The provisions and requirements stated in the Goshen College catalog are not to be considered as an irrevocable contract between the student and the college. The college reserves the right to make changes that it deems necessary at any time, without notification. Alterations may include course and program changes and cancellations. The online version of the catalog will be updated periodically to reflect such alterations. The responsibility for understanding and meeting the graduation requirements published in the Goshen College catalog rests entirely with the student.

Mission statement
Goshen College is a liberal arts college dedicated to the development of informed, articulate, sensitive, responsible Christians. As a ministry of the Mennonite Church, we seek to integrate Christian values with educational, social and professional life. As a community of faith and learning, we strive to foster personal, intellectual, spiritual and social growth in every person. We view education as a moral activity that produces servant-leaders for the church and the world.

Educational mission and core values
At Goshen College we intend to create a community of faith and learning built on five core values: Christ-centeredness, passionate learning, servant leadership, compassionate peacemaking and global citizenship.

In our academic program and campus life students will develop the knowledge, skills and values for

A life that is Christ-centered, with
• a reflective faith that nurtures spiritual growth in individual and corporate contexts.
• an active faith that informs an individual’s experience and choices in all aspects of life.

A life of passionate learning, through
• the mastery of a major field of study as the basis for life-long learning, service, relationships and work in a socially and culturally diverse context.
• an extensive foundation of knowledge, skills and dispositions derived from a liberal arts curriculum that inform an appreciation for and critical understanding of human experience and cultural variety.

A life of servant leadership, based on
• a leadership ability that empowers self and others.
• a healthy understanding of self and others that is reflected in relationships of interdependence and mutual accountability.

A life of compassionate peacemaking with
• a personal integrity that fosters the ability to resolve conflict and to promote justice.
• a commitment to diversity in all of its forms both conceptually and in practice.

A life of global citizenship with
• an intercultural openness with the ability to function effectively with people of other worldviews.
• a responsible understanding of stewardship for human systems and the environment in a multicultural world.

Liberal arts tradition and Christian context
Goshen College is nationally recognized for its excellent academic program and Christian ideals. As a Christian liberal arts college, Goshen draws on the best from both streams. The basic question that drives all liberal arts inquiry is “What is truth?” Different approaches, such as historical, scientific, aesthetic or linguistic, contribute different perspectives of truth.
Facilities and resources

The Goshen College campus comprises 135 acres and 19 major buildings and is located at the south side of Goshen, Ind., population 30,000. General classroom facilities and faculty offices are located in 10 buildings – Administration, Church-Chapel, Good Library, Music Center, Newcomer Center, Roman Gingerich Recreation-Fitness Center, Science Hall, Umble Center, Visual Arts and Wyse Hall. Special departmental facilities are provided for radio and video production, studio art, computer work and scientific research. The following facilities and resources are especially noteworthy:

**Music Center**: Opened in 2002, this beautiful award-winning facility has excellent acoustics and contains the 1,000-seat Sauder Concert Hall, 300-seat Rieth Recital Hall, rehearsal rooms, classrooms, practice rooms, offices, the Community School of the Arts and the Hershberger Art Gallery, which features rotating exhibits by guest artists, faculty and students.

**Roman Gingerich Recreation-Fitness Center**: The multi-use recreation-fitness facility includes three basketball courts, a swimming pool, jogging track, racquetball courts, weight room, climbing wall, classrooms, laboratories, an athletic training room and office space for the campus Wellness and Health Center and the physical education department. Surrounding the building are a lighted soccer field and bleachers, with adjacent practice field, baseball and softball fields and Eigsti Track and Field Complex completed in 2001.

**Information Technology Services**: ITS provides the high quality technology environment required by a modern college curriculum – and one that is continuously improving. All student lab computers are upgraded regularly (annually in most cases). Recent upgrades included 64 bit computers, flat screen monitors and DVD burners. The student to computer ratio in labs is 7.6 to 1, and both Macintosh and PC computers are available. Students who own their own computers can easily connect them to the campus network because all residence halls are networked, there is an extensive on-campus wireless network, and free dial-up service is available for commuting students. Students have access to a full complement of network services, all accessible via a single, personal user ID and password. Students have access to over 500 MB of personal network storage accessible from any computer on campus. All classrooms have network connections and major classrooms have multimedia and computer projection capabilities. The ITS Help Desk provides students on- and off-campus with tech support. Schertz Computing Center is open 24 hours, seven days a week. ITS also holds special Install Fair events to help get student computers configured for use from home or residence hall room. For more information about technology at GC, see the ITS Web page at www.goshen.edu/its/.

**Science Hall and Schrock Annex**: This building provides modern laboratory facilities for teaching and research in biology, chemistry, physics, psychology, computer science, and mathematics.

Specialized facilities and equipment are available in the physics department for research in X-ray crystallography, biophysics of membrane transport and sound production by bells. The chemistry department has active research projects in the areas of biochemistry, molecular genetics, organic synthesis and organometallic synthesis.

Specialized facilities and equipment are available in the biology department for research in the areas of cell biology, molecular genetics, membrane biology and neurobiology. The Merry Lea Environmental Learning Center provides numerous opportunities for research in field biology.

**Multicultural Affairs Office**: Established in 1992, this office supports the infusion of multicultural topics and resources into the curriculum. It also helps in recruiting and retaining of faculty, staff and students from underrepresented groups and offers special events.

**Good Library**: As a research and information center, the Harold and Wilma Good Library connects the campus to ideas and information in a variety of formats. In addition to over 130,000 print sources, the library maintains a video/DVD collection and serves as the gateway to extensive online resources, including scholarly databases, digital journals and electronic books. Collection strengths include peace studies, curriculum materials, and the J. D. Hartzler Music Collection of early American hymnody. Librarians are available for one-on-one assistance throughout much of the day and evening and also offer group instruction. A Web catalog indexes the collections of the Good Library, the Mennonite Historical Library, and 25 other Indiana college libraries. Interlibrary loans provide access to print materials in most North American libraries. Library facilities include a computer lab/classroom, vending and lounge areas, plenty of study space, a reservable meeting room, listening/viewing stations, a periodicals reading room and a gallery which typically features historical and cultural exhibits.

**Mennonite Historical Library**: The Mennonite Historical Library, housed on the third floor of the Good Library, contains more than 65,000 volumes, an unrivaled collection of published works by and about Anabaptists, Mennonites and related groups (Amish, Hutterites, etc.). Resources also include substantial source materials on the Protestant Reformation, local and family history and Pennsylvania Dutch culture.

**Laboratory Kindergarten and Campus Center for Young Children**: Since 1959, an innovative laboratory kindergarten has been operated on campus. Established in 1998, the Campus Center for Young Children offers quality childcare services for children of students, faculty, staff and community members. Both facilities provide students with opportunities for observation and practicum experiences.

**Umble Center**: An award-winning building in the center of campus, the John S. Umble Center features an excellent 400-seat theater. Lighting and sound systems were upgraded in 2002.

**Merry Lea Environmental Learning Center**: The Merry Lea Environmental Learning Center is a 1,150-acre complex of fields, forest, bogs and meadow located 30 miles south of the campus. Opportunities are available for field research in natural sciences as well as teaching internships in outdoor education. Facilities include an environmental-education building that houses a classroom, offices and library, a Farmstead, a pavilion, and some housing with overnight accommodations. Rieth Village, a set of “green” collegiate laboratory/residence buildings was completed in 2006. Rieth Village was conceived and designed to meet the highest standards of the U.S. Green Building Council’s LEED (Leadership in Energy and Environmental Design) rating system. LEED buildings are required to meet rigorous standards in areas such as energy efficiency, water management, use of recycled materials and indoor air quality. Merry Lea offers undergraduate courses in environmental science and education. A master’s degree program in environmental education begins in July 2007.

**Marine Biology Laboratory in Layton, Fla.**: A housing-laboratory building in the Florida Keys provides a permanent resource for the
maritime biology program that has been a unique part of Goshen College since 1966. The facility houses 18 students during an intensive May term experience in marine biology and is used at other times by several other colleges and universities.

**Residence Life.** Newly renovated residence halls Kratz, Miller and Yoder are joined together with the KMY Connector complex, which offers a new game room, large laundry facility, full ADA access, student lounges, computer study spaces and a student run coffee bar, the Java Junction. Newly constructed senior apartments offer housing with fully equipped kitchens, private bedrooms, the option to sign up for cable TV and many other amenities. More than a dozen small group housing units continue to offer an alternative to students who want to live in a small setting with a select group of friends.

**Spiritual development resources.** On the lower level of Coffman Hall is the Quiet Place, with space for individual or group prayers and meetings with spiritual directors. For warmer weather, an outdoor labyrinth was established as an additional option for a space of quiet reflection and contemplation. It is located on the lawn north of East Hall.

---

**Student Life – activities and services**

Goshen College helps students grow toward intellectual, social, moral and spiritual maturity. The college offers a high-quality education in the context of a community of Christian scholars, but learning extends beyond traditional “academic” boundaries. Students ponder questions such as:

“How can my education best be used to serve others?”
“How can I become an effective leader?”
“What should a Christian lifestyle look like?”
“Where is the balance between individual freedom and community responsibility?”

A variety of activities and services help students to explore their individual potential and develop relationships with others, including opportunities for service and experiential learning.

**Spiritual life**

Goshen College encourages growth in faith through worship, Christian community and service. The campus ministries office offers both support for students’ faith journeys and challenges to new discoveries in spiritual life. While Goshen is a Christian college rooted in the Mennonite Church USA we welcome seekers and people of all faiths to attend campus spiritual life activities.

Worship opportunities include chapel services every week, a variety of worship groups that meet throughout the week, and Sunday morning involvement in local congregations. Worship groups meeting during the week include a Fellowship of Christian Athletes chapter, Voices-n-Harmony Gospel Choir, Taizé worship and student-led contemporary worship. Christian community sustains students through friendships and in small groups organized by campus ministries that meet for prayer, Bible study, accountability and sharing. Residence hall floors also plan spiritual life programming.

Service projects of many kinds allow students to reach beyond themselves and the campus to show concern for needs of the world. Types of service include the Big Brother/Big Sister program, tutoring, Habitat for Humanity, working with the elderly, housing rehab and collecting supplies to be sent for world relief. During midterm breaks, groups of students travel to service locations. Celebrate Service Day, held annually in September, encourages service in the local community. The international Study-Service Term (SST) and many classes also include service-learning activities.

**Convocations and chapels**

Convocations and chapel services gather the campus community to focus on themes that connect with our personal lives and also to the world at and beyond Goshen College. Chapel services foster Christian worship and faith exploration. They may include guest speakers, faculty faith stories, hymn sings, or student presentations. Convocations are learning experiences that promote the mission and core values of Goshen College. They may include faculty speakers, guest lecturers, drama or music performances, or student presentations by clubs or Study-Service Term units.

Attendance requirements for convocation and chapel are publicized at the beginning of each semester.

**Goshen College commitment to community standards**

**A spirit of hospitality**

Goshen College is dedicated to fostering a spirit of hospitality on our
The Mennonite Church promotes a community founded on love and Jesus and the tradition of Anabaptist Christians to be accountable to God. Our search for truth and our understanding of complex modern relationships. Students and faculty at Goshen College are expected to support an environment of mutual respect and accountability, to care for the personal dignity of others and to have integrity in their conduct and communication.

The spirit of respect and hospitality at Goshen College reflects our character as a Mennonite-Anabaptist liberal arts community of scholarship, teaching, learning and service. We believe that the expression of hospitality is best understood in the life and character of Jesus Christ, who welcomed the Gentile and the Jew, women and men, the poor and the wealthy, the slave and the free, the sick and the healthy. The Mennonite Church promotes a community founded on love and justice in which all persons possess inherent dignity as children of God. Our search for truth and our understanding of complex modern challenges is informed and transformed by the life and teachings of Jesus and the tradition of Anabaptist Christians to be accountable to each other in the context of the church.

Invitation to Christian community
Goshen College is committed to encouraging students in intellectual, social, moral and spiritual growth. Students are invited to engage in a dynamic and life-giving community here and to mature as individuals through respectful relationships in the classroom, the local community, in the broader Christian church and among other cultures. All are expected to demonstrate sensitivity and concern for others’ convictions, perspectives and struggles. Within the context of a Christ-centered community, we seek to become:

- passionate learners;
- global citizens;
- servant leaders; and
- compassionate peacemakers

Expectations
Members of the Goshen College community are expected to demonstrate individual responsibility in showing consideration for the beliefs and feelings of others; abiding by federal, state and local laws; and demonstrating exemplary conduct. When a student’s behavior has direct implications for others and/or the well-being of the campus community, there is cause for community involvement, regardless of where the situation occurs (e.g. home or abroad.)

- Academic honesty
  As an academic community that expects integrity, we seek for truth and knowledge by requiring intellectual and personal honesty in learning, teaching, research and service. As an academic community of integrity, we uphold personal accountability and take action against wrongdoing. Examples of academic dishonesty include, but are not all inclusive of, the following: plagiarism, cheating on assignments or exams, falsification of data, sabotaging the work of another and aiding in academic dishonesty of another.

- Alcohol and illegal drug use
  Goshen College considers the use of alcoholic beverages and illegal drugs detrimental to individual and community health. The use of alcohol is illegal for minors, and alcohol and illegal drugs also may create dependencies, invite an unhealthy escapism, waste money and abuse health and take lives, as well as generate behavior offensive to other people. Goshen College does not consider it possible to have a wholesome campus community if alcoholic beverages and illegal drugs are used. Abstinence may be an effective witness against these practices, which are so widely and indiscriminately condoned in our culture. For these reasons, Goshen College recommends non-use as the most appropriate lifestyle choice. Alcoholic beverages and illegal drugs are prohibited from the campus and all college-related functions. Students will be held responsible for any alcohol, drugs or drug paraphernalia found in their presence.

- Firearms-fireworks
  The possession or use of firearms or fireworks is prohibited on campus.

- Fire and safety equipment
  Tampering with any fire and safety equipment on campus is unacceptable.

- Fraud and theft
  Students are expected to respect the identity and property of others. Examples of fraud or theft include, but are not all inclusive of, the following: dishonesty on timecards, theft of and other misuse of personal or college property.

- Racism
  Goshen College creates a social and academic environment where students develop awareness of issues of race, sensitivity to minority populations and intercultural understanding. The campus reflects God’s world: multicultural, multiracial and multiethnic. We believe that racist attitudes and actions do not exemplify the love of Christ, and violate the inclusive intention of the mission of Goshen College.

  Racism is a set of attitudes or beliefs that hold particular racial or ethnic groups superior to others, often resulting in justification of discriminatory treatment or other racist acts. Racism denies the humanity of others and denies the truth that all human beings are made in the image and likeness of God. As an institution of the Mennonite Church, Goshen College believes that racism is contrary to Christian theology and is inconsistent with the life and teachings of Christ. Therefore, we will resist the pervasive racism of our society by identifying and confronting its evidence.

- Sexuality
  We believe that sexuality is an integral part of our personalities, reflecting who we are as individuals. To care for another person includes honoring and respecting that person as a sexual being. Sexuality cannot be separated from the other dimensions of our lives.

  Sexual discrimination, coercion, exploitation and abuse are detrimental to both relationships and to individual self-esteem; these are also destructive behaviors that violate the caring nature of our community. Goshen College is firmly opposed to sexual discrimination, sexual harassment, sexual exploitation and sexual abuse. We believe the clear intent of New Testament Scripture is to place sexual intercourse within the covenant of marriage.

  The goal of confrontation in these matters, as in all others, will be for well-being, reconciliation, correction, forgiveness and redemption. Our counseling and health-service personnel are available to students wishing to discuss issues regarding sexuality or sexual behavior. These conversations will be held in strict confidence.
• Tobacco use
  The use of tobacco imposes a serious and unnecessary burden upon the health of the user and community. It also constitutes a fire hazard in some cases. Use of tobacco in any form is prohibited on campus or at any off-campus official college activity and strongly discouraged elsewhere.

• Threats of violence
  The threat of violence against another individual, whether verbal or physical, is unacceptable.

• Vandalism
  Any vandalism on campus will be considered offensive behavior. Responsibility for restitution will be expected.

Serious intent
While it is difficult to determine a framework of community standards that completely matches the ideals of each individual, clear expression of commonly held expectations is vital to productive, positive life and work together in a diverse campus setting. Every Goshen College student is expected to show serious intent to live according to these standards. Information regarding the disciplinary process is located at www.goshen.edu/aboutgc/community.php and is published in the student handbook distributed each fall.

Housing
As a residential campus fostering learning and leadership outside the classroom, policies are in place to encourage single students not living with a family member to join the Goshen College community through on-campus residential programs. Goshen offers a variety of housing options for students who are single, married or have families.

  Three residence halls – Yoder, Kratz and Miller Halls are available to single students of any classification. Each hall is coed, with men and women on different floors. Students typically live in groups of 20-30 per living unit. Leadership is provided by student resident assistants and a resident director.

  One senior/junior hall – In Kulp Hall, first priority is given to single students who are seniors or at least 22 years of age. Second priority is given to juniors or those who are 21 years old.

  Small group housing – available to single students who are juniors, seniors or 20 years of age. Facilities are in small residence hall units or houses for six to 12 students per group. Students form their own group and apply for housing facilities.

  Apartments – New apartments designed for groups of four to six students are available for juniors and seniors. Self selected groups sign up for apartments through student life. See residence life and housing link at www.goshen.edu/oncampus.

  College-owned houses – available primarily for married students and families; located a short walking distance from campus; size of houses range from one to four bedrooms. Contact the physical plant office for additional information.

Academic Support Center
The Academic Support Center promotes independent, life-long learning for all students of Goshen College. The ASC assists students with documented disabilities by helping them advocate for themselves and by helping coordinate reasonable academic accommodations with teaching faculty. The ASC trains peer writing mentors and tutors who are available to help all GC students grow as writers and scholars. ASC staff also administers the placement and competency tests.

First-year student program
The colloquium program helps new first-year students adjust to college life academically, socially and spiritually. In this program, ongoing orientation and advising activities are attached to a regular college class. Fall orientation includes several meetings with the colloquium professor and classmates, sessions for parents, placement testing, a worship service and other activities. During the first half of the fall semester, colloquium sessions continue to address college adjustment topics, including how to choose a major. Students do not officially declare a major until near the end of the first semester, or later, whereupon they are assigned an adviser from their major department. Colloquium professors serve as faculty advisers for students in their class during the first semester. In addition, upper-class peer mentors are assigned through Student Life to provide contact and support to first-year students through the fall semester.

Health services
Located in the Roman Gingerich Recreation-Fitness Center, the Wellness and Health Center is a primary health care facility providing both preventive and treatment services to all qualified students. The Wellness and Health Center provides a variety of health education programs and participates in the Campus Wellness Committee. All students are required to carry approved hospital and medical insurance.

Counseling
The Goshen College counseling office, located in the Wellness and Health Center, provides professional, short-term, on-campus counseling services to students on a free and confidential basis. Services support students’ personal, social and spiritual health, while increasing student’s ability to succeed academically. The counseling office provides individual, couple and group mental health counseling, wellness education, crisis intervention and referral to community providers.

Career guidance and employment
The mission of the career services office is to help students discover their vocation. In collaboration with academic faculty and administrators, the office works to enhance the professional opportunities available to students after graduation, whether that is work, service, or graduate school. A variety of services helps students with all facets of their career planning and post-graduation experience, including career advising, résumé preparation, practice interviews, job search skills, career readiness workshops, job and internship listings, alumni mentors and more. Students who desire on-campus employment should contact this office. An extensive online job bank for both on-campus and off-campus jobs is available from the career services Web page. The office is located in the Administration Building on the first floor (Ad 14), within the student life offices.

Multicultural affairs
The mission of the multicultural affairs office is to foster intercultural understanding at Goshen College. Through diversity training, curriculum development, recruiting and retention programs, the office promotes an anti-racist campus community. Special events such as the Martin Luther King Jr. Study Day and the celebration of heritage months are designed to increase awareness of the historical and cultural background of underrepresented ethnic populations. Faculty advisers provide academic, social and personal support for multicultural students on campus. Black Student Union, Latino Student Union and International Students Club encourage underrepresented students to negotiate the college experience, become involved in campus activities and develop leadership skills.
Use of motor vehicles
Students must register all motor vehicles to be used on campus at the beginning of each semester. Vehicles must be registered online at www.goshen.edu/checkin/vehicle_registration. Vehicles must be covered by liability and property damage insurance. Tickets are issued for parking, driving or registration violations.

Commuter student program
A commuter student lounge with study rooms, lockers and a kitchenette is available at the south end of the Union building. The Nontraditional/Commuter Student Association holds regular meetings to discuss special interests and concerns of commuting students.

Parents program
The director of the parents program works with the Parent Council, comprised of approximately 35 households, to plan programs and services for parents of students, including Family Weekend (usually the second Saturday in November) and an online newsletter. The program provides avenues for parents to learn about their student’s education and to communicate with administrators and faculty. A Web site especially for parents can be found at www.goshen.edu/parents/.

Activities
Athletics and recreation. Goshen College holds memberships in the National Association of Intercollegiate Athletics and the Mid-Central College Conference. Goshen men compete in baseball, basketball, cross country, golf, soccer, tennis and track and field. Women compete in basketball, cross country, soccer, softball, tennis, track and field and volleyball.

Opportunities for recreational activity are available to all students through the Roman Gingerich Recreation-Fitness Center, the intramural program or outdoor facilities. Over half the student body participates in the intramural program, which schedules one-night tournaments, as well as longer sports seasons of four to six weeks. The Gingerich Center is available for a wide range of walk-in activities. The recreation-fitness staff as well as student leaders organize these events.

Witmer Woods, an 18-acre site near the main campus, is an arboretum of plants native to Indiana and also a recreational area. The woods are named for S.W. Witmer who taught biology and botany at GC from 1915 to 1959. The College Cabin, adjacent to Witmer Woods, is available to students for meetings and recreational activities. A Meditation Garden is located near the College Cabin along the Elkhart River. It is a place for quiet reflection and contemplation.

Music. Students interested in music are invited to audition for music department ensembles, including Chamber Choir, Chorale, Orchestra, Wind Ensemble and Lavender Jazz. All members of Chorale and Chamber Choir are also part of the Men’s Chorus and Women’s World Music Choir. The Voices-in-Harmony Gospel Choir is open to all without audition. The choirs perform several on-campus concerts each year and at least one choir tours annually. The orchestra and wind ensemble perform a classic and contemporary symphonic and chamber repertoire on off-campus concerts. A fully-staged student opera, operetta, or musical is produced on alternate years. In addition to these faculty-directed groups, a variety of student-formed groups seek vocal and instrumental talent for coffeehouses, talent shows and worship teams.

Performing Arts Series. This program brings well-known artists to the campus for public performances. Recent performers include Lincoln Jazz with Wynton Marsalis, Sweet Honey in the Rock, IIInd Tyme Out, Colm Wilkinson, the International Sejong Soloists and Baltimore Consort.

Public lectures
• The Frank and Betty Jo Yoder Public Affairs Lecture Series brings nationally known speakers to campus to address a variety of current issues. Speakers have included Ray Suarez, Paul Loeb, Peggy Wehmeyer, Dorothy F. Cotton and Kenneth Woodward.
• Martin Luther King Jr. All-Campus Study Day annually brings to campus outstanding civil-rights leaders who share King’s vision for peace and justice. Past speakers have included Yolanda King, Rev. C.T. Vivian and Vincent Harding.
• The Eric Yake Kenagy Visiting Artist Program annually brings a distinguished visual artist to campus for lectures, workshops and interaction with students. Past artists have included Jaune Quick-to-See Smith, Roger Shimomura and Ursula Von Rydingsvard.
• The S.A. Yoder Memorial Lecture annually brings a distinguished poet, novelist, essayist or humorist to campus. Past guests have included Madeleine L’Engle, Garrison Keillor, Seamus Heaney, Gwendolyn Brooks and Edwidge Danticot.
• The C. Henry Smith Peace Lecture is given annually on a peace-related theme by a faculty member of colleges related to Mennonite churches.
• The Umble Master Class series brings an outstanding educator or practitioner in theater or communication to campus each year for lectures and workshops.
• The Miller-Jeschke Endowment for Science and Religion brings an outstanding scholar to campus each spring for a conference on science and religion.

Student government. The student body is represented by the Student Senate. A four-member cabinet is elected each spring to lead the next year’s Senate of campus group representatives and residence hall representatives. Student Senate appoints members to campus committees where students are actually involved in making decisions side by side with faculty and administrators. The Senate also manages all club funds for various student clubs and organizations.

Student activities. The director of student activities oversees all planning of social and recreation events on campus and advises student organizations with the help of faculty sponsors. The Campus Activities Council (CAC) sponsors a variety of events that include large celebrations like the annual luau, the Kick-Off talent competition each semester, and a number of weekly events such as coffeehouses, Hour After (variety shows), movies and late-night activities.

Service opportunities. Many students regularly participate in tutoring, Habitat for Humanity and a variety of other service organizations. In addition, the campus ministries office coordinates service trips during midterm breaks. Many academic courses include service-learning activities; the Study-Service Term includes six weeks of international service-learning.

Theater. Any student may audition for the two fully staged theater productions each year or any of the numerous student-directed one-acts. Students may also volunteer as costume, light and set construction assistants. Advanced students may design or direct shows, including selected one-acts.

Broadcasting. WGCS, or 91.1 The Globe, is the college radio station. Students serve as station manager and staff members. The station features American roots music, public affairs and religious programs, news and sports. On the air 24 hours a day, The Globe offers students many opportunities for broadcast experience. Students working with GC-TV produce a weekly video magazine called GC Journal, distributed via the campus cable system. Both The Globe and GC-TV use state-of-the-art digital equipment.
Publications. Students edit two major publications on campus. The Record, a weekly newspaper, includes news, features, perspectives and photographic coverage of campus events and issues and provides a forum for student, faculty and staff opinion. The Maple Leaf annual yearbook gives an overview of campus life. Both staffs, advised by communication faculty members, use the college’s communication center, a facility equipped with state-of-the-art computers, scanner and laser printer.

Pinchpenny Press. Sponsored by the English department, Pinchpenny Press publishes small volumes of creative writing by students and faculty members. Broadside publishes occasional short pieces of creative writing in signed, limited editions. Editorial committees of students and members of the English department faculty approve manuscripts for each publication series.

Clubs and organizations. A variety of student clubs and organizations are active on the campus. In most cases membership is open to any interested student. New clubs or organizations may be formed with the approval of Student Senate and the student activities office. Students who wish to start a new club or organization should discuss their purposes and goals with the coordinator of student activities. Following is a partial listing of groups that meet currently:

- Advocates
- AMISH (Association of Midwesterners for Ice and Street Hockey)
- Black Student Union
- Business Club
- Campus Activities Council
- Campus Ministries Team
- Catholic Student Association
- College Republicans
- Commuter/Nontraditional Student Club
- Eco-Pax
- Fellowship of Christian Athletes
- Fellowship of Rock Climbers
- GC Nursing Students Association
- GC Players
- Goshen Student Women’s Association (GSWA)
- International Student Club
- Latino Student Union
- Pax
- Pre-Medical Club
- Social Work Action Association
- Student Senate
- Student Womyn’s Advocacy Network (SWAN)
- Third Culture Students
- Voices-n-Harmony Gospel Choir
- Young Americans for Freedom

More information about these groups may be obtained through the Student Senate office located in Student Life.

Admission

First year
Admission counselors work individually with each applicant to ensure sound educational planning. High school courses, grades, test scores, high-school rank, references and personal essay, are all indicators of an individual’s ability to work successfully in college programs; they are important factors in the admission decision.

High school preparation
Graduation from an accredited high school is required. High school college-prep programs are the best way to prepare for Goshen College. This preparation usually includes the following areas of study and units: English – 4, science – 2–3; foreign language – 2–4; social science and history – 2–3; mathematics – 2–4. Applicants planning to enter the pre-nursing program need to have one unit of high-school chemistry with a grade of “C” or higher, or its college equivalent.

Students admitted with a Critical Reading score lower than 430 are required to enroll in Engl 105 Introduction to College Writing. Applicants who have been home-schooled are welcome to apply. Home-school curricula are evaluated on a case-by-case basis. Applicants who have not completed high school are considered for admission if they have achieved an average score of 500 or above on the General Educational Development (GED) tests.

Home-schooled students
Goshen College welcomes home-schooled students and recognizes the valuable contribution they bring to the diversity of the student body. Home-schooled students need to show that they have successfully completed a secondary school education in a home school setting and met state law requirements for secondary education. Applicants must submit high school equivalent transcripts with grades or evaluations. If these are not available, curricula for grades 9 through 12 may be provided. SAT I or ACT scores and a personal essay are requested of all students in the application form. If no letters of recommendation are available from teachers other than family members, a letter of recommendation from a pastor, employer or close family friend would be acceptable.

SAT I or ACT test scores
All United States and Canadian applicants who want to play intercollegiate sports are asked to take the Scholastic Aptitude Test (SAT I) or the American College Test (ACT). SAT I and ACT tests are given at testing centers several times each year around the world and should be taken in the junior year and/or as early as possible in the senior year. SAT I and ACT scores are not required of students age 24 or older.

Other requirements
The admission office will occasionally ask applicants for additional information or a personal interview before an admission decision is made. Applicants who are denied admission may appeal the decision to the Enrollment Committee.

Learning differences
Students with learning differences who are otherwise qualified for admission to Goshen College must, after being admitted, provide documentation of their specific learning differences in order to receive reasonable accommodation.
Application procedures and fee
Full-time first-year applicants need to provide a completed application, $25 application fee, high school transcript, SAT I or ACT scores, two personal references and a personal essay for admission. All students, full time and part time, must provide this information.

Applications will be reviewed on a continuous basis as they are completed. Students will be notified of the admission status and merit scholarship eligibility within two weeks of completing the application process. Admitted students must submit the $200 enrollment deposit in order to establish their priority for campus housing placement and to be eligible to register for classes. The $200 enrollment deposit is fully refundable by written request until May 1 for fall semester entry and Dec. 1 for spring semester entry.

Early enrollment program
The early enrollment program at Goshen College is for area high school juniors and seniors who excel in one or more subject areas and are ready for more advanced study at the college level. The student enrolls part time at GC while maintaining enrollment in high school. The total number of college courses a student takes must be equal to or fewer than the number of high school courses taken during the same period. A separate application is required, and students enroll on a semester-by-semester basis. No financial aid or other tuition discounts are available.

Guest student status
The guest student program is for individuals who wish to take a college course but do not initially intend to seek a degree from Goshen College. Students enrolled in this program may take no more than five hours per semester and will receive no financial aid. A separate application is required, and students enroll on a semester-by-semester basis. A maximum of 15 cumulative hours can be earned in the guest student program. If a student reaches 15 hours and wants to continue taking classes, he or she must complete a regular application for admission. Degree-seeking students will have priority for limited enrollment courses.

Transient students
The transient student program is for students not seeking a degree from Goshen College and are currently enrolled at another college. A separate application is required, as is a college reference. Transient students can enroll full time or part time at GC.

Transfer students
Requirements for admission. Transfer student applicants need to provide a completed application for admission, $25 application fee, high school transcript (if you have earned fewer than 24 semester college credits), college transcript(s), personal essay and a transfer reference form, which is completed by the dean of students at the college most recently attended. The application fee is not refundable.

Applicants are expected to be in good standing at the college or university they last attended and to have maintained a 2.50 GPA (out of 4.00) or higher.

Transfer of credits. Students who transfer from nationally or regionally accredited colleges or universities can receive credit on work in which they received a "C" grade or better. Up to 12 hours of credit will be accepted from technical schools. Transfer credit is recorded with the same titles and credit hours as at the previous school. Departmental advisers evaluate courses that are to be considered for meeting requirements for majors, minors and professional programs. All transfer students are expected to meet Goshen College graduation requirements. Course requirements for general education are determined by the registrar.

Hesston College transfers. Goshen College assures the acceptance of the Hesston College associate of arts degree and the associate of science degree and assures the student of junior standing.

Goshen College accepts the associate of arts and associate of science degrees as meeting the Goshen College lower level general education requirements for students who received a Hesston College associate degree after 2003. These degrees may meet some upper level requirements and international education requirements. All other competencies, prerequisites and upper level general education requirements must be met on the same basis as any other Goshen College student.

Transfer application deadlines
Students will be notified of the admission status and merit scholarship eligibility within two weeks of completing the application process. Admitted students must submit the $200 enrollment deposit in order to establish their priority for campus housing placement and to be eligible to register for classes. The $200 enrollment deposit is fully refundable by written request until May 1 for fall semester entry and Dec. 1 for spring semester entry.

International students
Applicants who are not citizens or permanent residents of the United States should complete a special set of application forms. These are available from the admission office and are also available online at www.goshen.edu. There is an application fee of $25.

International students must meet minimum requirements for admission to a university in their home country. A TOEFL score of 550/213/79 (paper version/computer version/Internet version) or an overall Band Score of 6.0 on the IELTS or a grade of "C" or better on the General Certificate of Education (GCE) English exam is required for admission. It is also highly recommended that international students submit SAT I scores with their application for admission. The SAT exam is given in locations around the world several times a year. Students can get details of when the exam is given and how to apply by contacting the nearest American Embassy or Consulate. Students should also start planning a year in advance of the time they want to attend college to take the required tests like the TOEFL and SAT I exams and to prepare the other required documents for admission and scholarship consideration.

Re-admitted students
Students who are not enrolled for one or two consecutive semesters at Goshen College, and who did not enroll at another college or university during their absence, may follow a simplified re-admission process, beginning with the registrar's office.

Students who wish to transfer credits earned during their absence to their Goshen College record, and students not enrolled for more than two consecutive semesters, must begin the re-admission process in the admission office.

Students contemplating a leave from their studies at Goshen College are encouraged to complete a Leave of Absence form, available in the registrar's office and online, to expedite the re-admission process. The Leave of Absence policy is explained in the Requirements and Procedures section of this catalog.
Academic life

Academic year: Two semesters plus a May term
In addition to fall and spring semesters, Goshen has a three and one-half week May term that is considered part of the regular school year. Students who are enrolled full time in fall and spring semesters and living in campus housing pay no additional tuition or room and board costs for May term courses on campus. Commencement is held annually between spring semester and May term. Students may enroll for three or four credit hours in a wide range of May term courses offered both on and off campus. In addition, two summer sessions during June and July offer a limited number of courses.

The summer Study-Service Term starts at the beginning of the May term and ends in July. A calendar for the 2007-08 school year is located on the last page of this catalog and is also available online.

Degrees
The Bachelor of Arts is the primary degree awarded by Goshen College. The program that leads to this degree includes general education requirements, a major and electives that can also be used for a second major, one or more minors or to complete professional programs in elementary or secondary education and social work.

The Bachelor of Science in Nursing is a professional degree. Upon completion of the nursing curriculum, graduates take the State Board Examination to become registered nurses. Graduates of associate degree programs are welcome to enter and pursue a modified program.

The Bachelor of Science degree in Organizational Leadership is designed for students with two or more years of college. Classes are offered in the evening by the Goshen College Division of Adult and External Studies program and accommodate adult needs in content and learning style.

The first graduate program at Goshen College begins in 2007, a Master of Arts in Environmental Education. This program is based at the Merry Lea Environmental Education Center near Wolf Lake, Ind., owned by Goshen College. Several more graduate programs are in process.

Majors and minors
The major is a specified concentration of courses in a department, in addition to designated electives in related departments, which develop expertise in the concepts and skills of a discipline. Many majors offer specialized concentrations, which allow students to tailor a program to their personal interests. Each major includes a departmental or interdisciplinary seminar at the senior level and most include an internship. Majors range in size from 30 credit hours to 60 or more in professional programs.

A total of 32 majors are offered in:
- Accounting
- American Sign Language Interpreting
- Art
- Bible and religion
- Biology
- Business
- Business information systems
- Chemistry
- Communication
- Computer science
- Computer science and applied mathematics
- Elementary education
- Elementary education/Special education
- English
- Environmental science
- History
- History and investigative skills
- Mathematics
- Molecular biology/Biochemistry
- Music
- Nursing
- Organizational Leadership
- Peace, justice and conflict studies
- Physical education
- Physics
- Psychology
- Social work
- Sociology
- Spanish
- TESOL (Teaching English to Speakers of Other Languages)
- Theater

An Interdisciplinary major is also offered, usually combining work in three departments.

Additional teacher education programs are available, leading to certification in:
- American Sign Language education (5-12)
- Bilingual/bicultural education (5-12)
- Business education (5-12)
- English/language arts education (5-12)
- English as a new language (ENL) education (K-12)
- Journalism education (5-12)
- Mathematics education (5-12)
- Music education (general, vocal or instrumental) (K-12)
- Physical education (5-12 or K-12)
- Chemistry education (5-12)
- Life sciences education (5-12)
- Life sciences and physical sciences education (5-12)
- Physical sciences education (5-12)
- Physics education (5-12)
- Social studies education (5-12)
- Spanish education (5-12)
- Theater arts education (5-12)
- Visual arts education (K-12)

Minors supplement the major, often emphasizing a special interest, an interdisciplinary approach or vocational skill. They require 18-20 credit hours of study.

A total of 34 minors are offered in:
- Accounting
- American Sign Language
- Anabaptist-Mennonite studies
- Art
- Bible and religion
- Business
- Business information systems
- Communication
- Computer science
- Conflict studies
- English
- Entrepreneurship
- Environmental science
• Global economics
• Graphic design
• Health
• History
• International studies
• Mathematics
• Multimedia communication
• Music
• Music in worship
• Peace and justice studies
• Physical education
• Piano pedagogy
• Psychology
• Social policy
• Sociology/Anthropology
• Spanish
• (TESOL) Teaching English to speakers of other languages
• Theater
• Women's studies
• Writing
• Youth ministry

Details on required courses and sequences for each major and minor appear under departmental headings in the academic programs section of the catalog. Handbooks on professional programs such as nursing or education are available in the appropriate departmental offices.

Declaring a major or minor
Students who wish to declare a major or minor should meet first with the faculty member who is their academic adviser, then notify the registrar's office of their intent.

Certificate programs
Certificate programs are designed for persons with special interests who want to spend one year at Goshen College. These programs are open to high school graduates and other mature adults. Certificate programs are offered in biblical studies, business administration, music in worship, piano pedagogy and teaching English to speakers of other languages (TESOL). Details of each program are available from the related department or from the registrar's office.

Undergraduate professional programs
Professional programs in education (elementary and secondary), nursing and social work are offered as majors or supplements to majors at Goshen College. Details about these programs are in their departmental pages in the academic programs section of the catalog.

Pre-professional programs
Certain programs are offered at Goshen College to prepare students for professional study at the graduate level or by transferring to an undergraduate professional program at another school after 1-3 years at Goshen. Pre-professional programs at Goshen College include:

• Pre-Architecture
• Pre-Medicine
• Pre-Dentistry
• Pre-Pharmacy
• Pre-Engineering
• Pre-Physical Therapy
• Pre-Law
• Pre-Seminary
• Pre-Veterinary

Pre-seminary. Goshen College has a close relationship with Associated Mennonite Biblical Seminary, Elkhart, Ind. Students anticipating seminary study are counseled to complete a B.A. degree with a major in Bible and religion, humanities or social sciences. They are also encouraged to join the pre-ministry club, attend the annual spring vocation banquet and participate in a summer Ministry Inquiry Program internship in a congregation.

Pre-medicine, pre-veterinary, pre-physical therapy or pre-dentistry. Since course sequencing is important, any student interested in these programs should consult the pre-medical adviser or advisers in the biology and chemistry departments about course selection. Early in the spring semester of the junior year, the pre-medical adviser, biology professor James Miller, will meet with students interested in applying to professional schools and explain the application and recommendation process. Applications should be sent before the fall of the senior year.

Pre-law. Law schools want students who can think, read and write well and who have some understanding of what shapes human experience. No specific major is required. History and English are good choices, but, depending on student interests, business, communication, Bible and religion or other fields could serve just as well. The most important thing is to select rigorous courses in wide-ranging fields. Alan Weldy, associate professor of business and a practicing attorney, serves as the pre-law adviser. Materials for the Law School Admissions Test (LSAT) and information about law schools and pre-law internships are available in his office.

Professional degree programs completed at other colleges
Each of the programs below involves two or three years of study at Goshen College and the remaining work at a professional school. For several of the professional programs, a B.A. degree can be granted by Goshen College.

Architect. This is a two degree, or 3-2 program resulting in a B.A. in physics or art from Goshen College and a B.S. in architectural engineering from Washington University in St. Louis, Mo.

Engineering. This is a two degree, or 3-2, program resulting in a B.A. in physics, chemistry or mathematics from Goshen College and a B.S. in engineering from a major university with an accredited engineering program. The student spends the first three years at Goshen and the final two years at the university. For details and requirements, see the program description of the physics and pre-engineering department.

Pharmacy. This program is normally a 2-3 program, with the last three years spent in an accredited college of pharmacy. Pre-pharmacy students take general-education courses and courses in chemistry, biology, physics, mathematics, sociology and psychology. The student should consult the college of pharmacy early in the freshman year to select appropriate courses at Goshen College. This program does not result in a Goshen College degree.

Key to course numbers

Lower level
100 - 199 courses — Primarily for first-year students
200 - 299 courses — Primarily for sophomores

Upper level
300 - 399 courses — Either juniors or senior
400 - 499 courses — Primarily for seniors and graduates

A student may register for courses one year above current classification (for example, a sophomore may register for a 300 course) provided prerequisites have been met.
In general, courses extend through one semester. A hyphen between the numbers of a two-semester course indicates that the first semester is prerequisite to the second semester, as does a “+” sign between the credit hours.

The number of hours stated after the description of each course refers to the number of credit hours granted for successful completion of one semester of the course.

Not all courses listed are offered each year. A list of course offerings for the two semesters of the next academic year is prepared in April of each year and is available from the registrar’s office. The college reserves the right to cancel any course if fewer than 10 students enroll or if suitable faculty are not available.

Special course — all departments

209  Field Experience ................................................1-4
Offers first- and second-year students opportunity to gain experiential learning in settings where departmental perspectives and skills are put to work. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. Forty hours of field experience will be expected for each hour of credit earned. The course is open for use in all departments of the college.

299/399  Special Studies: (title to be given) ..............1-6
An all-purpose course for recording credit in topics not contained in regular offerings, often used for independent study or credit by experience. Registration arrangements need to be approved by both the department and the registrar’s office. The course is open for use in all departments of the college.
General education curriculum

Director, Associate Academic Dean

The Goshen College general education program provides a core of common courses and activities for students in every major. Central to Goshen College general education is the Study-Service Term (SST), with its strong emphasis on international, intercultural education. As a Christian liberal arts college, Goshen also gives Bible and religion studies a prominent place in its liberal arts core.

What is a liberal arts education?
The heart of the liberal arts tradition is the assertion that only an educated person – one who is aware of self and of the other; one capable of independent discernment, analysis and judgment; one gripped by the quest for truth – can be truly free. The Bible also reflects this notion in Jesus’s words, “You will know the truth, and the truth will make you free.” The basic question that drives all liberal arts inquiry is “What is truth?” Since different disciplines offer different approaches to the exploration of truth, the general education core at Goshen College gives students courses and experiences in a wide range of disciplines: communication skills, mathematics and natural science, history and social science, physical education, humanities, Bible and religion, and international education.

As the Goshen College learning community pursues truth together, our aim is to develop “informed, articulate, sensitive, responsible Christians.”

Summary of general education course requirements

| Orientation | 1 |
| Communication skills | 5-6 |
| | Comm 202, Oral Communication (2-3 hours) |
| | College reading and writing (3 hours) |
| | Engl 110, Literature and Writing or Engl 210, Introduction to Literature |
| International/intercultural education | 12-13 |
| | Study-Service Term (SST) |
| | (international or alternate options) |
| | Language proficiency through 102-level required (or alternate) |
| | (See international education pages for details.) |
| | *Nursing students, see nursing department pages. |
| Bible/religion/philosophy/peace studies | 9 |
| | Bible survey course (3 hours) |
| | Bibl 100, Knowing the Bible or Bibl 200, Reading the Bible |
| | Bible or religion course (3 hours) Any additional Bible or religion course (except Greek and Hebrew languages) |
| | Peace/justice/conflict studies or philosophy* course (3 hours) Select one: |
| | Phil 200, Introduction to Philosophy |
| | Phil 302, Ethics and Morality |
| | Phil 307, Asian Thought |
| | PJCS 210, Transforming Conflict and Violence |
| | PJCS 312, War, Peace and Nonresistance |
| | PJCS 313, Violence and Nonviolence |
| | *Nursing students, see nursing department pages. |

Mathematics** and natural science ......................... 6-8
Select a course from any two areas**
Mathematics (3-4 hours)
Math 110, Mathematical World
Math 131, Mathematical Concepts for the Elementary Classroom
Math 141, Finite Mathematics
Math 170, Precalculus
Math 205, Discrete Mathematics
Math 211, Calculus I
Biological science (3-4 hours)
Biol 100, Biological World
Biol 111 or 112, Biological Principles
Biol 154, Human Biology
Biol 203, Human Anatomy and Physiology
Physical science (3-4 hours)
Chem 100, Physical World
Chem 101 or 102, Chemistry and Physics of Life
Chem 111, General Chemistry
Phys 100, Physical World
Phys 154, Descriptive Astronomy
Phys 203 or 204, General Physics

**Competency through Math 105 required

History and social science ................................. 6
History (3 hours) Select one:
Hist 100, Human Stories
Hist 101 or 203, World History I or II
Hist 102, European History
Hist 105 or 202, American History I or II
Social science (3 hours) Select one:
Econ 201 or 202, Principles of Economics
PoSc 200, Introduction to Political Science
Psyc 100, General Psychology
Soc 200, Principles of Sociology
Soc 220, Human Origins, Human Nature

Physical education .................................. 1
PhEd 100, Wellness (1 hour)

Humanities (select one) ................................. 4
Hum 220, Humanities: Literature and Art
Hum 221, Humanities: Literature and Music
Hum 222, Humanities: Theater and Literature
Hum 223, Humanities: Music and Art
Hum 224, Humanities: Music and Theater
Hum 225, Humanities: Art and Theater

TOTAL Credit hours .................................. 44-48

Special features in the senior year
Students in nearly every major participate in an internship during the senior year in which they apply academic learning to practical problem-solving or a position of employment. In addition, seniors enroll in a senior seminar appropriate to their major. Senior seminars integrate and synthesize learning from students’ entire college experience and guide them in exploring future vocations. Senior seminars also address ethical issues in the major field from a Christian perspective and sometimes include a major research project.

Goshen College Catalog 15
**Descriptions of courses and areas of study in the general education curriculum**

**Colloquium**
All first-time first-year students enroll in a colloquium course in the fall semester at Goshen College. Colloquium, a one-credit-hour course attached to another 1-4 credit course, is a set of activities that introduces students to academic life. Most of the courses with colloquium attachments meet a general education core requirement. Class size is limited to 20-22 students, giving them close contact with a small group of other students and the professor.

Colloquium students learn about the resources and values of Goshen College, process the changes that happen at college and find encouragement to grow socially, spiritually, psychologically and academically. The colloquium class introduces competency requirements in information literacy and begins to document students' academic learning. The colloquium professor serves as academic adviser to students in the colloquium class for the first semester at Goshen College. Required of all transfer students with fewer than 15 credits of college courses.

**Communication skills**
Courses in this area build a solid foundation in reading, writing, speaking and thinking skills to be used throughout students' academic careers. Close, careful reading and effective speaking and writing are essential skills for academic success. The English classes include readings in classical and contemporary literature and writing instruction. Most students will select Engl 110. Engl 210 is for students with SAT verbal scores of at least 630 or ACT English scores of at least 28 or for students who have earned AP or CLEP credit, but desire a stronger foundation in college-level reading and writing. The oral communication class involves practical speaking experiences from public speaking to interpersonal communication. Attention is given to communicating in a culturally diverse society. These courses also develop critical thinking skills.

**International/Intercultural education**
The core requirement in international/intercultural education provides students with an opportunity to learn about the values and assumptions of their own and other cultures. Most students choose to meet this requirement by participating in the unique Study-Service Term, or SST program.

SST is a full semester of international service learning in a country significantly different from the United States. Groups average about 20 students and are led by a Goshen College professor. Students live with host families and study the language and culture of the host country in a large city during the first half of the semester. Much experiential learning occurs as students scatter to outlying locations during the second half of the term. Current SST countries include Cambodia, China, Ethiopia, Nicaragua, Germany, Jamaica, Senegal and Peru.

This core education requirement may also be met through alternate intercultural study that combines academic coursework and experiential learning. A full year of BCA meets the SST requirement.

*(See an expanded description of both SST and other alternatives in the international education section of the catalog.)*

**Study-Service Term abroad (13 credits)**
Requires the following language proficiency as a prerequisite:

- French, German or Spanish SST units – 102-level in the language of the country;
- Other units – one elementary language course in the language of the country and either one course from the list of prerequisite courses in the international education pages or other foreign language competency at the 101-level or higher.

**Alternate SST (12 credits)**
Requires one of the following ways to demonstrate language proficiency:

- 102-level language proficiency or
- Comm 206, Communicating Across Cultures and 101-level language proficiency or
- two 101-level language courses in addition, students select 12 credits of courses from the approved list in the international education section of the catalog.

**Bible/religion/philosophy/peace studies**
Because Goshen College considers biblical literacy to be a foundational requirement for a well-rounded education, all students take a Bible survey course, either Bibl 100 (for students with little or no past experience with the Bible) or Bibl 200 (for students who are already familiar with biblical stories and concepts). For course descriptions, see the Bible, religion and philosophy department pages of this catalog. Placement tests are available at the beginning of each semester to help uncertain students determine which level is most appropriate for them.

In addition to a Bible survey course, all students select one more Bible or religion class of their choice. Also, all students select at least one of the philosophy or peace/justice/conflict studies classes in the list of general education courses. Each of these courses broadens the knowledge base and cultivates critical thinking skills in students as they face both current and perennial issues.

**Mathematics and natural science**
The core requirement in natural science is designed to help students understand the scientific approach to the pursuit of knowledge and the nature of the scientific community. Courses include laboratory experiences as well as classroom instruction.

Since the ability to think quantitatively and reason accurately from data is a fundamental skill for every educated person, all students must meet a mathematics competency requirement. Competency may be established in three ways: SAT math score of 550 or ACT math score of 23, college credit in mathematics at the Finite Mathematics level or higher, or a passing score on the Goshen College math competency exam. Students who do not meet the minimum competency requirement must pass Math 105, Understanding Our Quantitative World, before taking general education courses in mathematics or natural science.

All students choose at least one course from two of the three areas in the list of general education courses.

*Note: The preferred mathematics course for students who do not have a mathematics requirement in their major is Math 110. Also, Biol 112 and Phys 204 may be taken without Biol 111 or Phys 203 as prerequisites.*

**History and social science**
Historical study reveals the roots of modern civilization. History is a form of inquiry and a way of knowing both the world and one's place in it. The social science core requirement allows students to become familiar with at least one approach to understanding human behavior in the context of contemporary society.

Students select at least one of the history courses and at least one of the social science courses in the general education list.

**Physical education**
Everyone has both the challenge and the opportunity to improve and preserve health in body, mind and spirit. Toward this end, all students take PhEd 100, Wellness as part of the general education core.
This course explores wellness in many dimensions: physical, mental and spiritual. It is taught in the physical education department in collaboration with student life professionals.

**Humanities**

The humanities – art, music, literature, theater and other fine arts – have long been a central part of a liberal arts education because they offer both an expression of and an inquiry into human experience. These interdisciplinary courses give students an opportunity to study the history of artistic expression while participating in artistic activities and examining the relationship between the arts and their own lives. Students select one humanities course from the general education list. Two or three courses will be offered each year.

---

**International education program**

*Director of International Education and Off-Campus Programs T. Meyers*

Goshen College is involved in several types of international education activity. First, there are offerings to fulfill the general education requirement of a Study-Service Term (SST) or its equivalent (Sections I and II). Second are a variety of other overseas educational opportunities offered by Goshen College or other organizations with whom we cooperate (Sections III and IV). The third type of activity is the international student program directed by Student Life.

**I. The Study-Service Term (SST)**

**A. Program**

SST is a program designed to immerse students for one term in a culture significantly different from that of the United States. Its goals for each student are to develop intercultural openness, communication in a variety of forms, thinking that is active and reflective, and understanding of self and others. Spanish SST units are offered in the Caribbean and South America. Currently, units also operate in Germany, China, Asia, Ethiopia and Senegal.

Students choose a language area for SST in consultation with their academic adviser and spend one term in a location of that language, preferably during the sophomore year. Students are urged to plan and sign up for SST participation upon entering college because spaces are limited.

At each location, Goshen faculty leaders arrange the academic program and give personal counsel to a group of up to 23 students.

