose academic work falls below a C in required social work and related courses, or whose personal or professional behavior is inconsistent with the above requirements, may be asked to leave the program. Students have the right of appeal through the Goshen College grievance procedure.

Courses
SoWk 221 Human Behavior
A study of the individual through the life cycle within the social environment. Focus on physical, psychological, social, cultural and religious factors in the development of the self. Social work majors are required to have had Soc 200 as a prerequisite.

SoWk 224 Introduction to Social Work
Analysis of the knowledge base, value structure, purpose, nature, history and function of social work practice in various social welfare activities and social workers through observation and guided participation in programs for meeting human need. Students engage in a specific field experience as part of course requirements and must furnish their own transportation. Prerequisites: Soc 200 and Soc 210 or consent of instructor.

SoWk 321 Social Service Field Experience
Offers sophomore or junior students an initial exposure to social work practice in a social agency. The course focuses on an integrated understanding of the organizational and community context for social work practice and offers the students an opportunity for observing social work practitioners and offering specific services to clients. Classroom activities include discussion of social work related issues and concerns. Prerequisites: SoWk 221 and SoWk 224 or consent of instructor. Students furnish their own transportation for field placement.

SoWk 322 Social Welfare Policy and Program I
Economic and social justice is used as an organizing framework to study the relationship between major social problems and social welfare policy, programs and services. Included are poverty, health and mental-health care, family problems, racism, sexism and other forms of institutionalized oppression. The political aspects of social welfare policy and the legislative process itself are examined in depth. Prerequisites: Econ 201/202, SoWk 221, SoWk 224, SoWk 321 or consent of instructor.

SoWk 323 Social Welfare Policy and Program II
A critical analysis of social welfare programs and issues of social welfare policy, including philosophical perspectives, the broad issues of organization, cost delivery, impact, effectiveness and alternate strategies. Students develop skills in identifying, evaluating and formulating macro-level approaches to social problems. Prerequisite: SoWk 322 or consent of instructor.

SoWk 325 Social Work Practice Theory I
Systems approach to the practice of social work beginning with a model for solving human problems. Emphasizes development of a theoretical base for social work practice and includes a laboratory in which specific behavioral skills are developed through simulation experiences. Prerequisites: SoWk 221, SoWk 224, SoWk 321 and admission to program.

SoWk 350 Human Services: Special Studies
An in-depth seminar on a selected field of service program or policy issue. Several elective topics are offered annually. Present courses are: Child Welfare, Services to Families and Women's Concerns. These courses examine selected cultural, social, psychological and political issues relevant to the involvement and treatment of children, families and women in the social welfare system. Particular emphasis is given to concepts of exploitation and social/economic justice. Other courses may be added.

SoWk 391 Methods of Social Research
The principles and methods of research in sociology and social work, including descriptive and inferential statistics. Prerequisites: Soc 200, Soc 210, SoWk 221, SoWk 224, SoWk 321.

SoWk 409 Field Instruction
Integration of knowledge base and the acquisition of social work practice skills through direct practice under a qualified field instructor in a social service agency. Prerequisites: SoWk 323, SoWk 325 and consent of program director. Field Instruction must be applied for during the spring of the year preceding enrollment. A driver's license and transportation are required. Usually taken over two semesters; may be taken for 10 credits during the spring semester by approval of program director.

SoWk 410 Social Work Senior Seminar
Taken during the second semester of Field Instruction or concurrent with one semester block field placement. A weekly seminar that offers the integration of learning from all social work and required related courses. The final exam takes the form of a written paper and oral examination through which students demonstrate their integration of learning and skill competencies.

SoWk 425 Social Work Practice Theory II
Expansion of learning from Social Work Practice Theory I and Social Welfare Policy and Program II and application to social work practice with individuals, families and social systems of varying size. This course is taught concurrently with the first semester of field instruction, which provides the opportunity to integrate theory with skill development. Prerequisites: SoWk 323, SoWk 325, Psyc 306.

Agencies participating in field instruction
Church Community Services
Elkhart Community Schools
Elkhart County Court Services
Elkhart County Office of Family and Children Services
Elkhart General Hospital, Center for Behavioral Medicine
Fairfield Community Schools
Goshen Hospice Program
Goshen Housing Authority
La Casa of Goshen
Maple City Health Care Center
Oaklawn Community Mental Health Center
The theater program at Goshen College has a strong liberal arts emphasis grounded in aesthetic communication and performance theory. Concentrations are available in acting/performance, design/technical, film studies and generalist areas. Students explore major historical, philosophical and artistic movements, the specialized areas of theater design, acting, literature, playwriting, voice and artistic movements, and courses from other departments that augment knowledge and skills for theater studies. Students may focus on theatrical design with art department courses, performance with music classes, theater arts education with education courses, communication with communication courses and language and literature with courses from foreign language and English departments.

The John S. Umble Center is the home for most theater productions. There are two major productions and numerous one-acts during the academic year. The department also holds a biennial playwriting contest and produces the winning play.

Career opportunities
Students have completed internships with major theater companies, and a significant number have attended graduate schools. Graduates are working coast to coast in repertory theaters, video production, education, business and Christian ministry.

Major in theater
Students majoring in theater must complete 41 hours of theater, communication and related courses. All theater majors, in consultation with a faculty adviser, develop a plan of study that includes one of the concentration areas below. Basic requirements for the major include these courses:

- All students majoring in theater are required to take the general education course Comm 202, Oral Communication for three credit hours.
- Comm 204, Expository Writing .............................................. 3
- Thea 225, Introduction to Theater ............................................. 3
- Comm 240, Communication Research ...................................... 3
- Thea 235, The Power of Story .................................................. 3
- Thea 387, History of Theater .................................................... 3
- Thea 200, Theater Practice (technical theater, acting or stage management) ...................................................... 3
- Thea 409, Internship* .............................................................. 3
- Thea 410, Senior Seminar ......................................................... 3
- Area of concentration* ......................................................... 18 (minimum nine upper level)

*The Thea 409/Internship should be in the student’s area of concentration.

A transfer student should have a minimum of nine hours of theater courses at Goshen College.

A senior recital and a portfolio or its equivalent are required for graduation.

Students are required to participate during at least four semesters with mainstage and/or one-act theater productions.

Film studies

Same as communication major concentration requirements/options.

Generalist

This concentration is individually designed, in consultation with the faculty adviser, to develop individual areas of interest or encompass a broad base of theater and related areas. The course selection must include at least nine upper-level hours, at least nine hours in theater and at least six hours from the Goshen College theater department. Generalist students are required to participate in at least four semesters with mainstage and/or one-act theater productions.

Planning guide

**First year**

- General education
- Literature and Writing
- Oral Communication
- Introduction to Theater
- Communication Research
- The Power of Story

**Second year**

- General education
- Expository Writing
- History of Theater
- Theater Practice
- Courses in major
- SST

**Third year**

Riverview Adult Day Care Center
Urban Life Center (placement in various Chicago, Ill., social agencies)
Washington Gardens Eventstart Parenting Program
Theater arts education

A secondary teacher education program is available in theater arts. The *Goshen College Teacher Education Handbook*, available from the teacher education office, describes the education programs fully.

Courses

**Thea 200** Theater Practice .................................................. 1-2
Applied on-campus work in a theater production or other theater activity. A maximum of two hours applicable toward a theater major or minor. *Prerequisite: consent of instructor.*

**Thea 209** Field Experience .................................................. 1-3
Experiential learning in an off-campus professional setting, for theater majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. The 209 level is intended for first-year and sophomore students. Upper-level students should enroll in 409. *Prerequisite: consent of instructor.*

**Thea 225** Introduction to Theater ........................................... 3
This course will introduce students to the basic elements of theater. It will include script analysis of selected plays, acting improvisation techniques, scene performance studies, design and production work. A theater lab will be required.

**Thea 235** The Power of Story .................................................. 3
An introduction to performance studies as a mode of inquiry. Concentration on the methods of communicating performance texts for various audiences. Attention will be paid to the elements of vocal expression. *Prerequisite: Comm 202 or Thea 225.*

**Thea 245** Aesthetics ............................................................. 3
The study of aesthetics focuses on the philosophy of art, the nature of creativity, the work created, the problem of form and style, expression in art, society and ethics and arts and religion. The course includes lectures, primary reading materials and papers.

