

GLST 271, Community Engaged Learning

Global Health with MCC

Course Description

This virtual practicum is a partnership with Mennonite Central Committee (MCC) that gives students a foundation in global public health theory, practice, and current debates. The course includes hands-on skills in project evaluation working directly with MCC's public health partners in communities around the world. Students will gain insights into systemic disparities underlying many global health inequities.

Program Overview

- UPCOMING TERMS & TRIP LEADERS**
Spring Semester 2022-23 (every spring): Paul Shetler Fast
Spring Semester 2023-24 (every spring): Laena Maunula

VIRTUAL

What you can expect to see/learn/do...

- Explore case studies in clean water and sanitation, maternal and child health and mental health that connect to project staff in Haiti, Nepal, Zimbabwe, and North America.
- Hands-on experience working with MCC partners around the world on team evaluation projects focused on a pressing global public health issue. Past students worked on clean water, latrines, mental health, and maternal and child health.
- Study with a diverse, global cohort of students from Mennonite Central Committee and Mennonite colleges.
- Learn applied skills in program monitoring and evaluation, quantitative and qualitative research and cross-cultural engagement.
- Focus on social determinants and colonial legacies of health, mental health, criminal justice and community-led disease prevention strategies.
- Benefit from coaching, mentoring and networking for careers in global public health.