The first six weeks of the term are spent studying the language and culture of the host country. The faculty leader uses local resources to support a largely experience-based learning program: home stays, lectures, discussion, field trips, journal writing, readings, special projects and examinations. Library resources, although somewhat limited, are available at each unit.

During the last six weeks of the term, students work in a field/service-learning assignment, usually in a rural area. Throughout the term, students live in homes of the host country and eat at least two meals daily with their “families.”

Participation in SST is an educational privilege for those whose recent performance suggests that they are ready for the special challenge of SST. A screening process reviews the health and the academic and behavioral performance of all SST applicants throughout the preparation process until departure. On location, all SSTers are expected to follow both the standards of the college and the guidelines more specific to the norms of the host culture and host family.

Student fees in Central America and the Caribbean area, including travel costs, are the same as for a semester’s tuition, room and board on campus. Units in other locations involve extra cost.

**SST locations for 2007-2010 (tentative)**

**B. Credit**

The student normally receives 13 credit hours for the Study-Service Term, distributed as follows:

- Language ............................................. 4
- Intercultural communication ........................ 3
- History and Culture of (Country) .................. 3
- Arts and Literature of (Country) .................. 2
- The Natural World of (Country) .................... 1

Additional credit in foreign language may be awarded when testing shows unusual progress.

**C. Evaluation**

Students will receive a letter grade for each program component.

**D. Prerequisites for SST**

1. Students participating in French, German or Spanish units need to establish 102-level competency (by course or test) in the language of the country.
2. Students participating in any other foreign language unit will complete one elementary course in that language, offered on campus especially for that SST group prior to departure, and one course selected from any other language or from among any of the following:
Bus 350, International Business  
Comm 206, Communicating Across Cultures  
Econ 306, International Economics  
Econ 308, Introduction to Economic Development  
Engl 201, World Literature in English  
Engl 310, Introduction to Linguistics  
MCLL 300, International Classics  
Hist 240, World Geography  
Hist 255, History of Global Poverty  
Hist/WoSt 330, International Women’s History  
Hist 335, History of Ethnic Conflict  
Hist 350, African History  
PoSc 308, International Politics  
Phil 307, Asian Thought  
Rel 317, Islam & Judaism  
Soc 230, Cultural Anthropology  
Soc 330, Family and Kinship Across Cultures  
Soc 334, Race, Class and Ethnic Relations  
Soc 340, African Societies and Cultures  

Whenever possible students should elect a course from the specific region of their SST unit.

Students are responsible for completing these essential prerequisites prior to SST. The director of international education must approve any exceptions.

E. Minor in international studies  
Program director and adviser: Associate Dean T. Meyers, International Education Office  
SST is the core and the prerequisite for this minor. Its goal is to integrate international study experience with campus experience, to link SST with academic interests, and to enhance career planning. The international studies minor gives formal credentials to the very attractive international dimension of education at Goshen College.

Requirements*  
Language prerequisite for SST ............... 8 credits (or proficiency)  
The 13th hour of SST (only 12 credits required for general education) . 1 credit  
Any three approved “SST alternate” courses (see course list below) 9 credits Total ............... 10-18 credits

*Notes: This minor is available only to students who have had SST or an equivalent semester of study abroad.

For students with SST in Ethiopia, China, or Cambodia, the alternate SST prerequisites may be used.

The course work is recommended for after SST, but courses taken before SST do apply.

The three “SST alternate” courses may not overlap with requirements in any major or any other minor.

B. Other international and cross-cultural options
This program is designed for those whose needs call for an experience different from the full three-month SST unit abroad. While immersion in another culture through SST comes nearest to our ideal for an integrative experience in international education for most students, we intend other options to promote the same learning outcomes as SST. Through courses on the Goshen campus, experiences and resources in the surrounding community, and where possible participation in shorter seminars abroad, this program includes a serious study in culture, encourages an interdisciplinary service learning component and invites an integrative activity to bring the various components into a meaningful whole.

B.S. Nursing students who desire an alternative to the SST program should see the nursing department information in this catalog for a modification of the requirements below.

Required prerequisite: Two units of foreign language and culture which may be completed in any one of the following ways:

- a) 102-level course or competency in any foreign language,  
- b) 101-level language plus Comm 206 or  
- c) two 101-level courses in any foreign language (or equivalent).

Additional 12 credit hours in courses selected from the list of “SST alternate” courses below. These courses may not also count toward major, minor or other general education requirements. With assistance from advisers, students are encouraged to plan an integrated program to meet particular educational goals rather than to select courses based on random interest.

The following list of international studies courses may be supplemented with one-time courses approved by the dean and the director of international education. Some courses are offered in alternate years.

- ASL 104, American Deaf Culture  
- Bus 350, International Business  
- Bus 375, Business in Spain  
- Comm 206, Communicating Across Cultures  
- Econ 306, International Economics  
- Econ 308, Introduction to Economic Development  
- Engl 201, World Literature in English  
- Engl 207, 307, Irish Literature in Ireland, African-American Literature or American Indian Literature  
- Engl 310, Introduction to Linguistics  
- MCLL 300, International Classics  
- Any 300-level Spanish literature course  
- Hist 240, World Geography  
- Hist 255, History of Global Poverty  
- Hist/WoSt 330, International Women’s History  
- Hist 335, History of Ethnic Conflict  
- Hist 344, Latin American History  
- Hist 350, African History  
- Hist 375, History of the Southwest  
- Intl 250/350, Intercultural Service-Learning (see description below)  
- PJC 320, Borderlands  
- PJC 430, Healing the Wounds of Violence  
- PoSc 308, International Politics  
- PoSc 318, Latin American Politics  
- Phil 307, Asian Thought  
- Rel/Soc 315, Religion in Culture and Society  
- Rel 317, Islam and Judaism  
- Rel/Soc 319, Doing Theology Abroad  
- Rel/PJC 316, Liberation Theologies  
- Soc 220, Human Origins/Human Nature  
- Soc 230, Cultural Anthropology  
- Soc 330, Family and Kinship Across Cultures
Soc 334, Race, Class and Ethnic Relations
Soc 336, Latin American Societies and Cultures
Soc 340, African Societies and Cultures
Soc 342, Native American Societies and Cultures

**Int 250, 350  Intercultural Service-Learning  . . . . . . . . . . . . . . . . . . .  1-6**
A field assignment in an intercultural setting through an approved voluntary-service agency. Arranged by the student with the international education director and faculty adviser.

C. **Modified program for students with other intercultural experience**
Although most North American students who have considerable intercultural experience participate in SST, some may qualify for a reduced international education requirement. Students must meet one of the following requirements:
1. Live in another country outside the United States or Canada at least six months after completing high school.
2. Live in another country outside the United States or Canada for at least two years after the age of 12.
3. Participate in an organized service program operated by a church or service agency in a cultural group significantly different from one's own, for a period of at least six months.

If ANY one of the above conditions is met, the student must then:
1. Meet the standard language prerequisite to SST (See above).
2. Earn six credit hours in international-studies courses from the above options. Three hours of language learned in a foreign country may count as part of the six hours.

D. **Exemption from SST**
1. Students who have had significant intercultural experience throughout their life prior to enrolling at Goshen College may be exempt from SST. These students will be assessed on a case by case basis by the director of international education.
2. Studying in the United States meets the international education requirement for international students, though they are encouraged to seek service experience in this country. They may participate in SST, but any GC grants to international students may not be applied to SST.

III. **Other study abroad options with Goshen College**
During the May term or summer, Goshen College may offer special courses abroad. Locations vary, but in the past they have operated in England, France, Germany, Ireland, Italy, Spain, the Middle East, Colombia, Guatemala and Peru.

Credits may be earned in several areas, among them language, history, literature and peace studies. Some credits may apply as international study options (II-B).

IV. **Study abroad with other international programs**
Year-abroad study is available at colleges or universities in many different countries. Special application must be made on forms available from the international education adviser.

Goshen College students have access to approved year-abroad programs through affiliation with the Council of Mennonite Colleges, Brethren Colleges Abroad (BCA) and the Council on International Educational Exchange (CIEE). Most of these programs (except in Great Britain) may be used toward SST credit with the approval of the registrar. A full year of BCA study meets the SST requirement.

Some one-semester or short-term courses offered by the above and other organizations, such as CASAS in Guatemala, are also approved to provide credit toward the international education requirement.

Goshen College students in these programs will be registered as students at Goshen College in absentia. Credit for work in other foreign universities or programs may count for international education only with the approval of the associate academic dean.

Sources of student financial aid and scholarships for these programs are limited to funding outside of Goshen College, such as Pell Grants, state grants, outside scholarships, church aid and Guaranteed Student Loans. Only when the international program is required by the student's major and there is no alternative available on campus may Goshen College scholarships and financial aid be used. An application must be submitted and the major must be declared by spring advising days prior to the year of off-campus study. Contact the director of student financial aid for more information.

College studies program

Chair, Associate Academic Dean
Dean of Students B. Born
Director of Career Services A. Yoder

The department of college studies has three tasks: (1) to help students adjust to academic life at the college level; (2) to help students select courses, majors and minors so that they can make progress toward a degree; and (3) to provide career counseling for all students.

All Goshen College faculty members have an interest in this department because students’ success at Goshen College depends at least in part on their making wise decisions about majors and careers and responding to a sense of vocation.

The department itself offers neither a major nor a minor; instead, it offers these services:

• An academic home for all first-year students during their first semester and for continuing students who are deciders (those students who are in the process of selecting a major);
• Coordination of the colloquium program for first-year students during their first semester;
• Academic advising for all deciders;
• Workshops, advising guidelines and career counseling services for all students.

Collegiate studies program

Mission

The Division of Adult and External Studies offers quality education designed for adult learners. It reflects the distinctive standards of academic excellence, in a friendly environment of professional support, that characterizes Goshen College.

Faculty

Organizational Leadership Program faculty members are full-time professors at Goshen College or adjunct professors from local businesses who teach in their area of expertise. For nursing faculty, see nursing department pages.

Degree completion programs

Degree completion programs are designed for adult learners who are working full time. Classes meet once a week in evening hours. Students must have three to five years significant life or work experience, at least 60 semester hours already completed, demonstrate mastery of basic computer skills, provide a satisfactory writing sample, references and have a C average in all prior work.

Students graduating in this department must earn 120 semester hours with a 2.0 grade point average on courses completed at Goshen College. General education requirements must be completed as follows: English composition (3), literature/fine arts/foreign language (3), natural science (3), social science (3) and history (3). In addition, students must show evidence of competency in four areas: computer usage (basic knowledge, word processing), speech (presentation skills), written communication (effective writing ability) and quantitative skills (basic math skills).

In addition to the 40 hours earned in the core modules/classes, students may earn up to 20 additional hours by Credit for Prior Learning. Credits can also be obtained using DANTES and CLEP tests. Goshen College is a test center for both exam programs.

Two different majors are available: B.S. in organizational leadership and B.S. in nursing for persons who have already completed an R.N. program. For more information about the R.N. to B.S.N. program, including specific graduation requirements, see the nursing department pages.

Major in organizational leadership

The Organizational Leadership Program prepares learners to lead effectively within an organization. Through a thoughtful blend of theory and application, learners are able to understand what works – and why. Solid textbooks, experienced faculty, and the formal and informal life experiences of participants enable learners to be challenged to grow as leaders – and as people. Forty semester credits are awarded to those students who successfully complete this program.

DAES courses

OLP 300 Effective Communication .......................... 3
This course develops and enhances general and professional writing skills. Clear, concise, well-edited writing is emphasized. Course content includes selecting appropriate writing formats for specific situations and practicing various writing strategies to promote clear thinking and effective communication. Life-learning essays and professional writing assignments are included in the course requirements. (five weeks)

OLP 301 Individual and Group Dynamics .................. 3
This course examines the question: What factors combine to determine
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OLP 306</td>
<td>Economic Environment of Organizations</td>
<td>3</td>
<td>Explores basic issues such as individualism and community, personal decision-making, social justice and relating to other religious traditions. Class members will be challenged to think through their own responses to these issues. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 307</td>
<td>Managerial Accounting</td>
<td>3</td>
<td>The acquisition, analysis and reporting of financial information is important to the individual leader and the organization. Special attention is given to the planning and control responsibilities of practicing managers. Students gain confidence in their ability to interpret and use financial information for more effective decision making. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 308</td>
<td>Economic Environment of Organizations</td>
<td>3</td>
<td>This course focuses on the role of prices and markets in the modern, mixed free-enterprise economy. Students consider economic tools needed to better understand economic policy debates and make better choices as leaders. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 309</td>
<td>Leading and Serving in a Multi-Cultural World</td>
<td>3</td>
<td>The modern workforce is rapidly becoming a mosaic of colors, languages, cultural traditions and values. This demographic reality poses an immense challenge for both workforce and leaders. The goal of this course is to better understand different cultural values and styles, to recognize one’s own biases and assumptions and to value diversity. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 310</td>
<td>Leading and Managing Change</td>
<td>3</td>
<td>Organizations today function within a dynamic environment marked by rapidly changing technologies, globalization of markets, the “knowledge enterprise” and an increasingly diverse workforce. Leaders of organizations must understand the change process, appropriate responses to change, conflict resolution and how to develop strategies for the future. Rethinking competition, leadership and markets is an essential exercise as leaders search for new paradigms that will govern organizations now and in the future. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 311</td>
<td>Strategic Planning, Action, and Measurement</td>
<td>3</td>
<td>This course addresses strategic issues in running a business enterprise. Effective strategy-making and strategy-execution are the key ingredients of company success and the most reliable signs of good leadership. The basic concepts and tools of strategic analysis and business research are presented, utilizing case studies and simulation problems. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 312</td>
<td>Organizational Theory</td>
<td>3</td>
<td>Humans are immersed in organizations; to a large extent they form our lives. This course introduces the history of organizational development and examines how and why organizations change. It covers organizational task goals of planning, organizing and control. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 314</td>
<td>Organizational Cultures</td>
<td>3</td>
<td>This course introduces the concept that organizational culture is the sum total of the written and unwritten assumptions that an organization has learned and used throughout its history. The role of culture in young corporations, mid-life and mature organizations is considered. Consequences to organizational culture in a time of acquisitions, mergers and joint ventures are examined. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 315</td>
<td>Organizational Theory and Development</td>
<td>3</td>
<td>This course focuses on providing theoretical foundations and conceptual principles for leadership and skills necessary to practice leadership competently. Activities are designed to enhance leadership self-awareness, encourage development of personal perspectives on leadership and prepare students to address leadership challenges. The course reviews historical and current perspectives on leadership and considers how leaders use influence to direct and coordinate the activities of group members. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 316</td>
<td>Leadership Project</td>
<td>4</td>
<td>This project provides opportunity for students to integrate classroom theory with practical experience by identifying an opportunity to lead through service within an organizational setting – either the student’s workplace or a public benefit organization. Students work with a faculty mentor to structure the learning, coordinate with the cooperating organization and assess the level and significance of their learning. The findings or outcomes of the project will be presented on the last two nights of the program schedule. <em>(12 months)</em></td>
</tr>
<tr>
<td>OLP 319</td>
<td>Leadership Theory and Development</td>
<td>3</td>
<td>The capstone course considers the responsibilities of both leaders and organizations. Attention is given to three distinct but related themes: the social responsibility of organizations, public policy toward business organizations and leadership ethics. Students are challenged to make ethical analysis a routine part of their decision-making framework. Case studies explore the reality of the multiple, competing claims placed on the leader and the organization. <em>(five weeks)</em></td>
</tr>
<tr>
<td>OLP 320</td>
<td>Ethical Issues in Leadership and Organizations</td>
<td>3</td>
<td>This course addresses strategic issues in running a business enterprise. Effective strategy-making and strategy-execution are the key ingredients of company success and the most reliable signs of good leadership. The basic concepts and tools of strategic analysis and business research are presented, utilizing case studies and simulation problems. <em>(five weeks)</em></td>
</tr>

For more information about the R.N. to B.S.N. completion program, including specific graduation requirements, see the nursing department pages.
Special programs

Adult Programs
Bachelor degree programs with majors in organizational leadership and nursing are offered in the evening. For more detailed information, see the Division of Adult and External Studies (DAES) section. In addition the Transition to Teaching (TtT) program, which equips B.A. graduates for teacher licensure, is described in the education department pages.

Honors
The academic ethos at Goshen College is rigorous and engaging. Requirements for the Dean's List and the Latin Honors system for graduates are described in the Requirements and Procedures section of the catalog. Two special honors opportunities are described below.

Academic Symposium. An annual Academic Symposium features exemplary student research and writing. The symposium brings together students and faculty members involved in original research and scholarly activity from all disciplines. A selection of papers representing the quality of student research at Goshen College is published on the Academic Symposium Web site: http://www.goshen.edu/honors/ResearchSymposium.

Maple Scholars. Each summer the Maple Scholars program supports numerous student-faculty research partnerships. Maple Scholars is an eight-week program that gives students the opportunity to participate in independent research alongside Goshen College faculty of various disciplines. Each scholar is paired with a faculty member who works with and supervises individuals to help carry out their work. Students who are selected as Maple Scholars live in campus housing and receive a stipend. See www.goshen.edu/academics/maple_scholars.php for more details.

Goshen College off-campus programs
Goshen College offers many off-campus study options. Off-campus internships are available in nearly every major. Study-Service Terms (See international education section of the catalog) and May term and summer courses in England, Florida and other sites are entirely planned and coordinated by Goshen College. Off-campus May term courses offered by Goshen College in 2005-07 were:
- The Arts in London
- Marine Biology (Florida)
- General Ecology (Merry Lea)
- Ornithology (Merry Lea)
- Field Experience in Environmental Biology (various sites)
- Business in Spain
- Anabaptist History in Europe
- History of the Southwest
- Camping and Recreation (Boundary Waters, Minnesota)
- Women and Community Development in Costa Rica

Peace House in Indianapolis
Goshen collaborates with Earlham and Manchester colleges to offer an urban peacemaking experience. The city of Indianapolis is the classroom. The peace house program combines a living and learning experience with other college students, academic study and an internship at an Indianapolis agency. A 14-week, 15-credit program in fall or spring semester. Summer internships also available. For more information, contact Goshen Plowshares director Dean Johnson or the associate dean or see www.plowsharesproject.org/php/peacehouse/index.php

Other off-campus programs
Many other possibilities for off-campus study exist in cooperation with other colleges and universities. (See list below.) Special arrangements make it possible for students to register for Goshen College credit while participating in these programs. However, since tuition and fees are collected and passed on to the other agencies or colleges, sources of student financial aid and scholarships normally are limited to outside funding such as Pell Grants, state grants, non-Goshen College scholarships and Stafford Loans while enrolled in these programs.

Goshen College tuition discounts, scholarships and direct financial aid can be used only when a sponsored program is required for a student's major and those requirements cannot be fulfilled without the sponsored off-campus experience (Spanish major, e.g.). For Goshen College financial aid to apply to required off-campus study, an application must be submitted and the major must be declared by spring advising days prior to the year of off-campus study.

To obtain information on financial aid, contact the student financial aid office. Academic credits earned in these sponsored off-campus programs are considered residential credits. However, these are not Goshen College programs. Therefore, May-term fees are charged for students who were off-campus in one of these affiliated programs.

All students who plan to participate in one of the off campus programs listed below should contact the director of international education and off-campus programs as the first step in the registration process.

An Sable Institute of Environmental Studies offers summer programs in Mancelona, Mich., and other locations. See the biology department pages in this catalog or contact the environmental studies director for more information or see www.ausable.org.

Brethren Colleges Abroad offers academic-year and half-year programs in Europe, Asia and South America. Contact the director of international education and off-campus programs for more information or see www.bcanet.org.

Central American Study and Service (CASAS) in Guatemala offers semester or summer programs in Spanish and Central American studies. Contact http://semilla.org.gt/ingles/CASAS/casas.html or the director of international education and off-campus programs for more information.

Council for Christian Colleges and Universities (CCCU) offers various semester and summer programs. For further information, contact the associate dean or www.bestsemester.com. Semester programs of CCCU include the Los Angeles Film Studies Center. Located near major production studios, the program combines seminar courses with Christian context and a liberal arts perspective. Participation in this program is required for theater and communication majors who elect a film studies concentration.

Council on International Education Exchange offers many academic-year and half-year programs in Europe, Asia and Latin America. Contact the director of international education and off-campus programs for more information or see www.ciee.org.

Lithuania Christian College has summer TESOL internships and semester study opportunities. See the director of international education and off-campus programs or www.lccbc.org for more information.
Oregon Extension, in an old logging camp, offers an interdisciplinary fall semester and a women's studies May term for students from Christian colleges. Contact www.oregonextension.org or the director of international education and off-campus programs for more information.

Chicago Center offers semester and short and long summer programs in Soc 302, Urban Diversity and many internship possibilities. Because of special financial arrangements with this program, students who spend the fall or spring semester at the Chicago Center are not charged extra for a May term at Goshen. Contact the director of international education and off-campus programs for more information or www.urbanlifecenter.org.

Washington Community Scholars Center (sponsored by Eastern Mennonite University) has semester, year-long or spring/summer programs available in Washington, D.C. Includes significant internship experience and course work at a nearby university. Contact the director of international education and off-campus programs or www.emu.edu/wcsc for more information.

Center for Intercultural Teaching and Learning
This center, known as CITL, is being established with a grant from Lilly Endowment. Staffing for the center is projected to be in place by the beginning of the 2007-08 school year. The CITL will have three main areas of activity:

Research – researching the dynamics behind the changing ethnic composition in a rural Midwest community and its implications for higher education.

Educational access – making a Goshen College education accessible to Latino students and in the process enabling the college to better serve other culturally diverse students.

Transformed learning community – creating an intercultural learning community for all Goshen College students that prepares them for the communication, understanding and collaboration needed in the 21st century.
Undergraduate academic departments and courses

Art
Chair, Professor J. Blosser
Professor M. Krabill
Associate Professors J. Mishler, J. Wenig-Horswell
Assistant Professor G. Penner

Career opportunities
Art graduates are currently working as elementary and secondary school art teachers, architects, graphic designers, designers in industry and business, art therapists, free-lance artists, college teachers, fashion designers, interior designers, museum curators, photojournalists, production crafts persons and fine artists.

Major in art
33 credit hours
- Art 101, Drawing ........................................... 3
- Art 107, Design ............................................. 3
- Art 202, Painting ........................................... 3
- Art 205, Figure Drawing .................................... 3
- one 3-D course (Ceramics, Jewelry or Sculpture) .................. 3
- Art 341, History of Art I .................................. 3
- Art 342, History of Art II .................................. 3
- Art 409, Senior exhibit .................................... 1
- Art 410, Seminar .......................................... 3
- Art electives .............................................. 5

Related course:
Thea 245, Aesthetics ..................................... 3

Planning notes: 75 non-art hours are required for graduation. 38 art hours and 27 education hours are required for K-12 art teaching certification.

Beyond the basic requirements for a major, the department suggests that each student develop a specialized program from the elective courses in one of the concentration areas below.

Possible concentration areas
Visual arts education (K-12)
In addition to the required courses outlined above, these course are also required: Art 108, Art 255, Art 312; and six credits advanced study in a medium as preparation for senior exhibit. Also 30 credits in education, including student teaching during fall semester of the senior year. PJCS 210 is required for the PJCS/Phil general education requirement. For more details see visual art and secondary education pages of the Goshen College Teacher Education Handbook.

Graphic design
Art 108, Art 208, Art 308, Art 408; Art 203, Art 207; Art 301/401, Art 315, Art 355, Comm 326, Comm 375, or Comm 255; Art 343; Bus 336, Advertising; Bus 121, Introduction to Entrepreneurship; Engl 204, Expository Writing; Comm 212, Broadcast Media Production I.

Production crafts
Art 206; Art 301/401; Art 312; Art 343; Art 355; 9-15 hours in ceramics or jewelry; Bus 121, Introduction to Entrepreneurship; Bus 328, Venture Planning; Acc 201 and 202, Accounting.

Studio art
For students preparing for graduate school or a career as a studio artist.
Art 301/401; Art 312; Art 343; Art 355; 9-15 hours in selected studio courses in two- or three-dimensional media. Engl 204, Expository Writing. Selections from history, French, German, philosophy and anthropology.

Pre-Architecture
Pre-graduate school program. For a master’s degree in architecture, an undergraduate major in art is recommended, along with selected electives in other areas. Additional courses usually required include: Art 108; Art 301/401; Art 355; studio art classes; Math 211, Calculus I; Phys 203 or 204, General Physics; and two history courses chosen from Hist 101, 102, 203 or one of the humanities courses. In addition, courses in sociology, psychology, communication skills and business are strongly recommended, along with cross-cultural experience.

Art therapy
Pre-graduate school program. Art 204; Art 206; Art 207; Art 217; Art 301/401; Art 312; Art 355; Art 412; Psy 210, Developmental Psychology; Psy 306, Abnormal Psychology.

Curatorial studies
Pre-graduate school program. Art 301/401; Art 312; Art 343; Art 355; Art 412; Bus 121, Introduction to Entrepreneurship; Comm 324, Principles of Public Relations; Engl 204, Expository Writing; selections from history, French, German, philosophy and anthropology.

Planning guide
We recommend at least one, but not more than two studio art classes per term.

First year
- Drawing
- Design
- Painting
- Any art 3-D media course
- General education courses

Second year
- Figure Drawing
- Balance of remaining first-level studio courses
- Begin art concentration courses
- Aesthetics (offered on alternate years)
- General education, including SST

Third year
- History of Art
- Art concentration courses
- General education

Fourth year
- History of Art
- Remaining major courses, concentration courses and electives
- Remaining general education and electives
- Senior Exhibit
- Senior Seminar

Minor in art
Requires 20 hours in art including
- Art 101, Drawing ........................................... 3
- One from either Art 107, Design or Art 202, Painting ............... 3
- History of Art: one from Art 341, 342 or 343 .................... 3
Art electives .................................................. 11
Eight hours of the 20 required must be upper-level courses.

Minor in graphic design
Requires 18 hours in art including:
Art 101, Drawing .............................................. 3
Art 107, Design ............................................... 3
Art 108, Digital Design .................................... 3
Art 208, Graphic Design I .................................. 3
Art 308, Graphic Design II .............................. 3
Art 341, 342, or Art 343, Art History* .................. 3
Plus one elective from: ..................................... 2-3
  Art 315, Photography
  Art 408, Graphic Design III
  Bus 336, Advertising

* A third art history course is not required of art majors who select this minor. An additional three hours of elective credit from the list above may be chosen instead.

Minor in multimedia communication
Requires 18 hours in art, communication and business information systems. See the communication department pages for a full description.

Art courses
Art 101, Drawing .............................................. 3
Fundamentals of drawing as applied to pictorial organization. Emphasis placed on rendering skills: the use of line, value and perspective balanced by expressive approaches. Includes the use of various dry and wet media. Encouraged as a first course in art. Open to all students.

Art 107, Design ............................................... 3
A beginning course focusing on art elements and principles. Through experimentation, exercises, specific problems and using basic media and techniques, the student becomes familiar with fundamental visual concepts. Studio experience, critique and some research/writing are included. Encouraged as a first course in art. Open to all students.

Art 108, Digital Design .................................... 3
This course in visual expression and communication will introduce students to relevant computer programs including Adobe InDesign, Adobe Illustrator and Photoshop. Through exercises, projects and critiques, students will learn both creative visual design and technical aspects of computer-generated images and composition.

Art 202, 302, 402, Painting ............................. 3, 3, 1-3
The first course in painting is an introduction to the use and control of acrylic medium with a perceptual approach. Emphasis on technique, color and composition. Advanced courses emphasize independent investigation leading to a personal expression in oil paint. Art 202 open to all students. Prerequisite for Art 302 is Art 202; prerequisite for Art 402 is Art 302 and Art 101 or Art 107.

Art 203, 303, 403, Watercolor .......................... 3, 1-3, 1-3
Through studio activity, a wide range of subject matter and techniques are explored. Skill and control of the medium are encouraged through practice. Art 203 open to all students. Prerequisite for Art 303 is Art 203; prerequisite for Art 403 is Art 303 and Art 101 or 107.

Art 204, 304, 404, Ceramics ............................ 3, 3, 1-3
In the first term, students use the potter's wheel and other methods to create forms in clay, both sculptural and functional. Forming, glazing and firing are learned. Second-term students do glaze or clay research and continue skill and concept development. Advanced students develop personal styles. Art 204 open to all students. Prerequisite for Art 304 is Art 204; prerequisite for Art 404 is Art 304 and Art 101 or 107.

Art 205, 305, 405, Figure Drawing .................. 3, 1-3, 1-3
Studio based on the human figure, using a variety of drawing techniques, brief and sustained poses. Further development of perception and knowledge of the human figure advanced in work. Features a variety of media, the relationship of figure to ground and a variety of conceptual approaches. Prerequisite for Art 205 is Art 101; prerequisite for Art 305 is Art 205; prerequisite for Art 405 is Art 305.

Exploration of sculpture media and techniques. Includes verbal interpretation and research of sculptors. Art 206 open to all students. Prerequisite for Art 306 is Art 206; prerequisite for Art 406 is Art 306 and Art 101 or Art 107.

The study of woodcut and intaglio techniques. Advanced work directed toward experimental techniques and skill development. Individual and group critiques. Art 207 open to all students. Prerequisite for Art 307 is Art 207; prerequisite for Art 407 is Art 307 and Art 101 or Art 107.

Art 208, 308, 408, Graphic Design .................... 3, 3, 1-3
First-year students are introduced to the elements and principles of graphic design/visual communication. Emphasis will be placed on aesthetic use of typography and image in the conceptual development of projects in publication, poster and advertising design. The course will also provide a historical overview of the influences and movements in the field of graphic design.

Second-year students continue the study of graphic design/visual communication. Emphasis will be placed on the design and implementation of corporate symbols. Students will design various symbols and identities and carry the visuals through to stationary, packaging, advertising and various other marketing projects. Production standards for layouts, inks and paper and the printing process will also be studied.

In the third and consecutive terms, students concentrate on developing skill in various areas of interest. Projects from GC and the Goshen community are used with input and critique from students and instructor. Projects are chosen with the purpose of developing experience in working with clients and portfolio development.

Graphic design courses must be taken in sequence. Prerequisite for 208 is Art 108; prerequisite for Art 408 is Art 308 and Art 101 or 107.

Art 217, 317, 417, Jewelry ............................. 3, 1-3, 1-3
Three-dimensional design in metals including basic fabrication techniques, silver soldering, cold connections, stone setting, chain making and polishing processes. Includes study of historical and contemporary work in metal. Advanced students learn lost wax centrifugal casting. Art 217 open to all students. Prerequisite for Art 317 is Art 217; prerequisite for Art 417 is Art 317 and Art 101 or Art 107.

Art 255, Photo Communication ....................... 3
(See Comm 255)

Art 301, 401, Art Study Tour ............................ 3, 3
Art study on location in major art centers in Europe. Study stresses historical works and architecture. Both class and individual study is included. Extra cost. Open to all students.
Art 312 Teaching the Visual Arts ............................... 3-4
A methods course introducing the issues, concepts, philosophy and content of teaching art for art education students (K-12) and others with an interest in teaching art in other settings. Emphasis on curriculum and lesson planning, reading in art education, art classroom management and evaluation. Includes field work. All art majors strongly encouraged to take this course. Visual art education majors must take it for four credits; others may take it for three credits.

Art 315, 415 Photography ................................. 3, 2-3
The study of photography as an expressive art form. Advanced students follow individualized plans of study in an artistic, technical, digital and/or commercial area of photography to prepare work for exhibition, Web site, or to develop skills needed prior to a field assignment in commercial or journalist photography. Prerequisite for Art 315: Comm/Art 255, for Art 415: Art 315 and Art 101 or Art 107.

Art 330 Media Workshop ..................................... 3
A course that explores in depth a single medium or process such as metal casting, raku, papermaking, weaving, kiln building, silk screen and airbrush.

Art 341 History of Art I ...................................... 3
A survey of historical art from prehistory through the Middle Ages. Lecture. Prerequisite: junior level preferred. Offered alternate years.

Art 342 History of Art II ..................................... 3
Historical development of art from the Renaissance to present day. Lecture. Prerequisite: junior level preferred. Offered alternate years.

Art 343 20th Century Art ...................................... 3
A survey of major art movements, architecture and artists of the 20th century with emphasis on art since 1945. Students learn critical assessment, research and become more artistically articulate. Prerequisite: junior level preferred. Offered alternate years.

Art 355 Arts in London ....................................... 4
(See Thea 355)

Art 375 Multimedia Concepts ............................... 3
(See Comm 375)

Art 409 Senior Exhibit ....................................... 1
A senior exhibition emphasizing studio work in an area in which the student has specialized and developed a personal style. Course includes gallery installation, publicity and education relating to the exhibit. Prerequisite: six-nine hours in medium and consent of instructor. For art majors only.

Art 410 Senior Seminar ...................................... 3
Integrating creative endeavors, life's purpose and faith. Issues concerning vocational, ethical, theological and historical dimensions of art are explored. Prerequisite: Required of all senior art majors; consent of instructor.

Art 412 Special Projects ..................................... 1-3
Independent self-directed work or apprenticeship at an advanced level beyond that which is offered in regular courses or an internship related to an art concentration area. Prerequisite: consent of instructor.

Bible, religion and philosophy
Chair, Professor K. Graber Miller
Professors J. Brant, J. E. Brenneman and P. Keim
Director and Assistant Professor of Youth Ministry R. E. Yoder
Visiting Professor M. Berry
Adjunct Professors C. Guth and R. Shands Stoltzfus

Major in Bible and religion
The Bible and religion major is designed to provide students with an introduction to biblical studies and the academic study of Christian and other religious traditions while affirming their faith and orienting them toward the value that the Anabaptist tradition places upon the Bible and the church.

The major requires courses on the content and methods of biblical study, church history, theology, ethics and philosophy, and culminates in a senior seminar in narrative theology. A major in Bible and religion is of particular value to students contemplating graduate study in Bible, religion or theology, mission and service occupations in the church, or callings to youth ministry or broader pastoral work.

Career opportunities
Recent Bible and religion graduates have gone on to become pastors, service workers, professors, hospital chaplains, teachers, reporters, public relations consultants, lawyers, farmers, computer analysts, musicians, artists, business executives, translators and church administrators. Regardless of their future occupations, majors are given a strong foundation for careful reading of texts, thinking theologically, considering the relevance of faith for their daily lives, and active participation in congregational life.

Requirements
The major requires a total of 39 hours, including 18 hours of core requirements. Two tracks are available: general and youth ministry.

Core requirements for both tracks:
Bibl 300, Jesus and the Gospels .................................. 3
Bibl 301, Hebrew Scripture ..................................... 3
Rel 320, Christian Faith ....................................... 3
Rel 318, Anabaptist/Mennonite History or
Hist 321 History of Mennonites in America .................. 3
Bibl/Rel 409, Internship ...................................... 3
Bibl/Rel 410, Seminar ........................................ 3

Planning notes: Bibl 100/200 may not be applied to the major. It is strongly recommended that at least one course be taken at Associated Mennonite Biblical Seminary (AMBS) in Elkhart. Goshen students may take one course there per semester as part of their Goshen College registration.

General track (21 credit hours):
Elective in Bible .............................................. 3
Phil 302, Ethics and Morality .................................. 3
Phil 200, Introduction to Philosophy
Phil 307, Asian Thought or
Phil 401, Philosophy of Religion ............................. 3
Twelve hours of related courses in the department or in supporting courses such as Hist 304, PJC 313, Psyc 314, Soc 210,
in consultation with the adviser ............................... 12
Apprenticeship in youth ministry track (22 credit hours):
Rel 210, Introduction to Youth Ministry .......................... 3
Rel 374, Youth Ministry Seminar ................................. 3
Worship course .................................................. 3
Mus 311, Topics in Music Literature: Church Music
or AMBS course in worship*
Spirituality or Pastoral Care course ............................. 3
Rel 405, Spiritual Care and Healing
or AMBS course in spirituality or pastoral care*
PJCS 210, Transforming Conflict and Violence or
PJCS 325, Mediation: Process, Skills and Theory ............ 3
Edc 309, Educational Psychology: Secondary or
Psyc 210, Developmental Psychology .......................... 3
Rel 330, Religion and Sexuality or
Soc 210, Sociology of the Family or
Soc 260, Human Sexuality ...................................... 3
PhEd 102, First Aid and CPR ..................................... 1

*For AMBS course listings, see http://www.ambs.edu/academics/courses

Planning guide

First year
General education
Knowing the Bible or Reading the Bible

Second year
General education
SST
200-300 level courses in major including Bibl 301

Third year
General education
Upper-level courses in major including Bibl 300
Related courses

Fourth year
Balance of general education
Balance of major
Internship
Seminar

Minor in Bible, religion and philosophy

Departmental advisers will help shape the minor toward individual
students' needs and interest, but minors are required to take at least
nine hours of upper-level coursework and are encouraged to take courses
in all three areas in the department: Bible, religion and philosophy. An
example of a model program drawing on the departmental core:
18 hours:
Bibl 300, Jesus and the Gospels .................................. 3
Bibl 301, Hebrew Scripture ...................................... 3
Elective in Bible ................................................... 3
Phil 302, Ethics and Morality .................................... 3
Rel 320, Christian Faith .......................................... 3
Elective in religion or philosophy ............................... 3

Minor in youth ministry

The minor in youth ministry contains the core of the youth ministry
concentration and is designed to complement a degree in teacher
education or social work for those preparing to become youth pastors. A
minor in youth ministry prepares a student to work as a youth sponsor
and provides students with basic theory and skills for working with
young people.
Rel 210, Introduction to Youth Ministry .......................... 3
Rel 374, Youth Ministry Seminar ................................. 3
PJCS 210, Transforming Conflict and Violence ............... 3

Six hours selected from:
Rel 320, Christian Faith .......................................... 3
Bibl 300, Jesus and the Gospels ................................ 3
Bibl 301, Hebrew Scripture ...................................... 3

Three hours selected from:
Educ 309, Educational Psychology: Secondary ............ 3
Psyc 210, Developmental Psychology ........................ 3
Rel 330, Religion and Sexuality ................................ 3
Soc 210, Sociology of the Family ............................. 3
Soc 260, Human Sexuality ...................................... 3

Additional recommended courses
Rel 318 or Hist 321, Bibl 324, Phil 302, Rel 306, Rel 322, Rel 405,
Rel 209 or 409, Internship (with an emphasis in youth ministry), Art 311,
Mus 311, PhEd 102

Bible and religion majors and minors are encouraged to focus their plan
of study by selecting electives in concentrated areas. Among the possible
foci are youth ministry inquiry, ministry inquiry, religious studies,
thology, biblical studies and philosophy. Faculty advisers will work with
students to create the most appropriate plan of study for their particular
interests.

Certificate program

A one-year certificate program is available in biblical studies. See the
department chair or the registrar for more details.

Bible courses

Bibl 100  Knowing the Bible ....................................... 3
This course will cover the basic narrative structure of the Bible, the main
characters and themes and will address the following questions: How
did the Bible come to be? How does one understand Scripture? In what
contexts does one read Scripture? This course is for people with very
little or no formal background in the Bible.

Bibl 200  Reading the Bible .......................................... 3
This course will focus upon questions of genre and composition and
interpretation of the Bible and will address the following questions:
How does genre affect how we read? How is doctrine derived from
Scripture and how does it influence our own readings? How are various
modern methodologies used to understand the Bible? How does one
distinguish between opinion and reasoned interpretation? This course
is for students who have studied Scripture in a formal setting such as
in high school, Sunday school or academic courses and who know the
basic narrative structure and main characters. Note: Students who take
Bibl 100 cannot use Bibl 200 to satisfy the additional general education
Bible and religion requirement.

Bibl 100 or 200 fulfills the lower-level Bible literacy general education
requirement. Students who do not know which level to take are
encouraged to take the placement test scheduled at the beginning of
each semester or to consult with either Professor Brant or Keim.

Bibl 201  New Testament Greek .................................... 3
Basic vocabulary, verb structure and grammar of New Testament Greek;
reading and translation in first chapters of the Gospel of John. This
course does not meet the Bible/religion general education requirement.
It may, however, meet the basic Bible literacy requirement for students
who place out of Bibl 200 on the Biblical Literature placement test.
Prerequisite: Bibl 100, Bibl 200 or equivalent.

Bibl 204  Hebrew Language and Culture ............................ 3
Students will work through a standard grammar of biblical Hebrew,
building a working vocabulary of 600-800 words. The Book of Ruth
will be read in its entirety, along with representative selections from the major genres of biblical Hebrew literature. Attention will also be devoted to the cultural settings reflected in the texts. Offered alternating years with Bibl 201. This course does not meet the Bible/religion general education requirement. It may, however, meet the basic Bible literacy requirement for students who place out of Bibl 200 on the Biblical Literature placement test. Prerequisite: Bibl 100, Bibl 200 or equivalent.

Bibl 300 Jesus and the Gospels. Study of the life and teachings of Jesus, focusing on the proclamation of the reign of God and Jesus’ messianic identity as the Son of God. Examination of Jesus in his historical setting will be balanced with discussions of Jesus’ call to discipleship and theological interpretations of the Gospels. Prerequisite: Bibl 100 or 200 or consent of instructor. BRP majors are encouraged to add a one-hour depth credit.

Bibl 301 Hebrew Scripture. Content of this course will alternate every other year with one of the following topics:
- Prophets: A study of the important corpus of prophetic literature from the Hebrew Bible. Attention is given to historical, social, literary and theological features of the texts. Broad surveys of the prophetic writings will set the stage for close reading of selected oracles. Balancing the ethos of the Hebrew prophets with the demands these texts place on the contemporary audience keeps the Scriptural nature of this foundational material constantly in view.
- Wisdom and Psalms: Alongside law, history and prophecy, the wisdom and poetry sections of biblical Hebrew writings give expression to the formative power of this significant literary, theological and social movement in ancient Israel. Primary attention will be given to the universal perspectives reflected in the books of Ecclesiastes, Proverbs and Job, with selective attention given to the Wisdom corpus of the Apocrypha. Significant time will also be devoted to the laments, hymns and pilgrimage songs of the book of Psalms. Prerequisite: Bibl 100 or 200.

Bibl 303 Paul and the Early Church. Study the ministry of Paul and the growth of the early church by traveling through the geography and social world of the early church and reading the book of Acts and Paul’s letters. Explore Paul’s understanding of Jesus Christ and the nature of the Christian communities he established. Discussion will range from Paul’s council on issues such as church life, the role of women and the state, and circumcision to his theological teachings on salvation and end times. Prerequisite: Bibl 100 or 200.

Bibl 304 Writings of John. A study of the theology, themes, literary structure and social world of the fourth Gospel. Special attention is given to unique contributions of the fourth Gospel to the New Testament canon, to our understanding of the Christ event and to Christian thought. Other Johannine writings are examined in relation to the Gospel. Prerequisite: Bibl 100 or 200 or consent of instructor.

Bibl 310 Topics in Biblical Studies. Lecture, research and discussion oriented around specific biblical studies themes such as the book of Revelation, leadership in ministry, spiritual and pastoral care. Prerequisite: Bibl 100 or 200.

Bibl 321 Biblical Themes of Peace. A study of the themes and concepts that provide a biblical basis for nonretaliation and peace making. Particular attention is given to the nature of God’s sovereignty, forgiveness versus vengeance and love of enemies. Prerequisite: Bibl 100 or 200.

Bibl 324 Women in the Bible. An examination of the characterization of women in Old and New Testament narratives, their role in biblical societies and the early church and their representation in Judeo-Christian culture, particularly our contemporary culture. The course draws upon current research and exegetical strategies in biblical studies. Prerequisite: Bibl 100 or 200.

Bibl 409 Bible Internship. An approved internship or work experience related to biblical studies. Examples are: Ministry Inquiry Program, supervised work in local campus ministries, church agencies or hospital chaplaincy.

Bibl 410 Bible Senior Seminar. Advanced work in principles and problems of biblical studies through the examination and assessment of narrative theology and ethics. Constant attention is given to meaningful articulation of faith. (See Rel 402, Christianity and Modern Thought)

Religion courses

Rel 202 Religion in the Americas. An overview of religious institutions and individual expressions of religious faith in the Americas. The course includes some attention to historical developments across the Americas, but focuses primarily on recent or contemporary religious movements, realities, themes and issues in North America. The course also provides an introduction to the discipline of religious studies and is designed for colloquium students.

Rel 209 Field Experience in Ministry. A field placement in applied ministry or discipleship at a camp, retreat center, congregation or religious organization. Appropriate for credit by experience registration.

Rel 210 Introduction to Youth Ministry. Focuses on aspects of pastor identity formation, theological understanding for and history of youth ministry, various models of youth ministry, and issues related to spiritual development of youth. Attention will also be given to issues regarding size of youth groups, organizational nature of ministry, mentoring, abuse, suicide, evaluation, self-care, humor and recreation. Includes attending a national or regional youth ministry training event.

Rel 310 Topics in Religion. Lectures, research and discussion of specific topics in religion such as politics and religion, spirituality, religion and the media.

Rel 315 Religion in Culture and Society. An analysis of the social, cultural and political contexts that profoundly affect religious institutions and expressions, and upon which religion has an influence. Course includes such topics as meaning and belonging, modern individualism, dynamics of religious collectives and the impact of religion on social change.

Rel 316 Liberation Theologies. Liberation Theologies focuses on three contemporary theologies of liberation (Latin American Liberation Theology, North American Black Theology and North American Feminist Theology) as they are developing in the Americas. The course examines similarities and differences among these three theologies — in conversation with Womanist and Latina theologies — as each addresses specific theological questions raised by the people of God in actual contemporary situations of exploitation and oppression. The course also has a praxis component in which students move outward into the community.
Rel 317  Islam and Judaism  .......................  3
An introduction to the essential beliefs, religion, texts and cultures of
Islam and Judaism. Along with Christianity, these religious traditions
represent the great cultural heritage of the Ancient Near East. A survey
of essential Scriptures and exploration of primary doctrines will lay the
groundwork for understanding these traditions with more clarity and
sympathy. The living, contemporary communities of faith which claim
direct descent from the Scriptures and doctrines of these formative
cultures will become familiar through personal interaction with Muslims
and Jews – both in the classroom and on field trips to mosque and
synagogue. Emphasis will be placed on the deep continuities that exist
among the “peoples of the book,” as well as the unique contributions
each has made to contemporary world culture.

Rel 318  Anabaptist/Mennonite History  ..........  3
(See Hist 318)

Rel 319  Doing Theology Abroad  .................  4
An intensive seminar taught on location in a southern hemisphere
country, focusing on socio-political relations and practical theology.
Participants live and attend church-related activities with host-country
families. Topics of study include challenges of peace-building, effects of
U.S. military aid, impacts of U.S. commercial interests and partnerships
between North American churches and hosts. Personal safety of
participants will likely be at risk, so freedom of movement must be
surrendered. Proficiency in language of host country desired, but not
required.

Rel 320  Christian Faith  ..........................  3
An introduction to theology, examining the character of Christianity
by identifying and defining basic features and themes (e.g. Christology,
atonement, church, eschatology). Careful attention will be paid to both
historical development of theology as well as contemporary credibility.
Prerequisite: Bibl 100 or 200 or consent of instructor.

Rel 322  Worshipping Communities ...............  3
An introductory survey course about worship which examines styles and
patterns of worship as practiced by local communities of faith. Includes
weekly attendance at worship services in a variety of denominations.

Rel 328  Spiritual Writings of Women ..........  3
A survey of women’s writings about the spiritual journey. Includes a
range of medieval through 20th-century women. Examines women’s use
of their experiences as one source of theologizing.

Rel 330  Religion and Sexuality ....................  3
An exploration of the meaning and purpose of human sexuality in the
context of Christian (and other) religious faith(s) and in relation to
culturally based attitudes. Topics addressed will include body
phenomenology, body theology, gender issues, historical developments,
sexuality and spirituality, singleness, marriage, friendship, sexual
violence and a variety of other theological, ethical and relational issues.
The course draws extensively on feminist models, themes and authors.

Rel 374  Youth Ministry Seminar .................  3
Focuses on new ways to help young people pray and strengthen their
faith; critiques and adapts current youth ministry materials for one’s
own ministry context; considers the challenges of our ever-changing
world and the impact on our youth and youth ministry settings; learns
and practices various spiritual disciplines and prayer exercises; develops
practical ministry skills and resources; includes attending a national or
regional youth ministry training event. Co-registration for at least one
credit of Rel 209 highly recommended.

Rel 402  Christianity and Modern Thought ..........  3
A seminar examining and assessing narrative theology and ethics. An
tempt to state faith in meaningful terms by understanding the
principles and structures of narrative and habitually using them. This
course also serves as the senior seminar for Bible and religion majors,
and only seniors are allowed in the course. Participation for non-Bible
and religion majors requires the consent of the professor.

Rel 405  Spiritual Care and Healing ...............  3
Especially oriented towards the professional caregiver, this course
emphasizes the interaction of spiritual factors with physical and
emotional ones in the lives of helpers and their clients. Course
enrollment includes a commitment to regularly practice one of the
classical spiritual disciplines as a source of spiritual renewal and healing.

Rel 409  Religion Internship  .......................  1-3
Approved intern or work experience related to studies in religion.
Examples are Ministry Inquiry Program, supervised work in campus
ministries, church agencies, chaplaincy or congregational programs.

Rel 410  Religion Senior Seminar .................  3
Advanced work in principles and problems of religious studies through
the examination and assessment of narrative theology and ethics.
Constant attention is given to meaningful articulation of faith. (See Rel
402)

Philosophy courses

Phil 200  Introduction to Philosophy ..........  3
An introduction to the major problems of philosophy such as the
nature of knowledge and reality, the relation of faith and reason,
moral reasoning, politics and aesthetics. Discussion of the problems
is driven by self-examination of each student’s reasoned ideas and the
contributions of major philosophers from a variety of traditions.

Phil 302  Ethics and Morality  .....................  3
A study of the nature of moral claims and the bases for ethical principles.
The course draws on both moral philosophy and on Christian ethical
reflection, addressing the development of character as well as the
patterns and methods for both individual and corporate decision-
making.

Phil 305  Philosophy of Science ..................  3
A study of the nature and history of scientific inquiry, the role of
rationality, intuition and truth in the sciences, as well as the relationship
of the sciences to other realms of discourse, especially religion.

Phil 307  Asian Thought  .........................  3
The main aim of this course is to introduce the student to the questions,
methods, goals and character of Asian philosophies and to instill in
him or her a sensitivity to the profundity of thought that informs Asian
history and culture.

Phil 310  Topics in Philosophy ....................  2-3
Study in specific areas of philosophic thought such as ancient/medieval,
logic, modern philosophy, theory of knowledge, theory and problems of
reality.

Phil 400  Individual Readings in Philosophy ....  1-3
Students take initiative to develop a plan with a department faculty
member. By consent of the faculty member only.

Phil 401  Philosophy of Religion ..................  3
Traditional and modern encounters of religion and philosophy;
theistic arguments, faith and reason, apologetics, natural theology and
philosophical theology.
Biology and environmental science

Chair, Professor J. Miller
Professor S. Grove
Associate Professor L. Yoder
Assistant Professors L. English, D. Hess, D. Miller, B. Minter, J. Saylor

The biology department offers three majors: biology, environmental science and molecular biology/biochemistry. It also offers a minor in environmental science. The Merry Lea Environmental Learning Center, located 30 miles from campus, provides excellent opportunities for field research and courses in environmental science.

Major in biology

Career opportunities

Biology graduates are active in human medicine and related areas, veterinary medicine, the agricultural sciences, cell biology, microbiology, marine biology, biotechnology, ecology, environmental analysis, science communications and science education, as well as basic research in numerous biological areas.

Life sciences education

Teacher certification is available for grades 5-12 in two related areas. Courses needed in addition to core major requirements:

Life sciences - Biol 200 or 201; Biol 203 or 302; and Biol 215, 309 or 315.

Life sciences and chemistry - Biol 200 or 201; Biol 203 or 303; Biol 215, 309 or 315; Chem 200; Chem 304; Chem 310, 312, 415 or 430.

Also requires 30 credits of education courses, including a semester of student-teaching. PCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details.

Requirements

Minimum of 24 hours in biology (plus internship and seminar), of which 12 hours must be upper level, plus courses in related sciences for a total of 40 hours as follows:

Core courses

Biol 111-112, Biological Principles .......................... 8
Biol 300, Microbial Biology .................................... 4
Biol 301, Genetics ............................................... 4
Biology electives (at least four hours must be upper level) ........... 8
Biol 410, Biology Senior Seminar (or equivalent by permission of the biology department) .................. 3
Biology experience: Biol 209 (Field Experience), Biol 400 (Biology Research), Biol 409 (Internship) or other equivalent experience entailing at least 120 clock hours of practical experience in biology. See adviser for internship form. .......................... 0-3

Related courses

Chem 111-112, General Chemistry ......................... 8
Chem 303, Organic Chemistry ........................... 4
Additional science electives ................................. 1 or more

Students expecting to major in biology should elect General Chemistry, Chem 111-112, in the freshman year. Areas of interest for which majors may prepare by careful selection of courses include: agriculture, allied health (medical technology, pharmacy), biotechnology, botany, cellular biology, ecology, environmental biology, field biology, genetics, human biology, marine biology, microbiology, molecular biology, pre-professional (dentistry, medicine, veterinary medicine, physical therapy), teaching biology, tropical agriculture, wildlife biology or zoology.