**Thea 275** Acting Lessons I .................................................... 1
Students having demonstrated commitment to campus theater productions may register for private instruction in acting, with a focus on audition and scene work. Enrollment is limited with preference given to theater majors and minors. *Consent of the department chair and extra fee required.*

**Thea 320** The Expressive Voice ................................................ 3
Effective development of vocal skills to communicate expressive meaning. A study of the formation of speech sounds and techniques. Exercises in eliminating vocal problems and developing clear enunciation, diction and phrasing skills. *Prerequisite: Comm 202 or Comm 290 or Thea 225.*

**Thea 332** Design for the Theater ............................................. 3
Principles, methods and aesthetics of theater production: design, stagecraft, lighting, costume, sound and make-up. Lab work on current productions. *Prerequisite: Thea 225 or Art 107 or consent of instructor.*

**Thea 334** Acting ................................................................. 3
Fundamental acting skills: movement, voice and character development. An emphasis on Stanislavski’s theory of acting and realistic scene work. Scene studies from selected scripts. *Prerequisite: Comm 202 or Thea 225 or consent of instructor.*

**Thea 338** Directing ............................................................... 3
Principles of interpretation, analysis, design, composition and stage movement. The director’s craft: play selection, auditions, rehearsals and production. Lab session under faculty supervision. *Prerequisite: Thea 334 or consent of instructor.*

**Thea 350** Playwriting ........................................................... 1-3
Students will examine the theory and practice of playwriting. Every class member will write a one-act play as the course requirement. Class will meet regularly as a seminar. *Prerequisite: Engl 110 or consent of instructor.*

**Thea 355** Arts in London ......................................................... 4
A May term class that encompasses theater, art and music study and experiences in London, England. Class activities include morning lectures, visits to art galleries, attending music and theater performances, and day trips to Coventry, Stratford-upon-Avon, Salisbury and other locations. Daily writing assignments and a major project required. *Offered in alternate years. Extra cost.*

**Thea 387** History of Theater .................................................. 3
A study of the forms and conventions of all phases of theater (writing, performance, design, analysis) from classical Greece to the contemporary age. Emphasis on trends in performance. Includes the reading of selected plays.

**Thea 388** Themes in Drama .................................................... 3-4
A concentrated study of selected themes in drama. Focus on scripts that examine justice, peace and historical or religious issues. Emphasis on methods of dramatic analysis. Themes might include a major playwright, advanced acting, musical theater, creative drama, improvisational acting,
religious drama or theater and multiculturalism. Prerequisite: Thea 225 or Thea 235 or consent of instructor.

Thea 409 Internship .................................................. 1-3
An off-campus internship in a professional setting for theater majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. Prerequisite: consent of instructor.

Thea 410 Senior Seminar ........................................... 3
A consideration of ethical and professional issues in contemporary communication and theater. Information interviews with practitioners in communication and theater. Writing of résumés. Creation of a portfolio. Required of all theater majors.

Thea 412 Special Project .......................................... 1-3
Students may conduct research of particular interest or pursue specialized applied projects in theater under faculty supervision. Can be used as credit for senior theater recital. Prerequisite: consent of instructor.

Women's studies

Director, Professor B. Martin Birky
Professors R. Birkey, J. Brant
Associate Professors J. B. Shetter, A. Hostetler and J. M. Liechty
Adjunct Professor and Interim Director, C. Jarvis

Mission

Within the community of faith and learning at Goshen College, the Women's Studies Program enables students from a variety of disciplines to examine women's experience in a gendered society. Women's studies courses strive to foster the study and cultivation of feminist scholarship and practice in students' personal and professional preparation. In teaching feminist scholarship, our courses examine the roles and contributions of women across time and space in the arts, the sciences and the professions; they also develop the analytical, reflective and synthesis skills that characterize feminist scholarship. This interdisciplinary program draws on courses from a variety of disciplines and women's resources in the campus community to enhance a core of courses offered by the Women's Studies Program. Courses listed or cross-listed for the women's studies minor meet the following criteria:

• Critically examine cultural assumptions about gender as well as race and class.
• Explore the production of knowledge in disciplines that reflect on women's lived experiences.
• Equip students to identify factors that constrain women's lives.
• Examine feminist genres, research methods, structures, analytical tools, aesthetics, criticism, contemporary issues and pedagogy.

Opportunities

By combining theory and practice to this end, the women's studies minor can help students prepare for any career that involves speaking for, researching, writing about or serving women or other groups (disadvantaged by race or class, for example). The women's studies minor can be combined with any major or incorporated into an interdisciplinary studies major. In recent years, the number of women's advocacy programs has increased dramatically. Many such programs and agencies prefer to hire people with knowledge of and sensitivity to the issues and problems that confront the groups they work with.

Minor in women's studies

The minor consists of 18 hours from the following women's studies courses, including other cross-listed courses as available. Although there are few prerequisites, faculty recommend that students take the introductory course, WoSt 300.

Courses

WoSt 200 An Introduction to Women's Studies ..................... 3
This course will introduce students to major areas of feminist thought (historical and contemporary), focusing on the theories and concepts that have been instrumental in shaping women's studies. Readings and guest lectures enable students to experience theory concerning women and gender in various disciplines such as history, religion, art, science, sociology and literature.

WoSt 207/307 Women in Literature ................................ 3
(See Engl 207/307)

WoSt 210 Sociology of the Family ..................................... 3
(See Soc 210)

WoSt 221 Human Behavior ............................................. 3
(See SoWk 221)

WoSt 275/375 Women in Text and Image ............................ 3
Presents a critical analysis of women's representation in social institutions, popular culture, literature and film. Readings and projects will address definitions of feminism, femininity, woman, as well as gender, power and sexuality, with the objective of helping students critique cultural representations and examine how textual narratives shape their own perceptions of gender, sex and identity. Individual or collaborative projects take the form of art work, videos, texts (stories, poems, critiques, research) or performances, presented in a seminar format. Recent offerings have focused on gender, race and class in popular media.

WoSt 301 Women's Concerns ......................................... 3
(See SoWk 350)
This introductory course provides content that helps students to understand, contextually, women's requests for help and appropriate intervention strategies. This course serves as an introductory survey course for women's studies as well as an elective for social work majors. The course content assists students to understand, contextually, women's requests for help and appropriate intervention strategies. The course covers a wide range of issues that are part of contemporary North American women's lives. The place of women in society is approached from the position of social and economic justice. The course: (a) examines and critiques the U.S. American women's movement as an interpersonal and psychological phenomenon; (b) identifies cultural, religious, racial, social, economic and political processes as they affect women's lives; and (c) considers women to be persons of worth and value with the right of self-determination. Class participation and small group discussions are important components of course learning.

WoSt 316 Liberation Theologies ................................. 3
(See Rel 316)

WoSt 322 Social Problems ........................................... 3
(See SoWk 322)

WoSt 324 Women in the Bible ....................................... 3
(See Bibl 324)

WoSt 325 Topics in Women's Studies ......................... 3
Offered as topics courses in different departments in different years

WoSt 328 Spiritual Writings of Women .......................... 3
(See Rel 328)

WoSt 330 International Women's History ..................... 3

Women's studies
Requirements and procedures

Graduation requirements
All of these requirements are to be completed for a Goshen College degree.

Total credit hours
Minimum total hours for each degree are:
- Bachelor of Arts ........................................ 120 credit hours
- Bachelor of Science in Nursing ........................ 120 credit hours
- Bachelor of Science in Organizational Leadership ...... 120 credit hours

General education
All requirements are to be completed as listed in the catalog that is current at the date of matriculation.

Convocation/chapel attendance
Posted attendance requirements must be met.

Major
A defined major or interdisciplinary major must be completed. At least 12 upper-level hours are required with at least six upper-level hours completed in residence work at Goshen. Two majors may be completed with duplication only on specifically required courses. Students with a double major are required to take only one senior seminar and one internship. The departments concerned decide which will be taken. However, the total number of hours required for the major may not be reduced. From 40 to 60 hours of experience will be expected for one hour of credit earned in departmental internships, placements or special projects. Courses used in the minor may duplicate related courses in the major at the discretion of the department offering the major. Courses used to meet the international education requirement in general education may not be counted toward a major.

Minor
A minor supplements the major, often emphasizing a special interest, an interdisciplinary approach or vocational skill. Minors consist of 18-20 hours, with at least eight hours of upper-level study. Students work with a minor adviser to record the minor on the Plan of Study. At the discretion of the department granting the minor, courses in the minor may also be counted as related courses in the major. If two or more minors are completed, they may not contain overlapping courses unless such courses are specifically required in both minors. Courses used to meet the international education requirement in general education may not be counted toward a minor.