Field biology courses

Field biology courses are usually based at two Goshen College facilities: the Merry Lea Environmental Learning Center and the Marine Biology Laboratory. Additional field study and other courses can be done at Aux Sable Institute. For more details, see “Field biology courses” under the environmental science major below.

Planning guide

First year

General education
Biological Principles
General Chemistry
Pre-calculus (if needed)

Second year

General education
Microbial Biology (or Calculus I)
Genetics (or Calculus II)
Organic Chemistry
SST (summer)

Third year

General education
Upper-level biology (or calculus)
Physics
Developmental Vertebrate Biology (pre-med)
SST (if not in second year)

Fourth year

Balance of general education
Balance of major
Internship or equivalent
Biology Senior Seminar

Major in molecular biology/biochemistry

Coordinator, Professor S. Grove

Career opportunities

A molecular biology major provides excellent preparation for further study in medical or graduate school, or direct entry into the job market. Molecular biology provides a foundation for careers in biochemistry, molecular biology, molecular genetics, biotechnology, genetics, molecular medicine, genomics, molecular diagnostics, drug discovery and many related areas.

Requirements

Completion of the following courses or the equivalent (55-58 credit hours): Biol 111-112, Biological Principles .......................... 8
Biol 301, Genetics ............................................... 4
Biol 307, Molecular Cell Biology ................................ 4
Biol 409, Internship or alternate ................................ 0-3
Biol 410, Biology Senior Seminar .......................... 3
Chem 111-112, General Chemistry ......................... 8
Chem 303-304, Organic Chemistry ......................... 8
Recommended electives
Biol 300, Microbial Biology; Biol 302, Developmental Vertebrate Biology; Chem 200, Analytical Chemistry; Chem 310, Thermodynamics; and Chem 312, Quantum Mechanics I.

Recommended enrichment activities
Research Seminar, Biol 330; undergraduate research project — credit available through advanced biology (if done on campus) or internship (if done off campus).

Biology Senior Seminar

Major in environmental science
Director, Assistant Professor L. English

Career opportunities
Graduates in environmental science (ES) may work in a wide variety of areas, such as sustainable agriculture, conservation biology, water/air quality analysis, environmental education, recovery of threatened or endangered species, and as consultants for local, regional, or national parties interested in sustainable development. Courses in environmental science are designed to provide knowledge in areas of social structures, available natural resources, market forces, biodiversity status, landscape quality, cultural value, habitat and natural resource sustainability, and policy decisions. Potential employers include church and community agencies, local, state and federal government, private advocacy, stewardship and land trust organizations. Beginning in 2007-08, a master's degree program in environmental education is available at Goshen College. See that section of the catalog for more information.

Required core courses (28-31 credit hours):
Biol 111-112, Biological Principles ............................... 8
Biol 215, Principles of Environmental Science ............ 3
Biol 309, General Ecology ...................................... 4
Biol 335, Natural Resources Policy Seminar ............... 1
Biol 409, Internship ............................................. 0-3
Biol 410, Senior Seminar ..................................... 3
Econ 202, Principles of Economics ............................ 3

Econ 207, Introduction to Statistics ............................ 3
PsSc 210, Introduction to Public Policy ......................... 3

These core courses equip all majors to analyze environmental issues from biological, economic and social/political points of view. All of these tools are necessary for addressing questions of human ecology. When students declare the environmental studies major, they will, with their academic adviser, choose an area of concentration that reflects their interests and career goals. Available areas of concentration are listed on the following page.

Recommended electives
Hist 345, Environmental History; Biol 200, Zoology; Biol 201, Botany; Biol 300, Microbial Biology

Concentration options (28 credit hours)
Agroecology
Biol 201, Botany of Seed Plants .............................. 4
Biol 220, 230, 316, 318 ........................................ 12
Summer program at Merry Lea, studying four courses simultaneously:
Vegetable Crops, Agroecology, Properties and Management
of Soils, Small Farm Management and Produce Marketing
Biol 308, Entomology ........................................... 4
Biol 312, Land Management .................................. 4
Chem 111, General Chemistry ................................ 4
Conservation biology
Biol 301, Genetics ............................................. 4
Biol 312, Land Management .................................. 4
Chem 111-112, General Chemistry ......................... 8
Chem 303, Organic Chemistry ............................... 4
Selected field biology courses ............................... 8

Environmental analysis
Biol 300, Microbial Biology ................................. 4
Chem 111-112, General Chemistry ......................... 8
Chem 200, Analytical Chemistry ............................ 4
Chem 303, Organic Chemistry ............................... 4
Two other biology or chemistry courses approved by academic adviser .... 8

Resource management
Biol 201, Botany of Seed Plants .............................. 4
Biol 312, Land Management .................................. 4
Biol 345, Forest Resources ................................... 4
Chem 111-112, General Chemistry ......................... 8
Field courses approved by adviser .......................... 8

**Field biology courses**

Most field biology courses in the environmental science major take place at the Merry Lea Environmental Learning Center of Goshen College, a 1,150-acre natural area 30 miles from campus. This preserve contains prairies, grasslands, upland forests, lowland forests, lakes, ponds and senescent bogs. The marine biology course is taken at the Goshen College Marine Biology Laboratory, located on Long Key, Fla. Additional field courses are available through the Au Sable Institute, a field station with three U.S. locations and two international programs. The Great Lakes campus of Au Sable is close to Mancelona, Mich. – near state and national forests, Lake Michigan, two rivers and numerous ponds, bogs, etc. Summer programs and a May term are available at the Great Lakes campus. Au Sable-Pacific Rim offers a summer program from their campus on Whidbey Island in the Puget Sound. Au Sable-Everglades offers a program at the Educational Concerns for Hunger Organization (ECHO) tropical demonstration farm at North Fort Myers, Fla., with a focus on sustainable tropical agriculture. Au Sable-India, located near Tamil Nadu, South India, offers a summer program in the natural history, resources, conservation and ecology of the Indian tropics. Au Sable-Africa offers a summer program in tropical biology and ecological sustainability from their campus near Nairobi, Kenya.

**Practical experience in environmental science**

Students should enrich their course work in the major with appropriate experiences/internships. Many Goshen students have worked on projects in environmental education, city planning, municipal water quality assessment, organic agriculture, conservation biology, urban forestry, wilderness trail and facility maintenance, restoration ecology, wetland construction and planting and field biology. Appropriate international experience can be gained on SST, in Au Sable-India and Au Sable-Africa programs and with specially arranged programs.

**Agroecology program**

Four agroecology courses are taught at the Merry Lea Environmental Learning Center during a summer session: Biol 220, Biol 230, Biol 316 and Biol 318. Permission of the director of environmental science is required.

**Minor in environmental science**

(18-19 credit hours)
A minor in environmental science is appropriate for elementary and secondary teachers, regional planners, interpretive naturalists, park and camp managers, water and air resource analysts, environmental policy makers, bioinformation specialists and artists wishing to represent the natural world.

Field studies in the minor are usually based at the Merry Lea Environmental Learning Center or the Marine Biology Laboratory. Additional field study can be done at the Au Sable Institute. See descriptions of these field study sites under the environmental science major (above).

**Requirements:**

Biol 111-112, Biological Principles ................................. 8
Biol 215, Principles of Environmental Science .................. 3

Choose 7-8 credit hours from the following field biology courses:

Biol 201, Botany of Seed Plants
Biol 304, Marine Biology
Biol 308, General Entomology
Biol 309, General Ecology
Biol 312, Land Management
Biol 340, Field Experience in Environmental Education
Biol 345, Forest Resources
Biol 350, Ornithology

Appropriate Au Sable courses may be selected with approval of your environmental science adviser.

**Biology courses**

**Biol 100  The Biological World ........................................ 3**
A general education science class designed to provide a background of biological principles in order to help the student understand and evaluate current issues. Laboratory exercises will document and test these principles.

**Biol 111-112  Biological Principles .......................... 4, 4**
This course emphasizes the basic principles underlying all fields of biology, including diversity, water biology, energy flow, inheritance, life cycles and communication. Surveys plant and animal taxa, with special emphasis on vascular plants and vertebrate animals. This course is for science majors and others interested in a rigorous introduction to biology. Either Biol 111 or Biol 112 may be taken first.

**Biol 154  Human Biology ........................................ 3-4**
A biological study of how the body functions, of the diseases/disorders that can disrupt the normal functioning of the body and of strategies for the prevention of disease. Includes an exploration of human genetics and its role in disease. Current issues related to human health are discussed. Laboratory exercises will introduce students to scientific principles affecting the body. A four-credit option, with extra material on the muscular and skeletal system, is offered in even numbered years for physical education majors. (fall semester)

**Biol 200  General Zoology ........................................ 4**
A survey of representative animal groups from Porifera through Chordata. Includes anatomy, morphology, systematics, life histories and ecology. Three lectures, one three-hour lab. Prerequisite: Biol 111-112 or permission of instructor. (spring semester 2007-08, 2009-10)

**Biol 201  Botany of Seed Plants .......................... 4**
A major study of the stems, roots, leaves, flowers, fruits and seeds of the advanced vascular plants. Emphasis is placed on plant anatomy, morphology and physiology. Two lectures and two two-hour labs. Prerequisite: Biol 111-112 or permission of instructor. (fall 2008-09, 2010-11)

**Biol 203-204  Human Anatomy and Physiology .............. 4+3**
A study of the organ systems of the human body, their gross and microscopic structure and their functions. Laboratory demonstrations and dissections. Three lectures, one three-hour lab. With permission of the instructor, biology majors may take Biol 204 for two hours of lecture only. Prerequisite: one semester of college chemistry. (203 is offered in the spring semester, 204 in the May term.)

**Biol 206  Microbiology ........................................ 3**
A general study of microorganisms and their relations to health and disease, with practical applications valuable to the nurse. Includes the characteristics and activities of microorganisms, procedures for
sterilization and disinfection; methods of growing and studying organisms; and techniques of diagnosis, treatment and prevention of diseases; as well as a brief survey of the major pathogenic groups. Three lectures, one two-hour lab. Prerequisite: one semester of college chemistry. Not for the biology major. (spring semester)

Biol 209 Field Experience ........................... 1-3

Practical experience in biology, typically in a relevant off-campus experience. Off-campus positions may include various types of work (employed or volunteer) in university, hospital or other medical, veterinary, agricultural and industrial facilities or nature centers and camps. Students are encouraged to develop their own ideas. Taken only as credit/no credit. Prerequisite: consent of adviser.

Biol 210 Biology of the Sea ......................... 4

An introductory course to enable the student to recognize the more common marine plants and animals and appreciate such an ecosystem. An elective suitable for elementary-education students. Does not count toward biology or natural-science major. The course will be given on location in the Florida Keys. Lecture-lab approach. Prerequisite: application process and consent of instructor. Moderate extra cost. (May term)

Biol 215 Principles of Environmental Science .......... 3

Introduction to natural resources (forests, wetlands, water, air, climate, soils, etc.), human use and impact on resource supply, pollution and sustainability. A critique of the land use history and ethics in the United States will then frame the discussion of the human ecology and the development of a vision of sustainability. Prerequisite: Biol 111-112 or consent of instructor. (spring semester 2008-09, 2010-11)

Biol 220 Soil Properties and Management ............. 3

A comprehensive introduction to the field of soil science with emphasis on scientific principles and their application to solve practical soil management problems. Topics will include soil formation, soil physical properties, soil organisms and ecology, and practical nutrient management. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 230 Small Farm Management and Produce Marketing .. 3

This course teaches skills necessary for making a farm or market garden an economic success, including finding land; planning appropriate marketing strategies for selected crops, and managing income and expenses. Community supported agriculture (CSA) and other direct marketing options will be studied and local farmers and entrepreneurs will share from their experience. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 300 Microbial Biology .......................... 4

Study of the anatomy, physiology and natural history of microorganisms, particularly bacteria and viruses. Such organisms are studied in their roles in the environment, health and disease. Includes techniques involved in isolating, culturing and analyzing microbial organisms. Prerequisites: Biol 111-112. (May term)

Biol 301 Genetics ................................. 4

Introduction to genetics including classical, molecular and population concepts. Includes discussions of the moral and ethical implications related to genetic principles and techniques. The laboratory will include individual experiments with living organisms and modern genetic biotechnology. Three lectures and one laboratory/discussion session per week. Prerequisites: Biol 111-112. (spring semester)

Biol 302 Developmental Vertebrate Biology ............ 4

Principles of vertebrate development with study of developing systems in chicken and human embryos. Material covered includes the molecular genetics of developmental processes and cancer. Three lectures and one lab per week. Prerequisite: Biol 111-112. (fall semester 2008-09, 2010-11)

Biol 303 Vertebrate Physiology ....................... 4

A concentrated study of the principles of vertebrate physiology. Material covered includes various topics of significance in the biomedical field, including cellular, nervous, muscular and cardiovascular physiology. Laboratory activities will cover the same topics, frequently including computer based data acquisition. Three lectures and one laboratory session per week. Prerequisites: Biol 111-112 or Biol 203-204. (fall semester 2007-08, 2009-10)

Biol 304 Marine Biology ............................ 4

A concentrated field study in the Florida Keys to enable the student to recognize common shallow-water marine plants and animals and appreciate various marine ecosystems. Requires completion of a comprehensive collaborative field research project. The course is given on location. Prerequisites: Biological Principles, Biol 111-112, application process and consent of instructor. Moderate extra cost. (May term)

Biol 307 Molecular Cell Biology ..................... 4

Examination of the structure and function of cells. Includes individual and group demonstrations of how cells are studied including genomics. Emphasis on molecular organization and phenomena associated with eucaryotic cells. One lecture, two three-hour labs. Prerequisites: Biol 301 and Chem 111-112 or consent of instructor. (spring semester 2008-09-10)

Biol 308 General Entomology ....................... 4

A general study of insect structure, development, classification and habits. Laboratory sessions particularly directed at identification of insects and their economic roles. Three lectures and one three-hour lab per week. Prerequisite: Biol 111-112. Biol 200 strongly recommended. (spring semester 2007-08, 2009-10)

Biol 309 General Ecology ........................... 4

A study of the distribution and abundance of organisms. The course will include studies of the dynamics of natural Biol communities and the interaction of these communities with the abiotic environment. The impact of humans on natural ecosystems and concepts of sustainable living will be addressed. Taught as a concentrated field course at the Merry Lea Environmental Learning Center. Prerequisites: Biol 111-112. (May term 2007-08, 2009-10)

Biol 310 The Plant Kingdom ......................... 4

An in-depth study of the classification, structure and relationships of organisms that botanists have traditionally studied. Algae, bryophytes and primitive vascular plants are given extensive coverage. Taught as field course at the Merry Lea Environmental Learning Center with minimal lecture time. Prerequisite: Biol 111.

Biol 312 Land Management .......................... 4

Basic principles of the management of natural ecosystems for various values and functions. Includes principles of restoration of disappeared or damaged ecosystems. Focus on wetlands, prairies and natural grasslands, and forests, primarily as a field course. Field work at Merry Lea. Environmental science majors receive preference in registration. All others by consent of instructor. Prerequisite: Biol 111-112. (spring semester 2007-08, 2009-10)
Biol 315 Conservation ............................ 3
A study of the need for and the best methods of conservation of our natural resources from an ecological approach. Emphasis on ecological principles related to populations, soil, water, forest, wildlife, pesticides, waste, pollution and energy. Includes first-hand study of natural areas, erosion, conservation practices, impact of humans and some all-day field trips. Prerequisite: one physical science and one biological science course at the college level. Extra cost for field trips. (May term)

Biol 316 Vegetable Crops ......................... 3
This course provides an understanding of the role of the environment in plant growth and development and focuses on the basic principles of sustainable vegetable production. Topics will include environmental factors influencing plant growth and crop production, preparing and planting the field, extending the growing season, and handling crops after harvest. Students will practice production techniques on college-operated acreage. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 318 Agroecology ............................... 3
Study of sustainable food production, investigating the ecological impacts of manipulating natural systems to produce food, feed, fiber and medical products. Ecological concepts are discussed and their principles applied to sustainable food production that supports community culture and economy. Topics will include the theoretical basis of agroecology, alternative production systems, and ecological management of diseases, insect pests and weeds. This course constitutes one of the four courses taught during the summer agroecology program. Permission of the director of environmental science is required.

Biol 320-321 Human Pathophysiology .......... 3+3
An introductory study of the biology of diseases. Examines causes of disease and bodily response processes. A survey of both disorders that affect the body as a whole and disease of individual organs. Intended for students in allied health professions. Prerequisite: Biol 203-204 or consent of instructor. (fall and spring semesters)

Biol 330 Research Seminar ...................... 1
An exploration of opportunities in research at the undergraduate level, graduate level and for a career. Includes an introduction of ongoing departmental research programs, discussion and demonstrations by current student participants of their projects, examination of new discoveries reported in the current literature and discussions of opportunities for student participation in our research program for advanced biology credit.

Biol 335 Natural Resources Policy Seminar .... 1
To be taken in conjunction with Introduction to Public Policy, PoSc 210. Focus on U.S. natural resources policy (clean air, clean water, forest service policy, etc.) and the structure of the governmental agencies responsible for natural resources (Forest Service, Army Corps of Engineers, EPA, IDNR, IDEM, etc.). (spring semester 2008-09, 2010-11)

Biol 340 Field Experience in Environmental Education . . . . 1-3
Participants will develop and conduct interpretive programs in nature study for visiting school groups; observe practices related to managing a natural area and participate in discussions of environmental issues. Instruction takes place at the Merry Lea Environmental Learning Center. Enrollment by permission of instructor only. Not offered in spring semester. Prerequisite: one semester of college-level biology. (fall and May terms)

Biol 345 Forest Resources .......................... 4
Study of the function, value and use of forest resources, including management of forests for harvest, water quality, biodiversity, aesthetics and recreation. Significant time spent in the field at forestland sites. Environmental science majors receive preference in registration. All others by consent of instructor. Prerequisite: Biol 111-112. (fall semester 2008-09, 2010-11)

Biol 350 Ornithology ............................... 4
Natural history, taxonomy, and conservation of birds. Includes much work on visual and aural identification of birds in the field. Taught during the May term at Merry Lea Environmental Learning Center. Prerequisite: Biol 111-112. (May term)

Biol 355 Limnology ................................. 4
Study of the geochemistry and biological communities of wetlands, lakes and streams. Primarily a field course, with significant time spent at Merry Lea and environs. Prerequisite: Biol 111-112.

Biol 375 Topics in Biology: (Special Topic) ....... 1-4
Classroom and/or laboratory study in a major area of biology not covered by regular courses. Prerequisite: consent of instructor.

Biol 400 Biology Research ....................... 1-4
On-campus participation in a research project. Prerequisite: consent of faculty supervisor.

Biol 409 Internship ................................ 1-3
Practical experience in biology including professional levels of responsibility. Activities may be similar to those described for Biol 209, but with a higher degree of independent responsibility in the experience, as would be appropriate for a traditional apprenticeship. Students are encouraged to develop their own ideas. Taken only as credit/no credit. Prerequisite: consent of adviser.

Biol 410 Biology Senior Seminar ............... 3
An exploration of the interactions between biology and other areas of human concern, especially ethics and theology. Includes lectures, discussion and preparation of a paper. Prerequisite: senior standing. (fall semester)

Au Sable courses:
The Au Sable Institute, described above in “Field biology courses,” under the environmental science major, offers a variety of summer field courses and internships in several locations. These courses will appear as Biol 360-380 on student transcripts. See the environmental science coordinator for the current course catalogue.
The business department offers three majors: accounting, business and business information systems. In addition, it offers five minors: accounting, business, business information systems, entrepreneurship and global economics. A certificate program in business administration is also offered. Adult students interested in an evening program should see the Division of Adult and External Studies (DAES) section for a major in organizational leadership.

Some students seek a double major, or a major and minor, in our department. Note that a double major is not possible for accounting plus business, nor business information systems plus business, since there is very significant overlap in the courses required for these majors. A major plus minor is appropriate in these areas.

In addition to degree programs, the business department sponsors two continuing education programs for businesses: Family Business and Management Development. See information below.

**Career opportunities**

There is presently a very strong demand for graduates of these majors. Students with a degree from the business department are awarded with career opportunities with a broad range of businesses and nonprofit organizations. Students also create success in entrepreneurial settings. Numerous graduates have gone on to do graduate work in business, information systems, law, public policy and economics, completing degrees at the master's and doctoral level.

**Accounting:** Accounting majors have career opportunities in auditing, financial analysis, financial planning, taxation, as chief financial officers and controllers. Successful accountants possess a balance of quantitative and qualitative skills. Employers look for both problem-solving and relational skills.

**Business Information Systems (BIS):** BIS majors are in demand as consultants; to provide system-related support in a variety of positions and fields; to help maintain networks; to design and produce information systems, including e-commerce related functions. Projected to be one of the fastest growing jobs and best-paying areas according to the U.S. Bureau of Labor Statistics.

**Business:** Business graduates are currently working in business, industry, education, banking, overseas development, church offices and many not-for-profit settings. Their careers span the fields of marketing, human resources, management, finance and operations. Many also work in consulting or start their own businesses.

**Economics:** Global economics minors continue to find employment with business, government and in education.

**Entrepreneurship:** Entrepreneurship minors develop businesses and nonprofit organizations to complement their interests and major course of study. Previous Goshen College graduates currently successfully operate a variety of businesses. Coursework designed for students who may want to work in a family business, start their own business, manage a small business or start a professional practice or skill-based business.

**Admission to department**

All students are welcome to take courses in the business department, guided by their interest and course prerequisites (if required). To be officially admitted as a major in the department the student must:

a. Complete all lower level major and related requirements with a grade point average of 2.0 or above.

b. Complete a Goshen College Plan of Study with academic adviser.

c. Formally apply for admission to the business department with signature of academic adviser.

**Department majors**

**Planning guide**

**First year**

- General education
- Mathematics
- Introduction to Entrepreneurship (optional elective)
- Principles of Accounting: Financial
- Office Software Productivity

**Second year**

- General education
- Principles of Accounting: Managerial
- Principles of Economics
- Introduction to Statistics
- Accounting Information Systems
- Cost Accounting
- SST

**Third year**

- General education
- Intermediate Accounting
- Federal Income Tax: Individual
- Business Law
- Business Career Planning

**Fourth year**

- Balance of general education
- Balance of accounting major
- Internship
- Management Policy and Social Responsibility

**Planning notes**

Bus 121 is an excellent first-year elective course for students exploring their business interests; Acc 201 and 202 must be completed in the first two years; Acc 210 is intended for the second year; SST should come in the first two years or summer of the third year.
150-hour program in accounting
In many states, 150 hours of undergraduate or graduate education is required for individuals to sit for the Certified Public Accounting (CPA) examination. Goshen College offers several options for students desiring to complete 150 hours. Students can choose to complete all 150 hours at Goshen College through any of the following options:

Accounting and business (not a double major)
All the current accounting major requirements (52 hours) plus completion of:
- Acc 434, Federal Income Tax: Corporate
- Bus 315, Principles of Management
- Bus 317, Financial Management
- Bus 403, Management Strategy
- Nine hours of upper-level electives in business, economics or business information systems

Electives from any department (to complete 150 hours) 6-9

This program is designed to give the student a broader understanding of business and the role of the professional accountant as a business adviser.

Accounting and business information systems (double major)
All the current accounting major requirements (52 hour major) plus:
- Acc 434, Federal Income Tax: Corporate
- Bus 315, Principles of Management
- Seven BIS core courses: 250, 305, 310, 335, 340, 405, 407
- One related course: CoSc 200
- Elective in department

The internship could potentially include a significant experience in business information systems.

This program is designed to equip the professional accountant to work, consult and advise effectively in the business information systems arena, as well as accounting.

Accounting plus minors in business and in business information systems (BIS)
All the current accounting major requirements (52 hour major) plus:
- Acc 434, Federal Income Tax: Corporate
- Bus 315, Principles of Management
- Bus 316, Principles of Marketing
- Bus 317, Financial Management
- Bus 403, Management Strategy
- Four BIS courses from the BIS core courses
- Elective in department

This program is similar to the previous one but includes a broader exposure to the functional areas of business.

Finally, a student can meet the state’s 150-hour requirement by completing an accounting degree at Goshen College and transferring to another institution to complete a master’s degree. Goshen College is committed to developing and maintaining articulation agreements with various Indiana institutions to facilitate this option.

Minor in accounting
 Acc 201-202, Principles of Accounting
 Econ 201 or 202, Principles of Economics
 Acc 302, Intermediate Accounting
 six additional hours of accounting

(Accounting and business information systems majors must take 12 hours of accounting beyond the major, including Acc 302. Courses must be selected with approval of your adviser.)

Accounting courses

**Acc 201** Principles of Accounting: Financial ............... 3
Development of principles underlying financial statements and accounting procedures. Basic accounting terminology and concepts of both financial and managerial accounting. Emphasis on analyzing and understanding financial statement information.

**Acc 202** Principles of Accounting: Managerial .............. 3
Development of principles used in planning, controlling and evaluating organizational decision making. Primary topics are cost behavior, costing systems, profitability analysis and budgeting. At the conclusion of this course students will be able to conduct cost-volume-profit analysis, compute break-even points, prepare budgets, conduct variance analysis, do job costing, relevant cost analysis and capital budgeting. **Prerequisite: Acc 201.**

**Acc 210** Accounting Information Systems ..................... 3
Create an accounting system using a popular business software package. Gain understanding of internal control systems and organizational relationships with utilization of a computerized business system. Concentrates on the transaction cycles of cash receipts, cash disbursements, purchasing, sales, inventory control and management reporting. **Prerequisite: Acc 201.**

**Acc 301** Cost Accounting ............................................ 3
A study of how accounting information is used and communicated by managers to plan, control and evaluate decisions. Primary topics include cost behavior, cost-volume-profit analysis, costing systems, variance analysis, cost-allocation issues, budgeting and pricing decisions. This course is a continuation of the principles learned in Acc 202. Case studies are used extensively in this course. **Prerequisite: Acc 201-202, BIS 220 or Bus 150.**

**Acc 302-303** Intermediate Accounting ....................... 3+3
Development of accounting theory and practice by critically analyzing each element of the financial statement. Concentration on a conceptual approach to accounting information and reporting. Courses must be taken in sequence. **Prerequisite: Acc 201-202.**

**Acc 304** Federal Income Tax: Individual ......................... 3
A comprehensive study of the current income tax laws as they apply to individuals and sole-proprietorships. Emphasis is placed on applying the tax laws for tax return preparation. Students are also introduced to tax research and tax planning. Students will participate in a tax preparation program for the Goshen community. **Prerequisite: Acc 201-202.**

**Acc 375** Topics in Accounting ...................................... 1-4
Depth study on a selected topic in accounting. Intended to accommodate student interest and/or faculty expertise in specific accounting issues. Issues may vary from year to year.

Acc 400 **Selected Readings** ................................. Credit Arranged
Special topics for majors and minors.

**Acc 405** Auditing ..................................................... 3
Study of the attest function and the responsibility of a Certified Public Accountant as an independent auditor of financial information. Includes study of the CPA Code of Professional Ethics and the legal liability of auditors. **Prerequisite: Acc 302-303.**

**Acc 408** Accounting Internship ................................. Credit Arranged
Work experience in professional accounting. Limited to accounting
majors. Student must be approved by department faculty and accepted by a firm through an interview. Interested students should contact the supervising instructor during the junior year.

**Acc 409 Internship in Accounting** .......................... 3
Work experience in, or student observation of, a business enterprise or problem. Each student's project is individually arranged with the instructor. The course is designed to integrate and apply theoretical learning with experience.

**Acc 432 Government and Not-for-Profit Accounting** ........ 3
The study of accounting theory and practice relating to governmental entities and not-for-profit organizations. *Prerequisite: Acc 201-202.*

**Acc 434 Federal Income Tax: Corporate** ................. 3
Study of the current tax laws applicable to C corporations, S corporations, partnerships and limited-liability companies. Students are introduced to tax research and tax planning for these business entities. Also included is an introduction to tax law related to not-for-profit organizations, trusts, estates and gift taxation. *Prerequisite: Acc 304.*

**B. Business**

**Major in business**
Completion of the following general education courses:
- Math 141, Finite Math or Math 170, Precalculus or Math 211, Calculus 1 or Math 205, Discrete Math (determined based on high school math courses and SAT/ACT scores)
- One social science course selected from:
  - Soc 200, Soc 220, Psyc 100 or Psyc 200
Completion of the following “core” courses or equivalents, totaling 40 credit hours.
- Acc 201-202, Principles of Accounting .......................... 6
- Econ 201-202, Principles of Economics .......................... 6
- Econ 207, Introduction to Statistics ............................ 3
- BIS 220, Office Software Productivity .......................... 3
- Bus 310, Business Law ............................................ 3
- Bus 315, Principles of Management ............................... 3
- Bus 316, Principles of Marketing ................................. 3
- Bus 317, Financial Management ................................. 3
- Bus 403, Management Strategy .................................. 3
- Bus 405, Business Internship ...................................... 3
- Bus 409, Business Career Planning ............................... 1
- Bus 410, Management Policy and Social Responsibility ......... 3
Completion of an additional 12 hours elected from the department, of which nine must be upper level.

**Business education**
Teacher certification is available for grades 5-12. Courses needed in addition to core major requirements are Bus 102, Bus 322, Bus 328, and Econ 306 or Bus 350. Also required are 30 credits of education courses, including a semester of student teaching. PJC 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the *Teacher Education Handbook* for more details about requirements.

**Planning guide**

**First year**
- General education
- Introduction to Entrepreneurship (optional elective)
- Mathematics
- Principles of Accounting: Financial
- Principles of Economics, 202

**Second year**
- General education
- Principles of Economics, 201
- Principles of Accounting: Managerial
- Introduction to Statistics
- SST (spring or summer)

**Third year**
- General education
- Management, Marketing, Financial Management, Business Law
- Upper-level courses in major
- Business Career Planning
- A summer internship between third and fourth year is strongly encouraged

**Fourth year**
- Balance of general education
- Balance of major
- Management Strategy
- Management Policy and Social Responsibility

**Planning notes**
Bus 121 is an excellent first-year course for students exploring their business interests. Acc 201 and 202, Econ 201 and 202 and 207 and SST should normally be scheduled in the first two years. Additional math courses are encouraged for students anticipating graduate school.

**Minor in business**
- Acc 201, Principles of Accounting: Financial .................. 3
- Econ 201 or 202, Principles of Economics ..................... 3
- 12 additional hours of accounting, business, business information systems, and/or economics, of which nine must be upper level. ....... 12

(For the business minor, accounting and business information systems majors must take nine hours in business and economics beyond the major. Courses must be selected with approval of the adviser.)

**Certificate: business administration**
- Bus 121, Introduction to Entrepreneurship ...................... 3
- Acc 201, Principles of Accounting: Financial .................. 3
- Bus 315, Principles of Management ............................... 3
- Econ 201, Principles of Economics ............................... 3
- Econ 202, Principles of Economics ............................... 3
- SST term
- Elective in business .............................................. 3
- Bible or religion .................................................. 3
- Electives ......................................................... 9

(Usually scheduled for completion in one year. Specific courses may vary depending on previous training, experience and/or maturity of student. Courses selected with the approval of adviser.)

**Business courses**

**Bus 102 Advanced Keyboarding** .......................... 3
Manipulative skill development in the use of computer/typewriter keyboards, including numerical keypad. Skills development in the production of letters, reports, tables and other word processing communications using a leading software package. (Available as independent study.)

**Bus 121 Introduction to Entrepreneurship** ................. 3
Introduces the various activities that entrepreneurs undertake, from recognizing an opportunity to launching a business. Provides an overview of developing and testing a business concept, the components of a business plan and planning for growth and change. Additional

- **Bus 150 Introduction to Microcomputers**
  - 3 credits
  - An introduction to personal computers and their common uses.
  - Hands-on experience with word processing, spreadsheets, data base management, presentation graphics, the Windows operating systems and the Internet. Students work in a hands-on computer lab and gain experience with the software and concepts through completion of exercises and lab problems.

- **Bus 210 Basic Spreadsheet Applications**
  - 1-2 credits
  - Introduces the student to the features and functions of a commercial spreadsheet software for the microcomputer. Hands-on exercises and cases illustrate the use of spreadsheet software in common business applications. A working knowledge of microcomputers is required. (Credit not available for this course and Bus 150.)

- **Bus 215 Entrepreneurial Finance**
  - 3 credits
  - Designed to introduce the basics of business finance and accounting to nonfinancial managers or students who anticipate acquiring or starting a new venture. Builds understanding of key financial statement and day to day accounting and finance issues, tips for improving financial efficiency and strategies for pursuing financial growth.

- **Bus 217 Personal Finance**
  - 3 credits
  - Designed to introduce students to the basics of personal finance. A survey course of personal and family financial planning with an emphasis on financial recordkeeping, planning your spending, tax planning, consumer credit, making buying decisions, purchasing insurance, selecting investments and retirement and estate planning.

- **Bus 306 Human Resource Management**
  - 3 credits
  - Provides a comprehensive understanding of what effective firms in competitive environments are doing to manage their human resources as successfully as possible. Topics include the major issues facing human resource management and the various human resource activities.

- **Bus 308 Office Administration and Technology**
  - 3 credits
  - Principles of management, problem-solving, systems and communications as applied to office administration; the role of people in using the tools of information technology to increase productivity; records management, space, furniture, equipment and office automation. (Available as independent study.)

- **Bus 310 Business Law**
  - 3 credits
  - Survey of legal principles. Topics include liability, contracts, sales and negotiable instruments; also, secured transactions, agency, partnerships, corporations and antitrust.

- **Bus 315 Principles of Management**
  - 3 credits
  - Founded on the four major managerial functions: planning, organizing, leading and controlling. The process of management is applied to the functions of a business enterprise. Other topics include motivation, problem-solving and the coordination, communication and human relations aspects of management.

- **Bus 316 Principles of Marketing**
  - 3 credits
  - The nature of marketing in our society; how organizations develop marketing strategies that enable them to meet their objectives and the needs of their customers; the relationship of marketing to other management functions.

- **Bus 317 Financial Management**
  - 3 credits
  - Introduces students to the primary elements of organizational finance such as time value of money, stock and bond valuation, forecasting, working capital management, capital budgeting and structure and dividend policy. Prerequisite: Acc 201-202, Bus 150 or BIS 220, Econ 202.

- **Bus 318 Production/Operations Management**
  - 3 credits
  - Decision-making and quantitative analysis of production problems arising in areas of methods analysis, plant location, facilities design, production planning and control, inventory management, work measurement, job design, worker safety and health, materials handling and quality control.

- **Bus 319 Leading Nonprofit Organizations**
  - 3 credits
  - An exploration of how business principles apply to leading nonprofit organizations. Course provides students with the concepts, techniques and illustrations needed for effective nonprofit organizational management. Topics covered will include management and motivation of staff, trustees and volunteers, marketing, financial management, fund raising, planning, ethics, social responsibility, partnerships and sustainability.

- **Bus 320 Marketing Research**
  - 3 credits
  - A comprehensive overview of the nature and scope of marketing research and its role in decision support systems. Course focuses on the practical aspects of marketing research and provides a framework for conducting quantitative and qualitative research. Prerequisite: Bus 316 or consent of instructor.

- **Bus 322 Organizational Communication**
  - 3 credits
  - (See Comm 322)

- **Bus 327 Internet Business Strategies**
  - 3 credits
  - The Internet is a powerful global force that is influencing, and in some cases significantly changing business practices. The Internet can be a valuable business tool for marketing, customer and supplier relationship management, supply chain and inventory management and of course product sales. This course uses a strategic business planning approach to evaluating and implementing business functions on the Internet.

- **Bus 328 Venture Planning**
  - 3 credits
  - In this course students write business plans for an entrepreneurial venture. Areas of exploration include recognition of opportunity, pre-venture planning, start-up, strategy, negotiation and funding. Emphasis is also placed on the management of organizational growth and change. Attention is given to special concerns of small-firm management.

- **Bus 330 Entering Family Business**
  - 3 credits
  - The business, personal and interpersonal issues associated with a family-owned and managed firm are explored in this course. Topics include: the competitive strengths and weaknesses of a family firm; the dynamics of family interactions and the family business culture; conflict resolution; estate planning and planning for succession.

- **Bus 332 Investments**
  - 3 credits
  - In this course students will learn how to research, formulate and implement investment plans through portfolios constructed and monitored by students. Analytical frameworks and investment strategies that target objectives will be established and utilized. Also, decision making tools such as security valuation and leverage analysis models will be explored. Prerequisite: Bus 317 or consent of instructor.

- **Bus 336 Advertising**
  - 3 credits
  - This course covers a managerial approach to developing advertising...
strategies; the use of advertising as a marketing tool; the creative process; evaluation of the effectiveness of advertising; the role of advertising in our society. Prerequisite: Bus 316 or consent of instructor.

Bus 338 Sales ........................................ 3
An introduction to the dynamic world of selling. A pragmatic approach to the techniques and skills used by professional sales persons. Includes role playing and the development of a sales presentation.

Bus 340 Advanced Spreadsheet Applications .............. 1-2
Further practice in applying the features and functions of a commercial spreadsheet are provided. Emphasis is on overall spreadsheet design as well as the use of macros and spreadsheet publishing features. Much of the work is done independently by the student, in consultation with the instructor. Applications are drawn from common business and accounting problems. Prerequisite: Bus 150 or BIS 220 or consent of instructor.

Bus 350 International Business .......................... 3
International business is the field of study that focuses on business activities that cross national boundaries. It includes exports and imports – the subject of traditional international trade discussions – as well as foreign direct investment, international banking, the international transfer of technology and global business strategy. The cultural environment of international business is considered in some detail. The course presents the important activities of an international firm and a framework for analysis from a manager's perspective. Case studies are used in the course. Prerequisites: Econ 201-202 and Acc 201-202 or consent of instructor.

Bus 360 Java Junction Management ........................ 3
The purpose of this course is to give students the opportunity to manage a real business. Java Junction, a coffee shop located in the KMY Connector, is completely student-run and student-managed. Student managers, under the supervision of a business faculty member, have full responsibility for all management and operating decisions. Management positions include accounting, human resources, marketing, operations, purchasing and special events planning and coordination. The management team reports regularly to an Advisory Board who serves as Java Junction's Board of Directors. Managers are selected by the business department through an application process. Entrepreneurial students and those energized by challenges are encouraged to apply. This course is repeatable.

Bus 375 Topics in Business ................................. 1-4
Depth study on a selected topic in business. Intended to accommodate student interest and/or faculty expertise in specific business issues. Issues may vary from year to year (example: Business in Spain).

Bus 400 Selected Readings ............................... Credit Arranged
Special topics for majors and minors.

Bus 402 Applied Entrepreneurship .......................... 3
This course is awarded to recipients of Entrepreneurship Grants to provide time and business departmental guidance for student to start a business.

Bus 403 Management Strategy .............................. 3
A study and evaluation of management strategies to achieve organizational goals and objectives. Utilizes management principles, financial analysis and control, personnel decisions and marketing strategies to solve case/simulation problems. Prerequisites: Bus 315, 316 and 317 or consent of instructor.

Bus 405 Business Career Planning ......................... 1
The course will provide a framework within which to appraise career options, set goals and implement a plan to reach goals. Topics include self-appraisal, résumé, developing a job-search strategy, interviewing for jobs, choosing the first job and graduate school opportunities.

Bus 409 Internship in Business ............................. 3
Work experience in, or student observation of, a business enterprise or problem. Each student's project is individually arranged with the instructor. The course is designed to integrate and apply theoretical learning with experience.

Bus 410 Management Policy and Social Responsibility .... 3
A broad examination of the responsibilities of business to society and social expectations of business. Topics include: business and its environment; corporate social responsibility; ethics; government regulation of business. Intended as the capstone senior seminar. Prerequisite: Senior standing in department or consent of instructor.

C. Business information systems

Major in business information systems

Completion of the following courses or equivalent:

Business information systems courses:

- Bus 220, Office Software Productivity ...................... 3
- Bus 250, Introduction to Business Programming .......... 3
- Bus 305, Introduction to Information Systems ............ 3
- Bus 310, Information Technology Hardware and Networks 3
- Bus 335, Systems Analysis and Design .................... 3
- Bus 340, Database Management Systems .................. 3
- Bus 405, Project Management and Practice ............... 3
- Bus 407, Web Application Development .................... 3
- Bus 409, Internship ........................................ 3

Business courses:

- Acc 201-202, Principles of Accounting .................... 6
- Econ 201-202, Principles of Economics .................... 6
- Econ 207, Introduction to Statistics ........................ 3
- Bus 315, Principles of Management ........................ 3
- Bus 405, Business Career Planning ........................ 1
- Bus 410, Management Policy and Social Responsibility 3

Related courses:

- CoSc 200, Programming Techniques ...................... 4
- Mathematics ................................................. 3-4
  - Math 141, Finite Mathematics or
  - Math 170, Precalculus Mathematics or
  - Math 211, Calculus 1 or
  - Math 205, Discrete Math
  (determined based on high school math courses and SAT/ ACT scores)

Planning notes

Bus 121 (an elective) may be helpful as a first-semester exploratory course. Bus 150 required for students not prepared to enter BIS 220.

Planning guide

First year

- General education
- Introduction to Entrepreneurship (optional elective)
- Mathematics
- Principles of Economics, 202
- Principles of Accounting: Financial
- Office Software Productivity
**Second year**
- General education
- Principles of Economics, 201
- Principles of Accounting: Managerial
- Introduction to Statistics
- Introduction to Business Programming
- SST (spring or summer)

**Third year**
- General education
- Principles of Management
- Upper-level courses in major
- Business Career Planning
- Programming Techniques

**Fourth year**
- Balance of general education
- Balance of major
- Management Policy and Social Responsibility

---

**Minor in business information systems**

Acc 201, Principles of Accounting: Financial .................. 3
Econ 201 or 202, Principles of Economics .................. 3
Bus 315, Principles of Management .................. 3
BIS 220, Office Software Productivity .................. 3
BIS 305, Introduction to Information Systems .................. 3
BIS 310, Information Technology Hardware and Networks or BIS 335, Systems Analysis and Design .................. 3

(Business majors must take 12 hours of business information systems beyond the major. Accounting majors must take Bus 315, plus 12 hours of business information systems beyond the major. Courses must be selected with approval of adviser.)

---

**Business information systems courses**

**BIS 220 Office Software Productivity .................. 3**
Advanced skills in commonly-used office-suite software, such as spreadsheets, word processing, presentation graphics and personal databases. An introduction to Hypertext Markup Language (HTML) is also included. The focus is on using these tools in an organizational setting to improve personal and organizational productivity and effectiveness. The course currently uses the Microsoft Office Suite on personal computers. Prerequisite: Bus 150 or consent of instructor.

**BIS 250 Introduction to Business Programming .................. 3**
This course will provide an understanding of algorithm development, computer concepts and the design and application of data and file structures. It includes an understanding of the logical and physical structures of both programs and data. The course will be taught from a business perspective with business software development projects. Course will use the Visual Basic language.

**BIS 305 Introduction to Information Systems .................. 3**
A broad introduction to the Information Systems (IS) field. Accessible to anyone interested in learning about the various aspects of the IS field who may not be able to schedule additional, in-depth IS courses. Topics range from security and ethical challenges, to hardware, software, networking, e-business and IS strategy. Attention is also given to emerging trends in IS and their potential impact on organizations. Prerequisite: BIS 220 or consent of instructor.

**BIS 310 Information Technology Hardware and Networks .................. 3**
This course addresses hardware and operating systems and includes data communications and networking, and management of telecommunications networks. Prerequisite: BIS 305 or consent of instructor.

**BIS 335 Systems Analysis and Design .................. 3**
A structured approach to solving organizational problems in the context of Information Systems. The focus of the course is on determining the needs of the organization and meeting those needs through the design of an information system. Topics such as feasibility analysis, determining business requirements, documenting processes and data requirements through modeling tools, designing a new system and implementation issues are covered. An appropriate course for those considering a career as a business analyst in the consulting field. Prerequisite: BIS 305 or CoSc 215 or consent of instructor.

**BIS 340 Database Management Systems .................. 3**
Properly designed and constructed databases are crucial to ensuring business success. This course focuses on the proper design of databases and their construction. Students learn to design databases through diagramming tools, as well as learning the “language” of databases, SQL. Attention is also given to form and report development, data warehouse and data mining issues and administrative issues such as user security. Students gain experience in robust database environments such as Oracle. Prerequisite: BIS 335 or CoSc 215 or consent of instructor.

**BIS 375 Topics in Business Information Systems .................. 1-4**
Depth study on a selected topic in business information systems. Intended to accommodate student interest and/or faculty expertise in specific business information systems issues. Issues may vary from year to year.

**BIS 400 Selected Readings .................. 3**
Credit Arranged
Special topics for majors and minors.

**BIS 405 Project Management and Practice .................. 3**
Practice in managing the system life cycle; requirements determination for logical design, physical design, testing and implementation of a system. Other topics: system and database integration issues; metrics for project-management and system-performance evaluation; managing expectations of superiors, users, team members and others related to the project; determining skill requirements and staffing the project; cost effectiveness analysis; reporting and presentation techniques; effective management of both behavioral and technical aspects of the project. Prerequisite: BIS 335 or CoSc 215.

**BIS 407 Web Application Development .................. 3**
This course will cover advanced system development for the Internet with business-to-business application projects as the focus. It includes an understanding of advanced HTML concepts and database access using ASP (active server pages) and ADO (active data objects). The development environment will include Microsoft Access, Oracle, VB script, Java script and XML. Prerequisite: BIS 250 and BIS 340 or consent of instructor.

**BIS 409 Internship in Business Information Systems .................. 3**
Work experience in, and student observation of, an organization or problem related to the information systems field. Each student's project is individually arranged with the instructor. The course is designed to integrate and apply theoretical learning with experience.

---

**D. Economics**

**Minor in global economics for the non-business major**

Econ 201, Econ 202, Principles of Economics .................. 6
Econ 207, Introduction to Statistics .................. 3
Econ 306, International Economics or Econ 308, Introduction to Economic Development .................. 3
One additional upper-level economics course .................. 3
One course selected from ............................................. 3
  Bus 350, International Business
  Bus 375 Business in Spain,
  Hist 315, War and Peace in Twentieth Century Europe
  PoSc 308, International Politics
(or another upper-level course approved by the adviser)

Minor in global economics for majors in accounting,
business or BIS

  Econ 306  International Economics  ................................. 3
  Econ 308  Introduction to Economic Development  ................ 3

Three additional upper-level hours in economics; and one course selected from
Bus 350, Bus 375, PoSc 308, Hist 315 or other upper-level
international course approved by the adviser. Total 12 hours above the major.

Planning notes
Students should complete Econ 201 and 202 in first or second year.
These two courses may come in any order. Additional mathematics
beyond Math 211 is strongly urged if graduate work in economics is
anticipated. Teacher education program is available for students seeking
to teach social studies in high school.

Economics courses

Econ 201, 202  Principles of Economics  ........................... 3, 3
A general survey of economic relationships and processes in modern
society. Econ 201 focuses on macroeconomic topics: national-income
accounting, aggregate-income determination, money and banking,
and international trade. Econ 202, microeconomics, analyzes market
and price behavior under competitive and monopolistic conditions
and reviews the economic activities of government, with emphasis on
spending and taxing patterns. Either course may be taken first; both are
prerequisites for most upper-level courses in economics.

Econ 207  Introduction to Statistics  .................................. 3
Collection, presentation and analysis of numerical data. Descriptive
measures; index numbers; probability, sampling, estimation and
hypothesis testing; linear regression and correlation. Prerequisite: a
knowledge of algebra.

Econ 301  Money and Banking  ........................................ 3
Monetary theory and policy; commercial bank management and the
study of other financial institutions; the money markets; central banking
and the Federal Reserve System. Prerequisite: Econ 201.

Econ 304  Public Sector Economics  ................................. 3
Basis for public sector in an economy; mechanisms of governmental
allocation. The financing of federal, state and local governments;
principles and economic effects of taxation and expenditures.
Prerequisite: Econ 202.

Econ 306  International Economics  ................................. 3
Factors in international economic relations; international trade theory;
balance of international payments; foreign exchange; commercial
policy of the United States and other countries; foreign investment
and economic development; international economic cooperation.
Prerequisite: Econ 201-202 or consent of instructor.

Econ 308  Introduction to Economic Development  ......... 3
Provides a general overview of the development field and surveys major
issues from a range of viewpoints. Topics include trade and financial
problems faced by developing countries, evaluation of various models of
development and application of economic techniques to development
problems. Prerequisites: Econ 201-202 or consent of instructor.

Econ 375  Topics in Economics  ........................................ 1-4
Depth study on a selected topic in economics. Intended to
accommodate student interest and/or faculty expertise in specific
business issues. Issues may vary from year to year.

Econ 400  Selected Readings  ........................................  Credit Arranged
Special topics for minors.

E. Entrepreneurship

Minor in entrepreneurship

Minor for the non-business major

Required core courses:

- Bus 121, Introduction to Entrepreneurship  ......................... 3
- Bus 215, Entrepreneurship Finance  ................................ 3
- Bus 301, Principles of Management or
  Bus 316, Principles of Marketing  .................................... 3
- Bus 328, Venture Planning  ............................................ 3

(Note: Bus 315, Principles of Management or Bus 316, Principles
of Marketing may be taken as a core course. The alternative course may
also be taken as an elective.)

Electives:  ................................................................. 6
  Bus 217, Personal Finance
  Bus 319, Leading Nonprofit Organizations
  Bus 327, Internet Business Strategies
  Bus 330, Entering Family Business
  Bus 402, Applied Entrepreneurship
  Bus 409, Internship in Business
  Econ 202, Principles of Economics

Minor for majors in accounting, business or BIS

Required core courses:

- Bus 121, Introduction to Entrepreneurship  ......................... 3
- Bus 328, Venture Planning  ............................................ 3
Electives: (choose two) ....................................................... 6
  Bus 217, Bus 319, Bus 327, Bus 330 or Bus 402

F. Organizational Leadership Program

A major in organizational leadership is offered as an evening program for
adults, leading to the bachelor's degree. For further information, please
see descriptions under the DAES listing.

G. Continuing Education Programs in Family
   Business and Management Development

  Family Business Program provides a variety of educational services
for people involved in family owned and managed businesses and for
students from a family that owns and/or manages a business. The
Family Business Program Series offers quarterly seminars focusing on
topics and issues pertinent to family businesses. Other services include
Executive Breakfast meetings, affinity groups, a Family Business Library
and a referral service for family firms seeking counsel from qualified
professionals.

  Bus 330, Entering Family Business (3 hours) is an evening course
offered in the fall semester and is available to both college students and
community people involved in family businesses.

  Participation in the Family Business Program is on an annual
membership basis and is open to both family business firms and
professional firms that serve family businesses. Information about the
program is available by calling the Family Business Program office, (574)
535-7192, M. Kinsey, director.
Management Development Program provides a variety of short courses and seminars for the local business and professional community. Special programs can be designed for “in-house” presentation for individual organizations. Participants can earn continuing education units. More information is available by calling the Management Development Program office, (574) 535-7150.

Fundamental computer competency is expected. Chem 409, Chemistry Internship or an equivalent noncredit experience is required.

### Planning guide – option A

**First year**

- General education
- General Chemistry
- Calculus I, II
- Calculus III recommended (May)

**Second year**

- General education
- Organic Chemistry
- Analytical Chemistry
- SST (summer)

**Third year**

- General education
- General Physics
- Quantum Mechanics I
- Inorganic Chemistry

**Fourth year**

- Balance of general education
- Biochemistry
- Thermodynamics
- Internship
- Senior Seminar

### Planning guide – option B

**First year**

- General education
- General Chemistry
- Calculus I, II
- Calculus III recommended (May)

**Second year**

- General education
- Organic Chemistry
- General Physics
- SST (summer)
An introduction to the basic particles of matter, the modern concept of
the physical and chemical properties of some elements and compounds
are examined. Reaction equilibrium and kinetics, acid-base theory,
electrochemistry, radiochemistry and thermodynamics are included.
Lectures and laboratory. Prerequisite: Chem 100 or high-school chemistry
(grade C or better) and adequate pre-calculus math.

Chem 200 Analytical Chemistry ........................................ 4
Quantitative analysis using traditional and instrumental methods.
Lectures and laboratory. Prerequisite: Chem 111-112 or consent of
instructor.

Chem 220 Human Nutrition ............................................. 3
A study of the nutritive needs of the body in normal stages of growth
and development, food sources of nutrients, nutrient functions and
factors affecting nutrient utilization. Current U.S. and global nutritional
problems are explored. Prerequisite: Chem 101 or 111 (Biol 203 and 204
recommended).

Chem 303 Introduction to Organic Chemistry ..................... 4
Covering structure, nomenclature, stereochemistry and principal
reactions for the major functional groups of organic chemistry, this
is a one-semester survey course that gives an overview of the field.
Laboratory exercises introduce basic purification techniques. This
can be a stand-alone course for students majoring in biology and not
continuing to medical school, veterinary school, or other graduate
programs in biology and chemistry-related fields. For students with
graduate school plans, this is the first in a two-course sequence in
organic chemistry. Prerequisite: Chem 111-112.

Chem 304 Intermediate Organic Chemistry ....................... 4
Using Chem 303 as a foundation, this course presents additional
reactions (with an increased emphasis on mechanisms) and material
on stereochemistry, as well as introducing spectroscopy (IR, NMR,
GC-MS and UV-Vis). Together, the Chem 303-304 sequence covers
all topics traditionally covered in two-semester organic chemistry
courses. Laboratory experiments teach techniques for organic syntheses,
instrument (GC/MS, FT-IR, FT-NMR), and chemical information
retrieval. Prerequisite: Chem 303.

Chem 310 Thermodynamics ............................................. 4
A study of classical thermodynamics in the formulation of Gibbs.
Thermodynamic potentials, characteristic variables, stability,
and development, food sources of nutrients, nutrient functions and
factors affecting nutrient utilization. Current U.S. and global nutritional
problems are explored. Prerequisite: Chem 101 or 111 (Biol 203 and 204
recommended).

Chem 303 Introduction to Organic Chemistry ..................... 4
Covering structure, nomenclature, stereochemistry and principal
reactions for the major functional groups of organic chemistry, this
is a one-semester survey course that gives an overview of the field.
Laboratory exercises introduce basic purification techniques. This
can be a stand-alone course for students majoring in biology and not
continuing to medical school, veterinary school, or other graduate
programs in biology and chemistry-related fields. For students with
graduate school plans, this is the first in a two-course sequence in
organic chemistry. Prerequisite: Chem 111-112.

Chem 310 Thermodynamics ............................................. 4
A study of classical thermodynamics in the formulation of Gibbs.
Thermodynamic potentials, characteristic variables, stability,
and development, food sources of nutrients, nutrient functions and
factors affecting nutrient utilization. Current U.S. and global nutritional
problems are explored. Prerequisite: Chem 101 or 111 (Biol 203 and 204
recommended).

Chem 312 Quantum Mechanics I ..................................... 4
Principles of quantum mechanics are discussed beginning with a
hydrogen atom and concluding with many atom molecules. The
material is examined using the physical evidences that support the
theory of quantum mechanics, particularly spectroscopy. The course also
discusses symmetry of molecules, theory of NMR and X-ray diffraction.
Lectures and laboratory. Prerequisites: Phys 203-204, Chem 111-112, Math 212
or consent of the instructor.

Chem 350 Environmental Chemistry ................................ 4
A laboratory intensive course with two lectures and two three-hour
labs each week. Will include sampling, statistics and techniques
involved in determining the level of contaminants in the environment.
Although some instrumental theory will be discussed, the course
will emphasize experimental technique. Students will gain hands-on
experience collecting authentic environmental samples and using
modern instrumentation and methods for detecting the presence of a
variety of inorganic and organic compounds. Instruments used in the
laboratory will include AA, HPLC, GC and GC-MS as well as standard
commercial test kits. The students will gain experience using EPA
methods for determining the level of contaminants in their samples. 
Prerequisite: Chem 111-112 and Chem 303.

Chem 400 Advanced Preparations 1-2
Projects involving advanced laboratory techniques.

Chem 409 Chemistry Internship 0-3
Designed to give the student practical experience in chemistry. May involve work in a chemical industrial laboratory or production facility or an academic research activity. Students may also propose their own projects. 120 hours of work experience are required.

Chem 410 Senior Seminar 3
An exploration of the relations between the natural sciences and other broad areas with special emphasis on ethical and theological concerns. Discussion, lectures, preparation and presentation of papers. Prerequisite: Senior standing.

Chem 415 Inorganic Chemistry 4
Emphasis on models of structure and bonding as related to chemical and physical properties. Discussions will include descriptive chemistry of the elements, coordination and organometallic compounds and solid state materials. The laboratory component emphasizes synthesis and characterization of inorganic compounds. Prerequisite: Chem 200, Chem 303-304, Chem 312.

Chem 420 Organic Analysis 4
Structure elucidation using instrumental techniques (NMR, FT-IR, MS, UV). Advanced synthesis and identification of organic compounds. Lectures and laboratory. Prerequisite: Chem 303-304.

Chem 430 Biochemistry 4
Introduction to the chemical processes of living organisms, both plant and animal, with secondary attention to structure and organization. Lectures and laboratory. Prerequisite: Chem 303-304.

Chem 450 Introductory Research Problems 1-3
Laboratory and conference. Prerequisite: consent of instructor.

Communication
Chair, Associate Professor P. McFarlane
Associate Professors R. Johnson, D. Stoltzfus
Assistant Professor J. Samuel

The communication department offers a major and minor in communication and minors in writing and multimedia communication. Concentrations within the communication major include broadcasting, journalism, film studies, generalist, multimedia and public relations. The department also offers courses that meet Goshen College's general education requirements. Co-curricular activities and internships, supervised by faculty members, constitute an integral part of departmental programs.

The department considers communication a dynamic field of study that prepares students to engage in meaningful service and fulfilling careers. Also, involvement in communication provides avenues for self-discovery and creative expressions, giving students a strong base for further learning in graduate, professional and personal contexts.

Communication department faculty members endeavor to keep informed of academic advances and the latest professional practices to prepare students well for graduate study and careers. Faculty members are especially attuned to contemporary ethical issues and attempt to bring the college's Christian/Anabaptist orientation to bear on these issues.

A. Communication

Communication program
Communication students at Goshen College have numerous opportunities to apply their classroom learning and to test their vocational interests. Students can develop leadership skills in broadcasting (The Globe), journalism (Maple Leaf and Record), public address (the C. Henry Smith Peace Oratorical Contest) and video production (GC-TV). Student journalism organizations are based in a Communication Center with a full-service newsroom and suite of offices. The Globe studios feature state-of-the-art digital and computer-based equipment with satellite connections; GC-TV also is equipped with digital and computer-based production and editing equipment.

Career opportunities
Graduates have pursued vocations as broadcasters, reporters, editors, public relations and advertising practitioners, educators, attorneys, business executives and church leaders.

Major in communication
Students majoring in communication must complete at least 38 hours of communication and related courses. All communication majors, in consultation with a faculty adviser, develop a plan of study that includes one of the concentration areas below. Basic requirements for the major include these courses:

All communication majors are required to take the general education course Comm 202, Oral Communication for three credit hours.
Comm 200, Communication Practice* 2
Comm 204, Expository Writing 3
Comm 240, Communication Research 3
Comm 270, Media Law and Ethics 3
Comm 383, Communication and Society 3
Comm 409, Internship* 3
Comm 410, Senior Seminar* 3
Area of concentration 18 (minimum 9 upper level)

*Comm 200/Communication Practice should be with a co-curricular closely related to the area of concentration. The Comm 409/Internship should be in the student's area of concentration.
A portfolio or its equivalent is required for graduation.

**Concentration options**

**Broadcasting (Radio and Television)**

Required: (14 hours)
- Comm 190, Introduction to Radio ........................................... 1
- Comm 212, Broadcast Media Production I ......................... 3
- Comm 250, Writing for Media ........................................... 3
- Comm 260, Broadcast Writing ........................................... 3
- Comm 290, Radio Operations ........................................... 1
- Comm 312, Broadcast Media Production II ...................... 3

Elective: (choose four hours)
- Comm 314, Broadcast Media Production III .................... 3
- Comm 324, Principles of Public Relations ..................... 3
- Comm 326, Creating for the Web ................................ 3
- Comm 386, Film .............................................................. 3
- Comm 412, Special Project ............................................. 1-3
- Thea 235, The Power of Story ...................................... 3
- Thea 320, The Expressive Voice .................................. 3

Students are required to participate in at least four semesters with The Globe and/or GCTV.

**Journalism**

Required: (9 hours)
- Comm 212, Broadcast Media Production I ......................... 3
- Comm 250, Writing for Media ........................................... 3

Elective: (choose nine hours)
- Comm 108, Digital Design .............................................. 3
- Comm 190, Introduction to Radio ................................ 1
- Comm 255, Photo Communication ................................ 3
- Comm 260, Broadcast Writing ........................................... 3
- Comm 290, Radio Operations ........................................... 1
- Comm 308, Feature Writing ............................................ 3
- Comm 312, Broadcast Media Production II ...................... 3
- Comm 324, Principles of Public Relations ..................... 3
- Comm 326, Creating for the Web ................................ 3
- Comm 412, Special Project ............................................. 1-3
- Thea 235, The Power of Story ...................................... 3

Students are required to participate in at least four semesters with GCTV, The Record, Maple Leaf and/or The Globe.

**Journalism education**

Teacher certification is available for grades 5-12 in journalism education. Courses needed in addition to communication major and journalism concentration core requirements are Comm 190, Comm 260 and 30 credits of education courses, including a semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

**Film studies**

To obtain a film studies concentration a student must satisfactorily complete one full semester at the Council for Christian Colleges and Universities’ Los Angeles Film Studies Center, or an approved alternative off-campus program. This concentration cannot be completed solely in residence at Goshen College.

Required: (19 hours)
- Comm 212, Broadcast Media Production I ......................... 3
- Comm 386, Film .............................................................. 3
- Film studies program ...................................................... 13
  (+3 hours to fulfill Comm 409 requirement)

Recommended related (not required):
- Comm 255, Photo Communication ...................................... 3
- Comm 312, Broadcast Media Production II ......................... 3
- Comm 412, Special Project ............................................. 1-3
- Engl 230, Literature and Popular Culture ...................... 3
- Thea 235, The Power of Story ...................................... 3
- Thea 245, Aesthetics ...................................................... 3
- Thea 332, Design for the Theater ................................... 3
- Thea 334, Acting .............................................................. 3
- Thea 338, Directing ......................................................... 3

Students are required to participate in at least four semesters with GCTV and/or theater.

**Generalist (18 hours)**

This concentration is individually designed, in consultation with the faculty adviser, to develop individual areas of interest or encompass a broad base of communication areas. The course selection must include at least nine upper-level hours, at least nine hours in “communication” and at least six hours from the communication department. Generalist students are required to participate in at least four semesters with one or more relevant department co-curricular activities.

**Multimedia communication**

Required: (12 hours)
- BIS 220, Office Software Productivity .................................. 3
- Comm 108, Digital Design ............................................... 3
- Comm 326, Creating for the Web .................................. 3
- Comm 375, Multimedia Concepts ................................... 3

Elective: (choose six hours)
- Art 107, Design ................................................................ 3
- Art 208, Graphic Design ............................................... 3
- BIS 310, Information Technology Hardware and Networks .... 3
- Comm 190, Introduction to Radio ................................ 1
- Comm 212, Broadcast Media Production I ...................... 3
- Comm 255, Photo Communication .................................. 3
- Comm 312, Broadcast Media Production II ...................... 3
- Comm 412, Special Project ............................................. 1-3

Students are required to participate in at least four semesters with GCTV, The Record and/or The Globe.

**Public relations**

Required: (9 hours)
- Bus 316, Principles of Marketing ...................................... 3
- Comm 322, Organizational Communication .................. 3
- Comm 324, Principles of Public Relations ..................... 3

Elective: (choose nine hours, at least three must be Comm hours)
- Art 107, Design .............................................................. 3
- Art 208, Graphic Design ............................................... 3
- Art 308, Graphic Design ............................................... 3
- Bus 319, Leading Nonprofit Organizations .................. 3
- Bus 320, Marketing Research ........................................ 3
- Bus 336, Advertising .................................................... 3
- Comm 108, Digital Design .............................................. 3
- Comm 206, Communicating Across Cultures .................. 3
- Comm 250, Writing for Media ...................................... 3
- Comm 255, Photo Communication .................................. 3
- Comm 260, Broadcast Writing ........................................... 3
- Comm 308, Feature Writing ............................................ 3
- Comm 336, Sales .............................................................. 3
- Comm 386, Sales .............................................................. 3
- Comm 412, Special Project ............................................. 1-3
- Thea 235, The Power of Story ...................................... 3

Goshen College Catalog 45
Students are required to participate in at least four semesters with GCTV, The Globe, the Maple Leaf and/or Record.

Planning guide

First year
- General education
- Communication Research
- Oral Communication

Second year
- General education
- Media Law and Ethics
- Expository Writing
- Courses in major
- SST

Third year
- General education (including humanities requirement)
- Communication and Society
- Courses in major

Fourth year
- Balance of general education
- Balance of major
- Internship
- Senior Seminar

Minor in communication

Students minoring in communication must complete 18 hours in communication in addition to taking Comm 202, Oral Communication for three hours.

Core courses (six hours)
- Comm 240, Communication Research
- Comm 383, Communication and Society

Concentration (12 hours)
Individually designed, with at least nine hours in communication and at least six of these in the GC communication department. At least five of the concentration hours should be upper level.

Communication minors may take additional hours in the department, but the total number of communication hours applied toward the degree may not exceed 45. Also, students may earn a maximum of 12 hours of credit for experiential learning in Comm 200, 209, 409 or 412.

Minor in multimedia communication

The multimedia communication minor is offered by the art, communication, computer science and business information systems departments. Students in this program learn to design and develop Web sites and CD-ROM presentations that convey information effectively and aesthetically. A student must complete 18 credit hours (including at least eight upper-level hours) to receive a multimedia communication minor. Required are:

- Art 108, Digital Design
- Art/Comm 375, Multimedia Concepts
- BIS 220, Office Software Productivity
- Comm 326, Creating for the Web
- An additional six hours (at least two hours upper level)

must be selected from the following courses:
- Art 107, Design
- Art 208, 308, 408, Graphic Design
- BIS 310, Information Technology Hardware and Networks
- Bus 336, Advertising
- Comm 212, Broadcast Media Production I
- Comm 250, Writing for Media
- CoSc 105, Introduction to Computer Science
- CoSc 375, Special Topics (must be related to multimedia communication)
- CoSc 400, Independent Study (must be related to multimedia communication)

Minor in writing

The writing minor is administered by the communication and English departments. Students selecting this minor must complete 18 hours. Students may focus on exposition/journalism or creative writing while augmenting those with courses in production/internships. See English department pages for more details.

Communication courses

Comm 108 Digital Design ........................................... 3
(See Art 108)

Comm 190 Introduction to Radio ................................ 1
This applied course, offered on a credit/no-credit basis only, prepares students to work at The Globe. Students attend lecture-discussion periods, engage in self-study and learn to operate the station through tutorial shifts.

Comm 200 Communication Practice ............................. 1-2
Applied work in communication with the student newspaper, yearbook, GCTV, The Globe or other on-campus communication activity. A maximum of two hours applicable toward a communication major or minor. Consent of instructor required.

Comm 202 Oral Communication ................................. 2-3
A study of communication theories as applied to oral communication. Practical experience in a variety of activities including interpersonal communication, public speaking, small-group communication, persuasion and nonverbal communication. Attention is given to communicating in a culturally diverse society. Theories and principles of oral communication will be studied in all sections though individual professors may structure their courses around specific themes such as Border Crossings and Oral History. Communication and theater majors should take this course for three credits.

Comm 204 Expository Writing ................................... 3
(See Engl 204)

Comm 206 Communicating Across Cultures .................... 3
A study of cultures, comparative message systems and principles of cross-cultural communication. A focus on current issues having to do with cultural interactions. Students analyze cultural dynamics through ethnographic projects, films and simulations. This course is designed as preparation for SST or for living in settings unlike one’s native home.

Comm 209 Field Experience ......................................... 1-3
Experiential learning, usually in an off-campus professional setting, for communication majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. The 209 level is intended for first-year and sophomore students. Upper-level students should enroll in 409. Prerequisite: Comm 202 or Comm 204.

Comm 212 Broadcast Media Production I ....................... 3
An introduction to broadcast media production with an emphasis on audio and video production. The primary goal of the course is the development of the necessary skills and understandings needed to create effective broadcast media messages. Secondary goals are to give
an overview of media production tools and techniques and to explore aesthetic and ethical issues of media. This course places emphasis on the “craft” roles of media production personnel. Students will gain production craft experience as members of a production team.

Comm 240 Communication Research .......................... 3
An introduction to theory building and research methodology of mass communication. Course focuses on the practical aspects of communication research, providing a framework for conducting quantitative and qualitative research.

Comm 250 Writing for Media .................................... 3
An introductory newswriting course devoted to print, broadcast and multimedia environments. The course will cover news judgments and news values; reporting strategies; research techniques; forms of journalistic writing; and Associated Press style. Prerequisite: Engl 110 or equivalent.

Comm 255 Photo Communication ............................. 3
A first course including 35-mm camera use, film processing, black-and-white darkroom printing, digital camera use, digital enhancement skills using computers and color digital printing. Assignments deal with ways to communicate through subject matter, composition and technical creativity. Special emphasis is placed on photojournalistic approaches to news and feature stories. Some assignments encourage students to set individual creative and artistic goals. Students must provide their own 35-mm camera capable of manual exposure and film speed settings.

Comm 260 Broadcast Writing .................................... 3
Students will study the principles, forms and techniques of writing for broadcast media. Assignments will focus on the writing and editing of broadcast news and commercial messages. Prerequisite: Comm 250.

Comm 270 Media, Law and Ethics ............................... 3
A course devoted to models of ethical decision making as they are applied to mass media issues, with special attention given to Christian perspectives. The course will cover issues like access to information, accuracy, conflicts of interest, deception, fairness, libel, obscenity, plagiarism and privacy.

Comm 290 Radio Operations .................................... 1
An applied course providing advanced instruction and experience in radio station operations, emphasizing four areas: announcing, systems operations (computer-based operations, satellite downlinking, basic productions, etc.), programming and management. Course work includes assisting The Globe managers in such areas as programming, production and operations. Prerequisite: Comm 190.

Comm 308 Feature Writing ...................................... 3
Students will study nonfiction writing forms, including narrative journalism, and learn the process of publishing articles in newspaper, magazine and online markets. Students will prepare articles for submission. Prerequisite: Comm 204 or Comm 250 or equivalent.

Comm 312 Broadcast Media Production II .................. 3
Advanced study of broadcast media production with an emphasis on audio and video production. The primary goal of the course is the development of advanced skills and understandings needed to create effective broadcast media messages. Secondary goals are to give extended development of media production tools and techniques and to explore aesthetic and ethical issues of media. This course places emphasis on the “creative” roles of media production personnel as producers, directors and designers. Students will take creative responsibility for media productions, including supervision of a production team. Prerequisite: Comm 212.

Comm 314 Broadcast Media Production III ................... 3
The primary focus of this course is on advanced integration of audio and video elements in program-length productions. Capabilities of computer-aided editing and digital audio and video will be explored in depth. The major project for the class will accommodate an individual’s interest in either audio or video. Prerequisite: Comm 312 or consent of instructor.

Comm 322 Organizational Communication .................. 3
An exploration of communication within organizations, as well as communication between organizations and the larger society. Topics include theories of communication and organizational structure; examination of power, culture and conflict in organizations; and analysis of verbal and nonverbal messages in interpersonal, small-group and public settings. Assignments will assist students in developing skills in listening, analysis, speaking and writing. Prerequisite: Comm 240 or Bus 316.

Comm 324 Principles of Public Relations ..................... 3
Introduction to public relations contexts, issues and practices — research, planning, communicating and evaluating. Emphasis on skills in analyzing public opinion and in communication with internal and external publics, with special attention to not-for-profit organizations. Prerequisite: Comm 240 or Bus 316.

Comm 326 Creating for the Web ................................ 3
The class focus will be on creating Web pages for Internet and Intrane use. Class work will be entirely on the World Wide Web. Issues of design, Web graphics and the language(s) of page development will be a major part of the study.

Comm 340 Audio Production .................................... 3
(See Mus 340)

Comm 350 Reporting for the Public Good .................... 3
Journalism’s role in serving the public good will be in the forefront as students discuss civic journalism, the watchdog function of the news media, tensions between profits and public service and the advocacy of peace and justice. Students will focus on significant independent reporting projects intended to advance the public good. Prerequisite: Comm 240 or equivalent.

Comm 375 Multimedia Concepts ............................... 3
This course surveys a wide range of media based on new technologies – media such as the World Wide Web, CD-ROM and DVD animation and virtual reality – to explore their strategic use in education and other organizational contexts. The course includes some hands-on research and creative assignments. Attention will be given to legal and ethical issues associated with new media. Prerequisite: Comm 326.

Comm 383 Communication and Society ...................... 3
A study of communication issues in modern society with attention to the persons, institutions, media and systems that facilitate social interaction. An overview of communication philosophy as a basis for ethical and aesthetic perspectives.

Comm 385 Studies in Communication .......................... 3
Investigations into particular communication issues: social, scientific, philosophic, historical, aesthetic, political or institutional. Focus on an institution or topic of current interest.
Comm 386 Film ................................. 3
Survey of film as art, literature and mass medium. Historical development; authors and genres; philosophical, economic and political issues. A selection of 12 films for detailed study. Emphasis on “reading” film, understanding the medium’s function and exploring contemporary cinematic issues.

Comm 409 Internship .......................... 1-3
Experiential learning, usually in an off-campus professional setting, for communication majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. Prerequisite: consent of instructor.

Comm 410 Senior Seminar .................... 3
A consideration of ethical and professional issues in contemporary communication. Information interviews with practitioners in communication. Writing of résumés. Required of all communication majors.

Comm 412 Special Project ...................... 1-3
Students may conduct research of particular interest or pursue specialized applied projects in communication under faculty supervision. Prerequisite: consent of instructor.

Computer science
Chair, Professor P. Oakley
Professors D. Housman, F. Saner

The computer science program at Goshen College is an academic discipline that provides theoretical and applied perspectives on computer systems, software and hardware. Areas of study include problem-solving techniques, algorithm design and analysis, software design and development, computer hardware, mathematics, human-computer interaction and ethics. The liberal-arts context of the program produces graduates who are prepared for life-long learning in a rapidly changing discipline, who can communicate well and who have a broad understanding of other disciplines – characteristics that employers value highly.

Career and graduate school opportunities
Our computer science graduates are employed in many careers such as programmers, analysts, teachers, business owners, project managers, Web developers and network specialists. They work in business, insurance companies, banks, accounting firms, computer consulting agencies, telecommunications firms, higher education institutions and many other settings. Our students who go to graduate school are successful in earning master's and Ph.D. degrees.

Degrees and programs
The computer science department offers the following programs:
• a bachelor of arts in computer science;
• a bachelor of arts in computer science and applied mathematics (in conjunction with the mathematics department); and
• a minor in computer science.

The computer science, business, art and communication departments cooperate to offer a minor in multimedia communication. A degree and minor in business information systems is described in the business department pages.

Computing facilities
Goshen College has a campus-wide computer network that interconnects residence halls, multimedia classrooms, computing labs and faculty offices. Each student has access to e-mail and to the Internet. Computer laboratories provide students free access to PC and Macintosh computers. Software available for student use includes various programming language compilers, mathematical and statistical analysis programs, computer-aided drafting software, multimedia software, database programs, spreadsheet programs and word processing programs. Students in upper-level computer science or business information systems courses have access to an advanced computing lab equipped with state-of-the-art PC computers, current software and several servers and networks.

General and departmental academic requirements
Major in computer science: 50 credit hours
Major in computer science and applied mathematics: 60 credit hours
Minor in computer science: 18 credit hours

Computer science majors and also computer science and applied mathematics majors must both obtain a grade of C or better in each course counted for the major. In addition, any student taking a computer science course must obtain a grade of C or better in all prerequisites for that course prior to taking the course.

SST (spring or summer)

Third year
General education
Upper-level electives

Fourth year
General education
Upper-level electives
Bis 335 or Bis 405
Senior Seminar

Minor in computer science

A minor consists of 18 credit hours in computer science. The 18 hours
must include a minimum of eight upper-level credit hours (300 or 400
level). The courses selected must include:

CoSc 200, Programming Techniques .................................... 4
Math 205, Discrete Mathematics .................................... 3
At least one 300-level course ............................................ 3

Any other 200-level or higher computer science courses to fulfill the
credit-hour requirements.

Major in computer science and applied mathematics
(60 credit hours)

This degree is a rigorous, yet flexible, applied science degree. It offers
excellent preparation for a career in applied mathematics, programming
in science, industry or engineering. It also offers a strong base for
graduate study in computer science or in applied mathematics. The
18 hours of electives permits students to individualize the program.
The program is close to a double major in computer science and
mathematics and can be completed in four years. Degree requirements
are designated in three different areas:

Computer science core

23 credit hours
CoSc 200, Programming Techniques .................................... 4
Math 205, Discrete Mathematics .................................... 3
CoSc 215, Data Structures & Algorithms ................................. 4
Bis 340, Physical Design with DBMS .................................... 3

Mathematics core

24 credit hours
Math 211, Calculus I ........................................................... 4
Math 212, Calculus II ............................................................ 4
Math 213, Calculus III ............................................................ 4
Math 301, Linear Algebra .................................................... 3
Math 341, Numerical Analysis ................................................ 3
Mathematics upper-level electives ........................................ 6

Required related courses

13 credit hours
Biology, chemistry, computer science, mathematics, and
physics upper-level electives .................................................. 6
Biol 111, Biol 112, Chem 111, Chem 112, Phys 203,
or Phys 204 ........................................................................ 4
CoSc/Phys, Senior Seminar .................................................. 3

Numerical Analysis
Balance of major
Senior Seminar

Minor in multimedia communication

The multimedia communication minor is offered by the art, business,
communication and computer science departments. For further
information, see the full description in the communication department
pages.

Computer science courses

CoSc 105, Introduction to Computer Science .......................... 3
An introduction to basic computing concepts, hardware and software.
Topics include a history of computing devices, Web and Internet use,
an introduction to algorithmic solutions to problems, programming
concepts such as variables, loops and iteration, elementary programming,
the function of an operating system, careers in computing and social
and ethical considerations in computer science. No prerequisite.
Computer science

CoSc 200  Programming Techniques  3-4
An introduction to problem solving, algorithm development and
structured programming techniques. Topics include pseudo-code,
language syntax and semantics, applets and applications, loop and
control constructs, primitive data types, objects, arrays, lists, files,
graphical user interfaces, recursion, sorting and searching. Includes
three lectures and one 75-minute lab each week. Computer science
and business information systems majors are required to register for
four credit hours. Others may register for three credit hours. In the
three-hour option, students complete three-fourths of the course. No
programming experience is necessary to take this course; however, either
strong algebra skills or some computer programming experience is
helpful. Offered spring semesters.

CoSc 215  Data Structures and Algorithms  4
A continuation of Programming Techniques. Emphasis is placed
on program specifications, data abstraction, information hiding,
encapsulation and object-oriented programming. Traversing, sorting and
searching algorithms are studied along with an analysis of time-space
complexity. Data structures studied include lists, stacks, queues, trees
and graphs. Includes three lectures and one 75-minute closed lab each
week. Offered fall semesters. Prerequisite: CoSc 200 (four credit hours);
corequisite Math 205.

CoSc 315  Advanced Programming  4
A programming course that emphasizes visual-based programming
tools and advanced programming concepts such as the use of APIs,
development of GUIs, event-driven programming, multithreading and
client- and server-side programming. Actual topics included in the
course may vary from semester to semester. Prerequisite: CoSc 215.

CoSc 325  Data Communications  3
Computer interfacing, serial and parallel I/O techniques, modems, file
transfer, data communications and common computer networking
protocols. Prerequisites: CoSc 200 (three or four credit hours) and Math
205.

CoSc 335  Computer Architecture  3
A study of computer organization, architecture, basic logic design and
assembly level programming. Topics include logic gates, basic digital
circuits, microprocessors, micro-programming, memory addressing,
address buses, assembly level programming and addressing techniques.
Prerequisites: CoSc 200 (three or four credit hours) and Math 205.

CoSc 340  Introduction to Artificial Intelligence  3
An introduction to basic concepts in artificial intelligence: state spaces,
search, heuristics, knowledge representation, problem-solving paradigms,
rule-based systems and neural networks. Some examples of applications
in natural language processing, speech, vision, robotics, expert system
or machine learning are presented. Includes an introduction to LISP or
Scheme, Prolog and an expert systems shell. Prerequisite: CoSc 215.

CoSc 345  Theory of Computation  3
An introduction to topics in formal systems of computation: Turing
machines, post productions, recursive functions, finite state automata,
halting problem, undecidability, P/NP problems. Prerequisites: CoSc 215
and Math 211.

CoSc 360  Operating Systems  3
A study of operating system concepts and structures with a major
focus on process control, memory management, I/O management and
concurrent processes. Prerequisite: CoSc 215.

CoSc 375  Special Topics  Credit Arranged
Classroom study of advanced or special topics in computer systems.
May be repeated. Offered according to demand. Prerequisite: upper-level
status and consent of instructor.

CoSc 400  Advanced Projects/Topics  Credit Arranged
Individual software development projects or independent study of
advanced topics in computer systems. May be repeated. Grading plan
CR/NC. Offered by individual arrangement with a professor. Prerequisite:
upper-level status.

CoSc 409  Internship  1, 2, 3
A work experience with computer systems either on or off campus. The
purpose of the internship is to integrate theoretical knowledge with
practical skills. Grading plan CR/NC. Offered by individual arrangement
with a professor. Prerequisite: upper-level status.

CoSc 410  Senior Seminar  3
A study of the ethical and social implications of computer technology.
Open to senior students in any discipline. Prerequisite: none.
Education

Chair and Director of Teacher Education, Associate Professor M. Mast

Professors K. Meyer Reimer, A. Stalter
Assistant Professors B. Stably, C. Bonfiglio, K. Gary

Preparing for tomorrow’s classrooms
Goshen College seeks to graduate teachers who interact with their students and the content they teach, to construct meaning for living responsibly in a changing world. Programs offered include elementary education (K-6); elementary/special education (K-6); all grade education in visual art, music, physical education and English as a new language (K-12); and secondary education (5-12) in various subject areas.

Goshen’s teacher education programs meet standards set by state and national accrediting agencies. Department faculty members are actively involved in the world of education, teaching in the college laboratory kindergarten or working collaboratively in public school settings.

Goshen College prepares teachers to be lifelong learners who are also professionally active. They also invite pre-service teachers to put their faith into practice in all aspects of teaching and learning.

Several themes emerge throughout all teacher education courses: (1) an emphasis on teaching diverse student populations, including those with special needs; (2) principles of peacemaking inside and outside of the classroom, including conflict resolution skills; and (3) an approach to curriculum which integrates content within and across the disciplines as well as with students’ lives.

Education programs available

Elementary education (K-6)
Upon completion of a major in elementary education, students are eligible to be certified to teach kindergarten through sixth grade. Fieldwork takes place in a variety of classroom settings where students learn to teach language arts, math, social studies, science, art, physical education and music. Students also explore approaches to classroom management, discipline and evaluation.

Elementary education/Special education (K-6)
Goshen offers certification in Exceptional Needs: Mild Intervention for K-6 in conjunction with an elementary education certificate. It is a certification that must be completed at the same time as an elementary education certification, but does not stand alone as a separate program. To complete this program, 12 additional hours (Student Teaching: Exceptional Needs, Special Education Issues, Learning Disorders and Social Emotional Disorders) are added to the elementary education program.

All grade education in English as a new language, music, physical education or visual arts (K-12)
All-grade education focuses on the content area while including requirements for general and professional education at all developmental levels.

Secondary education (5-12)
Students can be certified to teach fifth through 12th graders upon completion of teacher education requirements for teachers of early adolescence, adolescence and young adults and content requirements in the chosen field of instruction. Goshen offers teaching majors in business, chemistry, English, English as a new language, journalism, Spanish, bilingual/bicultural, mathematics, music, physical education, physics, life science, social studies and theater arts.

Special attributes of Goshen’s teacher education program
• Elementary and exceptional needs dual certification program: Nationally, there is a critical shortage of special education teachers. Completing this dual certification program dramatically increases a candidate’s marketability. In addition, all classrooms include students with special needs. We believe that all special education teachers need to know what regular classroom teachers know, and all regular classroom teachers need to know what special education teachers know. The marriage of these two licensure content areas will prepare candidates to meet the needs of all students in their classrooms.
• English as a New Language: Schools continue to need teachers who are skilled in working with students who do not speak English as their first language.
• Conflict transformation: As school violence has increased, we have seen the need for teacher candidates to develop skills in conflict mediation. In collaboration with the peace, justice and conflict studies department, we are able to offer a series of three courses that equip our students in being able to help transform conflict peacefully. We strongly recommend that all teacher education candidates complete this sequence, which results in a Goshen College Certificate in Conflict Transformation (see below).
• Environmental education: Goshen College is fortunate to have integrated Merry Lea Environmental Learning Center into content area courses so all elementary majors have the opportunity to work in environmental education as part of their program.

Admission to the program
Students generally apply for admission to the Goshen College teacher education program during the sophomore year. Admission to the program includes:
• successful completion of the reading, writing and mathematics sections of the Pre-Professional Skills Test;
• a review of your high school record;
• successful performance in early fieldwork experiences;
• supportive references;
• demonstrated experience with children or youth;
• successful completion of the technology competency; and
• a written essay.

Teacher education students must maintain a 2.5 GPA overall and a 2.8 in their content area. All content related courses for the license content area must be passed with at least a C.

Fieldwork experiences
An important part of Goshen’s teacher education program is learning first-hand in the schools. Students will work in a variety of settings with diverse populations. If Study-Service Term (SST) is part of the international education experience, students will also have the opportunity to work with children or youth in another culture.

Student teaching experience
School systems in the area cooperate with Goshen College to provide strong and varied student teaching experiences. Preservice teachers experience a broad spectrum of classroom situations. During the student teaching experience, students will work 12 or more weeks full time in a local school system and will be supervised by classroom teachers and college professors.

Certification for teaching
After satisfactorily finishing an approved teaching program and successfully completing the Praxis II exam, students will apply and be recommended for licensure. Goshen graduates are generally eligible for initial or conditional certification in other states.
### Accreditation
Goshen College is accredited by the North Central Association of Colleges and Secondary Schools and is authorized by the Indiana Division of Professional Standards Board to prepare teachers for elementary and secondary schools. The teacher education program has been accredited by the National Council for Accreditation of Teacher Education since 1954.

### Special facilities
- Laboratory kindergarten
  Since 1959, a laboratory kindergarten has been operated by the education department in the Church-Chapel Building. The laboratory kindergarten is an integral part of teacher education at Goshen College. It provides opportunities for (1) observation of child development and behavior; (2) observation of teaching procedures; and (3) field placements for the kindergarten internship.
- Merry Lea Environmental Learning Center
  A 1,150-acre nature conservancy owned by Goshen College which hosts more than 5,000 school children each year for outdoor education.
- Curriculum library, Peace Curriculum Collection and Royer Reading Room (Children's Literature Collection) in the Harold & Wilma Good Library.

### Teaching content areas
Goshen College has been approved by the Indiana State Board of Education to offer the following content areas and all-grade content areas.

<table>

Certificate in conflict transformation for teachers

This certificate may be added to an elementary, middle school, or secondary education program. For further information, consult with a member of the teacher education faculty. Education students who wish to complete the conflict transformation studies minor at the conclusion of their certificate requirements should declare the minor and consult with a PJCS adviser for further details. (9 hours)

- PJCS 210, Transforming Conflict and Violence
- PJCS 325, Mediation: Process, Skills and Theory
- PJCS 426, Conflict in Groups

Transition to Teaching (grades K-6 or grades 5-12)

This program is an alternative certification program based on the premise that a candidate already has the content knowledge in the licensing area. Candidates must have completed an undergraduate degree in their field with at least a 3.0 GPA to be eligible for this program based on Indiana state law. An assessment of content knowledge and skills will be completed for each candidate by the GC licensure adviser before entering the program. Additional course work may be a prerequisite for admission to the program. The 18 credit hours required for secondary and 24 credit hours required for elementary programs are for education course work only. Candidates must demonstrate basic technological proficiency by passing a placement test in the fall, taking the Web-based tutorial course offered (Educ 030), or presenting a technology course on your transcript approved by the licensure adviser. Courses listed for two credit hours are in reality three credit hour courses, but because the state of Indiana has placed restrictions on credit hours, TT students pay for only two credit hours. Secondary education (grades 5-12) curricula, as well as additional information about the TT program is available at www.goshen.edu/education/Transition_to_Teaching.

Planning guide – secondary education

First year

- General education
- Literature and Writing
- Oral Communication
- Technology Competency

Secondary education (grades 5-12 or K-12)

Certification for secondary teaching (grades 5-12 or K-12) includes completion of general education requirements, a subject-matter major, any additional subject matter coursework required for certification, a professional-education component, a minimum of 124 hours and recommendation by Goshen College. Current students should plan to take the following general education courses:

Education courses

Educ 300 Technology Competency ............................. 1 (non-credit)

All education students must demonstrate competency in the area of.
technology. At the beginning of each school year a performance-based.
assessment will be offered as an opportunity for students to test out.
of this requirement. Students who cannot successfully complete the.
assessment will be required to complete this course. The course consists.
of computer based tutorials designed to teach general competencies in.
the following subject areas: operating systems, word processing,
spreadsheets, Web browsing, e-mail, multimedia, Web page authoring.
and presentation software. Conducted largely as an independent study.
course. Credit hours earned in this course meet the teacher education.
requirement for technology, but do not count as hours toward.
graduation.

Educ 201 Inclusive Schooling .................................. 3

Includes both campus and field study of learning environments,
classroom management and instructional methods that meet the needs.
of diverse student populations with emphases on race, gender, ethnicity,
socio-economic status, family structures, language and exceptionalities.

Educ 300 Exceptional Students ................................. 3

A study of the history and foundations of special education, how to.
implement the least intrusive interventions, use of assistive technologies,
how to access resources and how to integrate social and interrelationship.
skills into the curriculum. Includes a guided observation of both a pull-
out program and an inclusion classroom.

Educ 301 Curriculum Studies: Math .......................... 2

A study of mathematics pedagogy with an emphasis on conceptually
sound and developmentally appropriate lessons. Includes selecting and.
evaluating topics of study, multiple representations of information and
instructional strategies, interdisciplinary teaching and using school and
community resources. Also includes study of ways to adapt curriculum for
special needs students. Field experience in diverse classrooms.
Enrollment limited to those who have been admitted to the teacher
education program.

Educ 302 Adolescent Exceptional Learners .................... 3

A study of the history and foundation of special education, how to
implement the least intrusive interventions, use of assistive technologies,
how to access resources, how to adapt and assess instructional
opportunities for those with special needs in the regular 5-12 classroom
setting. Includes a guided observation of both a pull-out and an
inclusion classroom.

Educ 303 Literacy I: Developmental .......................... 3

A study in the development of reading, writing, listening and speaking.
Focus on instructional methods, assessment and developing authentic
engagement that leads to a life-long enjoyment of reading and writing in
many modes and styles. A study of literacy development, methodology
and curricular options for K-6 learners. Includes study of literacy and
exceptional needs learners. Opportunity to work with children and
teachers in diverse classroom settings.

Educ 304 Curriculum Studies: Social Studies ................ 2

A study of social studies curriculum and pedagogy with special emphasis on
instruction and assessments, including connecting curriculum to student's
prior learning, abilities and needs. Field experiences in diverse settings.

Educ 307 Children's and Adolescent Literature ................ 3

A survey of children's and young adolescent literature studying genre,
authors, illustrators, the art of writing and illustration; extensive reading
in the field as well as writing a book for children.

Educ 308 Curriculum Studies: Science ........................ 2

A study of science pedagogy with an emphasis on conceptually sound
and developmentally appropriate lessons. Includes selecting and
evaluating topics of study; multiple representations of information and
instructional strategies; and interdisciplinary teaching. Also includes
study of ways to adapt curriculum for special needs students. Field
experiences in diverse settings. Enrollment limited to those who have
been admitted to the teacher education program.

Educ 309 Educational Psychology: Secondary ................ 3

Educ 310 Educational Psychology: Elementary ............... 3

A study of physical, cognitive, psychosocial, emotional, linguistic,
moral and identity development birth through adolescence. Includes
developmental theories, influence of cultural and social factors on
development and school influences on children and adolescents.

Educ 314 Secondary Curriculum and Instruction:
General Methods .............................................. 2

General class sessions emphasize planning, classroom management,
multicultural teaching, instructional strategies and school reform.
Subject-specific class sessions concentrate on curriculum and instruction
in those subject areas. To be taken concurrently with Educ 315 the year
prior to student teaching.

Educ 315 Secondary Curriculum and Instruction:
Content Methods ............................................. 1

Subject-specific class sessions concentrate on curriculum and instruction in
those subject areas. To be taken concurrently with Educ 314 the year
prior to student teaching. Not required for ENL, music, art or physical
education content areas.

Educ 321 Middle School Curriculum and Instruction ........ 3

Instructional methods, strategies and classroom management particularly
as they pertain to fifth-eighth graders. Also includes a study of the
development of middle schoolers and how that influences which
methods and strategies are most appropriate to use. A tutoring clinic is
embedded into the framework of this course which will develop
students' understanding of theory and practice related to literacy skills
in the content area.

Educ 330 Fine Arts for Children ............................... 3

A study of drama, art and music as it pertains to the elementary
education. Participatory experiences, integration across the arts and
integration of the arts into the classroom.

Educ 340 Learning Disorders ................................. 2

Focuses on assessment, identification, characteristics and instruction of
elementary students with learning disabilities, as well as accommodating
students with learning challenges who do not qualify for special education services.

**Ed 342 Social and Emotional Disorders** .......................... 2
Focuses on assessment, identification, characteristics and instruction of elementary students with emotional disabilities, as well as other students with social/emotional difficulties who do not qualify for special education services.

**Ed 344 Adaptation and Assessment** .......................... 3
A study of multiple forms of assessment and record keeping. Focuses on knowing how to select, use and interpret a wide variety of formal and informal assessments and knowing how to communicate that information to parents and colleagues. Emphasis on using assessment to guide instruction for individuals and groups.

**Ed 346 Special Education Issues** .......................... 3
Issues and policy as they directly apply to schools and teachers including school law, politics, state legislation, unions, educational policy, parent issues and community services and how they function in school settings particularly as they apply to the exceptional needs student. To be taken concurrently with Ed 415.

**Ed 401 Child Development Practicum** .......................... 1
A study of child development. Focuses on learning theory and the importance of play for young children. Will include a field experience based on the application of developmentally appropriate practice. Required for K-12 art, ENL, music and physical education content areas.

**Ed 402 Student Teaching: Elementary** .......................... 12
At least 12 weeks of full-day student teaching in elementary schools under the supervision of a licensed elementary teacher and a faculty member of the GC education department. Includes several workshops on campus to reflect on important teaching issues.

**Ed 403 Secondary Education: Seminar** .......................... 3
An intensive three-week seminar immediately following Ed 405. Uses the licensure portfolio as a frame and also focuses on: educational philosophy, classroom management and discipline, evaluation, integration of faith and teaching. Includes student projects and presentations, group work, variety of approaches to individual reflection on teaching, and preparation of the licensure and presentation portfolios. **Corequisite**: Ed 405.

**Ed 405 Student Teaching: Secondary** .......................... 12
At least 12 weeks of full-day student teaching in a secondary school under the supervision of a teacher licensed in the student teacher's major teaching area and a GC faculty member. Includes several workshops on campus to reflect on important teaching issues.

**Ed 406 Literacy II: Diagnostic** .......................... 3
A second course in literacy focusing on observing and recording children's literate behaviors closely to be able to support struggling readers and writers and prevent further difficulties in developmentally appropriate ways. Emphasis on strategic teaching based on the psychosocio-linguistic nature of language. Includes tutoring a struggling reader. **Prerequisite**: Ed 303.

**Ed 407 Field Studies** .......................... 1-2
Individual study, research or field experience on a variety of topics.

**Ed 408 Studies in Education** .......................... 1-3
Individual study, research or field experiences on a variety of topics.

**Ed 409 Elementary Education: Seminar** .......................... 3
An intensive three-week seminar immediately following Ed 402. Uses the licensure portfolio as a frame and also focuses on: educational philosophy, classroom management and discipline, evaluation, integration of faith and teaching. Includes student projects and presentations, group work and a variety of approaches to individual reflection on teaching and preparation of the licensure and presentation portfolios. **Corequisite**: Ed 402.

**Ed 410 Transition to Teaching Practicum** .......................... 6
Student teaching for those enrolled in the Transition to Teaching program (TrT). Requires at least 12 weeks of full-day student teaching under a supervising teacher. Also includes preparation for licensure and formation of a presentation portfolio.

**Ed 415 Student Teaching: Exceptional Needs** .......................... 5
Ten weeks of half-day student teaching in a mild intervention context, under the supervision of a supervising teacher who is licensed for mild intervention and a faculty member of the Goshen College education department. Focuses especially on planning, instruction and assessment, following standards numbers 3, 4, 5, 6, 7 and 8 of IPSB Standards for Teachers of Exceptional Needs. **Concurrent course**: Ed 346.

**Ed 530 Mentoring Beginning Teachers** .......................... 3
Offered in collaboration with Goshen and Concord Community Schools. This course provides training for mentors of new teachers who are involved in the Indiana Mentoring and Assessment Program. Available only to licensed teachers who are currently serving as mentors.
The English department provides three distinct majors: one in general English studies, with an opportunity to select elective and upper-level related courses to create an emphasis in creative writing or literature of ethnicity, gender and race; one in teaching English as a second language (TESOL) in a strong intercultural framework; and one in teaching English and language arts to grades 5-12. Three minors enable students to augment any major with literary, writing, or second language skills.

**Mission**

The English department fosters skills in critical thinking, reading and writing, as well as literary analysis, criticism, theory and language use. We pay particular attention to the contexts of literary creation – cultural, philosophical, historical, aesthetic and rhetorical. The English minor offers students the opportunity to hone their critical thinking, reading and writing skills, as well as increase their understanding and appreciation for literature. The creative writing minor enables students to expand and mature their abilities as authors of poetry, fiction and creative nonfiction. Through the TESOL major, students prepare for certification to teach English as a New Language (ENL) in Indiana public schools. The TESOL minor provides students the fundamental skills needed to be successful as teachers of English to speakers of other languages. Extracurricular opportunities in publishing include writing, editing, and producing student work through *Broadside*, Pinchpenny Press, or the Horswell Fellowship.

**Career opportunities**

English is a versatile major that prepares students for a wide range of jobs after graduation. Alumni majors in English are employed around the world, in occupations such as teaching, program management, service with church agencies, journalism, publishing, public relations, business, social services, and the professions, including law, medicine, library science, nonprofit management or administration, and the ministry. A significant number of TESOL graduates are engaged in teaching English as a second language in the U.S. and abroad. As this list demonstrates, an English degree provides a strong base for graduate schools in many fields besides literary study.

**Honors thesis**

Students who wish to complete a major scholarly or creative project as part of their English major may enroll in a three-hour independent study specially designed for this purpose. The prerequisites for the independent study are as follows: minimum GPA of 3.8 in English department courses; English 204; 300; for literary research projects, six hours of upper-level literature courses; for creative writing projects, six hours of creative writing courses; for TESOL projects, English 310 or 315, and English 320. The independent study must be taken in the fall of the student’s senior year, be approved by the department in the previous spring, and include research in the intervening summer. (For more information about specific requirements, see the department chair.) The independent study will be given a letter grade and appear on the student’s transcript with the subtitle “Honors Thesis.” The independent study fulfills the senior project (English 409) requirement, but does not count as an English elective.

As an independent study, extra tuition charges apply: see the relevant information under “Requirements and Procedures” and “Expenses.” The independent study will be charged at the “readings” rate.

**Major in English**

38 hours, including

Electives in English ................................ 9

Upper-level (300-400) related courses ............ 6

Courses selected from Aesthetics, Art History, Bible/Religion, Children’s and Adolescent Literature, Communication, Sociology, History, Linguistics, Modern and Classical Languages and Literature (MCLL) topics courses, Music History, Peace/Justice/Conflict Studies (PJCS), Philosophy, TESOL Methods, Theater, Women’s Studies***

**Course selection notes**

Students might consider elective courses which provide skills that complement an English major: Digital Design, Creating for the Web, Photo Communication, Graphic Design, Broadcast Media Production, Communication Practice (journalism, radio), Multimedia Concepts, etc. Courses for the major must be taken for a letter grade unless CR/NC is specified.

*Students earning AP or CLEP credit in English are strongly encouraged to take Expository Writing during the first year.

**Students selecting Student Teaching or TESOL Field Experience instead of Engl 409 must fulfill the English departmental total of 32 hours, normally fulfilled with Engl 319, English Syntax.

***Upper-level related courses may not be applied courses (such as Record editing or music lessons) or be used to fulfill requirements of general education. One upper-level related course may be counted toward another major or a minor.

**English/language arts education**

Teacher certification is available for grades 5-12 in English/language arts education. Courses needed in addition to the English major core requirements are Engl 201 or 307; Engl 319; Comm 200; Comm 206 or Intl 256; Educ 307; a writing course; and a film or performance course. Also 30 credits of education courses, including a semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

Upper-level related (3-4)
Courses selected from education, history, modern and classical
languages and literatures, or sociology

*Prerequisite: Competence in a second language equivalent to 102-college level
**Fulfills general education requirement at Goshen College
***Additional foreign language credits may be in the same language which is
used to meet the foreign language prerequisite or may be courses in a third
language. Also, ASL courses may meet either the foreign language prerequisite
or the additional foreign language course requirement, but not both.

****See catalog for special off-campus programs that include intercultural
studies courses.

English as a new language education
Teacher certification is available for grades 5-12 in two related areas.
Courses needed in addition to TESOL major requirements are as follows:

English as a new language (ENL) – Educ 344 and 27 additional
credits of education courses. Certification for K-12 is also available in ENL.

Bilingual/bicultural education – Educ 344, 21 credits of foreign
language (level 201 or higher) and 30 additional credits of education
courses.

PJCS 210 is required for general education. The first education class,
Educ 201, should be taken in May term of the first year or fall of the
sophomore year. See the education department pages and the Teacher
Education Handbook for more details about requirements for both of
these certification areas.

English-related minors
Choosing the right minor adds to your employability and expands your
knowledge and skills. Students can influence job potential with minors,
special course work, or extracurricular activities: TESOL, Web work,
media production, archival work, environmental work, peace and justice
work, and more. Minors, combined with practical experience, reflect a
student's diverse skills and flexibility.

Minor in English
An English minor added to other majors indicates your increased
communication, critical thinking and analytical skills. Consider
the message sent to future employers if you have an English minor
along with a major in history, philosophy, art, music, business,
communication, theater, MCLL, BRP or PJCS, sociology or
environmental studies. Eighteen hours, including
**Minor in teaching English to speakers of other languages (TESOL)**

A TESOL minor provides you with intercultural and teaching skills that enhance your role in any profession, but in particular in education and international work. 20 to 21 hours, including:

**Required courses (14)**
- Engl 310, Introduction to Linguistics .......................... 3
- Engl 315, English Language Problems .......................... 3
- Engl 319, English Syntax ........................................... 1
- Engl 320, Methods of TESOL ..................................... 4
- Engl 325, Field Experience in TESOL .......................... 3

**Elective courses (6)**
- Comm 206, Communicating Across Cultures or  
  Soc 230, Cultural Anthropology or  
  additional foreign language courses* .................. 3-4

A TESOL minor provides you with intercultural and teaching skills that enhance your role in any profession, but in particular in education and international work. Every year a distinguished visiting writer offers an intensive week-long writing workshop to a small group of students. Eighteen hours, including:

**Required courses (12-13)**
- Engl 120, Introduction to Creative Writing  
  Engl 312, Writing Poetry  
  Engl 332, Writing Fiction  
  Engl 334, Writing Creative Nonfiction  
  Thea 350, Playwriting  
  Comm 250, Writing for Media  
  Comm 260, Broadcast Writing  
  Comm 308, Feature Writing  
  Comm 350, Reporting for the Public Good  
  Comm 326, Creating for the Web

**Elective courses (12-13)**
- Engl 120, Introduction to Creative Writing  
  Engl 312, Writing Poetry  
  Engl 332, Writing Fiction  
  Engl 334, Writing Creative Nonfiction  
  Thea 350, Playwriting  
  Comm 250, Writing for Media  
  Comm 260, Broadcast Writing  
  Comm 308, Feature Writing  
  Comm 350, Reporting for the Public Good  
  Comm 326, Creating for the Web

**Minor in teaching English to speakers of other languages (TESOL): One-year certificate**

Students with a minimum background of one year of college and skill in a second language equal to 102-college level may complete this certificate, which is usually scheduled for completion in one year.