Grade point average
A minimum 2.00 grade point average (GPA) for all work at Goshen College is required for graduation.

Residence at Goshen College
At least 30 credit hours of course work must be completed at Goshen College.

Senior residence
Of the minimum 30 hours taken at Goshen, at least 24 hours must be completed in the senior year (beyond 90 hours). Exceptions are made for certain professional curricula where the fourth year is spent at another institution and for students in the Division of Adult and External Studies.

Limit in one department
No more than 45 hours in one department can count toward the minimum hours required for the degree. In other words, at least 75 hours outside the department of the major must be completed. All interpretation of requirements should be checked with the registrar.

Special degree conditions
Credit limitations
In each of the following areas, a maximum of 12 hours may be credited toward the degree:
- Technical education. Terminal (nonliberal arts) program at other colleges, such as community colleges, technical or Bible institutes.
- English as second language. A maximum of 10 hours may be counted for the bachelor's degree.
- Correspondence credit. Goshen offers no correspondence courses, but up to 12 hours may be accepted in transfer.
- Credit for learning based on work and/or experience. A maximum of 12 hours of experience-based credit can be counted for the bachelor's degree.

Changes in graduation requirements
A student will normally be expected to meet the graduation requirements outlined in the catalog for the year of matriculation at Goshen (or at Hesston College – unless these requirements have been changed later by faculty actions that may be applied retroactively. A student whose graduation is delayed because of absences of more than two semesters will be subject to the graduation requirements in force at the date of readmission. However, a student who, in spite of a period of absence, can graduate not more than seven years after first matriculation (or an appropriate share of this time in the case of a student admitted with advanced standing), may elect the requirements in force on the date either of first matriculation or of readmission.

Candidacy for degree
Candidates for degrees must file applications not later than the beginning of the semester in which the degree is to be awarded. Official application forms are available online.

Registration
Following admission for study in a particular semester, all new students participate in course registration as described below.

Registration procedures
Registration for each semester normally proceeds in two distinct stages – course selection and final check-in. Course selection includes consultation with a faculty adviser and presentation of the course-selection form to the registrar’s office. This registration must be confirmed at the final check-in just before classes begin. Final check-in includes housing confirmation, fee payment, financial aid processing, proof of insurance, ID cards, auto registration and other items. Part-time students and late applicants complete both these stages on the first day of the semester.

Full semester: Continuing students select courses in April. New students participate in special orientation/registration days scheduled at Goshen and other selected locations from May to August. Final course selection and registration for all students is held the first two days of the semester, as is course selection for late students. Classes begin on the third day of the semester.
Spring semester/May term: Students on campus select courses in November and December. Fall SST students and new students complete course selection in December or on the first day of the semester. Final check in for all is the first day of the spring semester, and classes begin on the second day.

Academic advising
First-semester freshmen are assigned to colloquium advisers. Those who are ready to declare a major at the end of the first semester are then assigned to advisers in their academic departments. All others will be assigned to general advisers in the collegiate studies department until they declare majors.

During the advising period at the end of fall and spring semesters, all students are asked to consult with their academic advisers, but contact is not limited to these days. Faculty advisers are prepared to assist with a range of questions – life planning, career goals, choice of major, course selection and general adjustment to college. Questions about the advising program should be addressed to the associate dean.

Departments and professional or pre-professional programs conduct information sessions for interested students. Departmental advisers answer questions following these meetings and in individual sessions. Departments may also conduct group sessions to assist majors with course selection.

Students share responsibility with the faculty adviser for planning their college program, including course selection and for becoming acquainted with requirements through reading printed materials and attending departmental meetings.

Changes in registration
Students may make online changes to their course schedules during designated “open registration” times. Students may add new courses and change grading plans only during the first five days of classes in the fall and spring semesters and the first two days of the May term and summer sessions. Courses formally dropped before the end of the fifth day of classes do not appear on a student’s permanent record. Courses dropped during the second to ninth weeks will appear on the permanent record with a W grade (withdrawal). Courses dropped after the ninth week are recorded F (failing) or NC (no credit). Students may make changes in depth-credit registration (see below) during the first 12 weeks of the fall and spring semesters.

Course changes after the times specified above are permitted for health reasons only and must be approved by the coordinator of counseling.

Hours and course load
The usual academic load during the fall and spring semester is 12 to 15 credit hours. To discourage fragmentation of the student’s time and allow more concentrated study in each course, the maximum load permitted in any semester is 15 credit hours (six courses maximum). Exceptions to this policy are possible with approval from the registrar. Extra tuition is charged for hours beyond 15.

Depth credits
Depth credit is offered in some courses to encourage individual study. Sophomore, junior and senior students may register during the first 12 weeks of the semester for an extra credit hour in one or two such courses each semester.

Auditing courses
Students are invited to enrich their program by auditing courses on a space-available basis. Auditors may participate in a class, but are not required to complete assignments and tests. Therefore, classes that emphasize knowledge expansion rather than skill-building are most appropriate for auditing. To register, obtain an audit form in the registrar’s office and secure the instructor’s signature. A per-hour fee is charged for part-time students. There is no fee for full-time students. No attendance or achievement records are kept for auditors. Audited courses are not available for later credit by examination.

Special courses by request
A special course may be offered to students who propose and agree to enroll in it, provided a faculty member agrees to teach it. Off-campus courses and all courses not listed in the catalog need approval by the Academic Affairs Committee. In some cases, courses may be offered during the summer as well as during the May term. The course title and description will be kept as a permanent record by the college. An advance deposit will be required from all students agreeing to enroll.

Northern Indiana Consortium for Education (NICE)
Goshen College is a member of the Northern Indiana Consortium for Education, along with Bethel College, Indiana University South Bend, Holy Cross College, Saint Mary’s College and Ivy Tech State College in South Bend. Through this consortium, Goshen College students may cross-register for courses offered at another member institution. Registration is on a space-available basis. The home school records the registration, and home-school fees are charged. Summer courses are not eligible for cross-registration. See the registrar for current course options and registration procedures.

Special registrations
Courses and special credits are available by independent study, credit by experience and credit by examination. Since these options are not part of registration for any semester, students may register for them at any time with the associate dean. A special fee is always charged, and financial aid does not apply.

Independent study
To develop more curricular flexibility, Goshen College invites students to register for independent study. Students have one year from the date of registration to complete independent study courses. For special circumstances, the professor may request one extension with a specific completion date, generally not to exceed three months. There are two primary reasons why students may wish to take independent study:

Regular courses at special time. An academic program may require that a student take a course not offered during a given semester. In some cases it is possible to take such a course by independent study, under the direction of a faculty member, at a special tutorial rate. To register for such a course, the student obtains permission and a form from the associate dean. The instructor indicates approval on the form, which the student then presents to the office of the registrar. Students may register for independent study at any time during the year, but normally cannot register for an independent-study class that would increase their current course load to more than 15 hours. All independent study is charged at a special rate: tutorial, which assumes equal amount of professor contact hours as when the course is normally offered, or readings, which assumes about one-fifth the normal contact hours.
Special independent courses. A student may want to engage in an independent-study project in an area not covered by regular curriculum courses, especially during the summer, when full time can be devoted to the project. The student may study at the Goshen campus or may elect to go to any area appropriate to the particular study. To take a special independent course, the student makes an initial proposal to the faculty member under whom the project would be conducted. If the faculty member approves, the student submits a more detailed proposal in writing. Next, the associate dean must approve this proposal, then the student registers for the course and pays the usual fee for independent study.

Credit for learning based on work and/or experience
Students may seek college credit for learning acquired through significant experiences in work, travel and service assignments. Goshen College will give credit for this kind of learning, if the area of study is educationally valid and is compatible with college academic programs. The learning experience should involve both thorough preparation and systematic reflection on the importance of what has been learned. Contact with a faculty member before, during and after the experience is crucial for planning and evaluating readings, special research journals, portfolios and other materials. To earn experience-based credit, the student presents a proposal to an instructor and then obtains the associate dean’s approval. A contract is initiated prior to the experience by registration and paying a partial fee at contract time. The balance is due upon final evaluation. From 80-to-120 hours of experience will be expected for one hour of credit. A maximum of 12 hours of experience-based credit can be counted for a bachelor’s degree. Students have two years from the date of registration to complete credit by experience registrations. For special circumstances, the professor may request one extension with a specific completion date, generally not to exceed three months.