**Required courses (14)**
- Engl 310, Introduction to Linguistics .......................... 3
- Engl 315, English Language Problems .......................... 3
- Engl 319, English Syntax ........................................... 1
- Engl 320, Methods of TESOL ..................................... 4
- Engl 325, Field Experience in TESOL .......................... 3

**Elective courses (16)**
- Bible or religion .................................................... 3
- Comm 206, Communicating Across Cultures or  
  Soc 230, Cultural Anthropology or  
  additional foreign language courses* .................. 3-4
- Any elective course ............................................... 9-10

**Teaching English as a New Language (K-12 certification)**

In addition to the requirements for the TESOL major, English as a New Language (ENL) teachers must fulfill the same education requirements required of secondary or elementary education majors. For more details see the Teacher Education Handbook and an English adviser.

**A. Literature courses**

**Goals:** Literature courses teach the historical narrative of western and nonwestern literature along with the analytical skills required to study authors, genres, and literary and cultural topics in depth. In both survey and seminar literature courses, we teach the theoretical framework and critical apparatus involved in interpreting texts. As one of the first departments in the United States to offer a course in International Literatures in English, we are committed to examining both the production of and response to literature in diverse cultural contexts and offering a range of interdisciplinary courses featuring national and global literary traditions.

**Opportunities:** Special course offerings provide opportunities to study literature in off-campus settings such as Ireland or Stratford, Ontario.

**Engl 201 World Literature in English ............... 3**

Study of literature that deals in a significant way with the intersection of cultures, particularly postcolonial literature from Africa, Asia, the Caribbean and Latin America.

**Engl 207, 307 Topics in Literature: Ethnicity, Gender and Race .. 3**

Study of literature shaped distinctively by cultural and theoretical concerns related to ethnicity, gender and race. Specific topics, announced in advance, include the following:

**Irish Literature in Ireland.** Field studies in the cultural geography of 20th-century Irish authors, including Yeats, Joyce, Synge, Mary Lavin, Peter Fallon and Seamus Heaney. Conducted during May or summer term at urban and rural locations in the Republic of Ireland.

**American Indian Literature.** Contemporary fiction and poetry by such writers as M. Scott Momaday, Louise Erdrich, Leslie Silko and Sherman Alexie, with special emphasis on historical and cultural contexts and the revitalization of tribal practices, spirituality, ceremony and oral tradition.

**African-American Literature.** Twentieth-century fiction, poetry and essays from W.E.B. DuBois to Toni Morrison, with an emphasis on the history of race in America as it informs the literary tradition. Literature integrated with music, art and performance.

**Mennonite Literature.** Recent literature – mainly poetry and fiction – by U.S. and Canadian Mennonite writers, studied in relation to Mennonite history, culture and theology. Authors include Rudy Wiebe, Sandra Birdsell, Armin Wiebe, Julia Kasdorf, Janet Kauffman, Jean Janzen, Jeff Gundy and others.

**Women in Literature.** The study of literature written by women (mainly fiction and poetry) and of related issues such as the literary canon, gender representation and feminist literary theory. The syllabus will
often include literature by Austen, Bronte, Woolf and Hurston and criticism by Gilbert, Gubar, Showalter and Fetterly.

**Engl 210 Introduction to Literature** .......................... 3
Analysis of literary texts in a genre or genres chosen by individual professors. Instruction in literary analysis essay and literary research essay. Prerequisite: Engl 110, AP or CLEP credit, SAT verbal or critical reading score of at least 630, ACT English score of at least 28 or permission of instructor.

**Engl 230 Literature and Popular Culture** .......................... 3
Study of literature in relation to film, television, or other media of popular culture. Specific topics, announced in advance, may include Arthurian Literature and Film or Global Images in Film.

**Engl 300 Critical Theory and Practice** .......................... 3
This course examines contemporary critical interpretative strategies and theories as applied to several literary genres. In addition, the course introduces students to important research skills involved in the production of literary criticism. Intended as an introduction to the English major and as an elective for other (usually upper-level) students. Prerequisite: Any college-level literature course beyond Engl 110.

**Engl 301 British Literature to 1800** .......................... 3
Development of British literature from Beowulf through the medieval period, Renaissance and 18th century, with special attention to authors such as Chaucer, Shakespeare, Spenser, Milton and Pope.

**Engl 302 British Literature 1800 to Present** .......................... 3
Development of British literature through the Victorian, modern and post-modern periods, with special attention to authors such as Arnold, Eliot, Conrad, Yeats and Woolf.

**Engl 303 American Literature Survey** .......................... 3
Development of American literature from colonial times to the present. Study of literature that explores a range of American identities, including European-American, American Indian and African-American. Authors include Nathaniel Hawthorne, Emily Dickinson, Langston Hughes, William Faulkner, Adrienne Rich, among many others.

**Engl 305 Genre Studies** .......................... 3
Study of a single genre as announced, sometimes with focus on writings of a specific period, place or topic. Typical offerings include:
- **Contemporary Drama.** Study of dramatic literature from modern classics by Eugene O’Neill, Tennessee Williams and Arthur Miller in the U.S. and John Osborne and Samuel Beckett in the United Kingdom to currently productive playwrights on and off Broadway. *History of the Novel.* The reading and study of significant works illustrating the development of the novel in Great Britain and the United States. Attention to authors such as Austen, Dickens, Melville, Woolf, Hemingway and Morrison.
- **Contemporary Poetry.** The reading and study of poetry and poets working since 1945, including such authors as Allen Ginsberg, Galway Kinnell, Rita Dove, Li-Young Lee, Linda Hogan, Adrienne Rich and Maxine Kumin. In addition to critical writing, each student will practice writing poems in an effort to better understand the creation and artistic nature of poetry.
- **Cultural Studies.** The study of a genre of literature in relation to a specific cultural topic. Offerings may include Eugenics and Modernist Prose, or The Idea of Labor and Nineteenth-Century Fiction.

**Engl 306 Major Author** .......................... 3
A study of a major author or of two authors in comparison. Shakespeare every other year. In the alternate years, the author or selection of authors will be announced in advance: recent choices include Chaucer, Faulkner and Morrison.

**Engl 409 Senior Project** .......................... 1-2
English majors propose independent projects in research, off-campus field experience, internship, or creative writing.

**Engl 410 Senior Seminar** .......................... 1
Weekly meetings of departmental majors and faculty for an exchange of views on such topics as vocations, curriculum and ethical/spiritual issues related to a life-long study of literature and language.

**B. Writing courses**

**Goals:** Writing courses teach students the expository, creative and research writing strategies needed to express themselves professionally and personally. While developing skills in purposeful thinking, logical organization and clear expression, students also have opportunities to share their writing through publication or public presentation. The normal sequence in writing moves from Literature and Writing, Engl 110, to Expository Writing, Engl 204, and then to 300-level writing courses. Students are permitted to enroll in the 300-level creative writing courses with no prerequisite, even though Creative Writing, Engl 120, offers the preferred introduction to creative writing.

**Opportunities:** Many curricular and extracurricular writing opportunities exist for students interested in expository and creative writing, along with associated editorial responsibilities. Of particular note are Pinchpenny Press, which produces a number of books each year written and/or edited by students, and the *Broadside* series: signed, limited editions of single short works of creative writing. Pinchpenny and Broadside policies and publications are administered by student-faculty editorial boards. Students also gain valuable experience writing for the *Record*, a weekly newspaper, and the *Maple Leaf*, the college yearbook. One student a year is selected as the Horwell Fellow, a role that provides publishing and editorial experience.

**Engl 105 Introduction to College Writing** .......................... 3
Introduction to college-level reading and writing skills. Next course is Engl 110 to fulfill General Education requirements. This course is required for students with Verbal SAT/ACT of 430/20 or below, low GPA in high school English courses, low overall GPA, or concern about college-level reading and study skills.

**Engl 110 Literature and Writing** .......................... 3
Critical reading, thinking and writing based on literary texts focused on themes chosen by individual professors. Instruction in writing, argumentative prose and the cross-disciplinary research essay. Prerequisite: Successful completion of Eng 105, Verbal SAT/ACT score of 431/21 or higher. Fulfills the General Education requirement.

**Engl 120 Introduction to Creative Writing** .......................... 3
An introduction to the writing of poems, short stories and creative nonfiction, with emphasis on writing, reading and discussion. Written evaluations for credit instead of letter grades. Enrollment limited to 15 per section.

**Engl 204 Expository Writing** .......................... 3
Theory and practice of written communication. Assignments in a variety of prose forms aim at developing the student’s control of logic, organization, rhetoric and usage. Prerequisite: Engl 110, Engl 210 or equivalent.
Engl 312  Poetry Workshop .......................... 1
Intensive one-week workshop in writing poetry, usually conducted by
a visiting poet during the first week of the spring semester. Repeatable.
Prerequisite: Engl 310 or consent of instructor. Written evaluations for
credit instead of letter grades. Enrollment limited to 15 per section.

Engl 330  Writing Fiction .......................... 3
A workshop course in writing short fiction, with special attention to
issues of setting, character, plot, dialogue and point of view. Readings
by contemporary writers. Written evaluations for credit instead of letter
grades. Enrollment limited to 15 per section.

Engl 332  Writing Poetry .......................... 3
A workshop course in writing poetry in a variety of forms, with special
attention to imagery, sound, line, meter and revision. Readings by
classic and contemporary poets. Written evaluations for credit instead of
letter grades. Enrollment limited to 15 per section.

Engl 334  Writing Creative Nonfiction .......................... 3
A workshop course in writing the personal essay and nonfiction prose,
with special attention to creating a personal voice and applying creative
writing techniques to nonfiction subjects. Students will read and discuss
examples of creative nonfiction and prepare two longer essays for a
final portfolio. Written evaluations for credit instead of letter grades.
Enrollment limited to 15 per section.

C. Language courses

Goals: Through studies in language, students learn historical and
sociological framework for language development, as well as a respect
for both the power and limits of language as a social and artistic tool.

Opportunities: Through field work, senior project, service assignments
and on-campus and community tutoring, students have opportunities
to teach language acquisition in diverse cultural contexts.

Engl 310  Introduction to Linguistics .......................... 3
Different ways of looking at language: how languages’ systems of sounds,
word structures, grammatical patterns and meaning constructions
function. Insights useful for language learning, teaching and
appreciation of English and language in general.

Engl 315  English Language Problems .......................... 3
The study of the sound system and history of the English language,
followed by exploration of current developments in sociolinguistics,
dictionaries and word formation. The course cultivates an informed
attitude toward English usage.

Engl 319  English Syntax .......................... 1
Independent study in English grammar verified by a final exam.
Available only to TESOL majors and minors and English and Teaching
English as a New Language education students. Prerequisite: Previous or
concurrent enrollment in Engl 310 or 315.

Engl 320  Methods of Teaching English to Speakers of Other
Languages (TESOL) .................................. 4
Primary topics addressed are theories of language learning, general
TESOL approaches, methods for the teaching of specific language
skills and materials preparation in ESL. A concurrent internship
(teaching English to a nonnative speaker) brings reality to the theories.
Prerequisite: Engl 310 or Engl 315.

Engl 325  Field Experience in TESOL .......................... 3
One-hundred twenty hours of supervised teaching in the U.S.A. or
abroad when appropriate supervision can be arranged. Prerequisite: Engl
320 and consent of instructor.
Minor in history
A minimum of six history courses (18 hours) including at least one lower-level course and three upper-level courses in American and World History.

Major in history and investigative skills
A minimum of 24 hours of history, at least 15 upper-level and including Hist 410-411, Seminar.

Related courses:
- Soc 200, Principles of Sociology .................................................. 3
- CoSc 105, Introduction to Computer Science .................................. 3
- Econ 207, Introduction to Statistics ............................................... 3
- Soc 391, Methods of Social Research .......................................... 3

Internship and Senior-Seminar work should utilize various research skills. The student's faculty adviser will encourage taking additional elective courses in economics, sociology/anthropology and political science. This major is designed to provide the student with library, statistical and field-research skills useful in business, public administration, law and other practical pursuits. A variety of history courses provides a broad perspective rather than merely a technical orientation.

Social studies education
Teacher certification in social studies education is available for grades 5-12. Required are 54 credits in social science, with at least 12 credits each in three areas chosen from economics, historical perspectives, geographical perspectives, government, psychology, or sociology. Other requirements of a Goshen College major in history, psychology or sociology must be met as well. In addition, 30 credits of education courses are required, including a fall semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

Career opportunities
Recent graduates with these majors teach social studies in high school or a specialty in college. Some are employed in libraries, archives and education administration. Others are in church vocations, law, business and administration.

Hist 100 Human Stories
A topic course designed for the first-year colloquium. Provides an introduction to historical modes of inquiry based on themes of particular interest to the instructor. Topics in the recent past have included: “Leadership in American History,” “History of Childhood” and “Utopian Thought in the Western Tradition.”

Hist 101 World History I (Beginning to 850)
History of the world from the agricultural revolution to European expansion, concentrating on the establishment and interaction of classical traditions in the non-Western world. Also introduces the study of history as an academic discipline and how the historian uses primary sources.

Hist 102 European History (400-1815)
Selected topics in European civilization from the Middle Ages through the Renaissance, Reformation, Age of Absolutism to the 18th-century Enlightenment and French Revolution.
### History and Political Science

#### Hist 324 U.S., 1790-1877: Nationalism and War .......................... 3
Having rejected the one thing they had in common – British rule – Americans created an identity and constructed the myths needed to sustain a new nationalism. Slavery was a central and contested part of this identity, leading to frightful civil war. Through it all, American nationalism continued to claim the power to ‘reconstruct’ society.

#### Hist 325 U.S., 1877-1945: Identity and Diversity ..................... 3
The U.S. became the first highly diverse nation state, but only gradually came to understand the implications of that fact. Economic divisions, urban and Western population growth, debates over race and ethnicity, and international consciousness all shaped a society that faced Depression and global war, and began to link its plurality to notions of pluralism.

#### Hist 326 Recent American History ....................................... 3
A look at events that shaped the most recent generations of Americans. From grand expectations of the Civil Rights movement, faith in science, and the possibilities of affluence and social reform, society confronted the realities of Vietnam, Watergate and environmental destruction – producing cynicism, culture wars and continued efforts to balance liberty and equality.

#### Hist 327 American Immigration and Ethnic History .................. 3
An examination of the development of ethnic and racial identities in the United States, from the colonial period(s) to the present. Immigration patterns, forced migration, assimilation, ethnicization, nativism, family and gender dynamics, immigration and naturalization law, and multicultural debates were important factors in these processes.

#### Hist 328 African-American History ....................................... 3
Historical study of the experience of African-Americans as a group, especially their political and economic situations, their community life, some of their outstanding organizations and leaders, their forms of adjustment and resistance and their participation and contributions in U.S. life. Prerequisite: any 100- or 200-level history course or consent of instructor.

#### Hist 330 International Women’s History .................................. 3
A comparative studies in world history course. Women have been left out of the world’s history, particularly women in the non-Western world who are stereotyped as oppressed and passive. Putting women back into the center of world history unsettles older historical paradigms and challenges our ethnocentric assumptions. Explores the diverse experiences of women as active agents in shaping their world through a comparative case-study approach.

#### Hist 335 History of Ethnic Conflict ....................................... 3
A comparative studies in world history course. The world seems plagued with increasing conflict between ethnic groups. Explores the historical roots of this problem through a comparative case-study approach and takes an interdisciplinary approach both to analysis of the problem and its solution. Students will present an in-depth research paper on the historical roots of one conflict.

#### Hist 340 Religious History of Africa ...................................... 3
A comparative studies in world history course. Examination of the development and interaction of the three major religious traditions of Africa – African religion, Christianity and Islam – from earliest times to the present. The course will look at the particularly African forms of Christianity and Islam that were created by converts in various contexts and the social and political implications of religious practice. There will be some attention to the spread of African religious forms within the diaspora.

#### Hist 344 Latin American History: National Period ..................... 3
A study of the history of the Latin American republics since independence, with special attention given to Mexico, Cuba and the ABC countries (Argentina, Brazil and Chile).

#### Hist 345 Environmental History ........................................... 3
A comparative studies in world history course. Exploration of human interaction with the environment over time particularly in the non-Western world. Examination of the material and ideological conditions which have led to preservation or destruction of the environment through a comparative case-study approach.

#### Hist 350 African History ......................................................... 3
African history from ancient times to the present with an emphasis on topical studies of land and food, slavery and social reciprocity and colonial transformations in political authority. Encourages historical analysis for the purpose of responding positively to pessimistic predictions of Africa’s future and appreciating Africa’s strengths.

#### Hist 375 Topics in History ..................................................... 3
Study on a selected topic in American or world history. Examples: the United Nations; history of childhood in America. Students may be invited to help shape the topic.

#### Hist 400 Advanced Study ..................................................... Credit Arranged
Special topics for majors and minors.

#### Hist 409 Internship .............................................................. 2 or 3
Using research, writing and organizational skills in a setting outside the classroom; deliberate reflection on the process of historical or legal inquiry.

#### Hist 410 History Seminar: Analysis ....................................... 3
Philosophy and purposes of history; principles and methods of historical research; history and Christian faith; choice of a topic and bibliographical work and initial research on that topic. Course to be taken in the fall semester of the junior year. Required of all majors.

#### Hist 411 History Seminar: Synthesis ..................................... 3
Continued research on topic chosen and presentation in forms of oral report and written thesis paper. Course to be taken in the spring semester of the senior year. Required of all majors. Prerequisite: Hist 410.

### B. Political Science

#### Political science courses

##### PoSc 200 Introduction to Political Science ............................ 3
General comparative study of political institutions and behavior in various types of regimes, with special emphasis on the American political system. The most appropriate course for students required to take one course in political science. Collateral reading may be adjusted to individual needs and interests.

##### PoSc 210 Introduction to Public Policy .................................. 3
Explores the nature of the policy-making process in the United States and, to a lesser extent, other pluralist polities. Topics will include constitutional and structural framework in which policies are shaped, interest articulation, policy formulation and the feedback process.

##### PoSc 305 U.S. Government .................................................. 3
A basic introduction to the federal system of government in the United States. Focus on the constitutional arrangements established at the nation’s founding, critical points in the constitution’s evolution and
the contemporary setting. Topics include the legislative process, the judiciary branch and the nature of the presidency. The regulatory process, interest groups, political parties, the press, campaigning and voter behavior, civil rights and federal-state relations will also be examined.

**PoSc 308  International Politics .................................................. 3**
Examination of the structure, development and operation of the present international political system and its possible alternatives.

**PoSc 318  Latin American Politics ................................................ 3**
Analyzes Latin America's contemporary political and socio-economic institutions and issues; relates them to the area's development and need for change; includes the meaning of revolution in Latin America.

**PoSc 320  Issues in Politics and Society ........................................ 3**
Contemporary (and often controversial) political issues in the U.S. and Latin America, e.g.: African-Americans and the U.S. judicial system; educating legal professionals; the church and Latin American politics. Analysis through class discussions, some lectures by the instructor, student papers and contribution from resource persons with involvement in the subject matter.

### C. Minor in Anabaptist-Mennonite studies

Although this minor is intended to be interdisciplinary in nature, responsibility for administering the program will be lodged with the history/political science department.

**Core courses (12 hours required from the following)**
- Hist 318, Anabaptist/Mennonite History
- Hist 321, History of Mennonites in America
- Engl 207, 307, Mennonite Literature
- PoSc 312, War, Peace and Nonresistance

Any topics class or independent study approved by the chair of the history/political science department, such as Soc 351, Contemporary Issues; Hist 375, Topics in History.

Six additional hours selected from core courses above or the following electives:
- Hist 304, Renaissance and Reformation*
- Rel 320, Christian Faith*
- Mus 311, Church Music*
- Soc 334, Race, Class and Ethnic Relations*

Any topics class or independent study approved by the chair of the history and political science department*

Internship with the Mennonite Historical Library, Menno-Hof, Mennonite Mission Network, Mennonite Central Committee, or any other Mennonite agency or institution Class at Associated Mennonite Biblical Seminary (e.g. HTE602, Rethinking Mennonite History)

Ministry Inquiry Program (MIP) internship with a Mennonite congregation

*Note: It is assumed that students who apply these courses to the minor will do a focused study (paper or project, e.g.) that makes an explicit connection with an Anabaptist-Mennonite topic.

### D. Minor in social policy

The social policy minor at Goshen College is a collaborative interdisciplinary program for students who want to work for social change within the public sector or nonprofit organizations. The minor is described in the sociology, social work and anthropology department pages.

---

# Humanities

Humanities courses at Goshen College are interdisciplinary courses, team-taught by professors from several different departments. Each of these interdisciplinary courses studies the history of artistic expression, provides opportunities for participating in artistic activities and examines the relationship between the arts and students' own lives. Fulfills the general education requirement for humanities study. One course is offered each semester.

**Hum 220, Humanities: Literature and Art ........................................ 4**
**Hum 221, Humanities: Literature and Music .................................... 4**
**Hum 222, Humanities: Theater and Literature .................................. 4**
**Hum 223, Humanities: Music and Art ............................................. 4**
**Hum 224, Humanities: Music and Theater ....................................... 4**
**Hum 225, Humanities: Art and Theater .......................................... 4**

---

# Interdisciplinary studies

**Associate Academic Dean**

An interdisciplinary major is for students who wish to engage in substantial study in several academic fields. It also gives students the opportunity to design a major that fits their unique interests and needs. An interdisciplinary major provides preparation for careers or professional programs where a broad educational background is appropriate.

**Requirements for the major**

A minimum of 45 credit hours, plus a senior seminar and internship.

Courses are selected from three academic departments in which Goshen offers a major or a minor. Must include a minimum of 15 credit hours from each department, of which at least nine credit hours must be core courses required by the major or minor.

The senior seminar and internship are not included in the nine hours of core courses required in each of the three departments. These should be completed in the same department. Any exceptions must be approved by the supervising professor for the internship.

At least one three-credit core course in each department must be completed in residence at Goshen College. Not including the senior seminar and internship, a minimum of at least 18 credit hours in the major must be upper-level courses (300-400 level).

Students interested in investigating an interdisciplinary major should contact the associate dean to discuss interests and options. The student's academic adviser will usually be a professor from the department in which the student elects to complete the senior seminar and internship.

**Career opportunities**

Interdisciplinary graduates are working in nonprofit agencies, education, business, church ministries, community development, journalism, law and many other fields.
Mathematics
Chair, Professor P. Oakley
Professors D. Hausman, R. Milne

The mathematics program provides preparation for majors and nonmajors that is academically sound, responsive to individual needs and exemplary in its pedagogical approach. A student who successfully completes a major in mathematics will:
• develop mathematical ways of thinking and knowing (i.e., logic and deduction, data interpretation and analysis, modeling, pattern recognition and inference, abstraction, symbolism, optimization).
• make and value connections among different areas of mathematics.
• communicate mathematics through written and oral means.
• use general problem-solving strategies.
• use computers and calculators appropriately as mathematical problem-solving tools.
• have increased knowledge of and sensitivity to a variety of historical and cultural contexts in which mathematics has developed.
• develop self-confidence and enthusiasm along with technical expertise.
• experience mathematics as a collaborative, as well as an individual, enterprise.
• integrate spiritual/ethical values with mathematical activity, and be prepared for life-long learning in a discipline where knowledge grows exponentially.

Career opportunities
Graduates with mathematics majors are currently working in education, administration, computer technology, insurance, statistics, overseas development, mass communication and engineering.

Mathematics education
Teacher certification is available for grades 5-12. Courses needed in addition to the mathematics major core requirements are Math 302, Math 305, Math 323, Math 390 or 351, and a teaching internship with Math 131 or 132. Also required are 30 credits of education courses, including a semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

Major in mathematics
Core (21 credits):
Math 205, Discrete Mathematics ................................. 3
Math 211, Calculus I ............................................. 4
Math 212, Calculus II ............................................ 4
Math 213, Calculus III ............................................ 4
Math 300, Conjecture and Proof ................................. 3
Math 301, Linear Algebra ........................................ 3
Other upper-level mathematics (15 credits, or 12 credits for those who do student teaching in mathematics):
Must select at least one of the following:
Math 302, Abstract Algebra ..................................... 3
Math 305, Modern Geometry ................................... 3
Math 311, Real Analysis ......................................... 3
Other possible selections:
Math 321, Differential Equations .............................. 3
Math 323, Probability and Statistics ......................... 3
Math 341, Numerical Analysis ................................ 3
Math 351, Mathematical Modeling ........................... 3
Math 390, Problem Solving Seminar ......................... 1
Math 409, Senior Project/Internship ........................... 3
Related courses (10 credits):
Biol 111, Biol 112, Chem 111, Chem 112, Phys 203, or Phys 204 ......................................................... 4
CoSc 200, Programming Techniques ........................ 3
Phys 410, or CoSc 410, Senior Seminar ....................... 3
Total credit hours required: 46, or 43 for those who do student teaching in mathematics.

Other requirements:
• Students must achieve a grade of C or better in every course counted for the major.
• Listed prerequisites for all mathematics courses require a grade of C or better. (This applies to all students, not just majors.)
• All secondary education students in mathematics must complete at least one semester as an intern or as an assistant in Math 131 or Math 132.

Planning guide
First year
General education
Discrete Mathematics
Calculus I, II, III
Programming Techniques
General Physics
Second year
General education
Conjecture and Proof
Linear Algebra
Upper-level math
SST (summer)
Third year
General education
Upper-level math
SST (fall or summer)
Fourth year
Balance of general education
Balance of major
Senior Project/Internship or Student Teaching
Senior Seminar

Minor in mathematics
Completion of 19 credit hours in mathematics, including Math 205, Discrete Mathematics; Math 211, Calculus I; Math 212, Calculus II; and at least eight credit hours of mathematics chosen at the upper level (300 or 400 level).

Note: A typical way for a student to complete the eight upper-level credits would be to take Math 300, Conjecture and Proof (3 credits); Math 301, Linear Algebra (3 credits); and Math 351, Mathematical Modeling (3 credits).

Major in computer science and applied mathematics
A combined major in computer science and applied mathematics is available. For a full description, see computer science.

Mathematics courses
Math 105 Understanding Our Quantitative World ............... 3
Emphasis on the ability to critically interpret mathematical information commonly found in public discourse and positions of responsibility.

Goshen College Catalog
and leadership. Topics will include measurement and units, proportions, estimation, simple functions, graphs and their interpretation, appropriate use of technology (e.g., spreadsheets and calculators), probability and descriptive statistics. Examples incorporating mathematical arguments will be taken from a wide variety of fields including social science, sports, finance, environmental issues, education and health. This course can be used to meet the general education mathematics competency requirement and is intended for students who have not met the competency requirement by exam scores or transfer credit.

**Math 110 Mathematical World** .................................. 3
A survey of selected content chosen to help build basic number sense, develop skills in pattern recognition, use mathematical modeling to represent and investigate practical problems. Basic arithmetic computational skills are assumed. Prerequisite: general education mathematics competency requirement.

**Math 120 Intermediate Algebra** .................................. 4
Basic algebra as preparation for Math 141 or Math 170. Prerequisite: one unit of high school algebra and general education mathematics competency requirement. (Offered by demand.)

**Math 131 Mathematical Concepts for the Elementary Classroom I** .................. 3
Theory of natural, rational and real number arithmetic; computation in different numeration systems; elementary set theory and logic; number theory; probability and statistics; problem solving strategies. Linkage to mathematics education in the elementary school. Prerequisite: general education mathematics competency requirement.

**Math 132 Mathematical Concepts for the Elementary Classroom II** .............. 3
Formal and informal approaches to Euclidean geometry; patterns, symmetries, classification of geometric figures in two and three dimensions; transformations in the plane; measures, measurement and approximate data; computer software applications to geometry. Linkage to mathematics education in the elementary school. Prerequisite: Math 131 or high school geometry and general education mathematics competency requirement.

**Math 141 Finite Mathematics** ..................................... 3
Linear systems of equations and inequalities including linear programming set theory, elementary counting principles, probability, Markov chains. Applications to problems from business and the social sciences. Prerequisite: Two units of high school algebra or Math 120.

**Math 170 Precalculus Mathematics** .................................. 4
Families of functions and their graphs. Polynomial, rational, exponential, logarithmic and trigonometric functions and related applications. Graphing calculators and computer software are used. (Includes weekly computer lab.) Prerequisite: Three units of high school algebra and geometry or Math 120.

**Math 205 Discrete Mathematics** .................................... 3
Number systems and arithmetic, logic and Boolean algebra, enumeration, problem solving and proof techniques, functions and relations, set theory and applications, elementary graph theory and probability. Prerequisites: three and one-half units of high school mathematics including trigonometry or Math 170.

**Math 211 Calculus I** ............................................... 4
Differential and integral calculus of elementary algebraic and trigonometric functions with applications to geometry and physics; use of graphing calculators and mathematical computer software. (Includes weekly computer lab.) Prerequisites: three and one-half units of high school mathematics including trigonometry or Math 170.

**Math 212 Calculus II** ............................................... 4
A continuation of differential and integral calculus of a real variable; exponential, logarithmic, inverse trigonometric and hyperbolic functions; techniques of integration; introduction to differential equations; sequences and series; vectors in the plane; polar coordinates. (Includes weekly computer lab.) Prerequisite: Math 211.

**Math 213 Calculus III** ............................................... 4
Differential and integral calculus of three-space; vectors, lines, planes and surfaces in three-space; vector valued functions; functions of several variables; partial derivatives; multiple integrals; vector calculus. (Includes regular computer lab.) Prerequisite: Math 212.

**Math 300 Conjecture and Proof** ...................................... 3
An introduction to the exploration and formalization of mathematical phenomena, techniques of proof and the rudiments of logic, sets, real analysis and axiomatic geometry. Provides a preparation for the study of abstract mathematics. Prerequisite: Math 211 and either Math 205 or Math 212; or permission of instructor.

**Math 301 Linear Algebra** ............................................. 3
Linear systems of equations, vector spaces, linear transformations, matrices, determinants, characteristic vectors and values, inner products, computational aspects and applications. Prerequisite: Math 211 and either Math 205 or Math 212.

**Math 302 Abstract Algebra** .......................................... 3
An introduction to algebraic structures such as groups, rings and fields. Prerequisites: Math 300 and Math 301. (Offered in 2008-2009)

**Math 305 Modern Geometry** ........................................ 3
A survey of geometrics. Comparison of Euclidean, hyperbolic, elliptical, and projective geometries. Integral and fractional dimension; transformation groups; implications for computer graphics. Prerequisite: Math 300. (Offered in 2007-2008)

**Math 311 Real Analysis** .............................................. 3
A rigorous study of differentiation and integration of both one and several variables. Infinite series. Distance, compactness, limits of sequences, convergence and introduction to the topology of Euclidean n-space. Prerequisites: Math 213, Math 300 and Math 301. (Offered by demand)

**Math 321 Differential Equations** .................................... 3
The solution and application of ordinary differential equations; analytic solutions for linear systems; qualitative behavior of nonlinear systems; approximation and computer methods. Prerequisite: Math 213 or Math 301. (Offered in 2008-2009)

**Math 323 Probability and Statistics** ................................ 3-4
An introduction to the theory, practice and computer simulation of probability and statistics. Data exploration, sample spaces, random variables, probability distributions and their derivations, probability simulations and statistical inference. The optional fourth credit hour consists primarily of an independent data collection and analysis project. Prerequisites: Math 213 or permission of the instructor. (Offered in 2008-2009)
Math 341  Numerical Analysis  3
Numerical methods and error analysis for approximating solutions of mathematical problems. Includes linear and nonlinear numerical methods, interpolation and approximation techniques, numerical differentiation and integration. Prerequisite: CoSc 200 and one of Math 301 or Math 321. (Offered by demand)

Math 351  Mathematical Modeling  3
The modeling process, built around a study of applications from a variety of both social as well as natural sciences. A variety of mathematical and computing techniques will be employed including discrete structures, probability, calculus, differential equations and algorithms. Completion of modeling projects will be a major component of the course. Prerequisites: CoSc 200 and one of Math 213, Math 301 or Math 323. (Offered in 2007-2008)

Math 390  Problem Solving Seminar  1
The problem-solving process in the context of nonroutine problems, including a wide variety of general heuristics for approaching such problems. May be repeated. Prerequisite: Math 300 or permission of instructor. (Offered in 2008-2009)

Math 400  Selected Topics in Mathematics  1-3
For mathematics majors with consent of the department. May be repeated.

Math 409  Senior Project/Internship  3
Project designed to give the student practical experience in mathematics. Each student's project is individually arranged with the instructor. Arrangements must be made at least one semester in advance.

Modern and classical languages and literatures

Chair, Associate Professor D. Rhodes
Professors R. Falcón, P. Keim
Associate Professor M. Yoder
Assistant Professors, J. Armstrong, S. Yoder
Adjunct Faculty K. Masanari

The MCLL department offers a major and a minor in American Sign Language and in Spanish. Within these majors students may choose a concentration area: ASL – Secondary Teacher Education, ASL – English Interpreting, or Spanish – Secondary Teacher Education. MCLL also offers students the opportunity to study two semesters in either French or German.

The mission of MCLL is to foster in our students intercultural openness with the ability to function effectively with people of other world views as well as to develop in our students the ability to communicate in a variety of language systems.

Major in American Sign Language (ASL)
Requires completion of the following core courses plus those in the concentration:
(31 credit hours)

1. ASL - English Interpreting Concentration
(28 credit hours)

Recommended electives
Engl 315, English Language Problems
Engl 310, Introduction to Linguistics
Soc 200, Principles of Sociology
Soc 230, Cultural Anthropology
Soc 334, Race, Class and Ethnic Relations
Comm 206, Communicating Across Cultures

Planning guide
First year
General education
Elementary American Sign Language I and II
American Deaf Culture
### ASL Secondary Teacher Education Concentration

In addition to the required core courses outlined above and 30 credits of teacher education courses (for details see the American Sign Language pages of the Goshen College Teacher Education Handbook), the following Goshen College courses are also required: Engl 310, Engl 320 and PJCS 210.

ASL teacher education majors must also participate in a two-semester study immersion program in the language of the major. This is usually completed in the junior year through a semester at Gallaudet University and participation in the ASL language related SST semester.

### Planning guide

**First year**
- General education
- Level 202 or higher
- Second language (or second year)

**Second year**
- General education
- Advanced language courses
- Second language
- SST (recommended)

**Third year**
- Junior Year Abroad (advanced language and related courses)

**Fourth year**
- Balance of general education
- Balance of major and related courses
- International Classics
- Senior Integrating Seminar

### Career planning notes

**I. Study Abroad**

While most language majors begin to study another language in high school, it is possible to complete the major successfully if the student begins at Goshen College and participates in either a full junior year with Brethren Colleges Abroad (BCA) or a combination of one semester of BCA/SST or another approved program. (See international education pages.) While SST is not required to complete the major, it is highly recommended. Most required upper-level related courses are taken on location through BCA.

**II. Secondary Education**

A secondary teacher education major is available in Spanish. For this major the student must complete all requirements for the major in addition to courses in the secondary education department as well as the following courses:

- Engl 310 ..................................................... 3
- Engl 320 ..................................................... 4

This may include credit by exam for previous study above the 101-102 level in Spanish. For further details see the Goshen College Teacher Education Handbook as well as the education department pages of this catalog.

**III. Interdisciplinary Studies**

Spanish is an appropriate component of an interdisciplinary major.

### Minor in Spanish

Twelve hours in Spanish selected from any courses numbered 202 and above. Participation in a one-semester study-abroad program (or an approved alternate such as SST or CASAS) is required for all minors.

### American Sign Language courses

**ASL 101**  
Elementary American Sign Language I  
An introduction to American Sign Language and the deaf community; focuses on frequently used signs, basic rules of grammar, nonmanual aspects and cultural features of the deaf community.  
Prerequisite: ASL 101 or consent of instructor.

**ASL 102**  
Elementary American Sign Language II  
Emphasizes further development of receptive and expressive skills, vocabulary building and grammatical structures. Introduction to language forms used in American Sign Language poetry and theater.  
Prerequisite: ASL 101 or consent of instructor.

**ASL 103**  
Elementary American Sign Language III  
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: ASL 102 or equivalent.
ASL 104  American Deaf Culture  .................................. 3
Explores the American deaf community, examining the educational, sociological and cultural features which shape this group of people. Prerequisite: none.

ASL 106  Introduction to the Interpreting Profession  .......... 2
Introduces students to the professional field of interpreting; code of ethics, employment opportunities, professional organizations, etc. Prerequisite: ASL 102 or consent of instructor.

ASL 201  Intermediate American Sign Language I .............. 4
Continues development of expressive and receptive language skills through student-led discussions and prepared reports on topics related to the deaf community. Prerequisite: ASL 102 or consent of instructor.

ASL 202  Intermediate American Sign Language II ............. 4
Develops further expressive and receptive language skills. Prerequisite: ASL 201 or consent of instructor.

ASL 203  Intermediate American Sign Language III ............ 4
Continuation of grammar practice with emphasis on conversational ASL. Normally offered only on SST. Prerequisite: ASL 202 or equivalent.

ASL 205  Advanced Fingerspelling and Numbers ............... 2
Concentrated instruction and practice in expressive and receptive fingerspelling and the complex numbering system of ASL. Prerequisite: ASL 201 or consent of instructor.

ASL 206  The Deaf Community, Church and Religion .......... 2
Explores the variety of deaf community's experiences with churches and religion. Models of ministry and mission in the deaf community will be presented and critiqued. Out-of-class visits to local deaf ministries are required. Prerequisite: ASL 104. Offered May 2008 and May 2010.

ASL 301  Interpreting I .............................................. 4
Introduces theory and skills of the interpreting process, presenting both consecutive and simultaneous methods. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 302  Interpreting II .............................................. 4
Introduces spontaneous ASL/English interpreting and provides extensive practice utilizing videotapes and audiotapes. Prerequisites: ASL 301 or consent of instructor.

ASL 304  Certification Overview .................................. 1
Studies various quality assurance/state licensure assessments established across the United States. Prepares students for the written portion of the national certification of the Registry of Interpreters for the Deaf. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 305  Linguistics of ASL .......................................... 3
Investigates the major grammar rules of American Sign Language. Studies specific aspects of phonology, morphology, syntax and semantics. Prerequisites ASL 205, Engl 310.

ASL 306  Deaf American Literature ............................... 3
Focuses on various genres of literature by and about deaf people. Concentrates on deaf characters and the influences deaf culture and deaf history have on literary works. Prerequisites: All 200-level ASL courses or consent of instructor.

ASL 401  Interpreting III .............................................. 4
Continues the development of interpreting skills through role-playing and participating in out-of-class interpreting opportunities. Prerequisites: All 300-level ASL courses or consent of instructor.

ASL 407  Topics in Interpreting ..................................... 2
Practical and ethical issues in interpreting. Decision-making, assignment assessment, environmental management, policies and procedures within agencies and organizations. Prerequisites: All 300-level ASL courses or consent of instructor.

ASL 408  Specialized Vocabulary ................................... 2
Examines and develops the vocabulary necessary for interpreting in specific settings including education, medicine, mental health, legal, religious, etc. Taken during the first four weeks of the internship semester. Prerequisites: ASL 401 or consent of instructor.

ASL 409  Interpreting Internship ................................... 10
Supervised interpreting experiences through placement in various community settings. Course offered the last 10 weeks of the senior year. Prerequisites: All preceding 400-level ASL courses.

ASL 410  Senior Integrating Seminar ............................. 1
Students reflect on ethical dilemmas, problems, or conflicts encountered during their 10-week internship (ASL 409) with the goal of learning and growing from the collective discussion and experiences. In addition students will set goals for themselves related to career, vocation and job procurement and create tools to assist in achieving their goals following graduation. Prerequisites: All preceding 400-level ASL courses.

French courses
Fren 101-102 Elementary French I, II .......................... 4
Basic skills in understanding, speaking, reading and writing French for beginners.

Fren 103  Elementary French III ................................. 4
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: Fren 102 or equivalent.

Fren 201  Intermediate French I ................................. 3
Grammar review with reading and discussion in French. Normally offered only on SST. Prerequisite: Fren 102 or equivalent.

Fren 202  Intermediate French II ................................. 3
Reading and discussion of prose, poetry and drama. Grammar review, oral and written practice. Normally offered only on SST. Prerequisite: Fren 201 or equivalent.

Fren 203  Intermediate French III ............................... 4
Emphasis on conversational French. Normally offered only on SST. Prerequisite: Fren 201 or equivalent.

German courses
Germ 101-102 Elementary German I, II ........................ 4
Basic skills in understanding, speaking, reading and writing German for beginners; class work includes collaborative learning.

Germ 103  Elementary German III ............................... 4
Emphasis on basic communication skills in the target language and culture. Normally offered only on SST. Prerequisite: Germ 102 or equivalent.

Music
Chair, Associate Professor J. Grauity
Professor D. Bradaker
Associate Professors J. Heiks, M. Hill, B. Lapp
Assistant Professors L. Dengler, S. Dengler, C. Setiz,
S. Soroka, C. Thiegersen
Adjunct Faculty H. Carreño, P. Penny-Henderson
For a list of studio instructors, see the private applied study section.

Mission
The music department at Goshen College is dedicated to the cultivation of excellence in the areas of musical performance, pedagogy and scholarship. We believe musical expression is a human manifestation of the divine impulse and, as such, serves as a window into the individual soul, as a bridge between human beings and as a means of shared religious experience.

Career and post-graduate opportunities
Music graduates are currently working in public and private schools, colleges and universities, in private teaching, in music therapy (a music education degree is recommended for graduate work in music therapy), music technology, professional performance, in church music ministry and in music business. Many music graduates have gone on to pursue graduate degrees at our nation's most prestigious graduate schools.

Major in music
All bachelor of arts in music degree programs include a core requirement of 18 hours, plus additional hours to provide for any one of the following five possible areas of concentration: music education, general music major, music business/technology, music in worship and piano pedagogy.

Core requirements for all music majors (18 credit hours)
- Mus 201-202, Music Theory ................................................................. 8
- Mus 204, Survey of Music Literature ............................................. 3
- Mus 301, History of Music I ............................................................... 3
- Mus 303, Advanced Music Theory I ............................................. 3
- Mus 410, Senior Seminar ................................................................. 1
- Sophomore qualifying recital (15-20 minutes) ................................ NC
- Keyboard proficiency (by exam) ................................................... NC
- Senior recital/elective/project ....................................................... NC

Concentration options
General music major (26-27 credit hours)
- Mus 212, Song Leading ................................................................. 1
- Mus 302, Music History II ............................................................. 3
- Mus 304, Advanced Music Theory II ........................................... 3
- One specialty course that matches primary area of study, chosen from the following ......................................................... 2-3
- Mus 208, Introduction to Piano Pedagogy
- Mus 210, Teaching and Learning Concepts in Music
- Mus 241, Music Technology
- Mus 305, String Methods and Materials
- Mus 308, Vocal Methods and Pedagogy
- Mus 311, Topics in Music Literature ........................................... 3
- Applied music ................................................................. 14
- Ensemble participation at least seven semesters ...................... NC
- Senior recital or lecture recital (45-50 minutes) ..................... NC
- Pianists only: Accompany at least three sophomore recitals or comparable performances.

Music education concentration for K-12 certification (62 credit hours)
Note: Admission to teacher education program has additional requirements, including PPST and Praxis II exams. See education department pages.
- Mus 210, Teaching and Learning Concepts in Music .................. 3
- Mus 302, History of Music II ....................................................... 3
- Mus 304, Advanced Music Theory II ....................................... 3
- Mus 305, String Methods and Materials .................................. 2
- Mus 306, Woodwind Methods and Materials .......................... 2
- Mus 307, Brass Methods and Materials .................................. 2
- Mus 308, Vocal Methods and Pedagogy .................................. 2
- Mus 311, Topics in Music Literature ........................................ 2
- Mus 312, Conducting ................................................................. 3
- Mus 330, Teaching Secondary School Music ............................. 2
- Applied music ................................................................. 12
- Professional education courses ................................................. 30
- (See your adviser and education department pages for details.)
- Ensemble participation at least seven semesters ...................... NC
- Senior recital (35-40 min. may include demonstration of teaching skills) .................. NC
- Pianists only: Accompany at least two sophomore recitals or comparable performances.

Music business/technology concentration (37 credit hours)
- Mus 302, History of Music II ....................................................... 3
- Mus 304, Advanced Music Theory II ....................................... 3
- Mus 241, Music Technology ....................................................... 3
- Mus 340/Comm 340, Audio Production .................................... 3
- Mus 409, Internship ................................................................. 3
- Applied music ................................................................. 8
- Electives (choose 14 credit hours)
  - Acc 201/202, Principles of Accounting .................................. 6
  - Bus 315, Principles of Management .................................... 3
  - Bus 316, Principles of Marketing .................................... 3
  - Bus 328, Venture Planning ................................................. 3
  - Comm 212, Broadcast Media Production I .......................... 3
  - Comm 312, Broadcast Media Production II .......................... 3
  - Comm 190, Introduction to Radio ......................................... 1
  - Comm 270, Media Law and Ethics .................................. 3
  - Comm 290, Radio Operations ............................................. 1
  - Comm 326, Creating for the Web ......................................... 3
  - Ensemble participation at least seven semesters ...................... NC
  - Senior recital/lecture-recital/project (45-50 minutes) .............. NC
- Pianists only: Accompany at least two sophomore recitals or comparable performances.

Music and worship concentration (32 credit hours)
- Mus 210, Learning and Teaching Concepts in Music or
  - Mus 208, Introduction to Piano Pedagogy ............................... 3
- Mus 212, Song Leading ............................................................. 1
- Mus 241, Music Technology ....................................................... 3
- Mus 311, Topics in Music Literature: Music in Worship* ........ 2
- Mus 312, Conducting ................................................................. 3
- Mus 409, Internship ................................................................. 3
- Applied music ................................................................. 8
- At least six semesters of choral ensemble ................................ NC
- Senior recital or lecture recital (45-50 minutes) ...................... NC
- Public demonstration of chamber music ensemble leadership or hymn leading required.
- Pianists only: Accompany at least two sophomore recitals or comparable performances.
- Electives (choose nine credit hours)
  - Bibl 301, Hebrew Scripture: Wisdom and Psalms .................. 3
  - Engl 120, Introduction to Creative Writing ......................... 3
  - Psyc 210, Developmental Psychology ................................. 3

Goshen College Catalog
**Research and performance endorsements**

Music majors may choose to pursue the "performance endorsement" or "research endorsement" in addition to their area concentration.

**Research endorsement requirements:**
1. Sophomore qualifying recital (15 min.) or lecture-recital (20 min.) involving live performance and sample of written scholarly work (3,000 words) on a music topic submitted to faculty.
2. Junior project: a lecture or lecture-recital (30 min.) or a presentation at the student research symposium. Paper must be submitted to faculty for approval one month in advance.
3. Senior presentation of a scholarly paper (60 min.), which may or may not include performance. A 9-10,000 word paper must be submitted to faculty one month prior to the public presentation.

**Performance endorsement requirements**
1. Sophomore qualifying recital (20-25 min.).
2. Junior recital (30 min.).
3. Senior recital (50-60 min.). A permission performance is required one month prior to the public senior recital date.
4. Specific instrument requirements:
   - Pianists – learn at least one full concerto (may serve as junior recital) and accompany at least three sophomore recitals or comparable collaborative performances.
   - Violinists – learn at least one full concerto (may serve as junior recital)
   - Other instrumentalists – significant sonata repertoire and full concerto or other collaborative chamber project.

**Keyboard proficiency**

Keyboard proficiency will require facility in sight-reading, keyboard technique, harmonization, transposition, improvisation and playing by ear. Prior to entering the first semester of music theory (Mus 201), an examination will be given to determine the student's keyboard proficiency level and placement in the keyboard theory labs. Keyboard proficiency exams will be given at the end of each semester.

In order to pass the keyboard proficiency exam, most students require a sequence of study that begins with the 200-level music theory keyboard skills labs and continues with at least one semester of private applied piano study. Students earning a grade of B or higher in Mus 250 Class Piano automatically meet the requirement. Filling the keyboard proficiency requirement early in the degree program (by the end of the junior year at the very latest) is strongly recommended.

**Departmental recitals**

All music majors are expected to perform at least once per semester in the music department weekly recitals. All music minors are expected to perform at least once a year.

**Sophomore qualifying recital**

All music majors, minors and interdisciplinary majors with a focus in music are required to present 15-20 minutes of music in a public recital by the end of their fourth semester of applied music study. Successful completion of this requirement, as well as acceptable work in other music studies, is a prerequisite for continuing as a major in the department.

**Junior recital/project**

Junior recitals/projects are required only for students pursuing the research or performance endorsements or the Music Department Honors Program. See specific requirements under those headings and on the music department Web site.

**Senior recital/lecture-recital/project**

For those required to perform or present a senior recital or project, a permission performance is required one month prior to the public senior recital/presentation date. All program notes, translations and written documents must be submitted at the time of the permission for review and approval. Senior recitals are not required for music minors, but may be included (NC) if agreed upon by the student and music department adviser.

**Ensemble participation**

All music majors and minors are required to participate in a core ensemble (chorale, chamber choir, orchestra, or wind symphony). Participation in non-core ensembles is also encouraged (jazz band, men’s chorus, women’s world music choir, Voices-n-Harmony, percussion ensemble, small chamber groups).

**Planning guide**

**First year**
- General education
- Music Theory or Foundations of Music Theory
- Applied music
- Survey of Music Literature

**Second year**
- General education
- Music Theory (if not taken in first year)
- Applied music
- Sophomore recital
- SST

**Third year**
- General education
- Advanced Theory
- Applied music
- Courses in concentration

**Fourth year**
- Balance of general education
- Balance of major
- History of Music
- Topics in Music

*Topic must be "music in worship.*
Music minors and music scholarships
Students pursuing a minor in music, especially those receiving music scholarships, are strongly encouraged to complete all requirements by the end of their junior year, particularly the 201/202/204 sequence of courses.

Minor in music
(20-21 credit hours) Required courses:
- Mus 201-202, Music Theory ........................................... 8
- Mus 204, Survey of Music Literature ................................ 3
- Mus 212, Song Leading ................................................. 1
- Applied music .......................................................... 6
- Mus 210, Learning and Teaching Concepts or
  Mus 241, Music Technology or
  Upper-level music elective (not ensemble) ...................... 2-3
- Ensemble participation (at least six semesters)
- Sophomore recital or project (may take place in junior or senior year) ....................................... NC

Minor in piano pedagogy
(22 credit hours) Required courses:
- Mus 201, 202, Music Theory .......................................... 8
- Mus 204, Survey of Music Literature ................................ 3
- Mus 208, Introduction to Piano Pedagogy ....................... 3
- Mus 310, Private Teaching .......................................... 2
- Applied piano ............................................................
- Ensemble participation (at least four semesters)
- Sophomore recital or project (may take place in junior or senior year) ....................................... NC

Minor in music in worship
(21 credit hours) Required courses:
- Mus 201, 202, Music Theory .......................................... 8
- Mus 204, Survey of Music Literature ................................ 3
- Mus 210, Learning and Teaching Concepts of Music or
  Mus 241 Technology .................................................. 3
- Mus 212, Song Leading ................................................. 1
- Mus 311, Topics in Music Literature: Church Music ........ 2
- Applied music ............................................................
- Ensemble participation (at least six semesters)
- Sophomore recital or project (may take place in junior or senior year) ....................................... NC

Certificate programs
One-year certificates are available in music in worship or in piano pedagogy. See the department chair or the registrar for more information.

Courses
A. Departmental
- Mus 209  Music Field Experience ............................... 1-3
  On-campus internships supervised by a professor. May include arts administration, audio recording technology, church music, private teaching or other fields.
- Mus 355  Arts in London ............................................. 4
  (See Thea 355)

Mus 400  Special Projects in Music ................................. 1-2
May be elected for additional individual work in music theory, analysis, music history, conducting, music recording or music technology. May be repeated.

Mus 409  Music Internship ............................................. 1-3
Designed to give students practical experience in music-related fields such as arts administration, music business, audio recording technology, church music and music therapy. Internships are individually arranged with the work supervisor and faculty adviser.