Credit for church-related service
Goshen College, in cooperation with Eastern Mennonite Missions recognizes credit for participants in the Youth Evangelism Service (YES) Program. Details of the program will be certified by YES, and the student will be interviewed by the registrar. Up to 15 hours will be granted, and normal credit by examination fees are charged. Areas of credit are arranged with the registrar. This credit may be used toward general-education and major requirements as defined in policy statements available from YES and the registrar’s office. When YES service occurs in a cultural setting quite different from dominant U.S. culture, the credits can meet at least half of the international-education requirement.

A similar arrangement has been made with the Mennonite Mission Network for the Reaching and Discipling (RAD) Program. Goshen College cooperates with Mennonite mission and service agencies in developing credit programs for people in a variety of service activities, including voluntary service, using the same criteria as those for learning based on work and/or experience. Arrangements are made with the director of international education and the associate dean.

Credit by examination
Credit is granted for acceptable test results under four programs – College Level Examination Program (CLEP), DANTES Program and Advanced Placement Tests (all programs of Educational Testing Services, Princeton, N.J.) and tests given by Goshen College instructors. Any student may take these examinations and credit may be earned unless it duplicates previous college credit.

The CLEP tests are administered at least monthly at several hundred centers in the United States, including Goshen College. If acceptable levels are attained in any of the tests, credit is granted. The use of such credit toward specific course requirements of general education and a major will be decided by the departments concerned. Contact the registrar for details.

Academic policies
Classification
Students enrolled for 12 to 15 credit hours are considered full time; those enrolled for one to 11 credit hours are considered part time. All students are classified each semester as freshman, sophomore, junior or senior according to the following scale:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Freshman</th>
<th>Sophomore</th>
<th>Junior</th>
<th>Senior</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total hours at beginning of semester</td>
<td>0-29</td>
<td>30-59</td>
<td>60-89</td>
<td>90 or more</td>
</tr>
</tbody>
</table>

Attendance regulations
Regular attendance at class is expected; the instructor will announce specific requirements for each course. Absences and completion of missed class work are issues for the instructor and student to resolve. When a class field trip results in absence, the professor is responsible to notify other instructors via the online Faculty-Staff Bulletin.

Attendance at convocation and/or chapel is required for all full-time students. Current attendance policies are distributed to students annually and available at the chapel and convocation Web site.

Credits
Credit is given for work successfully completed by the student and for which a passing grade or CR has been earned. The credit hour should indicate the use of one-fifteenth of the student’s time (3 to 3 1/2 hours per week in and out of class for the average student). The number of class meetings each week in a particular course will be determined by the instructor in consultation with the academic dean.

Grading and evaluation
Goshen’s system of evaluation offers a standard (letter) grading system and a limited option system (CR/NC). The student chooses at registration whether courses will be selected for the option system.

Standard system

<table>

Academic honors are awarded to traditional baccalaureate degree graduates who have earned a cumulative grade point average of 3.6 or above (A = 4.0) and with no grade lower than a “C” at Goshen College. To qualify for graduation honors, a student must have completed at least 48 graded semester hours at Goshen College. Academic Honors indicated in the commencement program are reflective of fall semester grades and are subject to change with the addition of spring, May term and summer grades.

Academic honors are also awarded to Adult Degree Completion Program graduates who have earned a cumulative grade point average of 3.6 or above, with no grade lower than a “C” while pursuing a degree from the adult degree completion program. To qualify for graduation honors, a student must have completed at least 40 graded semester hours at Goshen College. Academic Honors indicated in the commencement program are reflective of fall semester grades and are subject to change with the addition of spring, May term and summer grades.

Summa Cum Laude: 3.90-4.00 GPA (with highest honor)
Magna Cum Laude: 3.80-3.89 GPA (with great honor)
Cum Laude: 3.60-3.79 GPA (with honor)

Standards for academic progress
Satisfactory progress depends on maintaining a minimum grade point average (GPA) and earning at least 12 hours of credit each full-time semester. Since graduation requires a 2.00 GPA, these intermediate goals must be met:

- In first year (12-29 hours earned) 1.50 minimum GPA
- After earning 30 or more credit hours 2.00 minimum GPA

Any student not meeting these standards for: a) GPA or, b) hours earned, is placed on academic probation for the next semester. While on probation the student will be expected to either: a) increase GPA to the required level or, b) complete sufficient credit hours to have at least 24 hours in the two consecutive semesters (including May term). If these conditions are not met by the end of the semester, the student is subject to academic disqualification. Full-time students who pass fewer than five semester hours in any given semester of enrollment are also subject to immediate academic disqualification. Disqualification action is taken after a short appeal period when the student can file a written appeal with the academic dean and dean of student life, who take final action. It is possible that the student would be asked to take a battery of tests from a qualified mental health professional. These tests would examine academic potential, any learning problems present and emotional or social problems that could affect the student’s progress. In an effort to work with identified problems, the student may be asked to contract with support persons such as counselors, parents or professors. Disqualification lasts two semesters and the student may apply for readmission after that time. The first 12 hours of attendance after disqualification will be at student expense (no financial aid). Further eligibility for financial aid is dependent on maintaining satisfactory academic progress.

Academic bankruptcy
Academic bankruptcy is designed to assist the once-disqualified student to return to school under reduced handicap. Only selected students may be considered for bankruptcy status; to qualify the student will: a) have earlier been academically disqualified from Goshen, b) not be enrolled in any college study for at least two years, c) submit a written appeal to the Appeals Committee.

Academic bankruptcy can be granted only once for a student and results in the entire Goshen College record up to that time being re-evaluated as a transfer record. This means that: a) only courses with grades of C- or better will be retained for credit at Goshen; b) the grade point average will be restarted with no computation for former work at Goshen; c) academic bankruptcy will be clearly marked on the academic record. Clear conditions of probation will be stated to fit the individual situation. Fully meeting these conditions and the maintenance of a minimum 2.00 GPA will be required to continue after academic bankruptcy.
**Academic integrity**

Goshen College expects all students and faculty members to practice academic integrity. Honesty, trust, fairness, respect and responsibility are essential building blocks in creating a vital learning community. They are also the foundation for lifelong integrity.

Academic dishonesty at Goshen College is considered a serious breach of the “Goshen College Commitment to Community Standards.” Academic dishonesty is any act that misrepresents academic work or interferes with the academic work of others. It includes:

- plagiarism (giving the impression that another person’s work is your own)
- cheating on assignments or exams
- falsification of data
- submission of the same (or substantially the same) paper in more than one course without the prior consent of all instructors concerned
- depriving others of necessary academic sources
- sabotaging another student’s work

Consequences of academic dishonesty are based upon the severity of the offense, course expectations and other variables. Consequences for individual offenses may range from re-doing the assignment to dismissal from the college.

**Official transcripts**

Official transcripts of a student’s academic record will be released upon written authorization of the student. To assure that the student has complete control over this confidential information, all requests by other individuals will be refused. Positive identification in the form of student number or birthdate should accompany the signed request.

One transcript is available free of charge. A fee of $4, payable in advance, is charged for each additional transcript. A transcript will be issued only if all financial obligations have been settled with Goshen College.

**Privacy rights of students**

In accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA), post-secondary students enrolled at Goshen College are hereby notified of their rights with respect to their education records. They are:

1. The right to inspect and review the student’s education records within 45 days of the day the college receives a request for access. Students should submit to the registrar, vice president for student life or other appropriate official, written requests that identify the record(s) they wish to inspect. The college official will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate or misleading. Students may ask the college to amend a record that they believe is inaccurate or misleading. They should write to the college official responsible for the record, clearly identify the part of the record they want changed and specify why it is inaccurate or misleading. If the college decides not to amend the record as requested by the student, the college will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to prohibit disclosure of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the college in an administrative, supervisory, academic, research or support staff position (including security personnel); a person or company with whom the college has contracted (such as an attorney, auditor or collection agent); a person serving on the board of directors; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his/her tasks.

A school official has legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Goshen College to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

FERPA further provides that certain information concerning the student, designated as “directory information,” may be released by the College unless the student has informed the college that such information should not be released.

Goshen College does not provide student e-mail lists to public or private entities.

Directory information includes:

- name
- permanent address*
- local address*
- telephone number*
- e-mail address
- ID photo*
- verification of birthdate supplied by inquirer
- dates of attendance
- full- or part-time status
- date of graduation and degree received
- major field(s) of study
- classification
- participation in officially recognized activities and sports
- height and weight of athletes

*Goshen College distributes the information marked with an asterisk, but less publicly than the other items:

- The campus telephone directory is printed and made available to Goshen College students, faculty and staff. It includes name, class, local address, phone and e-mail address.