Mus 410  Senior Seminar ............................................... 1
Weekly meetings of music majors and faculty to discuss vocational, curricular and ethical/spiritual topics. *(Offered in fall semester)*

B. Music theory
- Mus 102  Foundation of Music Theory ........................... 2
An introduction to the reading and interpretation of musical notation for those with limited experience. The development of basic aural and keyboard skills, along with exposure to musical forms and styles will also be included. Intended as preparation for Mus 201-202 and as an exploratory experience for all aspiring musicians. *(Offered in spring semester. May be required for admission to Mus 201.)*

Mus 201-202  Music Theory ........................................... 3+3
Designed to show how music is constructed artistically. Develops the ability to hear and perform music and teaches the technical elements necessary for original composition. Participation in the keyboard and aural-skills labs is required. Prerequisite: successful completion of online diagnostic exam in music theory *(See Prof. Christine Setz for details)* or completion of Mus 102.

Mus 201L-202L  Keyboard Lab ........................................ 0.5
Provides experiences designed to develop technical proficiency and understanding of music theory principles at the keyboard as well as development of sight-reading, harmonization, transposition and improvisation skills. The labs are divided into two or three groups according to previous experience at the keyboard. While music minors and nonmajors participate, for the music major the lab serves as initial preparation for the piano proficiency exam.

Mus 201L-202L  Aural Skills Lab ................................ .... 0.5
Provides experiences designed to develop the abilities necessary to become fluent in transforming written notation to performance. Course focuses on skills in reading and hearing rhythm, melody and harmony.

Mus 241  Music Technology ........................................... 3
Introduces student to MIDI, recording, digital audio, notation software and computer-aided instruction in music. Students produce projects relevant to individual areas of study. Explores the historical role of technological development on musical composition and the more practical applications of current technologies. Current issues such as duplication, distribution and intellectual property also discussed. *(Offered in fall semester)*

Mus 303-304  Advanced Music Theory ............................ 3+3
Study of chromatic harmony through altered chords and modulation procedures of the late 18th and 19th centuries. Introduction of orchestration and 20th century composition techniques. Original composition. Continuation of analysis techniques. Prerequisites: Mus 201-202, Mus 204 or permission of instructor.
Mus 340  Audio Production  ........................................... 3
An introduction to the recording studio presenting its function in commercial music production. Areas include basic electronics, studio setup and engineering fundamentals. Lecture/lab. (Offered spring 2007-08)

C. Music history and literature
Mus 204  Survey of Music Literature  .................................. 3
Designed to follow a year of music theory and precede the study of music history, this course presents an introduction to the basic style periods in Western music literature and acquaints the student with the main forms, composers and masterworks of those epochs. (Offered in May term only)

Mus 301-302  History of Music  ...................................... 3+3
History of musical style within Western civilization from the ancient Greeks to the modern day. Special emphasis on important trends and their relation to the other arts. Prerequisite: Mus 201-202, Mus 204 or permission of instructor.

Mus 311  Topics in Music Literature  ................................. 2
The study of a major composer, genre or style. The topic will be church music at least every other year. In 2007-08 the topic will be church music. Prerequisites: Mus 201-202 and Mus 204 or permission of the instructor. (Offered in spring semester)

D. Music education
Mus 210  Learning and Teaching Concepts in Music ............... 3
This is an introductory course for anyone who may someday teach music. It focuses on understanding the importance and power of melody, high quality diverse repertoire, song teaching strategies and developing skills for teaching children. The course also includes skill development on folk instruments: guitar, banjo, mountain dulcimer, autoharp and recorder. A fieldwork component provides real life experience with young singers. (Offered spring semester)

Mus 305  String Methods and Materials  .............................. 2
Study of a variety of pedagogical materials and procedures. Particular emphasis on the methods and ideas of Shinichi Suzuki. Class lessons on stringed instruments. (Offered fall semester 2007-08, 2009-10)

Mus 306  Woodwind Methods and Materials  .............................. 2
Study of pedagogical materials and teaching techniques appropriate to the woodwind instruments. Class lessons on woodwind instruments. (Offered fall semester 2008-09)

Mus 307  Brass Methods and Materials  ................................. 2
Study of pedagogical materials and teaching techniques appropriate to the brass instruments. Class lessons on brass instruments. (Offered spring semester 2008-09)

Mus 308  Vocal Methods and Pedagogy  ................................. 2
Required of all music-education majors and strongly recommended for all vocal performance majors. Study of basic concepts of singing in a class setting with the goal of assisting students in becoming effective teachers of singing. Emphasis will include review of basic singing technique, vocal physiology, drill in diagnosis and correction of vocal problems, diction and vocalizing for desired results. There will be a fieldwork dimension to this class. (Offered spring semester 2007-08, 2009-10)

Mus 312  Conducting  .................................................. 3
Principles of conducting theory and practice. Course begins with basic technique and progresses to score preparation and rehearsal planning for large ensembles. Students are encouraged, though not required, to take Mus 212, Song Leading prior to Mus 312. (Offered spring semester)

Mus 330  Teaching Secondary School Music  .......................... 2
This course deals with the practical strategies needed to build a successful music program at the secondary level (grades 7-12). Topics studied will include: developing high quality repertoire including multicultural elements, understanding the male changing voice, program structure, student rapport and classroom management, concert programming, marketing and recruiting, assessment strategies and teaching musical literacy. A field component provides hands-on experience to develop important teaching skills prior to student teaching. (Offered spring semester 2007-08, 2009-10)

E. Piano pedagogy
Mus 208  Introduction to Piano Pedagogy  ........................... 3
This introductory course in the piano pedagogy sequence focuses on the beginning student and on the materials and teaching techniques most effective for this level of instruction. The course includes weekly lecture-discussion sessions, observation of class and private instruction and the supervised teaching of weekly private lessons. This course is an alternative to Mus 210. (Offered fall semester 2008-09)

Mus 211  Group Piano Instruction  ...................................... 2
This course will provide students with an introduction to the pedagogy of group piano instruction for older students. We will examine a four-semester curriculum that encompasses elementary to intermediary piano levels. The pedagogical approach will examine conceptual learning and problem solving in relation to the following: ear playing, reading, transposition, harmonization, improvisation, technique and repertoire. Primary aims of study: Learning the applied skills such as ear playing, harmonization and transposition and being able to utilize these materials to convey important musical concepts in a classroom situation; gaining a greater appreciation, through research, of the academic literature concerning group piano instruction; surveying several college-level class piano texts. (Offered fall semester 2007-08, 2009-10)

Mus 310  Private Teaching  ............................................ 2
With special emphasis on the intermediate level student, this course focuses on the integration of theory, skills and repertoire; the reconstruction of transfer students; adolescent psychology and piano study; and a survey of intermediate materials. (Offered spring semester 2007-08, 2009-10)

Mus 412  Piano Literature  .............................................. 2
A functional knowledge of piano literature is essential for all pianists and teachers. This course will present an historical survey of piano literature from J.S. Bach to the present focusing on stylistic elements pertinent to particular composers. Special emphasis will be given to works that may be best suited for advanced students, both high school and at the college undergraduate level.

F. Applied music
1. Group study
Mus 212  Song Leading  .............................................. 1
An introductory conducting course using Hymnal: A Worship Book as a primary text. Emphasis will be placed on learning how to be a confident song leader. Attention will also be given to incorporating a variety of quality worship music in a worship setting. No prerequisite. Nonmusic majors are welcome. (Offered fall semester)

Mus 240  Class Voice  .................................................. 2
Breathing, diction and other beginning techniques of voice production
2. Private applied music study

Private lessons are available in voice, piano, harp, organ, string, brass and wind instruments, percussion and composition. Two hours of credit are granted for each applied music registration. At least one hour of daily practice is expected of nonmajors while music majors are expected to practice at least two hours daily. Students who have passed their sophomore qualifying recital should register for the 300-level course number in their particular applied area. Students electing applied music will perform for a music faculty jury at the end of each semester. (An applied surcharge for the costly nature of one-on-one instruction is assessed for each semester of applied music study. See the “Expenses” section of this catalog for more information on the applied music surcharge.)

- 265, 365, Composition .................................................. 2
- 269, 369, Percussion .................................................. 2
- 270, 370, Cello .................................................. 2
- 271, 371, Organ .................................................. 2
- 272, 372, Piano .................................................. 2
- 273, 373, Viola .................................................. 2
- 274, 374, Violin .................................................. 2
- 275, 375, Voice .................................................. 2

(prerequisite: Mus 240, Class Voice or permission of voice faculty)

- 277, 377, Flute .................................................. 2
- 278, 378, Bassoon .................................................. 2
- 279, 379, Oboe .................................................. 2
- 281, 381, French Horn .................................................. 2

- 297, 397, Tuba/Euphonium .................................................. 2

Applied music studio specialists and instructors

Flute – R. Hovan; Oboe – S. Stimson*; Clarinet – J. Graulty; Bassoon – C. Duda; Saxophone – C. French; Horn – M. Lewellen*; Trumpet – A. Murotani*; Trombone – A. Hicks*; Tuba – S. Gnagy*; Violin – S. Soroka; Viola – R. Troiano; Cello – D. Machavariani; String Bass – R. Martin; Percussion – J. Bollero; Drum Set/Jazz – S. Carreño; Harp – S. Davids; Voice – D. Brubaker, S. Dengler, L. Dengler (also composition); Piano – M. Hill, B. Lapp, C. Thögersen (also organ); Accompanying – C. Seitz; Music ed. – J. Heiks; Guitar – M. Stegmann (also audio production)

*Indicates member of Fort Wayne Philharmonic

3. Ensembles

All ensembles require auditions. Credit is optional.

Choirs

All choirs rehearse Monday, Wednesday, and Thursday 4–5:30 p.m. The rehearsal hours are shared between the four choirs, so that all students will participate in both a mixed choir and either the men’s or women’s choir. Students will audition for placement in either Chorale or Chamber Choir and may choose to register for academic credit or to participate as a co-curricular activity.

Mus 290 Chorale .................................................. 1 (credit optional)
The Chorale is open by audition to all singers. Its members represent a wide variety of academic majors. The choir sings choral treasures from every continent and every period of music history. Often the Chorale joins with the Chamber Choir to perform a major work. Chorale also performs concerts in the fall and spring, and at occasional off-campus events.

Mus 390 Chamber Choir .................................................. 1 (credit optional)
Chamber Choir is an auditioned group of 20–30 junior and senior singers, performing secular and sacred music from the Renaissance, Baroque, Classical and Modern periods. The Chamber Choir occasionally joins the Goshen College Orchestra for choral/orchestral works. Three or four on-campus and numerous off-campus concerts are presented each season, as well as periodic tours.

Men’s Chorus

Formed by the combined male voices of the Chorale and Chamber Choir, the Goshen College Men’s Chorus performs with the vitality and energy that has become a tradition of collegiate men’s choirs. They perform in all the scheduled choral concerts and occasionally perform in off-campus events and represent the college on tour. (Those wishing to sing in this ensemble must audit for placement in either Mus 290, Chorale or Mus 390, Chamber Choir.)

Women’s World Music Choir

Formed by the combined female voices of the Chorale and Chamber Choir, the Women’s World Music Choir sings music of international cultures and indigenous peoples. In doing so, the members celebrate the music of the world, as well as the role that women take in maintaining the arts within cultures. They perform in all the scheduled choral concerts, and occasionally sing at off-campus events and represent the college on tour. (Those wishing to sing in this ensemble must audit for placement in either Mus 290, Chorale or Mus 390, Chamber Choir.)
Mus 261  Jazz Band .......................... 1 (credit optional)
Lavender Jazz is Goshen College’s big band. The group plays classic jazz
standards and styles, such as swing, blues, waltz, mambo, cha cha and
funk. Lavender Jazz performs in a variety of settings, including concert
halls, malls, churches and high schools and makes recruiting trips
throughout the year.

Mus 280  Voices-n-Harmony ............... 1 (credit optional)
An associate choir of the music department, the Community School of the
Arts and the multicultural affairs office, Voices-n-Harmony sings classic
and contemporary gospel music and is open to students, faculty, staff and
community members from a mix of racial and ethnic backgrounds. Voices-
n-Harmony performs for Martin Luther King Day events and in several
other concert settings throughout the year. They rehearse on Thursdays
5:30-6:45 p.m. in Music Center.

Mus 292  Orchestra ......................... 1 (credit optional)
The Goshen College Orchestra presents concerts of major orchestral works
each semester. In addition, it accompanies the choirs, opera productions
and student winners of the annual Concerto-Aria competition. The
orchestra also performs in the department’s annual Festival of Carols
program, hosts world-renowned guest soloists and composers, and
occasionally serves as the host ensemble for nationally advertised
conducting workshops. The orchestra is open to all students by audition,
regardless of major. Rehearsals are on Tuesdays and Fridays 4-6 p.m.

Mus 298  Wind Symphony .................. 1 (credit optional)
An opportunity for all brass, woodwind and percussion players to
perform the finest wind band and chamber wind repertoire. Open to
music majors and non-majors by audition. Auditioned area pre-college
students also participate in this group. Rehearsals are Tuesday evenings
6:30-9 p.m., beginning approximately Nov. 1. The ensemble performs
a brief seasonal pre-concert before the annual Festival of Carols in
December and two concerts in the spring semester in Sauder Concert
Hall.

Nursing
Director, Associate Professor V. Kirkton
Professors E. Driver, B. Srof
Associate Professors F. Brunner, M. Helmuth, J. Hoffman,
N. Liechty Loewen, G. Weybright
Assistant Professor D. Hoover

Purpose
The nursing department is committed to excellence in nursing
education and practice with an emphasis in liberal arts and the
discipline of nursing. The nursing program provides opportunities
for the student to gain knowledge and develop values for personal
and professional growth and to prepare the student for entry into
professional nursing practice as a generalist in settings where health care
is provided. The study of the practice of nursing is based on nursing
and related theories, scientific principles, intercultural perspectives
and Christian ethics. The program prepares graduates with a foundation
for continuous intellectual inquiry, graduate study and/or eventual
specialization in nursing.

Program outcomes
Upon graduation, graduates will: 1) utilize knowledge from the
humanities, theology, natural and social sciences, nursing theories and
intercultural experiences in providing nursing care; 2) use the nursing
process by employing strategic thinking, decision making, psychomotor
and interpersonal skills; 3) develop a sense of vocational direction by
interpreting the historical role of nursing and participate in the present
emerging roles of the professional nurse; 4) collaborate and consult
with clients and the interdisciplinary team in providing comprehensive
health services that reflect a healthy understanding of self and others; 5)
assume leadership that empowers self and others, foster ability to resolve
conflicts, function as a change agent and promote accountability; 6) use
the ability to think actively and strategically in applying selected research
findings to improve nursing practice; 7) demonstrate personal and
professional growth by commitment to lifelong learning and involvement
in professional and community activities; 8) demonstrate a faith that
is active and reflective; appreciate transcendent reality of aesthetic and
spiritual experiences; and be sensitive and responsive to spiritual needs
of self and others. Demonstrate stewardship of the environment and
examine ethical issues in relationship to Christian faith.

Two tracks
The nursing program has a basic and a B.S.N. completion track. A
person who has just graduated from high school or who has completed
some college, follows the basic track. A person who has graduated from
a three-year diploma or associate degree program in nursing and is
a registered nurse follows the completion track. It is also possible for
registered nurses to fit into the basic track, however the completion
track was designed to provide an accelerated option that builds on
previous education, nursing practice and life experience. The objectives
and characteristics of graduates are the same for students enrolled in
either track. At graduation, the bachelor of science in nursing degree is
conferred.

A. Basic students
Admission process
Students applying for admission to the basic track should be in the
upper half of their high school graduating class. The high school
program should include foreign language, algebra, chemistry and
biology. Physics is also recommended.
Applications are submitted during the second semester of the
freshman year. Applications are due by March 1 and are processed by April 30. The first nursing course begins in the fall of the sophomore year. This course is also offered during the summer sessions. Transferstudent applications should be submitted by March 1 for summer or fall starts. Applications received after March 1 are considered according to date of receipt.

The applicant’s readiness for admission to the nursing major is determined by: academic performance, references, health record and a security check.

**Admission criteria**

*General.* Admission to Goshen College as outlined in this Catalog.

*Professional.* Essential abilities necessary to learn the professional nurse role include critical thinking, conceptual and judgmental skills, neurological function so that the senses can be used to make correct clinical judgments and perform psychomotor skills safely; the ability to communicate clearly; effective emotional coping skills; accountability; and the ability to engage in activities consistent with safe nursing practice.

**Academic.** Grade of C or above in supporting and nursing courses and a cumulative college grade point average of 2.5 or higher.

**Mathematics requirement.** All first-year or transfer students who are enrolled in pre-nursing courses need to take the Math Competency exam during registration. A score of 18 or above on this placement test is required.

**Other.** The nursing department reserves the right to adjust the current admission criteria when outcome assessment data demonstrate the need for such changes.

**Continuation criteria.** A grade of C or above in all supporting and nursing courses and a college grade point average of 2.5 or higher is required for continuation in the nursing major. A grade of C- or below in a supporting or nursing course interrupts the student’s plan of study. The course must be repeated with a grade of C or higher prior to advancement to the next level. Nursing and supporting courses may be repeated only once. The number of repeated courses is limited to two supporting courses and two nursing courses.

The nursing department reserves the right to place a student on probation or require a student to withdraw from the nursing major when that student displays behaviors deemed inappropriate to the practice of professional nursing.

**Graduation requirements**

Completion of 120 credit hours accepted by Goshen College, successful completion of all nursing courses, cumulative grade point average of 2.5 or higher in college course work.

**Curriculum**

The basic curriculum consists of 120 credit hours, of which 41 are in supporting courses and 46 are in nursing courses. Nursing students complete the same general education course requirements as students in other majors with two exceptions: (1) Nurs 309, Health Care Ethics substitutes for the general education course in philosophy or peace studies. (2) Nursing majors who participate in the alternative for international education do not need to meet the language prerequisite. They must complete a total of 12 credit hours, and one of the courses taken must be in foreign language.

Upon completion of the degree, the student is eligible to take the National Council Licensure Examination – RN (NCLEX-RN) for licensure as a registered professional nurse. The program is accredited by the Commission on Collegiate Nursing Education and is approved by the Indiana State Board of Nursing.

Graduates are prepared for positions in all areas of nursing in hospital and community settings. Graduates are encouraged to continue their education in graduate studies as well as in continuing education.

**Supporting science courses**

The following courses in the natural and social sciences are required for all nursing majors. Prior to enrolling in nursing courses the following (or their equivalent) courses must be completed successfully:

- Chem 101, Chemistry and Physics of Life* ............................................ 3
- Chem 102, Chemistry and Physics of Life ............................... 4
- Biol 203, Human Anatomy and Physiology .......................... 4
- Biol 204, Human Anatomy and Physiology ......................... 3
- Soc 200, Principles of Sociology .................................................. 3

*Students who had two semesters of high school chemistry with a grade of B- or higher would be exempt from Chem 101 but would be required to take Chem 102.

Before or with 200-level nursing courses:

- Biol 205, Microbiology ................................................................. 3
- Chem 220, Human Nutrition ........................................................ 3
- Psy 100, General Psychology ....................................................... 3
- Psy 210, Developmental Psychology* ......................................... 3
- Soc 210, Sociology of the Family ................................................ 3

In junior year, concurrent with 300-level nursing courses:

- Biol 320, Human Pathophysiology ............................................. 3
- Biol 321, Human Pathophysiology ............................................. 3
- Psy 306, Abnormal Psychology .................................................. 3

*SoWk 221, Human Behavior may be substituted for Psy 210 with approval of the director.

**Nursing courses**

**Nurs 210** Introduction to Professional Nursing ................................. 3

Selected nursing theories, nursing process and research will be studied as foundations for nursing practice. Emphasis will be on the nurse as a person and the importance of self-understanding, accountability, communication and helping relationships. The role of the professional nurse is studied in terms of an ever-changing health care delivery system and emerging nursing practice settings. Introduction to client as individual, family and community.

**Nurs 211** Concepts and Strategies in Nursing ................................. 3

Selected concepts and strategies inherent in basic nursing practice are studied. These are organized according to classification systems of nursing diagnoses, interventions and outcomes. Related nursing skills are incorporated. **Prerequisite:** Nurs 210.
Nurs 212 Holistic Client Assessment* .......................... 3
Holistic client assessment focuses on collection of a database within the context of the nursing process. Components of the database include: the health history and assessment of functional health patterns, body systems, growth and development, and cultural and spiritual dimensions. Assessment is linked with current health screening recommendations and a health promotion framework. Clinical and laboratory experiences are included. Prerequisite: Nurs 210, prerequisite or corequisite: Nurs 211.

Nurs 305 Pharmacology and Drug Administration* .......................... 3
An introduction to drug therapy focusing on drug classifications with an emphasis on: 1) principles of drug therapy and the actions of a classification, 2) drug administration in a clinical setting, 3) problem solving with clinical situations, and 4) nursing interventions with rationale. Nonnursing majors may take the course for one or two hours. Prerequisites: All 200-level nursing courses or by consent of instructor for nonnursing majors.

Nurs 306 Nursing Care of the Adult I .......................... 3
The nursing process is used with adults and families experiencing illness. Content areas in this course include nursing care of adults with fluid and electrolytes imbalance, gastrointestinal disorders, orthopedic problems, chronic neurological problems, urinary/genital conditions and autoimmune disorders. Clinical experiences consist of providing holistic nursing care to adults in medical/surgical clinical areas. Prerequisite: All 200-level nursing courses. Pre- or co-requisites: Nurs 305, Biol 320.

Nurs 307 Nursing Care of the Adult II .......................... 3
The nursing process is used with adults and families experiencing illness. Content areas in this course include nursing care of adults with cancer, lower respiratory problems, diabetes and cardiovascular problems. Clinical experiences consist of providing holistic nursing care to adults in medical/surgical clinical areas. Prerequisite: All 200-level nursing courses. Pre- or co-requisites: Nurs 305, Biol 320.

Nurs 309 Health Care Ethics .......................... 2
In this course, students will actively reflect on ethical issues which are present in health care for practitioners and consumers. The focus will be on the process of ethical inquiry rather than decision outcomes. In the process of analyzing bioethical issues, student will be introduced to ethical theory and modes of ethical analysis informed by the Christian faith. Prerequisites: Open to third- and fourth-year students from all departments.

Nurs 311 Nursing Care of the Expanding Family* .......................... 3
The nursing process and knowledge of normal and selected abnormal conditions experienced during the childbearing cycle are addressed. Clinical experiences occur with the family in the community and hospital. Pre- or corequisites: Nurs 305, Biol 320.

Nurs 312 Nursing Care of the Child* .......................... 3
The focus of this course is on common conditions and illnesses of children. The clinical focuses of the nursing care of the ill child. Developmental concepts, health promotion and prevention are emphasized in clinical and theory.

Nurs 403 Nursing Research .......................... 2
Basic concepts of nursing research are examined. Focuses on critical analysis of published nursing research as a basis for using research in clinical practice. Prerequisites: nine credit hours of 300-level clinical nursing courses.

Nurs 405 Psychiatric/Mental-Health Nursing* .......................... 3
A study of psychiatric/mental-health nursing practice. The clinical component provides opportunities in a psychiatric hospital and community mental-health settings. The role of the nurse as a member of the mental-health team is emphasized. Prerequisites: All 300-level clinical nursing courses. Prereq: Psy 306.

Nurs 406 Acute-Care Nursing* .......................... 3
Nursing concepts and theories are applied to the care of acutely ill adults and their families. Clinical experiences occur in an acute care facility and involve caring for acutely ill adults with complex needs. Prerequisites: All 300-level clinical nursing courses.

Nurs 407 Nursing Care in the Home* .......................... 3
Concepts from biological, behavioral and nursing sciences are applied to the care of ill clients and their families in the home. Students enhance their understanding of family theory and will apply this theory to their practice by performing one detailed family assessment of one client family. Loss theory is considered in the care of clients with complex needs, often including terminal illness. Understanding of family violence is emphasized. Prerequisites: All 300-level clinical nursing courses.

Nurs 408 Community-Health Nursing* .......................... 3
Applies a synthesis of nursing and public health theories to the assessment and care of aggregates in the community. Community health planning for aggregates is done using various community agencies and resources. The public health delivery system is differentiated from the private health care delivery system in its emphasis on social justice. Prerequisites: All 300-level clinical nursing courses.

Nurs 409 Leadership in Nursing* .......................... 3
A three-credit-hour course that continues to focus on the use of the nursing process with clients. Content includes management and leadership theories. The clinical experience includes management of care for multiple clients. Prerequisites: All supporting courses and clinical nursing courses.

Nurs 410 Senior Seminar in Nursing .......................... 3
A focus on integration of current professional practice issues. Students articulate their own philosophy of health care and nursing including their faith beliefs, rights of clients and responsibility to deliver quality nursing care. Prerequisites: All clinical nursing courses.

* Denotes courses with a clinical component or practice-based project

B. B.S.N. completion students
Registered nurses may choose to take the basic track or participate in the B.S.N. completion track described below. The B.S.N. completion program is offered in collaboration between the Goshen College nursing department and Division of Adult and External Studies (DAES). Transcripts from previous nursing education programs are evaluated individually and credits are transferred accordingly. Credit by examination is also an option for general education and supporting courses.

Overview
This track allows registered nurses to complete a B.S.N. in about 19 months. The track is designed to affirm personal and professional strengths. Students are actively involved in identifying their strengths and their learning needs. Self-directed study is promoted. Study guides are provided to maximize off-campus study and in-class activities. The collaborative education process makes student experiences and insights a

Goshen College Catalog 77
vital part of classroom activities. Each group of R.N.s progresses through
the courses as a cohort group. Classes meet one night a week for four
hours and vary in length from two to 10 weeks. The same night of the
week is used for a group throughout the program. Clinical experiences
for specified courses will be arranged at other times during the week.
There are 13 courses providing 40 credit hours, of which 28 are upper-
level nursing credits and 12 are general education credits.

Purpose
The B.S.N. completion track completes the purpose of the basic nursing
program and provides a program that is designed for the working
registered nurse.

Admission requirements
• An associate degree or diploma in nursing from an accredited
program.
• A cumulative grade point average of 2.5 or higher in prior academic
work.
• Completion of all prerequisite supporting courses (listed below).
• Transfer of a minimum of 60 credit hours from an accredited college.
• Current licensure as an R.N. in Indiana or a neighboring state where
the clinical component can be completed.
• Equivalence of one year of full-time employment as a registered
nurse in a health-care delivery setting. Currency and relevance of
work experience will be evaluated individually.

Prerequisites
Prior to assignment to a group and beginning progression through the
track, the following courses (or their achievement test equivalent) must
be completed:

General education
English Composition ........................................... 3

Supporting courses
Chemistry ......................................................... 4
Anatomy & Physiology ...................................... 4
Microbiology .................................................... 3
Principles of Sociology/General Psychology ................ 3

Graduation requirements
• Completion of 120 credit hours accepted by Goshen College
• Completion of the B.S.N. completion track
• Cumulative GPA of 2.5 or above in this program
• Completion of general education and supporting-course
requirements outlined above

Courses for the B.S.N. completion program
Nurs 331 Philosophy and Theories of Nursing ............ 3
Bridge course that prepares adult learners for upper-level college study.
The metaparadigm of nursing is utilized as the organizing framework for
exploration of self and nursing. The evolution of nursing science, theory,
research and practice are studied.

Nurs 332 Holistic Client Assessment* .................... 3
Builds on prior learning, expanding history taking and physical
assessment skills across the life span. Includes spiritual, cultural and
family assessment.

Nurs 333 Nursing Research ..................................... 4
Basic concepts of nursing research are examined. Students will focus
on applying these concepts by locating, reading and utilizing published
nursing research reports to make recommendations for evidence based
nursing practice. Nursing research is differentiated from research in
other fields.

Nurs 334 Communication Skills for Professional Nurses .... 3
This course responds to the challenges of professional communication
and the expectations for registered nurses who are baccalaureate students.
The focus is on critique and the development of individual written and
oral communication for content, style and effectiveness. Access and
management of information will be discussed.

Reln 305 Enduring Issues in Christian Perspectives ............ 3
Examines the biblical heritage and major doctrines of Christian faith.
Explores basic issues such as individualism and community, personal
decision-making, social justice and relating to other religious traditions.
Class members will be challenged to think through their own responses
to these issues.

Socn 305 Social Systems .......................................... 3
Family and organizational systems within their cultural and societal
context are examined from a social-theory perspective. Functional/
dysfunctional systems and change theory are studied.

Hist 202 American History II (1877 to present) or .......... 3
Hist 203 World History II (1500 to present) .................. 3
See history section of the catalog for course descriptions.

Nurs 437 Cross-Cultural Aspects of Health and Illness .... 4
Health, illness and various health-care systems are explored. Theory
relative to culture and specific aggregates will be studied.

Hum 223 Humanities: Music and Art or .................. 3
Hum 224 Humanities: Music and Theater or .............. 3
Hum 225 Humanities: Art and Theater ..................... 3
See humanities section of the catalog for course descriptions.

Nurs 438 Community Health Nursing* .................... 4
Applies a synthesis of nursing and public health theories to the
assessment and care of aggregates in the community. Community health
planning for aggregates is done using various community agencies and
resources. The public health delivery system is differentiated from the
private health care delivery system in its emphasis on social justice.

Nurs 439 Health Care Ethics ................................. 2
In this course, students will actively reflect on ethical issues which are
present in health care for practitioners and consumers. The focus will
be on the process of ethical inquiry rather than decision outcomes.
In the process of analyzing bioethical issues, student will be introduced to
ethical theory and modes of ethical analysis informed by the Christian
faith.

Nurs 447 Issues Seminar ....................................... 1
The focus of this course is on integration of current issues in the
practice of professional nursing. Students articulate their own
philosophy of health care and nursing including their faith beliefs, rights
of clients and responsibility to deliver quality nursing care.

Nurs 449 Leadership in Nursing* ............................ 4
Leadership and management principles are applied to clinical practice.
Clinical practice component of course will be arranged with each
student.

* Denotes courses with clinical component or practice-based project.
Peace, justice and conflict studies

Program Director, Associate Professor J. C. Liechty
Associate Professor C. Schrock-Shenk
Assistant Professors D. Johnson, R. Shands Stoltzfus
Adjunct Faculty D. Cortright, K. Shelly, P. Thomas, S. Thomas

Peace, justice and conflict transformation interests are an essential part of life at Goshen College. Goshen offers four academic peace programs: a major in peace, justice and conflict studies; minors in conflict studies and peace and justice studies; and a conflict transformation track for the teacher education program. The major introduces students to the array of topics and disciplines that make up peace, justice and conflict studies, while also allowing students to focus in areas of particular interest. The two minors enable students to combine peace, justice and conflict studies content with any recognized major. The minor in conflict studies is oriented toward students completing professional programs in nursing, social work and education as well as students hoping to use conflict transformation skills in a particular career. The minor in peace and justice studies assists students from a wide variety of academic majors who want to integrate peace and justice studies content with their vocational goals. The major and both minors prepare students for work in peace and justice organizations and other service agencies in the United States or abroad. Finally, a conflict transformation studies track, offered in conjunction with the teacher education program, gives a conflict transformation endorsement for education students.

PJCS majors undertake a wide variety of paid and voluntary internships, in Goshen, across the United States and around the world. Examples of recent internships include Mennonite Disabilities, La Casa of Goshen, the Fourth Freedom Forum, the Center for Community Justice in Elkhart, the Elkhart County Probation Department, Boys and Girls Club of Elkhart and Goshen, Jubilee Partners in Georgia and Corrymeela in Northern Ireland.

Campus co-curricular activities include the annual C. Henry Smith Peace lectureship, the annual student peace oratorical contest, the student PAX organization, the peace play competition, peace studies community forums, peace scholars-in-residence, the Intercolligate Peace Fellowship and the peace library collection.

The Orin and Marie Beechy scholarship fund assists students with academic expenses.

The department and its programs are rooted in Anabaptist-Mennonite theology and history. Courses emphasize action-reflection learning in addition to more traditional classroom opportunities. The program encourages internships as a way of gaining additional skills in peace-building. Classes, internships and co-curricular activities equip students with a framework of personal values and skills that will help them make a positive impact wherever they live.

Indianapolis Peace House
The Indianapolis Peace House began a peace studies program in fall of 2004. Students from three collaborating colleges – Goshen, Manchester and Earlham – join this urban peacemaking experience, involving an internship, several peace studies courses and independent study.

Career opportunities
Students are prepared to enter graduate programs in conflict transformation studies or in peace and justice studies – and any other field of scholarship in which critical and creative analysis of difficult issues is a priority. They are also prepared to work in a wide variety of nongovernmental organizations engaged in work around themes of mission, peace, restorative justice, conflict transformation, social justice, and other forms of service. Professional students electing the minor or professional endorsement in conflict transformation studies will be prepared to assist individuals, organizations and communities to deal constructively with conflict in the work environment.

Major in peace, justice and conflict studies
Requires a total of 41 credit hours

Any PJCS course, or any non-PJCS course with significant peace implications, as determined in consultation between student and adviser.

Planning guide for PJCS majors

**SST**
Recommended: sophomore year, any summer, spring term junior year or fall term senior year

**First year**
- General education
- Expository Writing
- SST language
- Transforming Conflict and Violence (recommended but not required)

**Second year**
- General education
- Violence and Nonviolence
- Mediation: Process, Skills and Theory
- War, Peace and Nonresistance
- Political Science or International Politics
- Principles of Economics or History of Global Poverty

**Third year**
- General education
- Junior Seminar
- Introduction to Public Policy, Social Policy and Programs or Methods of Social Research
- Three additional courses required for PJCS major

**Fourth year**
- Balance of general education
- Senior Seminar
- Remaining courses required for PJCS major
Minor in conflict transformation studies
(20 hours)
PJCS 210, Transforming Conflict and Violence ..................... 3
PJCS 313, Violence and Nonviolence. ............................. 3
PJCS 325, Mediation: Process, Skills and Theory .............. 4
PJCS 347, Justice/Restorative Justice or
PJCS 350, Dynamics and Theology of Reconciliation ........ 3
PJCS 410, Senior Advanced Work ............................... 1
PJCS 426, Conflict in Groups .................................. 3
Any PJCS course ............................................. 3

Minor in peace and justice studies
(20 hours)
Bibl 321, Biblical Themes of Peace or
PJCS 312, War, Peace and Nonresistance or
PJCS 332, Religion, Conflict and Peace ........................ 3
PJCS 311, Junior Seminar .................................. 3
PJCS 313, Violence and Nonviolence. ............................. 3
PJCS 325, Mediation: Process, Skills and Theory .............. 4
PJCS 350, Dynamics and Theology of Reconciliation or
PJCS 425, War and Peace in the Modern World .............. 3
PJCS 410, Senior Advanced Work ............................... 1
Any PJCS course ............................................. 3

Certificate in conflict transformation for teachers
This certificate may be added to an elementary, middle school or secondary education program. For further information, consult with a member of the teacher education faculty. Education students who wish to complete the conflict transformation studies minor at the conclusion of their certificate requirements should declare the minor and consult with a PJCS adviser for further details. (nine hours)
PJCS 210, Transforming Conflict and Violence ..................... 3
PJCS 325, Mediation: Process, Skills and Theory .............. 3-4
PJCS 426, Conflict in Groups .................................. 3

Peace, justice and conflict studies courses
PJC5 209 Field Experience ........................................ 1-4
An approved supervised internship related to peace, justice and conflict studies work.

PJC5 210 Transforming Conflict and Violence ..................... 3
Explores the potentially constructive nature of conflict, the destructive nature of violence and the relationship between the two. Examines various patterns of communication, conflict and violence and what is needed for transformation. Students will reflect on their own conflict styles, build their skills for peace building and examine their personal temptations for violence. Because PJCS 210 introduces concepts developed in greater depth in PJCS 325, this course may not be taken concurrently with or following PJCS 325.

PJC5 255 History of Global Poverty ................................ 3
(See Hist 255)

PJC5 305 Prosocial Behavior ........................................ 3
(See Psyc 305)

PJC5 307 Conflict and Conciliation in Irish Literature .......... 3
(Of ered in Ireland. See Engl 207/307)

PJC5 310 Issues in Peace, Justice and Conflict Studies .......... 3
A topical course focused on selected contemporary issues such as militarism, organizational power relationships and conflict transformation, nuclear weaponry, economic sanctions, domestic violence, etc.

PJC5 311 Junior Seminar ........................................ 3
Junior Seminar has three main purposes: to explore classic and contemporary issues in conflict and peace through faculty- and student-led seminars; generally, to develop research and writing skills appropriate for PJCS; and specifically, to begin work toward a major research project to be completed in Senior Seminar.

PJC5 312 War, Peace and Nonresistance ......................... 3
A survey course that examines the development of warfare ideologies and religious responses to warfare. Includes examination of just war theology, Anabaptist-Mennonite doctrines about nonresistance, pacifism and nonviolent action.

PJC5 313 Violence and Nonviolence ................................ 3
An interdisciplinary study of the nature, causes and types of violence. Examines the juxtaposition of scientific theories and religious teachings about violence and nonviolence.

PJC5 316 Liberation Theologies .................................... 3
(See Rel 316)

PJC5 319 Doing Theology Abroad .................................. 4
(See Rel 319)

PJC5 320 Borderlands ............................................... 3
This course will take place in Southeastern Arizona and Aqua Prieta, Sonora, Mexico. The Chiricahua Mountains extend from Arizona into North Central Mexico as one continuous ecosystem divided by the national border. The course will examine the interface between environmental realities of the region and U.S. government immigration policies. Students will hear the voices of western writers, Native Americans, immigrants, ranchers and environmentalists involved in border communities.

PJC5 325 Mediation: Process, Skills and Theory ................. 3-4
Focuses on the third party roles of the mediator. Explores the theoretical basis for mediation, its various applications in North America and critiques the appropriateness of mediation for certain types of conflicts. Emphasis will be on experiential learning to develop the skills needed for mediation in formal and informal settings. PJCS majors and minors, as well as interdisciplinary majors with a PJCS components, will complete one hour of applied experience.

PJC5 330 International Women's History .......................... 3
(See Hist 330)

PJC5 332 Religion, Conflict and Peace ............................ 3
An examination of the role of religion in causing and nurturing violence and in promoting peace, themes which have emerged as central to the pursuit of peace in the 21st century. The course will include exploration of the implications of these themes for Christian mission.

PJC5 335 History of Ethnic Conflict ................................ 3
(See Hist 335)

PJC5 344 Individual Readings ...................................... 1-3
Independent readings in peace, justice and conflict transformation studies. Student takes initiative to develop a plan with a PJCS faculty member. By consent of the faculty member only.

PJC5 345 Group Readings .......................................... 1-3
Selected writings of an individual scholar or peace activist will be
studied to examine the themes and issues raised within the corpus of work that s/he has produced during her or his lifetime.

**PJCS 347 Justice/Restorative Justice** .................................. 3  
Beginns with an account of some of the classic and mainstream understandings of justice and then moves on to an overview of the foundational principles of restorative justice and its various practical applications. The course will examine and address the needs of victims, offenders, communities and broader systems. It will specifically examine the Victim Offender Reconciliation (VORP) model and its role in the North American criminal justice system. It will also examine models from other contexts such as family group conferences and circles.

**PJCS 348 Sexual Violence and Violence** .............................. 3  
This survey course examines issues of sexual violation and violence within the life of individuals and communities. It explores the question, “What is the nature of reconciliation, forgiveness and healing?” in the experiences of individuals or communities where rape, incest, sexual harassment, sexual torture, professional sexual misconduct or domestic violence has been present. Examines conflicts of opinion and belief about these issues as individuals and communities seek to resolve the long-term aftermath of sexual violation and violence.

**PJCS 350 Dynamics and Theology of Reconciliation** ............. 3  
An interdisciplinary examination of the work of reconciliation in interpersonal and small group relationships, but especially in large-scale social and political contexts.

**PJCS 355 Contemporary Women’s Issues** ............................ 3  
(See WoSt 355)

**PJCS 405 Personal Violence** ........................................... 3  
An interdisciplinary study seminar about the prevalence of violence in the life of individuals or small groups. May include, for example, the death penalty, sexual violence, politically motivated torture, right-to-die issues or other relevant expressions and experiences of violent behaviors. Course includes emphasis on the development of independent research as well as written and oral presentation skills. In selected years, may become the senior seminar anchor course.

**PJCS 406 Spiritual Path of the Peacemaker** ........................ 3  
Uses biographical and autobiographical narratives alongside formal and/or theoretical writings of peace builders and healers of violence. Investigates the question, “How does a peace builder’s inner spiritual journey relate to her or his peace activism in the world?” Students will make major class presentations on such individuals as Mother Therese, Thomas Merton, Thich Nhat Hanh, Dorothy Day, the Dalai Lama, Elise Boulding, Dom Helder Camara, Barbara Deming, etc.

**PJCS 409 Senior Internship** ............................................ 1-4  
An approved internship or work experience related to peace, justice and conflict transformation studies. Examples include supervised activities in shelters for the homeless, work with local, regional, national or international peace, justice and conflict transformation agencies and organizations or work with congregational and denominational peace centers.

**PJCS 410 Senior Advanced Work** ..................................... 1  
A written project designed and implemented by the student in consultation with PJCS staff, that relates the PJCS minor to his or her major course of studies. Designed to be the final course of the student’s plan of study in the peace and justice and conflict studies minors.

**PJCS 411 Senior Seminar** .............................................. 3  
Students will complete a major research project, which will be open to a wide variety of interpretations as suggested by student priorities and interests. Senior Seminar will also focus on integrative issues concerning the work of peace building and conflict transformation in the work or graduate school environment and on professional issues such as résumé preparation and job interviews.

**PJCS 425 War and Peace in the Modern World** ................... 3  
Working primarily from a political science perspective, this course will examine changing patterns of fighting wars and seeking peace.

**PJCS 426 Conflict in Groups** ......................................... 3  
Using a systems approach, students will move from interpersonal conflict to addressing conflict in groups. Students will explore the uniqueness of conflict in various kinds of groups and will examine models for assessment, analysis, process design, intervention and evaluation in such situations of conflict. Using case studies and real life situations of group conflict and systemic injustice from families, congregations, organizations and communities, students will learn practical strategies for group facilitation, dialogue, problem-solving, decision-making and system change. Prerequisite: PJCS 325.

**PJCS 430 Healing the Wounds of Violence** ......................... 3  
A seminar in which students develop advanced research as well as oral and written presentation skills. Focused on interdisciplinary examination and analysis of historical and contemporary models for recognizing, assessing and healing the wound of violence. Investigates the question, “What are the strategies of healing processes for individuals and communities who seek to heal themselves or others from the wounds of violence?” This course is also suitable for students enrolled in clinical professional programs such as nursing, social work or education.
Physical education

Chair, Associate Professor J. Lehman
Associate Professor S. Daugherty, V. Hershberger
Assistant Professor S. Wiktorowski
Athletic Director K. Pletcher
Coaches: L. Bontrager, R. Clark, S. Daugherty, C. Furman, J. Keister, S. King, T. Maunsithiraj, T. Maunsithiraj, S. Wiktorowski, D. Yoder, S. Yoder

Mission statement
The physical education department contributes to the overall mission of Goshen College through the study of human movement in relation to wellness, exercise, sport and recreational activity. This department presents a unique and valuable perspective within the liberal arts education and provides programs specific for those who desire a career in the field of kinesiology. Based on the conviction that exercise and physical activity make a significant contribution to the health, growth and development of each individual, the physical education program is viewed as a valuable and integral part of the total curriculum at Goshen College.

Programs
The physical education department accomplishes this mission through curricular and cocurricular programs. First, the department services the general education curriculum by offering a wellness course which centers on the acquisition of wellness knowledge and the development and implementation of a personalized wellness plan. Second, the department offers a major and a minor in physical education, which prepares graduates for careers in teaching, sport management, personal training, retail sales, broadcasting, reporting and graduate work. Third, the elective physical activity program provides opportunities for students in any major to develop lifetime sport and exercise skills.

Two cocurricular programs, intramurals and athletics, provide many meaningful and intense opportunities for students to grow personally, intellectually, spiritually and socially as well. These programs have a significant impact in the lives of many Goshen College students who participate as leaders, event staff, players and as spectators. Additionally, these programs provide numerous occasions each week for members of the campus and larger community to gather in a spirit of recreation.

Career opportunities
Physical education graduates are currently teaching and coaching in public and private elementary, middle and high schools. Successful completion of other programs in this department prepare graduates to work in sport management, fitness facilities, athletic programs, municipal recreation, camp settings, Boys and Girls clubs, community development and/or sport ministry.

Graduate school opportunities
Alumni in physical education have completed graduate school and are teaching or conducting research in higher education.

Major in physical education
(42 credit hours)
PhEd 200-270 Sports Skills Electives (total of seven)
(One hour from each area 1-5 and, two electives from any area)
Area I: Aquatics ......................................................... 1
Area II: Dance ........................................................... 1
Area III: Gymnastics .................................................. 1
Area IV: Individual Sports ........................................ 1
Area V: Outdoor Recreation ....................................... 1
Elective sports skills .................................................. 2
Biol 154, Human Biology (with depth credit) or
Biol 203, Human Anatomy and Physiology (Prereq: Chem 101) .... 4
PhEd 102, First Aid and CPR ........................................ 1
PhEd 103, Basic Athletic Training .................................. 2
PhEd 250, History and Philosophy of Physical Education and Sport ... 2
PhEd 308, Teaching Sport Skills and Strategies .................... 3
PhEd 309, Physical Education for Children ....................... 3
PhEd 310, Administration of Physical Education and Sport ....... 2
PhEd 315, Kinesiology .................................................. 3
PhEd 317, Exercise Physiology ...................................... 3
PhEd 320, Adapted Physical Activity and Sport ................. 3
PhEd 330, Psychology of Motor Learning ......................... 3
PhEd 345, Theory and Techniques of Coaching ................ 3
PhEd 410, Senior Seminar ........................................... 3

In addition to the above requirements, PhEd 409, Internship or Educ 405, Student teaching must be completed.

Planning guide (Teacher licensure track)
First year
Wellness Colloquium
*History and Philosophy of Physical Education and Sport
(or second year)
Sports Skill Electives
Human Biology for four credit hours, available in fall or
Human Anatomy and Physiology (first semester take
prerequisite chemistry class)
Basic Athletic Training
First Aid and CPR
General education
Inclusive Schooling (May)

Second year
Inclusive Schooling (or first year)
*Psychology of Motor Learning (May)
Physical Education for Children
Human Biology for four credit hours (or first year)
*Administration of Physical Education and Sport (or third
year)
Theory and Techniques of Coaching
*Exercise Physiology
Exceptional Learners
Educational Psychology
General education
SST (or junior or senior)

Third year
*Teaching Sports Skills and Strategies (May)
Sports Skill Elective
Adapted Physical Activity and Sport (or second year)
*Kinesiology
Teacher certification in physical education

In addition to the physical education major, teacher certification requirements are as follows:

For grades 5-12 – 30 credits of teacher education courses.

For grades K-12 – PhEd 311, Educ 401 and 30 credits of teacher education courses.

PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

Major in physical education with concentration

For students who want to pursue career opportunities other than teaching.

(44 credit hours) Core courses include:

- Biol 154, Human Biology (with depth credit) or Biol 203, Human Anatomy and Physiology (Prereq: Chem 101)
- PhEd 250, History and Philosophy of Physical Education and Sport
- PhEd 310, Administration of Physical Education and Sport
- PhEd 315, Kinesiology
- PhEd 317, Exercise Physiology
- PhEd 330, Psychology of Motor Learning
- PhEd 409, Internship or Comm 409, Internship
- PhEd 410, Seminar

Courses in area of concentration: 15

Six hours chosen from:

- PhEd 200-242, 270
- PhEd 308, Teaching Sport Skills and Strategies
- PhEd 320, Adapted Physical Activity and Sport
- PhEd 345, Theory and Techniques of Coaching

Concentration areas

Sport communication. Comm 240 or Comm 383; Comm 250; Comm 202 or 204 (both recommended); six hours of electives: one to three in PhEd, remainder chosen from Comm 212, Comm 255, Comm 260, Comm 308, Comm 350. Note: Courses in the concentration area may not count toward a communication or writing minor.

Sport management. Acc 201, Bus 315, Bus 316; six hours of electives from PhEd 102, PhEd 103, CoSc 105 or Bus 150, Chem 220, Bus 328 and Bus 336, or Psy 200. Note: Courses counted toward a concentration in the major may not be included in a minor.

Minor in physical education

(24 hours)

- Biol 154, Human Biology (with depth credit) or Biol 203, Human Anatomy and Physiology (Prereq: Chem 101)
- PhEd 308, Teaching Sport Skills and Strategies
- PhEd 200-242, 270, Sports Skills Electives
- PhEd 345, Theory and Techniques of Coaching

Eight hours selected from:

- PhEd 103, Basic Athletic Training
- PhEd 315, Kinesiology
- PhEd 317, Exercise Physiology
- PhEd 320, Adapted Physical Activity and Sport
- PhEd 330, Psychology of Motor Learning

Four hours selected from:

- PhEd 250, History and Philosophy of Physical Education and Sport
- PhEd 309, Physical Education for Children
- PhEd 310, Administration of Physical Education and Sport
- PhEd 410, Seminar

Minor in health

(24-26 hours)

- PhEd 102, First Aid and CPR
- PhEd 103, Basic Athletic Training
- Biol 154, Human Biology (with depth credit) or Biol 203, Human Anatomy and Physiology (Prereq: Chem 101)
- Chem 220, Human Nutrition
- Soc 260, Human Sexuality

Five-eight hours selected from:

- Psy 200, Social Psychology
- Psy 210, Developmental Psychology
- Soc 210, Sociology of the Family
- Soc 220, Human Origins/Human Nature
- Soc 394, Race, Class and Ethnic Relations

Three-four hours selected from:

- Biol 111, Biological Principles
- Chem 101, Chemistry and Physics of Life

Coaching endorsement

(6 hours)

- PhEd 102, First Aid and CPR
- PhEd 103, Basic Athletic Training
- PhEd 345, Theory and Techniques of Coaching

Successful completion of the coaching endorsement certifies the student for coaching through the American Sport Education Program.

Physical education courses

PhEd 100 Wellness

The purpose of this course is to promote wellness in body, mind and spirit. Each participant will gain knowledge that informs decision-making related to physical, mental and spiritual health. Students develop and begin implementing a personalized fitness program. Topics addressed include cardiovascular fitness, muscular endurance and strength, flexibility, body composition, nutrition, stress management, spiritual wellness and lifestyle choices.

PhEd 102 First Aid and CPR

The course will provide an introduction to first aid, practical experience in basic first aid skills, first aid for specific sport inquiries and a practical guide to sport related liability. Successful completion of the course results in certification for one year.

PhEd 103 Basic Athletic Training

This course is valuable to anyone who plans to coach or pursue future certification in athletic training. Topics covered include: emergency procedures, evaluation and management of injuries to the foot, ankle, knee, shoulder, elbow and hand. Students learn basic taping techniques.
**PhEd 250  History and Philosophy of Physical Education and Sport.**  2
This course provides an introduction to the field of physical education and includes an overview of the history of physical education and sport. The time line begins with early civilization and continues through modern events including the Olympics. Additionally, a variety of philosophical approaches and their implications are discussed.  *(Offered fall 2007-08, 2009-10)*

**PhEd 255  Camping and Recreation**  3
Students gain hands-on experience in a wilderness setting. They will learn a variety of skills that may include: trip planning, map and compass reading, environmental care and study, spiritual growth and leadership skills. Other skills will be related specifically to either backpacking and/or canoeing.  *(Offered May 2009)*

**PhEd 308  Teaching Sport Skills and Strategies**  3
An applied course focusing on fundamental techniques in a variety of sports. Includes theory, current sport teaching models in physical education and best practice in secondary level pedagogy and skill content. This course focuses on organization and management for teaching, skill progressions and common problems/corrections of basic and intermediate-level skills and tactics.  *(Offered May 2009)*

**PhEd 309  Physical Education for Children**  2-3
Philosophy, methods and materials for teaching physical education to children. Some practical experience with with children included. Prerequisite: Edu 201 recommended.

**PhEd 310  Administration of Physical Education and Sport**  2
A focus on administrative practices in the areas of legal responsibility, personnel, finance, public relations, equipment, facilities, intramurals and athletics. Sociological and psychological issues related to leadership roles in physical education and sport are discussed.  *(Offered fall 2008-09)*

**PhEd 311  Physical Education Teaching Internship**  4
This course is designed to make sure teacher licensure students have a significant field experience at the elementary and secondary levels by the completion of their programs. If a student plans to complete the education student teaching experience (Edu 405) at the secondary level, this internship should be completed with an elementary school teacher and vice versa. Field experience with elementary students in the school setting. Prerequisite: PhEd 308 or 309.