- Your local address, phone number, student ID photo and permanent address are available on Goshen College’s Web site, but only to people using a computer connected to Goshen College’s on-campus network (physically connected to the network or remotely connected with a valid Goshen College username and password.) Any student who desires that any or all of the above listed information not be released may contact the registrar’s office or complete the form found at http://www.goshen.edu/registrar/privacy. Such nondisclosure must be requested within the first seven days of the semester to be excluded from printed directories. Online listings can be blocked at any time.

Questions about this policy may be directed to Stan Miller, registrar, or Bill Born, vice president for student life.

**Leave of absence policy**

Students whose enrollment is interrupted by one or two consecutive semesters may apply for a leave of absence at the time of their withdrawal. Formal requests for leaves should be made by completing a
Leave of Absence Form, available from the registrar. Justifiable reasons for a leave may include medical or financial exigencies, church-related service assignments, CASAS and MCC SALT or Intermenno programs. Students enrolled at the Indianapolis Peace House, Urban Life Center, Oregon Extension, Washington Community Scholars’ Center or in BCA study programs are considered to be currently enrolled students at Goshen College.

Students on official leave shall enjoy all the catalog privileges of continuous enrollment. The offices of registrar, student financial aid, SST and residence life will communicate with students on leave in a timely manner to ensure student services commensurate with continuing students.

Students who interrupt enrollment for more than one academic year must apply for readmission or extension of leave of absence through the admission office.

---

### Financial aid

#### Purpose and philosophy

The financial aid program at Goshen College is designed to assist students in a variety of economic circumstances and to supplement – not replace – family resources for college. First, the program is intended to provide financial assistance to accepted and continuing students who would be unable to attend college without aid. Second, it is intended to encourage the attendance at Goshen College of students who have demonstrated high achievement or otherwise have indicated strong potential to benefit from study at the college and to contribute to the achievement of the college’s mission. Third, awards are made to assist the college in meeting its goals for cultural diversity.

The financial aid program is based on the philosophy that since the student is the primary beneficiary of a college education, the student’s family must bear the major responsibility for the student’s education as far as its means will allow. The student is expected to contribute toward his or her own education, usually through savings and/or summer employment. Our awarding policies are balanced to consider need but to also recognize past achievement and high potential achievement (i.e. merit).

**Apply for admission to Goshen College by Feb. 1** to receive priority consideration for financial aid and scholarships *(March 1 for transfer students).*

#### Financial aid packaging concept

All financial aid awards are determined by the student financial aid office. Students applying for financial aid are considered for all aid for which they are eligible. Financial aid is normally provided in a "financial aid package" – a combination of college, state, federal and private loans, employment and gifts. Goshen College attempts to provide a financial aid package adequate to meet the needs of each student who applies.

Students planning to attend Goshen College should expect the following direct expenses for the 2006-07 academic year: tuition and fees – $20,300; room – $3,600; board – $3,100. In addition, allowances should be added to these figures for indirect expenses, including books and supplies, personal expenses, medical insurance and transportation. The student financial aid office considers the total attendance costs, including the items listed above, in making a financial commitment.

During 2005-2006, Goshen College administered more than $14.8 million in financial aid. The total amount of each package is based on the student’s financial need and/or eligibility for merit-based aid. Need is determined by subtracting the resources of the student and his or her parents’ contribution and any merit-based aid from the total estimated student expenses. The amount of the expected family contribution (EFC) is determined from information on the Free Application for Federal Student Aid (FAFSA), which uses such items as number of family members, income, assets, taxes paid and certain other liabilities of the family. A need analysis formula, called Federal Methodology, is used to evaluate the family’s financial circumstances.

#### Financial aid packages include the following:

- **Scholarships**: Gift aid awarded in recognition of outstanding achievement. Financial need will be considered in the awarding of some scholarships.
- **Grants**: Gift aid awarded to students, usually with demonstrated need.
- **Loans**: Education loans other than Federal Direct Unsubsidized Stafford loans usually accrue no interest during the time of enrollment in college. Relatively low interest accrues during the repayment period.
- **Employment**: Part-time jobs are available on campus or in the community where earnings can amount to as much as $1,800 or more each school year. Full-time summer employment can provide additional earnings.

#### Financial aid packages are assembled in the following order:

1. Federal Pell Grant
2. Federal Supplemental Educational Opportunity Grant (SEOG)
3. State grants
4. College scholarships and discounts
5. Church aid and Goshen College Church Aid Matching Grant
6. Endowed Scholarships
7. Federal College Work-Study
8. Federal Direct Stafford Loan (subsidized)
9. Goshen College Grant
10. Federal Perkins Loan, Federal Nursing Student Loan to meet remaining need
11. Federal Direct Parent Loan (PLUS) or unsubsidized Federal Direct Stafford Loan to families who desire it.

#### Sources of financial aid

An information booklet called *Go Further – Scholarships & Financial Aid* is available upon request from the admission office or the student financial aid office. It describes the financial aid resources at Goshen College. Goshen College participates in all federal programs, including the Federal Pell Grants, Federal Supplemental Educational Opportunity Grant (SEOG), Federal Perkins Loan, Federal Nursing Student Loan (NSL), Federal College Work-Study Program (CWSF), the Federal Direct Stafford Student Loan and the Federal Direct Parent Loan for Undergraduate Students (PLUS). Residents of Connecticut, Indiana, Pennsylvania, Rhode Island and Vermont are eligible to receive state scholarship and grant awards that can be used at Goshen College.

Other generous scholarship, grant, loan and discount programs include these:

- **President’s Leadership Award**: Up to 15 awards will be given annually to entering first-year students in recognition of outstanding academic and leadership skills. A separate application for the President’s Leadership Award requests a listing of leadership activities in high school, church and community, references and a written essay. The application is available from the admission office and must be submitted by Feb. 1. To be eligible to apply, a student must meet at least two of the following criteria: a) be a National Merit Semifinalist, b) rank in the top five percent of their high school class, c) have a grade point average of at least 3.8 (on a 4.0 scale), d) score at least 1270 (Critical Reading
plus Math) on the Enhanced SAT or 29 on the ACT. Canadian students must have a high school overall average of 88 or better. It is renewable each year with a 3.20 grade point average. The award is made for no more than eight total semesters. The stipend for 2006-2007 is $12,000. (The President’s Leadership Award replaces a Menno Simons or Wens Honors Scholarship.) Applicants for the President’s Leadership Award are interviewed by college faculty.

**Goshen College National Merit Scholarship (Burkholder Scholarship):** National Merit Scholarships for National Merit finalists — $1,000 to $2,000 per year for four years. Stipends above $1,000 are based on need. These scholarships are partially funded by an endowment established in honor of President Emeritus J. Lawrence Burkholder and his wife, Harriet. It is renewable each year with a 3.20 grade point average. The award is made for no more than eight total semesters.

**Academic/Merit Scholarships:** These “merit-based” scholarships reward achievement in high school at several levels. Your eligibility for the Menno Simons, Wens, Yoder, Grebel and Kratz Honors Scholarships are determined by looking at a combination of your grade point average (GPA), SAT or ACT scores, rank in class, financial need and date of application. Awards based on academics are limited to a total of eight semesters, and are renewable based on continued minimum GPA levels (3.20 for Menno Simons, 3.00 for Wens, Yoder and Grebel, 2.80 for Kratz). Scholarship stipends for fall 2006-07 are based on application date:

<table>
<thead>
<tr>
<th>Scholarship</th>
<th>By Feb. 1</th>
<th>After Feb. 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menno Simons Scholarship</td>
<td>$7,000</td>
<td>$6,000</td>
</tr>
<tr>
<td>Wens Honors Scholarship</td>
<td>$6,000</td>
<td>$5,000</td>
</tr>
<tr>
<td>Yoder Honors Scholarship</td>
<td>$5,000</td>
<td>$4,000</td>
</tr>
<tr>
<td>Grebel Honors Scholarship</td>
<td>$4,000</td>
<td>$3,000</td>
</tr>
<tr>
<td>Kratz Honors Scholarship</td>
<td>$2,000</td>
<td>$1,000</td>
</tr>
</tbody>
</table>

**Transfer Academic/Merit Scholarships:** Transfer students who have shown outstanding performance can receive academic/merit scholarships based on their cumulative transfer GPA. Scholarship stipends for fall 2006-07 are based on application date:

<table>
<thead>
<tr>
<th>Scholarship</th>
<th>By March 1</th>
<th>After March 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transfer High Honors Scholarship</td>
<td>$7,000</td>
<td>$6,000</td>
</tr>
<tr>
<td>Transfer Honors Scholarship</td>
<td>$5,000</td>
<td>$4,000</td>
</tr>
</tbody>
</table>

Students from Hesston (Kan.) College who are not eligible for the above scholarships, but who still show good academic performance, are eligible for the Hesston Honors Scholarship worth $1,500. Renewals are based on maintaining a 3.20 GPA for the Transfer High Honors and 3.00 for the Transfer Honors and Hesston Honors Scholarships.

**Stoltzfus Recognition Award:** All African-American, Asian-American, Latino and Native-American students (U.S. and Canadian citizens and alien residents) are eligible. Eligibility also includes a high school grade point average of 2.5 (on a 4.0 scale) or ranking in the top half of the high school class. Transfer students must have a 2.0 grade point average. The stipend for first year students in 2006-2007 is a minimum of $1,000 and a maximum of $2,500, depending upon financial need. It is renewable each year, but the award is made for no more than eight total semesters.

**Endowed and restricted scholarships:** In 2005-2006, the financial aid office administered over 150 endowed and restricted scholarship funds and awarded over $800,000 to students from these sources. Simply by applying for financial aid, the student will automatically be considered for endowed and restricted scholarships using criteria specified by each donor. Over 75 percent of these scholarships are need-based. Many are designated for a specific major or professional goal; some are based on other criteria such as geography, descendency, etc.

**Missionary service scholarships (Swallen and Lord’s Trust):** Two scholarships are available for those students who are preparing for missionary service. An application (available in the student financial aid office) is required along with two additional references. Stipends range from $1,000 to $5,000.

**Music scholarships:** Scholarships for music achievement are awarded each year through the music department. First-year students are not required to be music majors, but must be involved in activities of the department. Stipends range from $1,000 to $3,000. Check directly with the music department for scholarship applications and audition dates/procedures.

**Athletic scholarships:** Scholarships for athletic leadership/achievement are awarded each year through the athletic department. Usual stipends range from $1,000 to $5,000 (maximum institutional funds from all sources is the cost of tuition). Check directly with the athletic department for more details.

**Goshen College Grant:** A Goshen College Grant is gift assistance provided on the basis of financial need. The amount of the grant is dependent on the student’s demonstrated need and other gift aid received by the student.

**Church Aid Matching Plan:** To promote congregational/conference student aid programs, Goshen College will provide a grant to match assistance given by the student’s congregation or conference aid plan. This Church Aid Matching Grant will be awarded in addition to other scholarships, grants or discounts for which the student is also eligible. The Church Aid Matching Grant program is available to any eligible GC student, regardless of religious denomination. The Church Aid Matching Grant will apply dollar-for-dollar to the first $1,000 and beyond that on a 1:4 ratio. For example, after matching the first $1,000, the college will provide $1 for every additional $4 provided by the church up to full tuition of church-college match funds. Congregational or conference representatives must notify the church relations office by March 1, providing the amount of aid commitment and the name of each recipient. The match is pro-rated for part-time enrollment.

**Tuition discounts**

**Related Mennonite institution discounts:** Dependents of a faculty or staff member from schools of the Mennonite Secondary Education Council, Mennonite Elementary Education Council, Associated Mennonite Biblical Seminary, Eastern Mennonite Seminary or College Mennonite Church are eligible for a tuition discount up to 25 percent. Dependents of faculty and staff from these institutions who are employed less than full-time receive a pro-rata share of the 25 percent discount, based on the percentage of the parent’s employment.

**Mennonite Colleges tuition discount reciprocity:** Dependents of faculty and staff members from the following members of the Council of Mennonite Colleges are eligible for a 50 percent tuition discount: Bethel College (Kan.), Bluffton University, Eastern Mennonite University and Hesston College. Dependents of faculty and staff from these colleges who are employed less than full-time receive a pro-rata share of the 50 percent discount, based on the percentage of the parent’s employment.

**Aid limits and policies:** Goshen College limits merit awards so that more funds can be awarded on the basis of financial need. Students may apply/audition for any number of awards, but the student can receive a maximum of two awards from the following list:

- President’s Leadership Award
- Menno Simons, Wens, Yoder, Grebel or Kratz Honors Scholarships
The registrar's office establishes the last date of attendance for students. Unless otherwise specified, all financial aid requires full-time enrollment. Financial aid and satisfactory academic progress are established in the last date of attendance policy.

Early and orderly planning is important for receiving financial assistance. Per College policies, the total gift aid from Goshen College sources cannot exceed the cost of tuition, room/board and books. Tuition Discount Benefit, Athletic Awards, Music Department Achievement Award, Lord's Trust & Swallen Scholarships, Gorsline Business, Communication or Theater Scholarships, and International academic scholarships are available to students with outstanding ability. The scholarship will continue as long as the recipient maintains a grade point average of 3.00 and completes at least 24 semester hours of credit per year.

Financial aid recipients must show sufficient academic progress toward completion of degree objectives within a reasonable time period. The time period is normally defined as five years of full-time enrollment with exceptions granted for remedial work or other unusual circumstances. Failure to make normal progress will cause ineligibility in federal, state and institutional programs. The Appeals Committee hears appeals from those failing to meet minimum satisfactory academic progress. To continue receiving financial aid a student must have at least:
- a. 1.50 grade point average while earning between 12 and 29 credit hours.
- b. 2.00 grade point average after earning 30 or more credit hours.
- c. Additionally, each full time student must complete 24 hours in each academic year.

In no case may a student receive federal financial assistance after having attempted 150 percent of the published length of program for a full-time student, i.e., a maximum of 180 credit hours for programs that require 120 hours for completion.

A full statement of the policy is found in the academic policies section of this catalog.

Qualifications for financial aid
Unless otherwise specified, all financial aid requires full-time enrollment of at least 12 hours each semester. Students receiving Federal Pell grants or VA benefits may receive reduced amounts if enrolled in six to 11 hours. Accounts from previous enrollment must be paid in full to retain the assistance.

In accepting a scholarship, grant, loan or discount, a recipient agrees to maintain satisfactory support of the ideals and standards of Goshen College and to maintain satisfactory academic progress. Any financial aid held by a student who withdraws either voluntarily or by request will be adjusted according to federal and institutional refund policies. Any loan or open account will become due and payable.

Establishing last date of attendance policy
The registrar's office establishes the last date of attendance for students who stop attending classes without following withdrawal procedures by contacting teachers, the student's adviser and residence life personnel. Information obtained from these persons will be used to document the last date of attendance.

Financial aid and satisfactory academic progress
Financial aid recipients must show sufficient academic progress toward completion of degree objectives within a reasonable time period. The time period is normally defined as five years of full-time enrollment with exceptions granted for remedial work or other unusual circumstances. Failure to make normal progress will cause ineligibility in federal, state and institutional programs. The Appeals Committee hears appeals from those failing to meet minimum satisfactory academic progress. To continue receiving financial aid a student must have at least:
- a. 1.50 grade point average while earning between 12 and 29 credit hours.
- b. 2.00 grade point average after earning 30 or more credit hours.
- c. Additionally, each full time student must complete 24 hours in each academic year.

In no case may a student receive federal financial assistance after having attempted 150 percent of the published length of program for a full-time student, i.e., a maximum of 180 credit hours for programs that require 120 hours for completion.

A full statement of the policy is found in the academic policies section of this catalog.

Procedures for applying for financial aid
Early and orderly planning is important for receiving financial assistance. 1. Apply for admission; a student must be admitted to the college before a financial aid offer can be made. Students who apply for admission by Feb. 1 will receive priority consideration for financial aid.
2. Annually complete the Goshen College financial aid application form before March 1. (For first-year students, the financial aid application is combined with the application for admission.)
3. Submit a Free Application for Federal Student Aid (FAFSA) by March 1. The FAFSA may also be used to apply for the Pell Grant program and the Indiana Higher Education Award and Freedom of Choice Award. The FAFSA may be obtained from a high school guidance office. Students should specify 001799 as the code number for Goshen College in the appropriate section of the FAFSA.
4. Investigate other sources: high school, church, community service clubs, industry or vocational rehabilitation.
5. The student financial aid office will notify the student with an aid package starting in early March (or within two to four weeks if the student has not met the stated deadlines for submission of the financial aid application or FAFSA). Upon receiving a financial aid package, the student should review the award and respond to the guidelines stated in the financial aid letter.
6. Students must reapply for financial aid each academic year. Aid usually continues at substantially the same level each year unless the family's resources or the student's status change. All enrolled students receiving aid automatically receive information about applying for renewal awards. Others who want to apply for financial assistance should request application forms from the student financial aid office by Feb. 1.