**PhEd 315  Kinesiology**  3
A consideration of the anatomical and mechanical factors contributing to skilled performance in sport. Laws and principles from anatomy and physics that govern the use of the human body, objects and implements in a sport context are applied to the teaching and coaching of sport skills. Prerequisite or concurrent registration: Biol 154 with depth credit or consent of the instructor.  *(Offered spring 2007-08)*

**PhEd 317  Exercise Physiology**  3
A study of how the human body adjusts during various kinds of exercise and adapts to training over time. Laboratory equipment will be used when analyzing neuromuscular activity, circulation, respiration and metabolism as it applies to the trained and untrained. Prerequisite: Biol 154 with depth credit or Biol 203.  *(Offered spring 2008-09)*

**PhEd 320  Adapted Physical Activity and Sport**  3
This course, required for all physical education teacher licensure and general physical education majors, will examine attitudes, methods, techniques and special considerations important in addressing physical activity needs and interests of children and adolescents with disabilities. Critical aspects of motor development will be studied early in the semester, followed by adaptive programming and leadership of physical activity in inclusive settings. A concurrent field placement will be a required part of the class. This class is an elective for students in the sport management or sport communication concentrations.

**PhEd 330  Psychology of Motor Learning**  3
A study of the influence of psychological variables on learning motor skills. Some topics included are: motor-learning theory, individual differences, perception, motivation and social factors.  *(Offered May 2008)*

**PhEd 345  Theory and Techniques of Coaching**  3
The course will present an overview of basic theories and coaching applications including topics such as philosophy, psychology, ethics, practice and game preparation, social issues, as well as coaching roles and tasks. This course includes preparation for and the opportunity to take the American Sport Education Program certification exam. ASEP certification is required for coaching in Indiana and other state public school systems.

**PhEd 409  Internship**  2-3
A practical experience related to sport or fitness management. Generally occurs in an off-campus setting. For nonteaching majors only.

**PhEd 410  Senior Seminar**  3
An introduction to descriptive and inferential statistics and test analysis in physical education. Research methods in physical education; selection of a research problem, collection of data, basic analysis, written and oral presentation of findings. Course includes the consideration of professional and ethical issues in physical education. Students will finalize résumés and practice interviewing skills as well. For senior physical education majors.

**Sports Skills Electives (SSE)**  1
The following elective courses in six areas are offered to students. Normally, each course carries one hour of credit, except 226 and 240 which are worth two hours of credit.

**Area I: Aquatics**
- 226, Life Guard Training (Prerequisite: Instructor’s consent)
- 232, Beginning Swimming
- 234, Advanced Swimming
- 240, Water Safety Instructor

**Area II: Dance**
- 200, Aerobic Dance
- 224, International Folk Dance

**Area III: Gymnastics**
- 222, Gymnastics: Tumbling (offered fall 2007-08)

**Area IV: Individual Sports**
- 206, Badminton
- 218, Golf
- 230, Racquetball
- 236, Tennis

**Area V: Outdoor Recreation**
- 210, Canoeing and Backpacking
- 214, Cross Country Skiing
- 216, Cycling (offered fall 2008-09)
Mission statement
The physics department prepares responsible physicists, engineers and teachers for academic, research and industrial positions. Student involvement in active research and in teaching within the department fosters an understanding of the philosophical and structural concepts of physics as well as an ability to apply the science itself. The department consciously promotes an active participation in the wider scientific and engineering communities.

Career opportunities
Upon graduation, the physics major is prepared for graduate study in physics or engineering. Other possibilities include science secondary education or the combination of a physics baccalaureate degree with a master's degree in business administration, which affords the background for a management career in high technology and engineering industries. Biophysics and the neurosciences are growing fields requiring the background of an education in physics. Study of physics also provides the training and experience prized in many modern careers beyond the standard boundaries of science and engineering.

Graduate schools
All Goshen physics majors who have chosen to pursue a graduate degree have been admitted to graduate school. More than 70 percent of the physics majors elect this path. Individual professors at research universities have testified to the excellent preparation received at Goshen College. Recent Goshen graduates have chosen schools such as Purdue University, Princeton University, the University of Notre Dame, Carnegie-Mellon University, Case Western Reserve University, the Pennsylvania State University, the University of North Carolina, the University of Tennessee, Auburn University, Tulane University and Vanderbilt University.

Engineering
The combination of a liberal arts background and an engineering degree from one of the leading engineering schools in the nation is the optimal education for the modern engineer. Goshen College, acknowledged as one of the nation's finest liberal arts colleges, provides such a program. In this program the student spends three years at Goshen College and two or two and a half years at the engineering school receiving a bachelor of arts degree in physics (or chemistry) from Goshen and a bachelor of science degree from the engineering school.

Goshen College has program agreements with Case School of Engineering of the Case Western Reserve University (Cleveland, Ohio), Washington University (St. Louis, Mo.) and the University of Illinois (Urbana/Champaign). Admission to the engineering school is granted to a student with a 3.0/4.0 overall grade point average and at least a 3.0/4.0 in science and mathematics courses, upon recommendation of the engineering adviser.

Transfer to other schools is possible, but must be done on an individual basis. Goshen College will grant the B.A. degree when the student completes the engineering course and the Goshen College requirements.
While at Goshen College, the engineering student is enrolled as a physics or chemistry major. Studies of science and mathematics to fulfill the requirements of the first two years in the engineering school are undertaken. In addition the student completes the Goshen College requirements in the arts, religion and humanities. The Study-Service Term (SST) or alternative is also required of the engineer.

A large percentage of the Goshen students pursuing this program receive cum laude degrees from the engineering school and continue graduate study. Employment opportunities are excellent for graduates from this program.

**Physics education**

Teacher certification is available for grades 5-12 in two related areas.

Courses needed in addition to the standard track physics major are:

**Physics** – Phys 208, Phys 210

**Physical Science** – Chem 200, Chem 303, Phys 210

Also required are 30 credits of education courses, including a semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

**Major in physics / Standard track**

The major requires 27 hours of study in physics, including:

Phys 101-102, Research Seminar ............................. 1-2
Phys 203-204, General Physics .................................. 8
Phys 302, Analytical Mechanics ................................. 3
Phys 303, Classical Field Theory ............................... 3
Phys 310, Thermodynamics ..................................... 3
Phys 312, Quantum Mechanics ................................. 3
Phys 410, Senior Seminar ..................................... 3
Physics electives .................................................. 2-3

And 23 hours of related study including:

Chem 111-112, General Chemistry ............................ 8
Math 211-213, Calculus I-II ..................................... 12
Math 321, Differential Equations .............................. 3

**Major in physics / Biophysics track**

Biophysics is that branch of knowledge that applies the principles of physics, chemistry, and the methods of mathematical analysis and computer modeling to understanding how the mechanisms of biological systems work. Biophysics is a molecular science which seeks an understanding of biological function in terms of the structures and properties of specific molecules and the interactions among them in biological systems. Biophysics offers career opportunities in teaching and research at colleges, universities, medical centers, research institutes and government laboratories, in research and development at pharmaceutical, biotechnology, nanotechnology and other biologically-oriented high-tech companies. Goshen offers a biophysics track which is appropriate preparation for graduate programs in biophysics and neurosciences, however it is not adequate preparation for pure physics graduate study.

The physics department has a biophysics research program studying the fusion of vesicles with membranes, which is a step in neurotransmission.

The major requires 27 hours of study in physics including:

Phys 101-102, Research Seminar ............................. 1-2
Phys 203-204, General Physics .................................. 8
Phys 304, Electronics ........................................... 4
Phys 310, Thermodynamics ..................................... 4
Phys 314, Statistical Mechanics ............................... 3
Biol 111, Biological Principles ............................... 4

And 28 hours of related study including:

Biol 301, Genetics ............................................. 4
Biol 307, Molecular Cell Biology ............................. 4
Chem 111-112, General Chemistry ........................... 8
Chem 303, Organic Chemistry ............................... 4
Math 211-212, Calculus I & II ................................. 8

**Planning guide**

Physics department advisers will assist each student in creating a suitable four-year plan. For students enrolled in the three-two physics/engineering track, below is a sample schedule for courses taken at Goshen College.

**Double majors/minors**

Because of the extensive requirements in mathematics in the physics major, a double major in mathematics or applied mathematics may be undertaken. Many have also obtained double majors in physics and chemistry. A number of physicists have pursued minors in music.

**SST (Study-Service Term)**

This is required of pre-engineering as well as physics majors. The student should choose a unit freely, anticipating that course schedule adjustments can be made to accommodate the choice.

**Undergraduate research**

An undergraduate research experience has been identified nationally as the most influential contributing factor in the education of a scientist or engineer and is becoming almost a requirement for the student wishing to pursue graduate study. Working on a research project with a faculty member allows the student to encounter both the real world beyond the classroom and the profession. Papers with student authors are presented at both the National Conference on Undergraduate Research, held annually, and professional conferences.

The research center in the department is the Turner Laboratory.
which has facilities for optical holographic studies of musical instruments, phospholipid bilayer studies in biophysics and X-ray diffraction studies. Theoretical modeling studies are also conducted in the laboratory.

Much of the work conducted in the Turner Laboratory is collaborative. Collaborative research is presently underway with the University of Notre Dame and Brigham Young University. These collaborations provide a steady flow of research problems as well as an invaluable contact for both students and faculty. The interaction allows the student to explore further possibilities for education or career and the experience makes the Goshen student particularly attractive to graduate schools.

**Thesis/internship**
There is no explicit internship requirement in physics, but internships have been arranged for interested students. Most students, however, are involved in some form of research that may include the development of special experiments for the teaching laboratory. For the student involved in research, the thesis option is recommended. A thesis may be undertaken in consultation with the faculty adviser and forms part of the student’s permanent record. Thesis abstracts are integral parts of graduate school and professional school applications.

Cooperative (Co-op) experiences are available for pre-engineering students.

**Physics courses**
The course sequences have been carefully arranged. Each academic year provides a developing experience. The student should consult with a faculty adviser regarding deviation from the designed sequence, such as for SST.

**Phys 100  The Physical World ......................... 3**
An introduction to physical science for nonmajors. The Manhattan Project is used as a vehicle for the study of physics, engineering and scientific management. The course is experiential. *(Offered annually in the fall.)*

**Phys 101-102  Research Seminar ..................... 1+1**
An introduction to the department and to physics and engineering as careers. Presentations by faculty and students of research, introduction to the scientific literature and scientific writing, individual research on a chosen topic. *(Offered annually)*

**Phys 154  Descriptive Astronomy .................... 3**
An introduction to astronomy, including the study of the solar system, stars and stellar development, galaxies and cosmology. Laboratory experience will include astronomical observation and measurement. *(Offered May 2008-09, 2010-11)*

**Phys 203-204  General Physics ..................... 4+4**
A calculus and vector treatment of basic physics including mechanics, sound, electricity, magnetism and light. Required of physics majors and recommended for majors in the physical sciences. Lectures and laboratory. *Prerequisite or concurrent: Math 211-212. (Offered annually)*

**Phys 208  Introduction to Research ................... 2**
An introduction to the techniques and practice of experimental research. Students participate in laboratory work in the Turner Laboratory. Course is considered training for future research in the physics department. *Prerequisite: Phys 203-204 or consent of instructor.*

**Phys 210  Modern Physics .......................... 3**
An introduction to the basis of modern physics. Special relativity, experimental origins of the quantum theory, elementary particle physics and cosmology. *Prerequisites: Phys 203-204 or consent of instructor. *(Offered fall 2008-09, 2010-11)*

**Phys 240  Physics of Music .......................... 3**
A study of the physics of a variety of musical instruments including the voice, the physical origins of musical scales and temperaments, perception effects in the ear and brain and room acoustics. Many class sessions will be laboratory experiences and each student will do a major project. *(Offered spring 2008-09, 2010-11)*

**Phys 301  Methods of Mathematical Physics ........ 3**
Introduction to the mathematical methods used in physics. Complex variables, transformations, vector spaces. Green’s Function solution to differential equations and calculus of variations. *Prerequisite: Math 213. (Offered fall 2007-08, 2009-2010)*

**Phys 302  Analytical Mechanics ..................... 3**
Newtonian Mechanics based on the formulation of Lagrange and Hamilton. Applications to oscillations, orbital motion, scattering, rigid body motion. Special topics include chaos theory and relativity. *Prerequisites: Phys 203-204, Phys 301 or consent of instructor. (Offered spring 2007-08, 2009-2010)*

**Phys 303  Classical Field Theory ................... 3**
Study of electric and magnetic fields using the formulation of Maxwell. Maxwell’s equations are developed with reference to experiments followed by selected applications including wave propagation in dispersive media, plasma phenomena, and magnetic and dielectric phenomena. *Prerequisites: Phys 203-204, Phys 301 or consent of instructor. *(Offered May 2007-08, 2009-2010)*

**Phys 304  Electronics .............................. 4**
Introduction to analog and digital electronics and robotics. The focus is on design and construction of practical circuitry which can be used to build useful devices. After the analog and digital groundwork is laid, students learn to program microcontrollers to interface with a variety of sensors and outputs on mobile robotic platforms. Weekly laboratories culminate in individual projects presented in the biannual electronics show. Lectures and laboratory. *Prerequisites: Phys 203-204 or consent of instructor. (Offered fall 2007-08, 2009-2010)*

**Phys 305  Optics and Holography ................... 4**
Electromagnetic theory, geometrical optics, interference and diffraction, and other principles provide the framework for understanding a variety of optical instruments and experiments. Laboratories include various types of interferometry, laser beam filtering and profiling, several types of holography and culminate in individual projects. Lectures and laboratory. *Prerequisites: Phys 203-204. (Offered spring 2007-08, 2009-2010)*

**Phys 310  Thermodynamics .......................... 4**
A study of classical thermodynamics in the formulation of Gibbs. Thermodynamic potentials, characteristic variables, stability, homogeneous and heterogeneous systems, chemical kinetics are treated. An introduction to statistical mechanics is presented. Applications include studies of material properties and engineering systems. *Prerequisites: Phys 203-204; Chem 111-112; Math 212 or consent of instructor. (Offered fall 2008-09)*
Phys 312  Quantum Mechanics I  ................................................. 4
Principles of quantum mechanics are discussed beginning with a hydrogen atom and concluding with many atom molecules. The material is examined using the physical evidences that support the theory of quantum mechanics, particularly spectroscopy. The course also discusses symmetry of molecules, theory of NMR and X-ray diffraction. Lectures and laboratory. Prerequisites: Phys 203-204; Chem 111-112; Math 212 or consent of instructor.

Phys 313  Quantum Mechanics II  ........................................... 3
A study of the quantum theory in the vector formalism of Dirac. Schroedinger and Heisenberg representations are considered. Applications to scattering, atomic physics and magnetism. Prerequisites: Phys 203-204, Math 213, or consent of instructor. (offered spring 2008-09, 2010-11)

Phys 314  Statistical Mechanics. ............................................. 3
A study of the statistical treatment of particles including molecules, atoms and electrons. The ensemble theory of Gibbs is developed as the basis. Applications include gases, crystalline solids, magnetic materials and phase transitions. Prerequisite: Math 213 or consent of instructor. (offered spring 2008-09)

Phys 410  Senior Seminar. .......................................................... 3
An exploration of the relations between the natural sciences and other broad areas with special emphasis on ethical and theological concerns. Discussion, lectures, preparation and presentation of papers. Prerequisite: Senior standing. (offered annually)

Phys 421  Advanced Topics ......................................................... 1-3
Special topics selected by the student in consultation with professor. These may include topics of special interest to the student or research. Academic credit for research or thesis is covered by enrolling in this subject. (offered annually)

Psychology

Chair, Associate Professor J. R. Reese
Professor D. Kauffmann, V. Koop

Career opportunities
Graduates of the psychology program are currently working in administration, counseling, public-welfare agencies, mental-health centers, institutions for delinquent and emotionally disturbed children, probation services and a variety of additional social and religious agencies.

Major in psychology
Concentration area of 39 hours including 30 hours in psychology.

- Statistics and Methods
- Balance of major and related courses
- Seminar
- Internship

Social studies education
Teacher certification in social studies education is available for grades 5-12. Required are 54 credits in social science, with at least 12 credits each in three areas chosen from economics, historical perspectives, geographical perspectives, government, psychology, or sociology. Other requirements of a Goshen College major in history, psychology or sociology must be met as well. In addition, 30 credits of education courses are required, including a fall semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

Minor in psychology
Eighteen hours in the psychology department, 12 of which must be upper-level. Five or more hours must be selected from Psyc 308, 402, 408 or 410.
Psychology courses

Psyc 100  General Psychology  .................................. 3
An introduction to the methods, concepts and principles used in
the study of behavior. Includes a survey of topics in psychological
development, individual differences, memory, personality structure,
mental health, learning and social psychology.

Psyc 200  Social Psychology  ..................................... 3
A study of the influence of society on the individual and of
the individual on society. Involves the study of person-to-person
transactions, with emphasis on attitudes and small group structure and
process.

Psyc 210  Developmental Psychology  .......................... 3
A study of developmental processes across the life span. Physical, social
and cognitive changes provide the basic organization for this course. A
variety of developmental theories will be examined including Piaget,
Vygotsky, Erickson, social learning and psychodynamic. Current research
and an understanding of how to think about developmental processes
will be emphasized.

Psyc 221  Human Behavior  ........................................ 3
(See SoWk 221)

Psyc 302  Experimental Psychology  ............................ 4
A study of the methods and techniques of experimental psychology.
Course will include study of selected empirical findings from the
areas of learning, memory, intelligence and physiological psychology.
Experimental projects constitute a major emphasis of the course.
Prerequisite: Psyc 100.

Psyc 303  Physiological Psychology  ............................. 3
An introduction to the physiology of the brain and central nervous
system and their effects on psychological processes. Prerequisite: Psyc 100.

Psyc 305  Prosocial Behavior  ....................................... 3
A study of theories and empirical research concerned with positive
human interaction. Topics of special focus include altruism, empathy
and service from the perspective of both the helper and the recipient.
Some attention to applications in education, government and church
agencies. Offered alternate years.

Psyc 306  Abnormal Psychology  .................................. 3
A study of the variety of psychological disorders as classified by the
DSM system. Issues related to classification will be discussed. A
biopsychosocial model will be assumed when discussing etiology and
treatment. Since this is primarily a descriptive course, considerable
emphasis will be placed on case studies. At the conclusion of the course,
students will be well versed in understanding the major psychological
disorders. Prerequisite: Psyc 100.

Psyc 307  Applied Industrial/Organizational (I/O) Psychology  .............................................................. 3
A study of the application of psychological principles to industry
and organizations. Topics include employee selection, motivation,
job satisfaction, workplace violence, stress, organizational climate,
organizational effectiveness and leadership. Emphasis will be on applied
issues. Designed for both psychology majors and for nonmajors.
Prerequisite: Psyc 100. Offered alternate years.

Psyc 308  Personality Theory  ....................................... 3
A study of theory development with particular focus on major
personality theories. The central concepts of each theory, the unique
place in contemporary psychological thought and relationship of theory
to psychological experimentation and research will be emphasized.
Prerequisite: Psyc 100.

Psyc 309  Educational Psychology: Secondary  .................. 3
(See Educ 309)

Psyc 310  Educational Psychology: Elementary  ................ 3
(See Educ 310)

Psyc 313  Violence and Nonviolence  ............................ 3
(See PJCS 313)

Psyc 314  Psychology of Religion  .................................. 3
An exploration of the interaction of psychological dynamics and
religious behavior. Includes study of belief systems, faith, behavior
change, conversion, life styles, personality and religious persuasion.
Offered alternate years.

Psyc 316  Introduction to Clinical Psychology  ................. 3
A study of the major issues facing someone entering the professional
world of delivering psychological services to others. Critical thinking
about the most recent diagnosis and treatment modalities will be
emphasized. Other topics include ethics, psychopharmacology,
counseling, health psychology, psychobiology and community
psychology. Prerequisite: Psyc 100. Offered alternate years.

Psyc 317  Leadership Education  .................................. 1
A learning experience in leadership that integrates theory and
practice. Philosophy and theory of leadership will be integrated with
each student's specific campus leadership responsibility. The course
is repeatable as the student assumes additional campus leadership.
Enrollment is by consent of the instructor.

Psyc 320  Psychological Assessment  ............................. 3
A study of psychological testing theory, test administration and test
interpretation. The course will survey intellectual, aptitude, achievement,
interest, personality and neurological assessment. Students will be given
direct experience with tests from each of these categories. Prerequisite:
Psyc 100. Offered alternate years.

Psyc 400  Advanced Projects in Psychology  .................... 1-3
Independent reading or research for psychology majors. Requires
extensive reading or research on a topic of the student's choice.
Consultation with instructor required.

Psyc 402  Statistics and Methods in Psychology  ............... 4
A study of research methods and data analysis in psychology. Involves
research on a specific problem and presentation in the form of a written
thesis. Prerequisite: senior standing and consent of instructor.

Psyc 408  Contemporary Viewpoints In Psychology  ............ 3
A study of the research and current status of contemporary psychological
issues in the areas of personality, measurement, intelligence, perception,
learning, developmental, mental health and psychology of religion.
Prerequisites: Psyc 100; minimum of nine additional hours in psychology.

Psyc 409  Senior Internship  ......................................... 2
Internship offers opportunity to observe and participate in a supervised
field learning experience in which psychological theories and concepts
are employed and issues pertaining to psychology as a career can be
addressed. Prerequisites: senior standing; minimum of 12 hours of upper-
level psychology or consent of instructor.
Sociology, social work and anthropology

Chair, Associate Professor J. M. Liechty
Social Work Program Director, Professor R. Birkey
Professor T. Meyers
Assistant Professors D. Lind, R. Shands Stoltzfus
Adjunct Professor C. Jarvis

A. Sociology and anthropology

Major in sociology

(40 hours)
Completion of these disciplinary core and skills courses (19 hours):
Soc 200, Principles of Sociology ........................................ 3
Soc 391-392, Methods of Social Research ............................. 6
Soc 209, Field Experience in Sociology/Anthropology, or
Soc 409, Applications in Sociology/Anthropology:
Internship ........................................................................ 3
Soc 310, Social Theory ...................................................... 3
Soc 334, Race, Class and Ethnic Relations ........................... 3
Soc 410, Senior Seminar .................................................. 1

In addition, each sociology major is required to take 12 additional hours in sociology, six of which must be upper level, and three hours each in history, introductory economics and political science. ............. 21

Planning guide

First year
- General education
- Principles of Sociology
- 200-level sociology course

Second year
- General education
- History, economics, political science
- Sociology course
- SST

Third year
- General education
- Social Theory
- Methods of Social Research
- Upper level sociology course

Fourth year
- Senior Seminar
- Field Experience/Internship
- Balance of general education
- Balance of major

Minor in sociology/anthropology

Students minoring in sociology/anthropology complete 20 hours in the department including: three core courses, Soc 200, Soc 220 or 230, Soc 310 and Soc 391; and two elective courses in sociology or anthropology.
(This option is not available for social work majors.)

Career opportunities

The sociology major and sociology/anthropology minor provide a knowledge base and skills in social analysis with a variety of practical applications. Past graduates have entered positions in high-school teaching, foreign and domestic community development and professional and voluntary social services (not requiring social-work training) with such agencies as Church World Service, Mennonite Central Committee and Peace Corps. The majority of graduates have
gone on to attend graduate school or seminary and are presently employed in the Christian ministry, college teaching, community development, law and business, personnel management, public administration, public policy and program evaluation, research, social services, urban planning.

**Social studies education**
Teacher certification in social studies education is available for grades 5-12. Required are 54 credits in social science, with at least 12 credits each in three areas chosen from economics, historical perspectives, geographical perspectives, government, psychology, or sociology. Other requirements of a Goshen College major in history, psychology or sociology must be met as well. In addition, 30 credits of education courses are required, including a fall semester of student teaching. PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements.

**Minor in social policy**
The social policy minor at Goshen College is a collaborative cross-disciplinary program for students who want to work for social change within the public sector or nonprofit organizations. Students will develop understanding of policy making processes, community organizing and social advocacy in relation to their specific area of academic interest as well as some of the specific skills necessary for this work. The minor requires six courses (18-19 credit hours), including:

- **Core courses** (six or seven credit hours)
  - one of the following: ........................................... 3-4
    - SoWk 322, Social Welfare Policy and Program I
    - PoSc 210, Introduction to Public Policy
  - one of the following: ........................................... 3
    - Econ 201 or 202, Principles of Economics
    - Hist 255, History of Global Poverty
    - Phil 302, Ethics and Morality
    - Psyc 200, Social Psychology
    - Soc 200, Principles of Sociology
    - Soc 230, Cultural Anthropology

- **Social policy internship** .................................... 3

  Students will gain practical experience in their specific areas of interest – e.g. community development, environment, health care, women's studies, etc. Most will complete an internship through the existing course, SoWk 321, Social Service Field Experience (3), which combines 40 hours in an agency and policy setting with weekly class sessions and assignments. Students may also meet this requirement through existing departmental internship courses, provided they meet the three-credit hour requirement. The internship requirement may also be met through an off-campus program, approved by the social policy review committee, such as Indianapolis Peace House or the Chicago Center.

- **Skills and methodology courses** ........................... 9
  - Choose three of the following, with no more than two courses from any one department:
    - Bus 121, Introduction to Entrepreneurship
    - Bus 215, Entrepreneurial Finance
    - Bus 319, Leading Nonprofit Organizations
    - Comm 212, Broadcast Media Production I
    - Comm 250, Writing for Media
    - Comm 324, Principles of Public Relations
    - PJCS 325, Mediation: Process, Skills and Theory
    - PJCS 426, Conflict in Groups
    - Soc 301, Community Development: Local and International Soc 391, Methods of Social Research

Through consultation with their major advisers, students will submit a proposal of their goals for the minor and rationale for their course choices to the Social Policy Review Committee for approval. At least nine credit hours in this minor must be upper level (300-400 level) courses. After the plan of study is approved and submitted to the registrar, students will continue to be advised for the minor by their major advisers. Double counting will be limited to two courses, i.e., at least 12 hours of the minor must be met through discrete courses that do not count toward a student’s major requirements.

**Sociology courses**

- **Soc 200** Principles of Sociology ............................. 3
  An introduction to the study of human society through basic sociological concepts and perspectives – culture and social order, social interaction, social stratification, power and organizations. Teaches fundamental skills of behavioral observation and social analysis and discusses topics of current concern.

- **Soc 205** Introduction to Women's Studies .................. 3
  (See WoSt 200)

- **Soc 207** Introduction to Statistics ........................... 3
  (See Econ 207)

- **Soc 209** Field Experience in Sociology/Anthropology ...... 1-3
  Offers first- and second-year students opportunity to gain first-hand experience in settings where sociological or anthropological perspectives and skills are put to work. Arrangements for field experience are made at initiative of the student in consultation with a faculty adviser and a supervisor at the field-experience location. Forty hours of field experience will be expected for each hour of credit earned. Prerequisite: Soc 200.

- **Soc 210** Sociology of the Family ............................. 3
  Course combines institutional and functional approaches in the study of courtship, mate selection, marriage, family roles and relationships, family disorganization and social trends affecting the family in contemporary society and culture.

- **Soc 220** Human Origins/Human Nature ........................ 3
  An introductory anthropology class, this course surveys broad sweep of human experience from earliest times, attending especially to the latest archaeological, bio-behavioral, ethnographic, fossil-skeletal, genetic and primate field studies as these help us better to comprehend the nature of being human. Student chooses any topic/issue of interest, e.g., socialization of children for cooperation/aggression, selfishness/self-renunciation (kenosis), status and role of women/men, amount and use of leisure time, abortion or other techniques of birth control, nutrition and health, freedom of mate selection/divorce, homo/heterosexuality, dancing, music-making, drug use/abuse, healers and healing, conscription of warriors, prevalence of violence and warfare, role of artists and artistic expression, beliefs about the nature of God, patterns of worship, leadership and authority, with the goal of learning how societies both ancient and modern, both near and far handle this topic/issue.

- **Soc 230** Cultural Anthropology ............................... 3
  Course teaches an anthropological approach to cultural studies at a time when global cultural homogenization is producing increasing conflict around cultural differences. Students gain knowledge and skills for making sense of all culturally conditioned experience – both “ours” and “theirs.” Lab component teaches ethnographic skills needed by anyone wishing to relate competently to persons whose linguistic, social and cultural backgrounds differ from one’s own.

## B. Social work

### Social work program objectives

The purpose of social work is the restoration and enhancement of social functioning through intervention with individuals, families, groups, larger social systems and social welfare policies and programs. The social work program is a four-year generalist program leading to...
the bachelor of arts degree with a major in social work. Generalist social work practice requires a person-situation approach to problem solving, and the generalist perspective of the Goshen College social work education program provides a broad conceptual framework. The program is accredited by the Council on Social Work Education and has, as its primary objective, the preparation of students for professional social work practice. Students are also prepared for graduate social work education and receive advanced standing in many graduate social work programs.

The social work curriculum is built upon a liberal arts perspective. By its focus on the humanities, physical and social sciences and international experience, this foundation assists students in thinking broadly about individuals and the social systems in which they function. Liberal arts education at Goshen College is seen as a moral activity that places a high value on persons and social justice.

**Major in social work**

Social work courses required (38 hours):

- SoWk 221, Human Behavior .......................... 3
- SoWk 224, Introduction to Social Work .......................... 3
- SoWk 321, Social Service Field Experience .......................... 3
- SoWk 322, Social Welfare Policy and Program I .......................... 4
- SoWk 323, Social Welfare Policy and Program II .......................... 3
- SoWk 325, Social Work Practice Theory I .......................... 4
- SoWk 425, Social Work Practice Theory II .......................... 3
- SoWk 409, Field Instruction .......................................... 10
- SoWk 410, Social Work Senior Seminar .......................... 2

One elective from: (3 hours) .......................................... 3

- SoWk 350, Human Services: Services to Families
- SoWk 350, Human Services: Child Welfare
- SoWk 350, Human Services: Women's Concerns
- Soc 301, Community Development: Local and International

Required related courses (18 hours):

- Soc 200, Principles of Sociology .......................... 3
- Econ 201 or 202, Principles of Economics .......................... 3
- Psy 306, Abnormal Psychology .......................... 3
- Soc 210, Sociology of the Family .......................... 3
- Soc 334, Race, Class and Ethnic Relations .......................... 3
- Soc 391, Methods of Social Research .......................... 3

Biol 154, Human Biology is strongly recommended for the general education science requirement.

**Planning guide**

**First year**

- General education
- Human Biology
- Principles of Sociology
- General Psychology
- Sociology of the Family

**Second year**

- General education
- Human Behavior
- Introduction to Social Work
- Social Service Field Experience
- Principles of Economics
- SST (spring or summer)
- Expository Writing (strongly recommended)

**Third year**

- General education
- Social Welfare Policy and Program I, II
- Practice Theory I
- Methods of Social Research

**Fourth year**

- Methods of Social Research
- Practice Theory I

**Admission**

Social work is a professional program that requires an admission process separate from admission to the college. Students apply for admission to the social work education program following successful completion of Introduction to Social Work, SoWk 224, taken in the sophomore year. Written applications are accepted after Jan. 1 of each school year. Students transferring into the major in the junior year should apply immediately upon college admission. Admission criteria include academic and personal qualifications with a value orientation necessary for the professional practice of social work. The admission process is directed toward furthering students’ personal growth as they explore vocational interests and abilities. Specific information about criteria and process is found in the Social Work Student Handbook. This may be obtained from the director of social work education.

**Advising**

Students declaring a social work major are assigned a social work faculty adviser. Students exploring their interest in social work are invited to talk with the program director. Academic advising, which takes place in the fall and spring semesters each year, aids students in selecting courses in the sequence required for successful completion of the program. All social work courses must be taken in numbered sequence. If possible, Methods of Social Research should precede Social Work Practice Theory I and Economics should precede Social Welfare Policy & Program I. Additional advising appointments are scheduled as part of admission to the program and to field instruction. Students are encouraged to initiate contact with faculty advisers as issues arise, at any time throughout the academic year.

**Remaining in the program**

The professional practice of social work requires acquisition of knowledge, specific skills, a firm identification with specified values and ethics and a high degree of social and personal responsibility. Students whose academic work falls below a C in required social work and related courses, or whose personal or professional behavior is inconsistent with the above requirements, may be asked to leave the program. Students have the right of appeal through the Goshen College grievance procedure.

**Social work courses**

**SoWk 221 Human Behavior** .......................... 3
A study of the individual through the life cycle within the social environment. Focus on physical, psychological, social, cultural and religious factors in the development of the self. Social work majors are required to have had Soc 200 as a prerequisite.

**SoWk 224 Introduction to Social Work** .......................... 3
Analysis of the knowledge base, value structure, purpose, nature, history and function of social work practice in various social welfare activities and social workers through observation and guided participation in programs for meeting human need. Students engage in a specific field experience as part of course requirements and must furnish their own transportation. Prerequisites: Soc 200 and Soc 210 or consent of instructor.
SoWk 321 Social Service Field Experience .......................... 3
Offers sophomore or junior students an initial exposure to social
work practice in a social agency. The course focuses on an integrated
understanding of the organizational and community context for social
work practice and offers the students an opportunity for observing social
work practitioners and offering specific services to clients. Classroom
activities include discussion of social work related issues and concerns.
Prerequisites: SoWk 221 and SoWk 224 or consent of instructor. Students
furnish their own transportation for field placement.

SoWk 322 Social Welfare Policy and Program I ..................... 4
Economic and social justice is used as an organizing framework to
study the relationship between major social problems and social
welfare policy, programs and services. Included are poverty, health and
mental-health care, family problems, racism, sexism and other forms of
institutionalized oppression. The political aspects of social welfare policy
and the legislative process itself are examined in depth. Prerequisites:
Econ 201/202, SoWk 221, SoWk 224, SoWk 321 or consent of instructor.

SoWk 323 Social Welfare Policy and Program II .................... 3
A critical analysis of social welfare programs and issues of social
welfare policy, including philosophical perspectives, the broad issues of
organization, cost delivery, impact, effectiveness and alternate strategies.
Students develop skills in identifying, evaluating and formulating macro-
level approaches to social problems. Prerequisite: SoWk 322 or consent of
instructor.

SoWk 325 Social Work Practice Theory I ............................. 4
System approach to the practice of social work beginning with a model
for solving human problems. Emphasizes development of a theoretical
base for social work practice and includes a laboratory in which
specific behavioral skills are developed through simulation experiences.
Prerequisites: SoWk 221, SoWk 224, SoWk 321 and admission to program.

SoWk 350 Human Services: Special Studies ....................... 3
An in-depth seminar on a selected field of service program or policy
issue. Several elective topics are offered annually. Present courses are:
Child Welfare, Services to Families and Women’s Concerns. These
courses examine selected cultural, social, psychological and political
issues relevant to the involvement and treatment of children, families
and women in the social welfare system. Particular emphasis is given to
concepts of exploitation and social/economic justice. Other courses may
be added.

SoWk 391 Methods of Social Research ............................. 3
The principles and methods of research in sociology and social work,
including descriptive and inferential statistics. Prerequisites: Soc 200, Soc
210, SoWk 221, SoWk 224, SoWk 321.

SoWk 409 Field Instruction ............................................. 5+5
Integration of knowledge base and the acquisition of social work
practice skills through direct practice under a qualified field instructor
in a social service agency. Prerequisites: SoWk 323, SoWk 325 and consent
of program director. Field Instruction must be applied for during the spring
of the year preceding enrollment. A driver’s license and transportation are
required. Usually taken over two semesters, may be taken for 10 credits
during the spring semester by approval of program director.

SoWk 410 Social Work Senior Seminar .............................. 2
Taken during the second semester of Field Instruction or concurrent
with one semester block field placement. A weekly seminar that offers
the integration of learning from all social work and required related
courses. The final exam takes the form of a written paper and oral
examination through which students demonstrate their integration of
learning and skill competencies.

SoWk 425 Social Work Practice Theory II ......................... 3
Expansion of learning from Social Work Practice Theory I and Social
Welfare Policy and Program II and application to social work practice
with individuals, families and social systems of varying size. This course
is taught concurrently with the first semester of field instruction, which
provides the opportunity to integrate theory with skill development.
Prerequisites: SoWk 323, SoWk 325, Psy 306.

Agencies participating in field instruction
Church Community Services
Elkhart Community Schools
Elkhart County Court Services
Elkhart County Office of Family and Children Services
Elkhart General Hospital, Center for Behavioral Medicine
Fairfield Community Schools
Goshen Hospice Program
Goshen Housing Authority
La Casa of Goshen
Maple City Health Care Center
Oaklawn Community Mental Health Center
Riverview Adult Day Care Center
Chicago Center (placement in various social agencies)
Washington Gardens Evenstart Parenting Program
Theater
Chair, Professor D. L. Caskey
Adjunct Professor M. Milne
Performance Venue Technical Director J. Peters

The theater program at Goshen College has a strong liberal arts emphasis grounded in aesthetic communication and performance theory. Concentrations are available in acting/performance, design/technical, film studies and generalist areas. Students may also become certified in theater arts education. Students explore major historical, philosophical and artistic movements, the specialized areas of theater design, acting, literature, playwriting, voice and artistic movements, and courses from other departments that augment knowledge and skills for theater studies. Students may focus on theatrical design with art department courses, performance with music classes, theater arts education with education courses, communication with communication courses and language and literature with courses from English and Modern and Classical Languages and Literatures departments.

The John S. Umble Center is the home for most theater productions. There are two major productions and numerous one-acts during the academic year. The department also holds a biennial peace playwriting contest and produces the winning plays.

Career opportunities
Students have completed internships with major theater companies, and a significant number have attended graduate schools. Graduates are working coast to coast in repertory theaters, touring companies, video production, education, business and Christian ministry.

Major in theater
Students majoring in theater must complete 41 hours of theater, communication and related courses. All theater majors, in consultation with a faculty adviser, develop a plan of study that includes one of the concentration areas below. Basic requirements for the major include these courses:

All students majoring in theater are required to take the general education course Comm 202, Oral Communication for three credit hours.
Comm 204, Expository Writing .......................................................... 3
Thea 225, Introduction to Theater ....................................................... 3
Comm 240, Communication Research ................................................ 3
Thea 235, The Power of Story .............................................................. 3
Thea 387, History of Theater ............................................................... 3
Thea 200, Theater Practice (technical theater, acting or stage management) .............................................................. 2
Thea 409, Internship* ........................................................................... 3
Thea 410, Senior Seminar ................................................................. 3
Area of concentration* ................................................................. 18 (minimum nine upper level)

*The Thea 409/Internship should be in the student’s area of concentration.

A transfer student should have a minimum of nine hours of theater courses at Goshen College.

A senior recital and a portfolio or its equivalent are required for graduation.

Concentration options
Acting/Performance
Required: (nine hours)
Thea 245, Aesthetics .......................................................... 3
Thea 334, Acting .......................................................... 3
Thea 338, Directing .......................................................... 3

Elective: (choose nine hours)
Engl 305, Major Author: Shakespeare .................................................. 3
Mus 240, Class Voice .......................................................... 2
Mus 262, 362, Opera Workshop .......................................................... 1
Thea 275, Acting Lessons .......................................................... 1
Thea 320, The Expressive Voice ....................................................... 3
Thea 350, Playwriting .......................................................... 1-3
Thea 355, Arts in London .............................................................. 4
Thea 388, Themes in Drama .......................................................... 3
Thea 412, Special Project .......................................................... 1-3

Students are required to participate during at least four semesters with mainstage and/or one-act theater productions.

Design/Technical
Required: (nine hours)
Thea 245, Aesthetics .......................................................... 3
Thea 332, Design for the Theater ..................................................... 3
Thea 338, Directing .......................................................... 3

Elective: (choose nine hours)
Art 107, Design .......................................................... 3
Art 342, History of Art II .......................................................... 3
Comm 212, Broadcast Media Production I ........................................... 3
Comm 375, Multimedia Concepts .................................................... 3
Thea 355, Arts in London .............................................................. 4
Thea 388, Themes in Drama .......................................................... 3
Thea 412, Special Project .......................................................... 1-3

Students are required to participate during at least four semesters with mainstage and/or one-act theater productions.

Theater arts education
For teacher certification in theater arts, grades 5-12.
Required: (19 hours)
Thea 245, Aesthetics .......................................................... 3
Thea 332, Design for the Theater ..................................................... 3
Thea 334, Acting .......................................................... 3
Thea 338, Directing .......................................................... 3
Thea 350, Playwriting .......................................................... 3
Thea 388, Themes in Drama .......................................................... 3
Thea 412, Special Projects (curriculum & instruction issues) .......................................................... 1-3

Also 30 credits of education courses, including a semester of student teaching, PJCS 210 is required for general education. The first education class, Educ 201, should be taken in May term of the first year or fall of the sophomore year. See the education department pages and the Teacher Education Handbook for more details about requirements. Theater arts education students are required to participate during at least four semesters with mainstage and/or one-act theater productions.

Film studies
Same as communication major concentration requirements/options.

Generalist
This concentration is individually designed, in consultation with the faculty adviser, to develop individual areas of interest or encompass a broad base of theater and related areas. The course selection must include at least nine upper-level hours, at least nine hours in theater and at least six hours from the Goshen College theater department. Generalist students are required to participate in at least four semesters with mainstage and/or one-act theater productions.
Planning guide

First year
General education
Literature and Writing

Theater Practice
Courses in major
SST

Third year
General education
Theater Practice
Upper-level courses in major

Fourth year
Balance of general education
Balance of major
Senior Seminar
Internship

Minor in theater (18 credits)
Thea 225, Introduction to Theater .................................. 3
Select one: ......................................................... 3
Thea 387, History of Theater
Thea 388, Themes in Drama
Thea 235, The Power of Story or Thea 334, Acting ............ 3
Nine-hour concentration in theater or related courses
(at least six hours at Goshen)

At least eight credit hours should be upper-level credit.

Theater minors must take Comm 202 for three hours as a general education requirement (not included in the 18 hours for the minor).

A faculty-approved and supervised theater recital (or its equivalent) is encouraged, but not required for theater minors.

Theater courses

Thea 200  Theater Practice ....................................... 1-2
Applied on-campus work in a theater production or other theater activity. A maximum of two hours applicable toward a theater major or minor. Prerequisite: consent of instructor.

Thea 209  Field Experience ........................................ 1-3
Experiential learning in an off-campus professional setting, for theater majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. The 209 level is intended for first-year and sophomore students. Upper-level students should enroll in 409. Prerequisite: consent of instructor.

Thea 225  Introduction to Theater ................................ 3
This course will introduce students to the basic elements of theater. It will include script analysis of selected plays, acting improvisation techniques, scene performance studies, design and production work. A theater lab will be required.

Thea 235  The Power of Story ..................................... 3
An introduction to performance studies as a mode of inquiry. Concentration on the methods of communicating performance texts for various audiences. Attention will be paid to the elements of vocal expression. Prerequisite: Comm 202 or Thea 225.

Thea 245  Aesthetics .................................................. 3
The study of aesthetics focuses on the philosophy of art, the nature of creativity, the work created, the problem of form and style, expression in art, society and ethics and arts and religion. The course includes lectures, primary readings, media and materials and papers.

Thea 275  Acting Lessons I ......................................... 1
Students having demonstrated commitment to campus theater productions may register for private instruction in acting, with a focus on audition and scene work. Enrollment is limited with preference given to theater majors and minors. Consent of department chair and extra fee is required.

Thea 320  The Expressive Voice ..................................... 3
Effective development of vocal skills to communicate expressive meaning. A study of the formation of speech sounds and techniques. Exercises in eliminating vocal problems and developing clear enunciation, diction and phrasing skills. Prerequisite: Comm 202 or Comm 290 or Thea 225.

Thea 332  Design for the Theater ................................... 3
Principles, methods and aesthetics of theater production: design, stagecraft, lighting, costume, sound and make-up. Lab work on current productions. Prerequisite: Thea 225 or Art 107 or consent of instructor.

Thea 334  Acting ....................................................... 3
Fundamental acting skills: movement, voice and character development. An emphasis on Stanislavski’s theory of acting and realistic scene work. Scene studies from selected scripts. Prerequisite: Comm 202 or Thea 225 or consent of instructor.

Thea 338  Directing .................................................... 3
Principles of interpretation, analysis, design, composition and stage movement. The director’s craft: play selection, auditions, rehearsals and production. Lab session under faculty supervision. Prerequisite: Thea 225, Thea 334 or consent of instructor.

Thea 350  Playwriting ................................................ 1-3
Students will examine the theory and practice of playwriting. Every class member will write a one-act play as the course requirement. Class will meet regularly as a seminar. Prerequisite: Engl 110/210 or consent of instructor.

Thea 355  Arts in London ............................................. 4
A May term class that encompasses theater, art and music study and experiences in London, England. Class activities include morning lectures, visits to art galleries, attending music and theater performances, and day trips to Coventry, Stratford-upon-Avon, Salisbury and other locations. Daily writing assignments and a major project required. Offered in alternate years. Extra cost.

Thea 387  History of Theater ........................................ 3
A study of the forms and conventions of all phases of theater (writing, performance, design, analysis) from classical Greece to the contemporary age. Emphasis on trends in performance. Includes the reading of selected plays.
Thea 388 Themes in Drama 3-4
A concentrated study of selected themes in drama. Focus on scripts that examine justice, peace and historical or religious issues. Emphasis on methods of dramatic analysis. Themes might include a major playwright, advanced acting, musical theater, creative drama, improvisational acting, religious drama or theater and multiculturalism. Prerequisite: Thea 225 or Thea 235 or Engl 110/210 or consent of instructor.

Thea 409 Internship 1-3
An off-campus internship in a professional setting for theater majors and minors. The student contracts with a faculty member in regard to goals, performance expectations, supervision, evaluation and course subtitle. Prerequisite: consent of instructor.

Thea 410 Senior Seminar 3
A consideration of ethical and professional issues in contemporary communication and theater. Information interviews with practitioners in communication and theater. Writing of résumés. Creation of a portfolio. Required of all theater majors.

Thea 412 Special Project 1-3
Students may conduct research of particular interest or pursue specialized applied projects in theater under faculty supervision. Can be used as credit for senior theater recital. Prerequisite: consent of instructor.

Women’s studies
Director, Professor B. Martin Birky
Professors R. Birkey, J. Brant and A. Hostetler
Associate Professors J. B. Shetler and J. M. Liechty
Adjunct Professor C. Jarvis
Visiting Assistant Professor M. Berry

Mission
Within the community of faith and learning at Goshen College, the Women’s Studies Program enables students from a variety of disciplines to examine women’s experience in a gendered and global society. Women’s studies courses strive to foster the study and cultivation of feminist scholarship and practice in students’ personal and professional preparation. In teaching feminist scholarship, our courses examine the roles and historical contributions of women across many cultures in the arts, the humanities, the sciences and the professions; they also develop the analytical, reflective and synthesis skills that characterize feminist scholarship. This interdisciplinary program draws on courses from a variety of disciplines and women’s resources in the campus community to enhance a core of courses offered by the Women’s Studies Program. Courses listed or cross-listed for the women’s studies minor meet the following criteria:

• Critically examine cultural assumptions about gender as well as race and class.
• Explore the production of knowledge in disciplines that reflect on women’s lived experiences.
• Identify and analyze the many systems that shape women’s lives and choices.
• Examine feminist genres, research methods, structures, analytical tools, aesthetics, criticism, contemporary issues and pedagogy.

Opportunities
The women’s studies minor can be combined with any major or incorporated into an interdisciplinary studies major. Today, many such programs and agencies prefer to hire people with knowledge of and sensitivity to the issues and problems that confront the groups with whom they work.

Minor in women’s studies
The minor consists of 18 hours from the following women’s studies courses, including other cross-listed courses as available. Although there are few prerequisites, faculty strongly recommend that students take the introductory course, WoSt 200.

Women’s studies courses
WoSt 200 An Introduction to Women’s Studies 3
(See Soc 205)
This course will introduce students to major areas of feminist thought (historical and contemporary), focusing on the theories and concepts that have been instrumental in shaping women’s studies. Readings, small group discussions, and service learning/activism projects enable students to experience theory concerning women and gender from an interdisciplinary perspective. This course serves as an introductory survey course for women’s studies.

WoSt 207/307 Women in Literature 3
(See Engl 207/307)

WoSt 210 Sociology of the Family 3
(See Soc 210)

<td>This independent study provides opportunity for women's studies minors to 1) pursue more individualized, self-guided study and research in a topic of interest, 2) enhance student curriculum in areas where courses are not or cannot be offered due to curriculum limits and 3) strengthen student skills and knowledge in an area of feminist scholarship and/or practice in an area where they have not been able to do course work. A student may take a maximum of three hours credit. Prerequisite: two women's studies classes and program director approval.</td>

Graduate programs and courses

Master of arts in environmental education

Program Director. L. Gascho
Assistant Professors L. English, D. Heis, D. Miller, W. Minter
Instructors P. Steury, L. Ziess

The environmental education department at Merry Lea Environmental Learning Center of Goshen College offers a 12-month graduate program leading to a master of arts in environmental education. In September 2006, the Higher Learning Commission of North Central Association of Colleges and Schools expanded the accreditation of Goshen College to include conferring this degree.

The program is designed as an intensive experience in all aspects of environmental education. By experiencing the many facets that lead to the delivery of quality programs, the student will become an excellent interpreter of natural history. A distinctive aspect of this program is an immersion in natural history, which includes utilizing various media to record observations and using scientific methods for ecological field research. An integrated portfolio and project will be outcomes of this experience. It is essential for environmental educators to be well grounded in the concepts of ecosystems.

Each student will study an ecosystem at Merry Lea throughout the yearlong program. The first three courses in the curriculum will provide the tools for gathering and interpreting data, as well as making practical applications in designing and delivering programs. Exposure to and engagement with K-12 program delivery at Merry Lea will create important learning experiences for each graduate student. Learning will occur through modeling by the professional environmental educators and through direct involvement in guiding learning experiences for K-12 students. The outstanding “environmental education laboratory” at Merry Lea will provide a high quality framework as graduates begin their careers as environmental educators.

Student learning outcomes

Upon completion of the program, students will be:

1. able to exhibit and promote systems thinking by integrating knowledge from multiple disciplines into the design and delivery of environmental education programs.
2. able to demonstrate an approach to environmental education that reflects an understanding of ecological relationships and processes common to all systems and biomes
3. proficient in the design, implementation and assessment of environmental education programs.
4. competent in teaching skills for experiential, inquiry and field-based environmental education.
5. able to recommend and utilize best practices in leading people in the context of environmental education.
6. able to evaluate resources and apply skills necessary for managing resources for the successful delivery of environmental education programs.

Admission and financial aid information

Requirements for admission include GRE scores, an essay, a résumé, three letters of recommendation and official transcripts for all undergraduate and graduate coursework. One full scholarship is available to an Indiana student. A limited number of additional scholarships are also available. See www.goshen.edu/merrylea/graduate/ for more details.

Career opportunities

This program is designed for college graduates who will work as environmental educators in diverse settings such as nature centers, outdoor education programs, nonprofit camps, parks and recreation programs, public and private schools, and independent environmental organizations.

Course schedule

The degree is built around four major components: core courses, a project, a portfolio and an extensive practicum. A central theme of the curriculum is the integration of ecological learning with development of pedagogical skills. Additionally, students will focus on many practical concepts that are needed in delivering quality environmental education programs, from land management to administration. The cohort of students will complete the curriculum in three terms from July to June of the following year.

Term I  July-October

Total credits .......................................................... 30

Environmental education courses

EnEd 510  Natural History of the Southern Great Lakes .... 3
A study of the plants and animals of this region – and the ecosystems in which they are found. Emphasis is on the 1) the interrelationships which exist in ecosystems 2) the function of ecosystems, both how they operate and how they impact surrounding systems and humans, 3) identity of the organisms that comprise the ecological community. Students are expected to investigate the ecological relationships of the organisms identified as well as behaviors and life cycles.

EnEd 515  Research Methods and Measurements ............... 3
A laboratory class designed to give students an overview of designing, implementing and reporting a scientific study including the use of environmental monitoring equipment to collect data and the basic statistics needed to analyze them. The class will address both ecological research as well as methods that could be used to analyze the success of educational strategies. Students will investigate the different ecosystems around the area using standard ecological data collection methods.
Students will learn standard methods for evaluating learning in environmental educational programs.

**EnEd 520 Principles of Environmental Education**  
A study of distinctive concepts and skills needed for delivering quality environmental education programs. The following themes – within the context of natural history – will be part of the course: field-based and experiential education, inquiry, questioning, interpretation, settings, responsive instruction, program design, assessment and evaluation, and learner outcomes.

**EnEd 525 Environmental Issues & the History of Environmental Education**  
A study of current environmental issues facing society. Topics include ethics, citizenry, environmental justice, theological implications and organizations addressing issues. The various facets of the history of environmental education and outdoor education will be reviewed. A study of important literature relevant to all topics will be included.

**EnEd 530 Leadership for Environmental Education Programs**  
A study of essential skills and practices in the administration of an environmental education center. Topics include personnel management, strategic planning, personality styles, financial and resource management, budget preparation, board utilization, fundraising and capital campaign, day-to-day functioning of a nature center, and team development.