Canadian students
Canadian students are eligible for institutional grants and scholarships listed above. In addition:
1. Canadian students receive a “Canadian Exchange Discount” for tuition, room and board based on the current exchange rate. In other words, the Canadian dollar is accepted on a par with the American dollar.
2. If you anticipate applying for need-based financial assistance, please request the Canadian Student Financial Aid Form. You should also consider sources of aid in your province.

Financial aid for international students
Special scholarships and grants are available to qualified international students.

International scholarships: International academic scholarships are available to students with outstanding ability. The scholarship will continue as long as the recipient maintains a grade point average of 3.00 and completes at least 24 semester hours of credit per year.

International tuition grants: These grants cover part of the cost of tuition. The maximum grant is 66 percent of tuition. The actual percentage depends on the financial need of the student. International students may apply for aid as a part of the admission process. To be considered, a completed application along with all supporting transcripts and test scores must be submitted along with a financial declaration.

Support
The expenses of the college are met only partially by student payments. The balance is provided by current gifts and by income from endowment funds. The college depends upon gifts from the Mennonite Church, alumni, business and industry, foundations and interested friends to meet college expenses not covered by student payments.
A school year at Goshen College includes fall semester, spring semester, and May term. Financial aid is based on the costs for a complete academic year, with an additional allowance for books, clothing, recreation, incidentals and transportation. Aid funds are disbursed at the beginning of the fall and spring semesters soon after students complete final registration.

### Expenses

#### Tuition and Room and Board Refund Procedures

Fall or spring SST | $13,500 |

Summer SST (attended full time both fall and spring) | 10,830 |

Summer SST (attended full time fall or spring) | 12,165 |

Summer SST (did not attend full time fall or spring) | 13,500 |

Other tuition rates and surcharges

1. No additional cost for May term for students who are registered full-time and living on-campus at Goshen College in both fall and spring semesters. All others, including BCA students and those in off-campus courses through other agencies, pay the charges listed below for May term.
2. Additional costs for May term meals may apply if student was not in full board both fall and spring.

| May term only | | | |
| May term | $2,000 | $350 | $320 | $2,670 |

Add the following estimates to the above fixed costs: books and supplies — $800; personal expenses (i.e., health insurance, recreation, laundry, pocket money, etc.) — $1,100; transportation — variable.

### Other Tuition Rates and Surcharges

| Part-time fall and spring enrollment charges (except applied music) | |
| One credit hour | 500 |
| Two credit hours | 750 |
| Three credit hours | 1,000 |
| Four credit hours | 1,300 |
| Five credit hours | 1,600 |
| Six-to-11 hours (and May term part time) (per credit hour) | 800 |
| Extra hours above 15 (per credit hour) | 500 |

### Full-and-part-time:

- Independent study, per credit hour (tutoring) | 800 |
- Independent study, per credit hour (honors thesis) | 650 |
- Independent study, per credit hour (readings) | 500 |
- Summer session | 1,400 |

### Finance Charges

Interest of 12 percent annually (1 percent per month) will be levied against charges unpaid 30 days after statements are issued. Delinquent accounts may be sent to a collection agency. The student is responsible for all collection costs.

### Refund Policy

The following tuition refund procedures apply to students who withdraw or are dismissed from the institution, change status from full time to part time or reduce hours as a part-time student. Room and board refund rates apply to students who withdraw, are dismissed or change from resident to commuter status.

#### Voluntary Withdrawal

Voluntary withdrawal: Students who withdraw completely from the college initiate the process by contacting counseling services. Official contacts must also be made with the academic adviser, registrar and resident director (if residence-hall student), accounting office and student financial aid office. Students who reduce their hours of enrollment must contact their academic adviser and the registrar. Students with changes in housing or food-service contracts must contact the dean of students and dining services. To receive credit for the unused board contract, the student’s ID and any unused munch money must be returned to the dining hall, and the dean of students must be informed.

#### Involuntary Withdrawal

Involuntary withdrawal: The registrar’s office establishes the last date of attendance for students who stop attending classes without following withdrawal procedures by contacting teachers, the student’s adviser and residence life personnel. Information obtained from these persons will be used to document the last date of attendance.

From the day of registration through the first week of classes (drop/add period), the student will receive a 100 percent refund on tuition. The refund percentage for the rest of the semester follows the federal regulations for refunding financial aid. From the eighth day of the semester, the refund percentage is calculated by counting the number of days left in the semester, divided by the total number of days in the semester. As in the federal formula, weekends and breaks are also counted except for scheduled breaks of at least five consecutive days. There is no refund after the last day to withdraw with a “W” which is when 60 percent of the semester is completed. A day-by-day refund schedule is posted in the accounting office and at http://www.goshen.edu/financialaid/cf_refundpolicy.php

### Withdrawal and Refund Policy for Reservists Called to Active Duty

Any student called to active duty in the military may withdraw from
courses up until the last day of the semester. If the withdrawal comes during the first nine weeks of the semester, normal withdrawal and refund policies take effect. If departure comes after the ninth week, the student has the option of withdrawal "W" or incomplete "I." Options should be discussed with and approved by the course instructor(s). If course withdrawal “W” is pursued, tuition and fees will be refunded on a prorata basis. The official date of withdrawal will be used to calculate the refund. Students receiving financial aid will be subject to refund policies as provided for by the agencies sponsoring the aid. Reservists called to active duty who wish to withdraw from courses must provide the registrar with a copy of their orders.

Other charges are made for special fees as follows:

<table>
<thead>
<tr>
<th>Service</th>
<th>Fee</th>

Standard payment plans

**Plan #1 Payment in full** each semester at final check-in. Part-time students and students whose balance due is less than $4,000 are expected to elect this plan.

**Plan #2 Payment of $4,000** at final check-in, with the balance in 30 days. After 30 days any unpaid charges will be subject to monthly interest charges and a $75 special payment arrangement fee.

**Plan #3 Monthly payment plan:** Contracts may be arranged with an outside agency, Tuition Pay (AMS), for a low-cost monthly payment program to extend throughout the year. The cost of the plan is $75, which includes Life Benefit Coverage. There are no interest charges. Contact the accounting office for information, or call Tuition Pay at (800) 635-0120 or www.TuitionPay.com.

**Plan #4 Special arrangement:** If none of the preceding plans fit your situation, you may submit a proposal that will be subject to the approval of the controller. If approved, a processing fee of $75 will be charged. A payment of at least $4,000 is required at the time of final check-in each semester. After 30 days any unpaid charges will be subject to monthly interest charges.

*Students may not go through final check-in until full or initial payment is made under one of these plans. Scholarships, grants, discounts and Perkins, Federal Direct or other college loans will be credited to the student's account and are not considered to be part of the down payment due at final check-in. Private bank-loan checks, church checks and other outside checks may be counted toward the down payment if received on or before the day of final check-in.

**Note:** It is not acceptable to go through final check-in without a payment and have a statement sent to parents so they can send a check. As an acceptable alternative, we suggest plan #2. Any exception to this policy will be granted only after careful evaluation of the individual situation, and the student will be charged a deferred payment fee of $75.

**Note:** It is the policy of Goshen College to report all students with outstanding balances to the credit bureau beginning when charges are 120 days past due and continuing until the balance is paid in full. In addition, delinquent accounts may be referred to a collection agency at any time after the account is 120 days past due. Collection costs on referred accounts are the responsibility of the student.

Professor of Mathematics
B.A., Goshen College, 1967; M.A., Michigan State University, 1972; Ph.D., Indiana University, 1985. GC, 1976-.

Steven M. Nolt, Ph.D.
Associate Professor of History

Patricia A. Oakley, Ph.D.
Professor of Mathematics and Computer Science

Julie C. Reese, Ph.D.
Associate Professor of Psychology

E. Dean Rhodes, M.A.
Associate Professor of Spanish
B.A., University of Iowa, 1975; M.A., Coe College, 1996. GC, 2001-.

John D. Roth, Ph.D.
Professor of History, Director of Mennonite Historical Library and Editor of Mennonite Quarterly Review

Russ J. Rupp, C.P.A., M.B.A.
Professor of Accounting
Phil Rush, M.S.M.
Associate Professor of Business Information Systems

Jody D.aylor, M.S.
Assistant Professor of Biology
B.S., Hanover College; M.S., Purdue University Calumet, 1996; Ph.D. program, The University of Notre Dame, 1996-97. GC, 2002-.

Douglas M. Schirch, Ph.D.
Associate Professor of Chemistry
B.A., Goshen College, 1982; Ph.D., Michigan State University, 1987. GC, 2004-.

Carolyn Schrock-Shenk, M.S.
Associate Professor of Peace, Justice and Conflict Studies
B.S., Eastern Mennonite College, 1980; M.S., University of Virginia, 1983. GC, 2000-.

Christine L. Seitz, M.M.
Assistant Professor of Music and Staff Accompanist

Jan Bender Shetler, Ph.D.
Associate Professor of History

Daniel A. Smith, Ph.D.
Professor of Chemistry
B.S., Elizabethtown College, 1986; M.S., Bucknell University, 1988; Ph.D., Iowa State University, 1992. GC, 1994-.

Solomia Soroka, D.M.A.
Assistant Professor of Music

Brenda S. Srof, Ph.D.
Professor of Nursing
B.S.N., Goshen College, 1982; M.S.N., Oral Roberts University, 1986; Ph.D., Loyola University, 2004. GC, 1988-.

Barbara Y. Stahty, M.A.
Assistant Professor of Education and Laboratory Kindergarten Director/Teacher

Matthias C. Stegmann, M.M.
Instructor of Music (part time) and Music Center Recording Specialist
B.M., Musikhochschule Köln, 1986; graduate study, Ohio University, 1986-89; M.M., University of Cincinnati-College Conservatory of Music, 1993. GC, 1994-.

Duane C. S. Stoltzfus, Ph.D.
Associate Professor of Communication

Eric Stromberg, Ph.D.
Assistant Professor of Sociology

Chris Thögersen, M.M.
Assistant Professor of Music (part-time)

Alan L. Weldy, J.D., M.B.A.
Associate Professor of Business

Judy M. Wenig-Horswell, M.F.A.
Associate Professor of Art

Gail L. Weybright, M.S.N.
Associate Professor of Nursing
B.N., Parkview School of Nursing, 1981; B.S.N., Goshen College, 1995; M.S.N., Valparaiso University, 1999. GC, 1996-.

Steve Wiktorowski, M.S.
Women’s Basketball Coach and Assistant Professor of Physical Education
B.S., Indiana University, 1980; M.S., Indiana University, 1990. GC, 2002-.

Myron Yoder, M.A.
Associate Professor of American Sign Language
B.A., Madonna University, 1982; M.A., Indiana University, 1984. GC, 1987-93, 2000-.

Robert E. Yoder, M.Div.
Director of Youth Ministry Program and Assistant Professor of Religion

Sheila Yoder, M.S.W.
Assistant Professor of American Sign Language
B.A., Goshen College, 1980; M.S.W., Indiana University, 1984. GC, 2004-.

Tim Yoder, M.B.A. (leave of absence 2006-07)
Associate Professor of Business Information Systems

Administrative faculty

Anna Bauer, M.A.
Community School of the Arts Piano Program Director
Diplom Musik Lerner mit Emphases in Klavier, 2000; M.A., Fresno Pacific University, 2004. GC, 2005-.

Jodi S. Hochstedler Beyeler, B.A.
News Bureau Director/Writer
Linda L. Bontrager, B.S.
Women's Softball Coach
B.S., Ball State University, 1984. GC, 2005-.

William J. Born, M.A.
Vice President for Student Life

James E. Brenneman, Ph.D.
President

Anne Meyer Byler, M.S.L.S.
Peace Resources Librarian

James K. Caskey, B.A.
Regional Director of Development
B.A., Goshen College, 1984. GC, 1997-.

Nora Chávez-Morales, B.A.
Admission Counselor
B.A., Goshen College, 1985. GC, 2006-.

Rick V. Clark, M.S.
Men's and Women's Track and Field Coach
B.A., Goshen College, 1975; M.S., Indiana University-South Bend, 1979. GC, 1994-.

Andrew Clouse, B.A.
Admission Counselor

Chad Coleman, B.S.
Resident Director
B.S., Indiana University, 1996. GC, 2002-.

Elizabeth Eggink, B.S.
Financial Aid Counselor
B.S., Ball State University, 2003. GC, 2005-.

Michele Fanfair-Steuery, B.A., C.T.R.S.
Director of Student Activities

Carla Friesen Weldy, B.S.
Director of Church, Alumni and Parent Relations
B.S., Goshen College, 1987. GC, 2001-.

Cory Furman, B.A.
Sports Information Director, Golf Coach, Assistant Men's Basketball Coach
B.A., Ball State University, 1999; M.A. candidate, Ball State University. GC, 2001-.

Executive Director of Merry Lea Environmental Learning Center
B.S., Eastern Mennonite University, 1974; M.A., Grace Theological Seminary, 1983; Ed.D., Nova Southeastern University, 1998. GC, 1997-.

Carol J. Good-Elliott, B.A.
Merry Lea Environmental Learning Center Environmental Science Educator
B.A., Goshen College, 1989. GC, 2001-.

Philip D. Good-Elliott, M.S.W., L.C.S.W.
Director of Counseling
B.F.A., Webster University Conservatory of Theater and Dance, 1984; M.S.W., University of Michigan, 1990. GC, 2005-.

DeLane Graber, B.A., C.P.A.
Controller

Galen L. Graber, B.A.
Director of Enrollment
B.A., Goshen College, 1985. GC, 1984-.

Kevin J. Gross, B.A.
Senior Analyst, Information Technology Services
B.A., Goshen College, 1983. GC, 1984-.

Lisa Guedea Carreño, M.L.I.S.
Library Director

Carlos Gutierrez, M.A.
Associate Director of Financial Aid

Jason Harrison, M.A.
Assistant Campus Minister

Freeman D. Hartman, M.L.S.
Technical Services Librarian
B.A., Warren Wilson College, 2000; M.L.S., Indiana University/Purdue University at Indianapolis, 2002. GC, 2004-.

Gwen F. Hershberger, B.A.
Regional Director of Development

Dale Hess, Ph.D.
Collegiate Program Director, Merry Lea Environmental Learning Center, and Assistant Professor of Environmental Science
B.A., Millersville State College, 1976; M.S., 1984, Ph.D., 1989, Purdue University. GC, 2005-.

James L. Histand, C.P.A., M.B.A.
Vice President for Finance and Associate Professor of Accounting
Rebecca B. Horst, M.A.  
*Associate Registrar and Grants Coordinator*  

David Janzen, M.S.W.

Facts and figures

Accreditation
Goshen College is accredited by the Higher Learning Commission and is a member of the North Central Association. [http://www.ncahigherlearningcommission.org/, (312) 263-0456, (800) 621-7440]. Goshen is classified as a Baccalaureate College – Liberal Arts by the Carnegie Foundation.

The college is authorized by the Indiana State Board of Education and accredited by the National Council for Accreditation of Teacher Education for the preparation of elementary and secondary school teachers. The division of nursing is approved by the Indiana State Board of Nurses Registration and Nursing Education and also by the Commission on Collegiate Nursing Education [One Dupont Circle, NW, Suite 530, Washington, DC 20036-1120, (202) 887-6791]. The social work program is accredited by the Council of Social Work Education [1725 Duke Street, Suite 500, Alexandria, DC 22314, (703) 683-8080]. Alumnae of Goshen College are admitted to membership in the American Association of University Women.

Goshen College is registered with the Regents of the University of the State of New York.

Equal opportunity
Goshen College does not discriminate on the basis of sex, race, color, handicap or national origin in its employment policies, educational policies, administration policies, scholarship and loan programs and athletic and other school administered programs; and does not deny to any student on the basis of sex, race, color, handicap or national origin any right, privilege, program or activity generally accorded or made available to students in Goshen College.

Grievance policy
The grievance procedure at Goshen College is a process by which nonacademic differences between students and employees of Goshen College (and employees of Goshen College and their supervisors or managers) can be resolved. Grievable issues are defined in the policy. The first step is an informal process, attempting to resolve differences through discussion. If this is not successful, the second step, a formal, written grievance procedure is initiated. Information about the grievance policy and assistance with understanding the procedures is available from the personnel director and affirmative action officer.

Goshen College graduation rates
The Student Right-to-Know Act, PL 101-542, requires that institutions publish graduation rates. The rates are based on new freshmen entering an institution as first-time, full-time, degree-seeking students and graduation within 1.5 times the normal time for their program (six years). The graduation rate for those entering Goshen College in the fall of 1999 and graduating within six years was 60 percent. The five-year average rate of first-time freshmen returning to Goshen College for the second year of study is 78 percent.