**EnEd 535 Land Management for Environmental Education**  
A study of both the theory and practice of the management of “place” for various ecological functions and human values that can contribute to the enhancement of an environmental education experience. Includes how land management practices need to reflect the economic/social/spiritual values of humans, and the biological functions of the ecosystems it encompasses.

**EnEd 560 Project**  
The project paper will be based on one of the following themes: a) environmental issue investigation b) ecological data based investigation, or c) pedagogical data based investigation. Project statement, literature review, critical investigation, application, conclusion and professional formatting will all be expectations. Students will develop age-appropriate instructional materials based on the project themes.

**EnEd 570 Portfolio**  
Portfolio expectations will be assigned to students during each of the first three semesters. These will include ecological observations, photography and nature writing. Students will participate in six topical seminars, which will be offered throughout the year, and write a response paper to each seminar. (Nature Photography, Writing in Nature, Exploration of Faith and Spirituality, Sustainability, Wilderness First Responder, and Public Presentation Skills)

**EnEd 580 Practicum**  
Being part of the delivery of Merry Lea’s K-12 onsite and outreach programs in environmental education will fulfill the practicum in three major programming time blocks giving students experience in multiple programs. Student will also have opportunities in specialty programs, such as summer camps and public programs. Assessment of student performance will occur after each of the three programming time blocks and as part of the final evaluation.
Requirements and procedures

Graduation requirements
All of these requirements are to be completed for a Goshen College degree:

Total credit hours
Minimum total hours for each degree are:

- Bachelor of Arts ............................................. 120 credit hours
- Bachelor of Science in Nursing ............................................. 120 credit hours
- Bachelor of Science in Organizational Leadership ................. 120 credit hours

General education
All requirements are to be completed as listed in the catalog that is current at the date of matriculation.

Convocation/chapel attendance
Posted attendance requirements must be met.

Major
A defined major or interdisciplinary major must be completed. At least 12 upper-level hours are required with at least six upper-level hours completed in residence work at Goshen. From 40 to 60 hours of experience will be expected for one hour of credit earned in departmental internships, placements or special projects. Students with a double major are required to take only one senior seminar and one internship. The departments concerned decide which will be taken. However, the total number of hours required for the major may not be reduced.

Minor
A minor supplements the major, often emphasizing a special interest, an interdisciplinary approach or vocational skill. Minors consist of 18-20 hours, with at least eight hours of upper-level study.

Courses that meet multiple requirements
Most general education courses may also count toward a student’s major or minor. Exceptions are SST alternate courses, Engl 105/110 (for English majors), and Bibl 100/200 (for Bible and religion majors). Duplication of courses for two (or more) majors or two (or more) minors may occur only for courses specifically required in both of the majors or both minors. However, courses in a minor may duplicate related courses in a major, at the discretion of the relevant departments.

Grade point average
A minimum 2.00 grade point average (GPA) for all work at Goshen College is required for graduation.

Residence at Goshen College
At least 30 credit hours of course work must be completed at Goshen College.

Senior residence
Of the minimum 30 hours taken at Goshen, at least 24 hours must be completed in the senior year (beyond 90 hours). Exceptions are made for certain professional curricula where the fourth year is spent at another institution and for students in the Division of Adult and External Studies.

Limit in one department
No more than 45 hours in one department can count toward the minimum hours required for the degree. In other words, at least 75 hours outside the department of the major must be completed. All interpretation of requirements should be checked with the registrar.

Special degree conditions
Credit limitations
In each of the following areas, a maximum of 12 hours may be credited toward the degree:

- Technical education. Terminal (nonliberal arts) program at other colleges, such as community colleges, technical or Bible institutes.
- English as second language. A maximum of 10 hours may be counted for the bachelor's degree.
- Correspondence credit. Goshen offers no correspondence courses, but up to 12 hours may be accepted in transfer.
- Credit for learning based on work and/or experience. A maximum of 12 hours of experience-based credit can be counted for the bachelor's degree.

Changes in graduation requirements
A student will normally be expected to meet the graduation requirements outlined in the catalog for the year of matriculation at Goshen (or at Hesston College) – unless these requirements have been changed later by faculty actions that may be applied retroactively. A student whose graduation is delayed because of absences of more than two semesters will be subject to the graduation requirements in force at the date of readmission. However, a student who, in spite of a period of absence, can graduate not more than seven years after first matriculation (or an appropriate share of this time in the case of a student admitted with advanced standing), may elect the requirements in force on the date either of first matriculation or of readmission.

Candidacy for degree
Candidates for degrees must file applications not later than the beginning of the semester in which the degree is to be awarded. Official application forms are available online.

Registration
Following admission for study in a particular semester, all new students participate in course registration as described below.

Registration procedures
Registration for each semester normally proceeds in two distinct stages – course selection and final check in. Course selection includes consultation with a faculty adviser and presentation of course selections to the registrar’s office. This registration must be confirmed at the final check in just before classes begin. Final check in includes housing confirmation, fee payment, financial aid processing, proof of insurance, ID cards, auto registration and other items. Part-time students and late applicants complete both these stages on the first day of the semester.

Fall semester: Continuing students select courses in April. New students participate in special orientation/registration days scheduled at Goshen and other selected locations from May to August. Final course selection and registration for all students is held the first days of the semester, as is course selection for late students. Classes begin on the evening of the first day of the semester.

Spring semester/May term: Students on campus select courses in November and December. Fall SST students and new students complete...
course selection in December or on the first day of the semester. Final check in for all students is the first day of the spring semester, and classes begin on the second day.

Academic advising
First-semester freshmen are assigned to colloquium advisers. Those who are ready to declare a major at the end of the first semester are then assigned to advisers in their academic departments. All others will be assigned to general advisers in the collegiate studies department until they declare majors.

During the advising period at the end of fall and spring semesters, all students are asked to consult with their academic advisers, but contact is not limited to these days. Faculty advisers are prepared to assist with a range of questions – career goals, graduate school, choice of major, course selection and general adjustment to college. Questions about the advising program should be addressed to the associate dean.

Departments and professional or pre-professional programs conduct information sessions for interested students. Departmental advisers answer questions following these meetings and in individual sessions. Departments may also conduct group sessions to assist majors with course selection.

Students share responsibility with the faculty adviser for planning their college program, including course selection and for becoming acquainted with requirements through reading printed materials and attending departmental meetings.

Changes in registration (Drop and Add)
Students may make online changes to their course schedules during designated “open registration” times. Students may add new courses and change grading plans only during the first five days of classes in the fall and spring semesters and the first two days of the May term and summer sessions. Courses formally dropped before the end of the fifth day of classes do not appear on a student's permanent record. Courses dropped during the second to ninth weeks will appear on the permanent record with a W grade (withdrawal). Courses dropped after the ninth week are recorded F (failing) or NC (no credit). Students may make changes in depth-credit registration (see below) during the first 12 weeks of the fall and spring semesters.

Course changes after the times specified above are permitted for health reasons only and must be approved by the coordinator of counseling.

Hours and course load
The usual academic load during the fall and spring semester is 12 to 15 credit hours. To discourage fragmentation of the student's time and allow more concentrated study in each course, the maximum load permitted in any semester is 15 credit hours (six courses maximum). Exceptions to this policy are possible with approval from the registrar. Extra tuition is charged for hours beyond 15.

Depth credits
Depth credit is offered in some courses to encourage individual study. Sophomore, junior and senior students may register during the first 12 weeks of the semester for an extra credit hour in one or two such courses each semester.

Auditing courses
Students are invited to enrich their program by auditing courses on a space-available basis. Auditors may participate in a class, but are not required to complete assignments and tests. Therefore, classes that emphasize knowledge expansion rather than skill-building are most appropriate for auditing. To register, obtain an audit form in the registrar's office and secure the instructor's signature. A per-hour fee is charged for part-time students. There is no fee for full-time students. No attendance or achievement records are kept for auditors. Audited courses are not available for later credit by examination.

Special courses by request
A special course may be offered to students who propose and agree to enroll in it, provided a faculty member agrees to teach it. Off-campus courses and all courses not listed in the catalog need approval by the Academic Affairs Committee. In some cases, courses may be offered during the summer as well as during the May term. The course title and description will be kept as a permanent record by the college. An advance deposit will be required from all students agreeing to enroll.

Northern Indiana Consortium for Education (NICE)
Goshen College is a member of the Northern Indiana Consortium for Education, along with Bethel College, Indiana University South Bend, Holy Cross College, Saint Mary's College and Ivy Tech Community College in South Bend. Through this consortium, Goshen College students may cross-register for courses offered at another member institution. Registration is on a space-available basis. The home school records the registration, and home-school fees are charged. Summer courses are not eligible for cross-registration. See the registrar for current course options and registration procedures.

Special registrations
Courses and special credits are available by independent study, credit by experience and credit by examination. Since these options are not part of registration for any semester, students may register for them at any time with the registrar's office. A special fee is always charged, and financial aid does not apply.

Independent study
To develop more curricular flexibility, Goshen College invites students to register for independent study. Students have one year from the date of registration to complete independent study courses. For special circumstances, the professor may request one extension with a specific completion date, generally not to exceed three months. There are two primary reasons why students may wish to take independent study:

Regular courses at special time. An academic program may require that a student take a course not offered during a given semester. In some cases it is possible to take such a course by independent study, under the direction of a faculty member, at a special tutorial rate. To register for such a course, the student obtains permission and a form from the registrar. The instructor indicates approval on the form, which the student then returns to the registrar's office. Students may register for independent study at any time during the year, but normally cannot register for an independent-study class that would increase their current course load to more than 15 hours. All independent study is charged at a special rate: tutorial, which assumes equal amount of professor contact hours as when the course is normally offered, or readings, which assumes about one-fifth the normal contact hours.

Special independent courses. A student may want to engage in an independent-study project in an area not covered by regular curriculum courses, especially during the summer, when full time can be devoted to the project. The student may study at the Goshen campus or may elect to go to any area appropriate to the particular study. To take a special independent course, the student makes an initial proposal to the faculty member under whom the project would be conducted. If the faculty member approves, the student submits a more detailed proposal in writing. Next, the associate dean must approve this proposal, then the student registers for the course and pays the usual fee for independent study.
Credit for learning based on work and/or experience

Students may seek college credit for learning acquired through significant experiences in work, travel, and service assignments. Goshen College will give credit for this kind of learning, if the area of study is educationally valid and is compatible with college academic programs. The learning experience should involve both thorough preparation and systematic reflection on the importance of what has been learned. Contact with a faculty member before, during, and after the experience is crucial for planning and evaluating readings, special research journals, portfolios, and other materials. To earn experience-based credit, the student presents a proposal to an instructor and then obtains the associate dean’s approval. A contract is initiated prior to the experience by registration and paying a partial fee at contract time. The balance is due upon final evaluation. From 80-to-120 hours of experience will be expected for one hour of credit. A maximum of 12 hours of experience-based credit can be counted for a bachelor’s degree. Students have two years from the date of registration to complete credits by experience registrations. For special circumstances, the professor may request one extension with a specific completion date, generally not to exceed three months.

Credit for church-related service

Goshen College, in cooperation with Eastern Mennonite Missions recognizes credit for participants in the Youth Evangelism Service (YES) Program. Details of the program will be certified by YES, and the student will be interviewed by the registrar. Up to 15 hours will be granted, and normal credit through voluntary service fees are charged. Areas of credit are arranged with the registrar. Credit may be used toward general-education and major requirements as defined in policy statements available from YES and the registrar’s office. When YES service occurs in a cultural setting quite different from dominant U.S. culture, the credits can meet at least half of the international-education requirement.

A similar arrangement has been made with the Mennonite Mission Network for the Reaching and Discipling (RAD) Program. Goshen College cooperates with Mennonite missions and service agencies in developing credit programs for people in a variety of service activities, including voluntary service, using the same criteria as those for learning based on work and/or experience. Arrangements are made with the director of international education and the associate dean.

Credit by examination

Credit is granted for acceptable test results under four programs – College Level Examination Program (CLEP), DANTES Program and Advanced Placement Tests (all programs of Educational Testing Services, Princeton, N.J.) and tests given by Goshen College instructors. Any student may take these examinations and credit may be earned unless it duplicates previous college credit.

The CLEP tests are administered at least monthly at several hundred centers in the United States, including Goshen College. If acceptable levels are attained in any of the tests, credit is granted. The use of such credit toward specific course requirements of general education and a major will be decided by the departments concerned. Credit policies for CLEP and AP examinations are posted at www.goshen.edu/registrar. Credit earned through testing, other than AP, that is intended to meet Goshen College general education, major or minor requirements is subject to the normal credit by examination fee. Contact the registrar for details.

International Baccalaureate credits

Goshen College recognizes International Baccalaureate work and grants seven semester credits for examination scores of four or higher in higher level courses. A maximum of one year of credit (30 hours) is granted. IB credits may be counted toward general education requirements, major or minor requirements, or electives in the same manner as advanced placement credits. Individual departments will determine the exact placement in departmental courses. Generally, Goshen College does not award credit for standard level exams. However, when the IB diploma has been earned, four semester credits will be awarded for exams with scores of six or seven.

Academic policies

Classification

Students enrolled for 12 to 15 credit hours are considered full time; those enrolled for one to 11 credit hours are considered part time. All students are classified each semester as freshman, sophomore, junior or senior according to the following scale:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Freshman</th>
<th>Sophomore</th>
<th>Junior</th>
<th>Senior</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total hours at beginning of semester</td>
<td>0-29</td>
<td>30-59</td>
<td>60-89</td>
<td>90 or more</td>
</tr>
</tbody>
</table>

Attendance regulations

Regular attendance at class is expected; the instructor will announce specific requirements for each course. Absences and completion of missed class work are issues for the instructor and student to resolve. When a class field trip results in absence, the professor is responsible to notify other instructors via the online Faculty-Staff Bulletin.

Attendance at convocation and/or chapel is required for all full-time students. Current attendance policies are distributed to students annually and available at the chapel and convocation Web site.

Credits

Credit is given for work successfully completed by the student and for which a passing grade or CR has been earned. The credit hour should indicate the use of one-fifteenth of the student’s time (3 to 3.5 hours per week in and out of class for the average student). The number of class meetings each week in a particular course will be determined by the instructor in consultation with the academic dean.

Grading and evaluation

Goshen’s system of evaluation offers a standard (letter) grading system and a limited option system (CR/NC). The student chooses at registration whether courses will be selected for the option system.

Standard system

NR Grade not reported (temporary grade)
Academic honors are awarded to traditional baccalaureate degree candidates. A cumulative grade point average (GPA) for standard-system courses is 3.6 or above (A = 4.0) and with no grade lower than a C at Goshen College. To qualify for graduation honors, a student must have completed at least 48 graded semester hours at Goshen College. Academic Honors indicated in the commencement program are reflective of fall semester grades and are subject to change with the addition of spring, May term and summer grades.

Academic honors are also awarded to Adult Degree Completion Program graduates who have earned a cumulative grade point average of 3.6 or above, with no grade lower than a C, while pursuing a degree from the Adult Degree Completion Program. To qualify for graduation honors, a student must have completed at least 40 graded semester hours at Goshen College. Academic Honors indicated in the commencement program are reflective of fall semester grades and are subject to change with the addition of spring, May term and summer grades.

**Summa Cum Laude:** 3.90-4.00 GPA (with highest honor)

**Magna Cum Laude:** 3.80-3.89 GPA (with great honor)

**Cum Laude:** 3.60-3.79 GPA (with honor)

**Dean's list**
The Dean's list is published after the fall and spring semesters. Students who have earned a semester GPA of 3.75 or higher on at least 12 credit hours of course work for a letter grade and who have no grades of incomplete (I) will be named to the list. Students may decline having their names published, if they so desire, by informing the registrar.

**Standards for academic progress**
Satisfactory progress depends on maintaining a minimum grade point average (GPA) and earning at least 12 hours of credit each full-time semester. Since graduation requires a 2.00 GPA, these intermediate goals must be met:

- In first year (12-29 hours earned) 1.50 minimum GPA
- After earning 30 or more credit hours 2.00 minimum GPA

Any student not meeting these standards for: a) GPA or, b) hours earned, is placed on academic probation for the next semester. While on probation the student will be expected to either: a) increase GPA to the required level or, b) complete sufficient credit hours to have at least 24 hours in the two consecutive semesters (including May term). If these conditions are not met by the end of the semester, the student is subject to academic disqualification. Full-time students who pass fewer than five semester hours in any given semester of enrollment are also subject to immediate academic disqualification. Disqualification action is taken after a short appeal period when the student can file a written appeal with the Appeals Committee, which takes final action. It is possible that the student would be asked to take a battery of tests from a qualified mental health professional. These tests would examine academic potential, any learning problems present and emotional or social problems that could affect the student’s progress. In an effort to work with identified problems, the student may be asked to contract with support persons such as counselors, parents or professors. Disqualification lasts two semesters and the student may apply for readmission after that time. The first 12 hours of attendance after disqualification will be at student expense (no financial aid). Further eligibility for financial aid is dependent on maintaining satisfactory academic progress.

**Academic bankruptcy**
Academic bankruptcy is designed to assist the once-disqualified student to return to school under reduced handicap. Only selected students may be considered for bankruptcy status; to qualify the student will: a) have earlier been academically disqualified from Goshen, b) not be enrolled in any college study for at least two years, c) submit a written appeal to the Appeals Committee.
Academic integrity
Goshen College expects all students and faculty members to practice academic integrity. Honesty, trust, fairness, respect and responsibility are essential building blocks in creating a vital learning community. They are also the foundation for lifelong integrity.

Academic dishonesty at Goshen College is considered a serious breach of the “Goshen College Commitment to Community Standards.” Academic dishonesty is any act that misrepresents academic work or interferes with the academic work of others. It includes:
- plagiarism (giving the impression that another person’s work is your own)
- cheating on assignments or exams
- falsification of data
- submission of the same (or substantially the same) paper in more than one course without the prior consent of all instructors concerned
- depriving others of necessary academic sources
- sabotaging another student’s work

Consequences of academic dishonesty are based upon the severity of the offense, course expectations and other variables. Consequences for individual offenses may range from re-doing the assignment to dismissal from the college.

Official transcripts
Official transcripts of a student’s academic record will be released upon written authorization of the student. To assure that the student has complete control over this confidential information, all requests by other individuals will be refused. Positive identification in the form of student number or birthdate should accompany the signed request.

One transcript is available free of charge. A fee of $4, payable in advance, is charged for each additional transcript. A transcript will be issued only if all financial obligations have been settled with Goshen College.

Privacy rights of students
In accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA), post-secondary students enrolled at Goshen College are hereby notified of their rights with respect to their education records. They are:

1. The right to inspect and review the student’s education records within 45 days of the day the college receives a request for access. Students should submit to the registrar, vice president for student life or other appropriate official, written requests that identify the record(s) they wish to inspect. The college official will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate or misleading. Students may ask the college to amend a record that they believe is inaccurate or misleading. They should write to the college official responsible for the record, clearly identify the part of the record they want changed and specify why it is inaccurate or misleading. If the college decides not to amend the record as requested by the student, the college will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to prohibit disclosure of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the college in an administrative, supervisory, academic, research or support staff position (including security personnel); a person or company with whom the college has contracted (such as an attorney, auditor or collection agent); a person serving on the board of directors; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his/her tasks. A school official has legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Goshen College to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 600 Independence Ave., SW, Washington, DC 20202-4605. FERPA further provides that certain information concerning the student, designated as “directory information,” may be released by the College unless the student has informed the College that such information should not be released.

Goshen College does not provide student e-mail lists to public or private entities.

Directory information includes:
- name
- permanent address*
- local address*
- telephone number*

*Goshen College distributes the information marked with an asterisk, but less publicly than the other items:
- The campus telephone directory is printed and made available to Goshen College students, faculty and staff. It includes name, class, local address, phone and e-mail address.
- Your local address, phone number, student ID photo and permanent address are available on Goshen College’s Web site, but only to people using a computer connected to Goshen College’s on-campus network (physically connected to the network or remotely connected with a valid Goshen College username and password.)

Any student who desires that any or all of the above listed information not be released may contact the registrar’s office or complete the form found at http://www.goshen.edu/registrar/privacy.
Such nondisclosure must be requested within the first seven days of the semester to be excluded from printed directories. Online listings can be blocked at any time.

Questions about this policy may be directed to Stan Miller, registrar, or Bill Born, vice president for student life.

**Leave of absence policy**

Students whose enrollment is interrupted by one or two consecutive semesters may apply for a leave of absence at the time of their withdrawal. Formal requests for leaves should be made by completing a Leave of Absence Form, available from the registrar's office or online. Justifiable reasons for a leave may include medical or financial difficulties or church-related service assignments. Students enrolled at the Indianapolis Peace House, Chicago Center, Oregon Extension, Washington Community Scholars Center or in BCA study programs are considered to be currently enrolled students at Goshen College.

Students on official leave shall enjoy all the catalog privileges of continuing enrollment. The offices of registrar, student financial aid, SST and residence life will communicate with students on leave in a timely manner to ensure student services commensurate with continuing students.

Students who interrupt enrollment for more than one academic year must apply for readmission through the admission office. All students who take courses elsewhere during their leave, and who want to transfer credit to Goshen College, also must apply for readmittance through the admission office.

## Financial aid

### Purpose and philosophy

The financial aid program at Goshen College is designed to assist students in financing a Goshen education and to supplement, not replace, family resources for college. The program is intended to provide financial assistance to accepted and continuing students who would be unable to attend Goshen College without aid. It is intended to encourage the attendance at Goshen College of students who have demonstrated high achievement or otherwise have indicated strong potential to benefit from study at the college and to contribute to the achievement of the college's mission. Awards are made to assist the college in meeting its goals for cultural diversity.

The student is expected to contribute toward his or her own education, usually through savings and/or summer employment. Our awarding policies are balanced to consider need but to also recognize past achievement and high potential achievement (i.e. merit).

### Financial aid packaging concept

All financial aid awards are determined by the student financial aid office. Students applying for financial aid are considered for all aid for which they are eligible. Financial aid is normally provided in a "financial aid package" – a combination of institutional, state, federal and private loans, employment and gifts. Goshen College attempts to provide a financial aid package adequate to meet the needs of each student who applies.

Students planning to attend Goshen College should expect the following direct expenses for the 2007-08 academic year: tuition and fees – $21,300; room – $3,750; board – $3,250. In addition, allowances should be added to these figures for indirect expenses, including books and supplies, personal expenses, medical insurance and transportation.

The student financial aid office considers the total attendance costs, including the items listed above, in making a financial commitment.

During 2006-2007, Goshen College administered more than $14.8 million in financial aid. The total amount of each student aid package is based on the student's financial need and/or eligibility for merit-based aid. Need is determined by subtracting the resources of the student and his or her parents' contribution and any merit-based aid from the total estimated student expenses. The amount of the expected family contribution (EFC) is determined from information on the Free Application for Federal Student Aid (FAFSA), which uses such items as number of family members, income, assets, taxes paid and certain other liabilities of the family. A need analysis formula, called Federal Methodology, is used to evaluate the family's financial circumstances.

### Financial aid packages include the following:

- **Scholarships:** Gift aid awarded in recognition of outstanding achievement. Financial need will be considered in the awarding of some scholarships.
- **Grants:** Gift aid awarded to students, usually with demonstrated need.
- **Loans:** Education loans other than Federal Direct Unsubsidized Stafford loans usually accrue no interest during the time of enrollment in college. Relatively low interest accrues during the repayment period.
- **Employment:** Part-time jobs are available on campus or in the community where earnings can amount to as much as $1,800 or more each school year. Full-time summer employment can provide additional earnings.

### Financial aid packages are assembled in the following order:

1. Federal Pell Grant
2. Academic Competitiveness Grant
3. National SMART Grant
4. Federal Supplemental Educational Opportunity Grant (SEOG)
5. State grants
6. College scholarships and discounts
7. Church aid and Goshen College Church Aid Matching Grant
8. Endowed Scholarships
9. Federal College Work-Study
10. Federal Direct Stafford Loan
11. Goshen College Grant
12. Federal Perkins Loan, Federal Nursing Student Loan to meet remaining need
13. Federal Direct Parent Loan (PLUS) or unsubsidized Federal Direct Stafford Loan to families who desire it.

### Sources of financial aid

Goshen College participates in all federal programs, including the Federal Pell Grants, Federal Supplemental Educational Opportunity Grant (SEOG), Federal Perkins Loan, Federal Nursing Student Loan (NSL), Federal College Work-Study Program (CWSP), the Federal Direct Stafford Student Loan and the Federal Direct Parent Loan for Undergraduate Students (PLUS). Residents of Connecticut, Indiana, Pennsylvania, Rhode Island and Vermont are eligible to receive state scholarship and grant awards that can be used at Goshen College.

Other generous scholarship, grant, loan and discount programs include the following:

- **President's Leadership Award:** Up to 10 awards will be given annually to entering first-year students in recognition of outstanding academic and leadership skills. A separate application is required for the President's Leadership Award. The application is available from the admission office and must be submitted by Feb. 1. To be eligible to...
Missionary service scholarships (Swallen and Lord’s Trust): Two scholarships are available for those students who are preparing for missionary service. An application (available in the student financial aid office) is required along with two additional references. Stipends range from $1,000 to $5,000.

Music scholarships: Scholarships for music achievement are awarded each year through the music department. First-year students are not required to be music majors, but must be involved in activities of the department. Stipends range from $1,000 to $3,000. Scholarship applications and audition dates/procedures can be found at www.goshen.edu/music/scholarship.

Athletic scholarships: Scholarships for athletic leadership/achievement are awarded each year through the athletic department. Usual stipends range from $1,000 to $5,000 (maximum institutional funds from all sources is the cost of tuition). Check directly with the athletic department for more details.

Goshen College Grant: A Goshen College Grant is gift assistance provided on the basis of financial need. The amount of the grant is dependent on the student’s demonstrated need and other gift aid received by the student.

Church Aid Matching Plan: To promote congregational/conference student aid programs, Goshen College will provide a grant to match assistance given by the student’s congregation or conference aid plan. This Church Aid Matching Grant will be awarded in addition to other scholarships, grants or discounts for which the student is also eligible. The Church Aid Matching Grant program is available to any eligible GC student, regardless of religious denomination. The Church Aid Matching Grant will apply dollar-for-dollar to the first $1,000 and beyond that on a 1:4 ratio. For example, after matching the first $1,000, the college will provide $1 for every additional $4 provided by the church up to full tuition of church-college match funds. Congregational or conference representatives must notify the church relations office by March 1, providing the amount of aid commitment and the name of each recipient. The match is pro-rated for part-time enrollment.

Tuition discounts

Related Mennonite institution discounts: Dependents of a faculty or staff member from schools of the Mennonite Secondary Education Council, Mennonite Elementary Education Council, Associated Mennonite Biblical Seminary, Eastern Mennonite Seminary or College Mennonite Church are eligible for a tuition discount up to 25 percent. Dependents of faculty and staff from these institutions who are employed less than full-time receive a pro-rata share of the 25 percent discount, based on the percentage of the parent’s employment.

Mennonite Colleges tuition discount reciprocity: Dependents of faculty and staff members from the following members of the Council of Mennonite Colleges are eligible for a 50 percent tuition discount: Bethel College (Kan.), Bluffton University, Eastern Mennonite University and Hesston College. Dependents of faculty and staff from these colleges who are employed less than full-time receive a pro-rata share of the 50 percent discount, based on the percentage of the parent’s employment.

Aid limits and policies: Goshen College limits merit awards so that more funds can be awarded on the basis of financial need. Students may apply/audition for any number of awards, but the student can receive a maximum of two awards from the following list:

- President’s Leadership Award
- Menno Simons, Wens, Yoder, Grebel or Kratz Honors Scholarships

Goshen College National Merit Scholarship (Burkholder Scholarship): National Merit Scholarships for National Merit finalists – $1,000 to $2,000 per year for four years. Stipends above $1,000 are based on need. These scholarships are partially funded by an endowment established in honor of President Emeritus J. Lawrence Burkholder and his wife, Harriet. It is renewable each year with a 3.20 grade point average. The award is made for no more than eight total semesters.

**Academic/Merit Scholarships:** These “merit-based” scholarships reward achievement in high school at several levels. Eligibility for the Menno Simons, Wens, Yoder, Grebel and Kratz Honors Scholarships are determined by looking at a combination of grade point average (GPA) and SAT or ACT scores. Awards based on academics are limited to a total of eight semesters, and are renewable based on continued minimum GPA levels (3.20 for Menno Simons, 3.00 for Wens, Yoder and Grebel, 2.80 for Kratz).

- Menno Simons Scholarship $8,000
- Wens Honors Scholarship $7,000
- Yoder Honors Scholarship $6,000
- Grebel Honors Scholarship $5,000
- Kratz Honors Scholarship $3,000

**Transfer Academic/Merit Scholarships:** Transfer students who have shown outstanding performance can receive academic/merit scholarships based on their cumulative transfer GPA.

- Transfer High Honors Scholarship $7,000
- Transfer Honors Scholarship $5,000

Students from Hesston (Kan.) College who are not eligible for the above scholarships, but who still show good academic performance, are eligible for the Hesston Honors Scholarship worth $1,500. Renewals are based on maintaining a 3.20 GPA for the Transfer High Honors and 3.00 for the Transfer Honors and Hesston Honors Scholarships.

**Stoltzfus Recognition Award:** All African-American, Asian-American, Latino and Native-American students (U.S. and Canadian citizens and alien residents) are eligible. Eligibility also includes a high school grade point average of 2.5 (on a 4.0 scale) or ranking in the top half of the high school class. Transfer students must have a 2.0 grade point average. The stipend for first year students in 2007-2008 is a minimum of $1,000 and a maximum of $2,500, depending upon financial need. It is renewable each year, but the award is made for no more than eight total semesters.

**Endowed and restricted scholarships:** In 2006-2007, the aid office administered over 150 endowed and restricted scholarship funds and awarded over $800,000 to students from these sources. Simply by applying for financial aid, the student will automatically be considered for endowed and restricted scholarships using criteria specified by each donor. Over 75 percent of these scholarships are need-based. Many are designated for a specific major or professional goal; some are based on other criteria such as geography, descendency, etc.

**Athletic scholarships:** Scholarships for athletic leadership/achievement are awarded each year through the athletic department. Usual stipends range from $1,000 to $5,000 (maximum institutional funds from all sources is the cost of tuition). Check directly with the athletic department for more details.
Procedures for applying for financial aid

1. Apply for admission; a student must be admitted to the college before a financial aid offer can be made.
2. Annually complete the Goshen College financial aid application form before March 1. (For first-year students, the financial aid application is combined with the application for admission.)
3. Submit a Free Application for Federal Student Aid (FAFSA) by March 1. The FAFSA may also be used to apply for the Pell Grant program and the Indiana Higher Education Award and Freedom of Choice Award. The FAFSA may be obtained from a high school guidance office. Students should specify 001799 as the school code number for Goshen College in the appropriate section of the FAFSA.
4. Investigate other sources of financial aid: high school, church, community service clubs, industry or vocational rehabilitation.
5. The student financial aid office will notify the student with an aid package starting in early March (or within two to four weeks if the student has not met the stated deadlines for submission of the financial aid application or FAFSA). Upon receiving a financial aid package, the student should review the award and respond to the guidelines stated in the financial aid letter.
6. Students must reapply for financial aid each academic year. Aid usually continues at substantially the same level each year unless the family’s resources or the student’s status change. All enrolled students receiving aid automatically receive information about applying for renewal awards. Others who want to apply for financial assistance should request application forms from the student financial aid office by Feb. 1.

Qualifications for financial aid

Unless otherwise specified, all financial aid requires full-time enrollment of at least 12 hours each semester. Students receiving Federal Pell grants or VA benefits may receive reduced amounts if enrolled in six to 11 hours. Accounts from previous enrollment must be paid in full to retain the assistance.

In accepting a scholarship, grant, loan or discount, a recipient agrees to maintain satisfactory support of the ideals and standards of Goshen College and to maintain satisfactory academic progress.

Any financial aid held by a student who withdraws either voluntarily or by request will be adjusted according to federal and institutional refund policies. Any loan or open account will become due and payable.

Financial aid and satisfactory academic progress

Financial aid recipients must show sufficient academic progress toward completion of degree objectives within a reasonable time period. The time period is normally defined as five years of full-time enrollment with exceptions granted for remedial work or other unusual circumstances. Failure to make normal progress will cause ineligibility in federal, state and institutional programs. The Appeals Committee hears appeals from those failing to meet minimum satisfactory academic progress. To continue receiving financial aid a student must have at least:

a. 1.50 grade point average while earning between 12 and 29 credit hours.

b. 2.00 grade point average after earning 30 or more credit hours.

c. Additionally, each full-time student must complete 24 hours in each academic year.

In no case may a student receive federal financial assistance after having attempted 150 percent of the published length of program for a full-time student, i.e., a maximum of 180 credit hours for programs that require 120 hours for completion.

A full statement of the policy is found in the academic policies section of this catalog.

Financial aid for international students

Grants are available to qualified international students.

International tuition grants: These grants cover part of the cost of tuition. The maximum grant is 66 percent of tuition. The actual percentage depends on the financial need of the student. International students may apply for aid as a part of the admission process. To be considered, a completed application along with all supporting transcripts and test scores must be submitted along with a financial declaration.

Other financial support

The expenses of the college are met only partially by student payments. The balance is provided by current gifts and by income from endowment funds. The college depends upon gifts from the Mennonite Church, alumni, business and industry, foundations and interested friends to meet college expenses not covered by student payments.
Expenses

A school year at Goshen College includes fall semester, spring semester and May term. Financial aid is based on the costs for a complete academic year, with an additional allowance for books, clothing, recreation, incidentals and transportation. Aid funds are disbursed at the beginning of the fall and spring semesters soon after students complete final registration.

Fall or spring SST......................... $14,150
Summer SST (attended full time both fall and spring) ........... $11,350
Summer SST (attended full time fall or spring) .................. $12,750
Summer SST (did not attend full time fall or spring) ............ $14,150

There will be an extra cost for China, Cambodia, East Africa, Senegal and Peru SST units.

1 No additional cost for May term for students who are registered full-time, living on-campus and with a meal plan at Goshen College in both fall and spring semesters. All others, including Brethren College Abroad students and those in off-campus courses through other agencies, pay the charges listed below for May term. Additional costs for May term meals may apply if student was not in full board both fall and spring.

2 Single-room charges are $500 additional per semester.
    Kratz, Miller, Yoder residence halls – $1,675/semester
    Kulp junior/senior floors – $1,800/semester
    All small group housing – $2,075/semester
    Individual apartment complex units – $2,275/semester

3 Other meal plan options – to be announced

Add the following estimates to the above fixed costs: books and supplies – $800; personal expenses (i.e., health insurance, recreation, laundry, pocket money, etc.) – $1,100; transportation – variable.

Full-and part-time:
Independent study, per credit hour (tutoring) .................... 850

Independent study, per credit hour (readings) .................... 525
Summer session: .................................................. 1,500

Finance charges

Interest of 12 percent annually (1 percent per month) will be levied against charges unpaid 30 days after statements are issued. Delinquent accounts may be sent to a collection agency. The student is responsible for all collection costs.

Refund policy

The following tuition refund procedures apply to students who withdraw or are dismissed from the institution, change status from full time to part time or reduce hours as a part-time student. Room and board refund rates apply to students who withdraw, are dismissed or change from resident to commuter status.

Refund procedures. Official withdrawal. Students who withdraw completely from the college should initiate the process by contacting the registrar’s office. Official contacts must also be made with the academic adviser, resident director (if living on-campus), accounting office and financial aid office. Students with changes in housing or food-service contracts must contact the student life office. To receive credit for the unused board contract, the student’s ID and any unused room money must be returned to the dining hall, and the student life office must be informed.

Reducing from full time to part time. Students who drop courses, reducing their status from full time to part time, must contact the registrar and financial aid offices.

Unofficial withdrawal. The registrar’s office establishes the last date of attendance for students who stop attending classes without following withdrawal procedures by contacting teachers, the student’s adviser and residence life personnel. Information obtained from these persons will be used to document the last date of attendance.

From the day of registration through the first week of classes (drop/add period), the student will receive a 100 percent refund on tuition. The refund percentage for the rest of the semester follows the federal regulations for refunding financial aid. From the eighth day of the semester, the refund percentage is calculated by counting the number of days left in the semester, divided by the total number of days in the semester. As in the federal formula, weekends and breaks are also counted except for scheduled breaks of at least five consecutive days. There is no refund after the last day to withdraw with a “W” which is when 60 percent of the semester is completed. A day-by-day refund schedule is posted in the accounting office and at http://www.goshen.edu/financialaid/cf_refundpolicy.php

Room and board refund rates, following day 1, are prorated daily until the last date to withdraw with a “W.” No refunds are given after the “W” date.

Refund rates for students enrolled in the May term only are the same as those listed above, but the 100-percent refund rate applies only to days one and two (drop/add period).

A student financial aid recipient will have earned aid according to the formula listed above. Exceptions are during the 100 percent refund period, where no aid is earned since no costs are incurred. The full formula for determining the amount of Title IV federal aid that is earned, and how unearned portions are returned to the federal programs is outlined in CFR 668.22. Institutional aid earned is calculated according to the same procedures, with the exception that any credit left on the student’s account after the refund listed above will first pay back any current year loan owed to Goshen College.
Withdrawal and refund policy for reservists called to active duty

Any student called to active duty in the military may withdraw from courses up until the last day of the semester. If the withdrawal comes during the first nine weeks of the semester, normal withdrawal and refund policies take effect. If departure comes after the ninth week, the student has the option of withdrawal (W) or incomplete (I). Options should be discussed with and approved by the course instructor(s). If course withdrawal (W) is pursued, tuition and fees will be refunded on a prorata basis. The official date of withdrawal will be used to calculate the refund. Students receiving financial aid will be subject to refund policies as provided for by the agencies sponsoring the aid. Reservists called to active duty who wish to withdraw from courses must provide the registrar with a copy of their orders.

Other charges are made for special fees as follows:

- Applied music surcharge (students enrolled for six or more hours) ... $270
- Applied music surcharge (students enrolled in less than six hours) ... 380
- Applied drama surcharge ................................................. 135
- Audit fee, per hour ............................................................ 165
- Credit by examination per hour ........................................ 135
- Credit for experience per hour ......................................... 155
- Credit through Voluntary Service per hour ........................ 135
- Early enrollment tuition, per credit hour ............................ 275
- Examination out of schedule ............................................ 30
- Late arrival for check-in ................................................. 50
- Late payment (payment received after due date) .................. 50
- Special payment arrangement (arrangements other than the standard payment plans) ........................................ 75
- Yearbook ................................................................. 35
- Transcripts of credit (after first) .......................................... 4
- Transcripts (Transcripts are released only after all accounts are paid in full) ........................................ 5

GC Student Health and Accident Insurance Program
- Single student per year .................................................. 602
- Major medical ............................................................... 157
- Spouse per year ............................................................ 1,150
- Each dependent child per year ......................................... 971

Standard payment plans

Final payment due dates

- Fall term: Aug. 10, 2007
- Spring term: Dec. 21, 2007
- May term: April 30, 2008 (first day of classes)
- Summer term: May 27, 2008 (first day of classes)

Plan #1 Payment in full. Any payment not received by the due date is subject to the $50 late payment penalty. For more information on payment methods, including online payments, visit www.goshen.edu/accounting.

Plan #2 Monthly payment plan. Contracts may be arranged with our outside agency for a low-cost monthly payment program to extend throughout the year. The cost of the plan is $45. There are no interest charges. Contact the accounting office for information, or visit www.goshen.edu/accounting for information.

To avoid a $50 late payment fee, enroll in one of the payment plans by the final payment date. Students may not go through final check-in until payment requirements are met under one of these plans.

Tuition, fees, expenses and payment due dates can be found on links from the accounting office Web page (www.goshen.edu/accounting). This information along with the financial aid information received in the financial aid award letter can be used to determine payment requirements. Student account information, including estimated billings, can be found on GC Online. Please use this information to plan adequately and meet payment requirements for the 2007-08 year.

Note: Delinquent accounts may be referred to a collection agency at any time after the account is 120 days past due. Collection costs on referred accounts are the responsibility of the student and are added to the balance due.

B.S., University of Arkansas-Little Rock, 1997; M.S., 1999, Ph.D., 2003, University of Arkansas-Fayetteville. GC, 2003-.  

Rafael Falcón, Ph.D.  
Professor of Spanish  
B.A., Universidad Interamericana de Puerto Rico, 1968; graduate studies at Universidad de Puerto Rico, 1972-73; M.A., 1977, Ph.D., 1981, University of Iowa. GC, 1979-.  

Kevin Gary, Ph.D.  
Assistant Professor of Secondary Education  

Delmar G. Good, Ph.D.  
Professor of Economics  

Keith A. Graber Miller, Ph.D.  
Professor of Bible, Religion and Philosophy  

John Graulcy, Ed.D.  
Associate Professor of Music  

Stanley N. Grove, Ph.D.  
Professor of Biology  
B.A., Goshen College, 1965; Ph.D., Purdue University, 1971. GC, 1975-.  

James Robert Heiks, M.M.E.  
Associate Professor of Music  
B.A., Bluffton College, 1972; M.M.E., Northwestern University, 1973. GC, 2004-.  

Mervin R. Helmuth, M.N.  
Associate Professor of Nursing  
Diploma in Nursing, Parkview-Methodist School of Nursing, Fort Wayne, 1966; B.S., Goshen College, 1969; M.N., University of Florida, 1970; graduate study, Western Michigan University. GC, 1970-.  

Carl S. Helrich, Jr., Ph.D.  
Professor of Physics  
B.S., Case Institute of Technology, 1963; Ph.D., Northwestern University, 1969. GC, 1985-.  

Valerie J. Hershberger, M.S.  
Associate Professor of Physical Education and Intramurals Coordinator  
B.S., Eastern Mennonite College, 1984; M.S., James Madison University, 1996. GC, 1996-.  

Matthew Hill, D.M.A.  
Associate Professor of Music  
B.M., Southwest Missouri State University, 1987; M.M., University of Kansas, 1989; D.M.A., University of Wisconsin-Madison, 1995. GC, 2000-.  

Joyce Bedsworth Hoffman, M.A., M.H.S.  
Associate Professor of Nursing  
B.S.N., Goshen College, 1972; M.A., University of Iowa, 1979; M.H.S., Wichita State University, 1988. GC, 2005-.  

Dawn M. Hoover, M.S.  
Assistant Professor of Nursing  
B.S.N., Goshen College, 1995; M.S., Indiana Wesleyan University, 2001. Post-master certificates, Adult and Geriatric Nurse Practitioner; Board-certified Adult Nurse Practitioner. GC, 2005-.  

Michelle E. Horning, C.P.A., M.S.  
Associate Professor of Accounting  
B.S.N., Goshen College, 1991; M.S., Drexel University, 1995. GC, 1998-.  

Ann E. Hostetler, Ph.D.  
Professor of English  
David Housman, Ph.D.
Professor of Mathematics and Computer Science

Dean Johnson, M.A.
Assistant Professor of Peace, Justice and Conflict Studies
B.S., Manchester College, 1996; M.A., Bethany Theological Seminary, 2000; Ph.D. candidate, Iliff School of Theology and University of Denver, GC, 2002-.

Ronald A. Johnson, M.A.
Associate Professor of Communication

Duane R. Kauffmann, Ph.D.
Professor of Psychology (part-time)

Paul A. Keim, Ph.D.
Professor of Bible, Religion and Philosophy

Melissa Kinsey, M.P.A.
Director of Entrepreneurship Learning Center, Director of Family Business Program, and Assistant Professor of Business
B.A., University of Kentucky, 1991; M.P.A., Indiana University at South Bend, 2004. GC, 2004-.

Director of Nursing and Associate Professor of Nursing
R.N., Mennonite Hospital School of Nursing, 1970; B.S.N., Goshen College, 1973; M.A., Ball State University, 1983. GC, 1998-.

Victor R. Koop, Ph.D.
Professor of Psychology
B.A., Tabor College, 1966; M.A.Sc., University of Waterloo, Ontario, 1969; Ph.D., University of Toronto, 1975. GC, 1982-.

Merrill O. Krabill, M.F.A.
Professor of Art
B.A., Goshen College, 1979; M.F.A., Claremont Graduate School, 1986. GC, 2001-.

Beverly K. Lapp, M.M.
Associate Professor of Music

Jewel Ilene Lehman, Ed.D.
Associate Professor of Physical Education

Jeanne M. Liechty, M.S.W., Ph.D.
Associate Professor of Social Work
B.A., Goshen College, 1992; M.S.W., Smith College, 1994; Ph.D., Simmons College, 2005. GC, 1998-.

Joseph C. Liechty, Ph.D.
Associate Professor of Peace, Justice and Conflict Studies
B.A., Goshen College, 1978; Ph.D., National University of Ireland, 1987. GC, 2003-.

David Hilty Lind, M.S.
Assistant Professor of Sociology
B.A., Goshen College, 1997; M.S., 2001, Ph.D. candidate, University of Missouri-Columbia, GC, 2007-.

Nancy Liechty Loewen, M.S.
Associate Professor of Nursing
B.S.N., Goshen College, 1974; Certificate, Nurse-Midwifery Education Program, School of Nursing, Washington, D.C., 1979; M.S., Georgetown University, 1988. GC, 2005-.

Margie A. Mast, Ph.D.
Associate Professor of Education
B.A., Goshen College, 1987; M.Ed., Our Lady of the Lake University, 1993; Ph.D., University of Texas at Austin, 2002. GC, 2001-.

Patricia L. McFarlane, M.A.
Associate Professor of Communication
B.A., Eastern Mennonite College, 1974; M.A., Georgetown University, 1976; additional graduate study, Calvin College, 1996. GC, 1994-.

Robert Meyer-Lee, Ph.D.
Assistant Professor of English

Kathryn Meyer Reimer, Ph.D.
Professor of Education

James S. Miller, Ph.D.
Professor of Biology
B.S., Bluffton College, 1975; Ph.D., Ohio State University, 1980. GC, 1980-.

Michelle Milne, M.F.A.
Assistant Professor of Theater (part-time)
B.A., Goshen College, 1994; M.F.A., Towson University, 2005. GC, 2005-.

Ronald J. Milne, Ph.D.
Professor of Mathematics
B.A., Goshen College, 1967; M.A., Michigan State University, 1972; Ph.D., Indiana University, 1976. GC, 1976-.

Steven M. Nolt, Ph.D.
Associate Professor of History

Patricia A. Oakley, Ph.D.
Professor of Mathematics and Computer Science
B.S., Wheaton College, 1981; M.S., 1984, Ph.D., 1989, Northwestern University, GC, 1998-.
Gwendolyn Penner, M.A.
Assistant Professor of Art and Gallery Director
B.A., University of Waterloo, Ontario, 1979; graduate work at Ball State University, Kent State University; M.A., Syracuse University, 2000. GC, 1994.-

Julie C. Reese, Ph.D.
Associate Professor of Psychology

E. Dean Rhodes, M.A.
Associate Professor of Spanish
B.A., University of Iowa, 1975; M.A., Coe College, 1996. GC, 2001.-

Jerrell Ross Richer, Ph.D.
Associate Professor of Economics

John D. Roth, Ph.D.
Professor of History, Director of Mennonite Historical Library and Editor of Mennonite Quarterly Review

Russ J. Rupp, C.P.A., M.B.A.
Professor of Accounting

Phil Rush, M.S.M.
Associate Professor of Business Information Systems

Jody D. Saylor, M.S.
Assistant Professor of Biology
B.S., Hanover College; M.S., Purdue University Calumet, 1996; Ph.D. program, The University of Notre Dame, 1996-97. GC, 2002.-

Douglas M. Schirch, Ph.D.
Associate Professor of Chemistry
B.A., Goshen College, 1982; Ph.D., Michigan State University, 1987. GC, 2004.-

Kyle Schlabach, M.A.
Assistant Professor of English (part-time)

Carolyn Schroock-Shenk, M.S.
Associate Professor of Peace, Justice and Conflict Studies
B.S., Eastern Mennonite College, 1980; M.S., University of Virginia, 1983. GC, 2000.-

Christine L. Seitz, M.M.
Assistant Professor of Music and Staff Accompanist

Regina Shands Stoltzfus, M.A.
Assistant Professor of Peace, Justice and Conflict Studies

Jan Bender Shetler, Ph.D.
Associate Professor of History

Daniel A. Smith, Ph.D.
Professor of Chemistry
B.S., Elizabethtown College, 1986; M.S., Bucknell University, 1988; Ph.D., Iowa State University, 1992. GC, 1994.-

Solomia Soroka, D.M.A.
Assistant Professor of Music

Brenda S. Srof, Ph.D.
Professor of Nursing
B.S.N., Goshen College, 1982; M.S.N., Oral Roberts University, 1986; Ph.D., Loyola University, 2004. GC, 1988.-

Barbara Y. Stahly, M.A.
Assistant Professor of Education and Laboratory Kindergarten Director/Teacher

Matthias C. Stegmann, M.M.
Instructor of Music (part time) and Music Center Recording Specialist
B.M., Musikhochschule Köln, 1986; graduate study, Ohio University, 1986-89; M.M., University of Cincinnati-College Conservatory of Music, 1993. GC, 1994.-

Duane C. S. Stoltzfus, Ph.D.
Associate Professor of Communication

Chris Thögersen, M.M.
Assistant Professor of Music (part-time)

Alan L. Weldy, J.D., M.B.A.
Associate Professor of Business

Judy M. Wenig-Horswell, M.F.A.
Associate Professor of Art

Gail L. Weybright, M.S.N.
Associate Professor of Nursing
R.N., Parkview School of Nursing, 1981; B.S.N., Goshen College, 1995; M.S.N., Valparaiso University, 1999. GC, 1996.-
Steve Wiktorowski, M.S.
Women’s Basketball Coach and Assistant Professor of Physical Education
B.S., Indiana University, 1980; M.S., Indiana University, 1990. GC, 2002-.

Myron Yoder, M.A.
Associate Professor of American Sign Language
B.A., Madonna University, 1982; M.A., Indiana University, 1984. GC, 1987-93, 2000-.

Sheila Yoder, M.S.W.
Assistant Professor of American Sign Language and Coordinator of Church Relations
B.A., Goshen College, 1980; M.S.W., Indiana University, 1984. GC, 2004-.

Tim Yoder, M.B.A.
Associate Professor of Business Information Systems

Goshen College administrative faculty
Richard R. Aguirre, B.A.
Director of Public Relations
B.A., California State University-Fresno, 1980. GC, 2006-.

Kristyn C. Bakel, M.A.
Admission Counselor

Facts and figures

Accreditation
Goshen College is accredited by the Higher Learning Commission and is a member of the North Central Association. [http://www.ncahigherlearningcommission.org/, (312) 263-0456, (800) 621-7440]. Goshen is classified as a Baccalaureate College – Liberal Arts by the Carnegie Foundation.

The college is authorized by the Indiana Division of Professional Standards Board and accredited by the National Council for Accreditation of Teacher Education for the preparation of elementary and secondary school teachers. The division of nursing is approved by the Indiana State Board of Nurses Registration and Nursing Education and also by the Commission on Collegiate Nursing Education [One Dupont Circle, NW, Suite 530, Washington, DC 20036-1120, (202) 887-6791]. The social work program is accredited by the Council of Social Work Education [1725 Duke Street, Suite 500, Alexandria, DC 22314, (703) 683-8080]. Alumnae of Goshen College are admitted to membership in the American Association of University Women.

Goshen College is registered with the Regents of the University of the State of New York.

Equal opportunity
Goshen College does not discriminate on the basis of sex, race, color, handicap or national origin in its employment policies, educational policies, administration policies, scholarship and loan programs and athletic and other school administered programs; and does not deny to any student on the basis of sex, race, color, handicap or national origin any right, privilege, program or activity generally accorded or made available to students in Goshen College.

Grievance policy
The grievance procedure at Goshen College is a process by which nonacademic differences between students and employees of Goshen College (and employees of Goshen College and their supervisors or managers) can be resolved. Grievable issues are defined in the policy. The first step is an informal process, attempting to resolve differences through discussion. If this is not successful, the second step, a formal, written grievance procedure is initiated. Information about the grievance policy and assistance with understanding the procedures is available from the human resources director and affirmative action officer.

Goshen College graduation rates
The Student Right-to-Know Act, PL 101-542, requires that institutions publish graduation rates. The rates are based on new freshmen entering an institution as first-time, full-time, degree-seeking students and graduation within 1.5 times the normal time for their program (six years). The graduation rate for those entering Goshen College in the fall of 2000 and graduating within six years was 61 percent. The five-year average rate of first-time freshmen returning to Goshen College for the second year of study is 80 percent.
